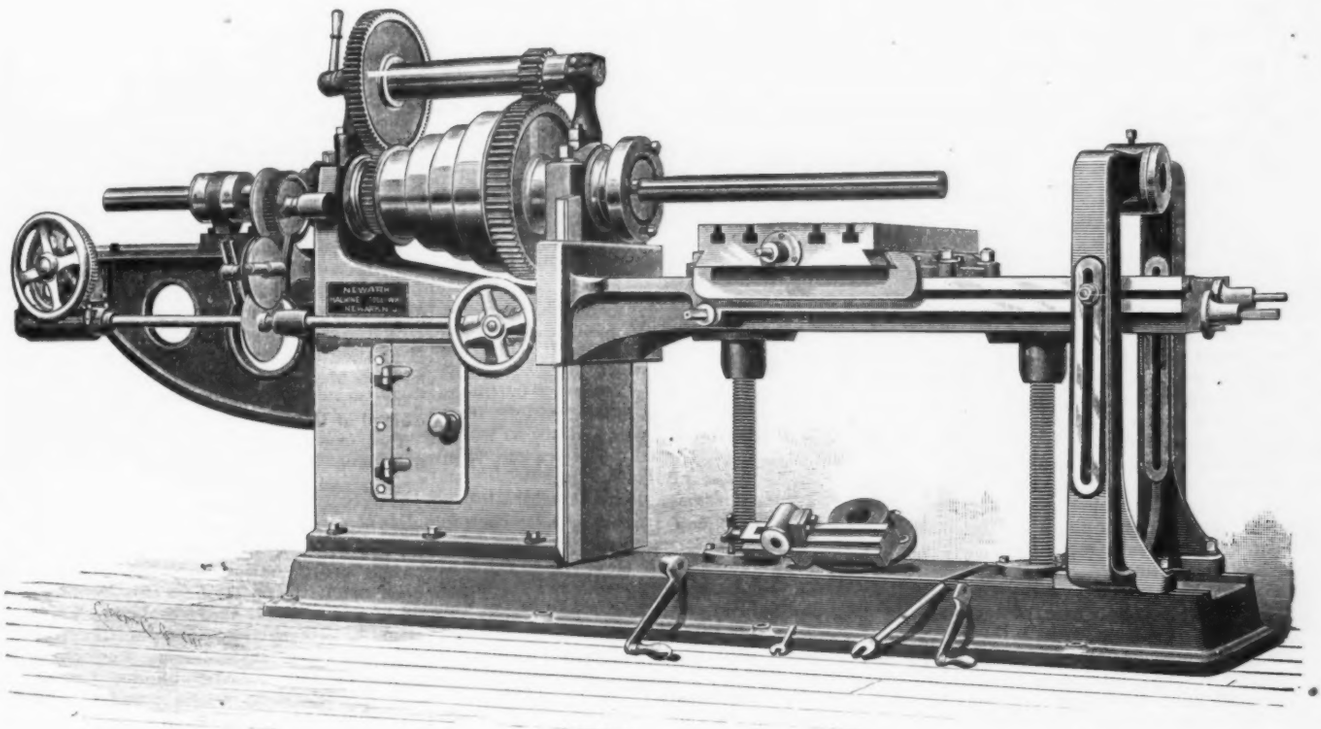
THE IRON AGE

THURSDAY, DECEMBER 25, 1890.



Horizontal Boring and Drilling Machine.

On this page we present an illustration of a horizontal boring and drilling machine, which has been designed with little regard to the existing type, and which has a feed motion which would seem to offer many advantages. It was designed by the Newark Machine Tool Works of Newark, N. J., and although it has been in successful use for some time, it is now illustrated for the first time.

To begin with, the feed arrangements have been put on the opposite side of the machine from where they are usually put, thus bringing the operator into the same position with regard to the cone pulley, and the various hand wheels and levers by which the machine is operated, that he occupies at the lathe, which is believed to be an advantage, since the lathe is the standard machine tool with which all machinists are familiar. This machine is not the only one in which the parts are so arranged, but the usual practice is to place them on the other side, so that the cone pulley and hand wheels come at the right of the operator, instead of the left, as they do on the lathe.

The feed details have, it is believed, been reduced to the simplest possible form, considering the ends attained by them—viz., a great range of feed with any required number of variations, and which can be changed either in rate or direction with the greatest facility. For securing the changes in the rate of feed the Sellers friction disks have been adopted, the materials chosen for their construction, and the method used for regulating the pressure of the central disks upon the upper and lower disks, insuring their satisfactory operation under the heaviest duty. Any rate of feed from $\frac{1}{16}$ to $\frac{1}{4}$ inch is instantly available by the simple movement of a lever. These friction disks drive a worm shaft which extends to the rear of the machine, and is there provided with two worms, one right and the other left hand, these worms being cut upon a sleeve which is fitted to the shaft, and can be moved along to make either of the worms engage with the wheel, which is an ordinary spur gear. Thus the feed may be in either direction at will, and a cutter after passing through a bore can be run back for the finishing cut when desired without disturbing it in the bar. The clamp by which the bar is secured to the feed slide grips it by friction only, instead of having holes through for a pin, and thus it can be gripped at any point, instead of a limited number of points only.

The table can be raised or lowered from the side or end of the machine, as may be most convenient, and the platen has the usual movements in either direction, in addition to which a platen is furnished where desired which can be turned around on the table to any angle. Special pains have been taken to make all the parts of the machine amply heavy for the duty they have to perform, particular attention being given the yoke which supports the outer end of the bar, since weakness of this part of the machine is quite too common, and where it occurs greatly limits the capacity of the machine. It has been customary to grade these machines by the swing—that is, by the distance from the center of the boring bar to the top of the table, but the Newark Machine Tool Works grade their machine by the diameter of the boring bar, which limits the diameter of the hole which the machine can bore and which measures, therefore, the capacity of the machine. The swing, length of table and size of carriage the makers change as required. The machine from which the engraving is made is called the "C" machine, and has a 3-inch bar with a table 5 feet long. It will swing over the platen 3 feet 3 inches, and over the table 4 feet The platen is 30 inches long, 17 inches wide, and has a motion across the bed of 24 inches The machine measures over all 10 feet 9 inches and weighs 7500 pounds. It will bore holes up to 18 inches diameter. Other machines of the same design are built having bars 4, 5 and 6 inches diameter, and with other parts in proportion, the largest machine weighing about 17,000 pounds. The squaring attachment shown is furnished with each machine, and the swing or size of platen or table can be altered to suit special requirements.

HORIZONTAL BORING AND DRILLING MACHINE, BUILT BY THE NEWARK MACHINE TOOL WORKS.

A comparison of the statistics of travel on the East River bridge and the Third avenue horse car line in this city, which is about to introduce cable traction, is instructive in various respects. During the year 1889 the Third avenue line carried 31,458,000 passengers, and the bridge railroad carried 33,954,773. The receipts of the Third avenue line were $1,572,861.07, and of the bridge railroad $931,973.39. The operations of the surface road paid a dividend of 9 per cent. on the capital stock and $223,283.85 interest on the bonds, and left a surplus of $47,496. The operations of the bridge last year, after paying $500,140.58 for real estate, rolling stock and improvements, left a balance on hand of $255,676.32. The pay roll of the bridge amounts to $580,000 a year; that of the surface road to $560,000. The total expenses of the bridge are $1,075,436.71 for the year. The total expenses of the surface road are $1,085,404.32 for the year.

NAVY ORDNANCE.

REPORT OF THE SECRETARY OF THE NAVY.

The following table gives the number of sets of forgings so far ordered, the number of guns completed, and the number of guns now under construction at the Washington Gun Foundry :

Caliber.	Forgings ordered.	Completed guns.	Guns under construction.
4-inch....	35	4	12
5-inch....	4	2	.....
6-inch....	128	77	25
8-inch....	35	15	2
10-inch....	25	4	3
12-inch....	8	.....	.....
13-inch....	12	.....	.....

Of the above guns, the 4-inch and 5-inch may properly be classed as "rapid firing guns," employing fixed ammunition—that is to say, having the cartridge case, charge and projectile combined in one. The 5-inch gun is the largest that present investigation and experience indicate as properly adapted to the quick firing feature. The combined weight of the cartridge case, charge and projectile in this gun is estimated not to exceed 100 pounds, which can be handled without difficulty. Beyond this it is inexpedient to go, as the great weight of the projectile prevents the rapidity of fire which is this gun's essential feature. A specimen of the 4-inch gun has been completed and tried, and has given highly satisfactory results, two types, differing in their breech mechanism, having been manufactured.

The adoption of rapid firing guns of large caliber has made it necessary to develop a plant for the manufacture of suitable cartridge cases, and an agreement has accordingly been made with the Winchester Repeating Arms Company of New Haven, Conn., to supply 15,000 cases, with the option to the Department to order 10,000 more at a reduced price. The company have nearly completed the machinery necessary for making these cases, and their delivery will soon begin.

Passing to the heavy guns, the first is the 6-inch, the length of which has been increased from 30 to 35 calibers. The performance of the new gun is satisfactory, and specimens will soon be made with a still longer bore, a gun 40 calibers in length having been designed for this purpose.

Of the 8-inch guns, six of the new design, 35 calibers in length, have been manufactured, tested, with good results, and issued, and a new 8-inch gun, 40 calibers in length, has been designed, which it is proposed to mount on cruiser No. 12. The great advantage of this gun, as of all long guns, is the flat trajectory of the projectile, due to its high velocity, which makes it possible to use the gun successfully at ordinary battle range without accurate measurement of distance.

Of the 10-inch guns, four that make up the armament of the Miantonomoh are completed, and three of the four for the Maine are in an advanced stage of manufacture.

No 12-inch guns have yet been made, but forgings for one gun have been received from the Bethlehem Iron Company, and the gun factory is ready to proceed with the manufacture of these guns as fast as forgings are delivered.

The design for the 13-inch gun, 35 calibers in length, has been completed, and the tools for its manufacture are in course of construction. Twelve sets of forgings of this size have been ordered from the Bethlehem Iron Company for the batteries of the three new battle ships.

All contracts with private firms for the manufacture of heavy guns have been completed in the course of the past year, and the guns have been proved and issued to the service. No further contracts of this character will be made with private firms, the capacity of the gun foundry at Washington being sufficient to handle forgings as fast as they will be received.

The ordnance work of the past year has included the completion and installation of the armaments of the Baltimore, the Philadelphia, the San Francisco and the Miantonomoh, while those of the Newark and Concord are ready.

The 8-inch guns of the Charleston are also ready, and will replace four of her 6-inch guns on her return. The manufacture of the new armament for the gunnery ship Lancaster has been begun. It is believed that with the increased rapidity of delivery of forgings from the Bethlehem and Midvale companies and the development of the Washington Gun Foundry, batteries can hereafter be furnished to new ships as fast as the latter are completed. The Midvale Company are now engaged in putting up a plant for forgings of large calibers and by the early part of next year will probably be able to do machining up to 10-inch guns, and to cast and forge up to 13-inch. There will, therefore, be two firms in the United States ready to supply any gun forgings that are likely to be needed.

The improvements at the gun foundry during the past year include the erection of the 110-ton overhead traveling crane, the completion of the shrinkage pit, gun carriage shop and office building, the construction of a railway siding from the Baltimore and Potomac Railroad which has greatly facilitated deliveries and shipments, and the purchase of a shifting engine and of several special machine tools.

I desire to call particular attention to the extraordinary reduction in the cost of making guns and carriages which the gun factory has accomplished. The tables given below make a comparison of the average cost of the 6-inch, 8-inch, and 10-inch gun manufacture, first, under the old contracts with private firms; secondly, at the Washington Gun Factory in 1888, and finally, at the same place in 1890, from which it appears, to take a single example, that the 8-inch guns, for manufacturing which the Government, under the old contract, paid $8500 per gun, aside from the cost of forgings, were manufactured by the Washington factory in 1888 for $5163 and in 1890 for $2772.

A similar reduction is to be noticed in the cost of 6-inch carriages, the average of the first ten manufactured being $6556, and the last ten $2824, a reduction chiefly in labor, as the material, though diminished in cost, has not shown a proportionate variation.

The tables are as follows:

Guns.

Caliber.	Average cost of manufacture.			Average time of manufacture in 10-hour days.	
	By contract with private firms.	Washington Gun Factory.		Washington Gun Factory.	
		1888.	1890.	1888.	1890.
6-inch....	$3,400	$2,649	$1,298	115	60
8-inch....	8,500	5,163	2,772	225	120
10-inch...	.....	6,334	3,500	240	164

6-inch Carriages

	Labor.	Material.	Total cost.
Average of—			
First 10 ...	$4,423.10	$2,133.21	$6,556.31
Second 10...	3,027.41	1,283.32	4,310.73
Third 10....	2,250.74	1,191.35	3,442.09
Fourth 10...	1,968.05	1,344.67	3,312.72
Fifth 10.....	1,708.00	1,116.00	2,824.00

The act approved June 30, 1890, appropriated, for the purpose of enabling the Secretary of the Navy to manufacture and experimentally test, under rules and conditions to be prescribed by him, a submarine gun and projectiles for the same, $30,000: Provided, that no part of this money shall be expended until the owners of the patents to be tested under this provision shall agree by contract to give the Government the option, within a specified time, to contract, at such price as shall be satisfactory to the Secretary of the Navy, for the exclusive right on the part of the Government to manufacture, by contract or otherwise, such submarine guns and projectiles without the payment of any royalty on the same: Provided, that such submarine gun and projectiles shall prove satisfactory, on due test, and be approved by the Secretary of the Navy.

In pursuance of this act, the Navy Department, under date of September 19, 1890, entered into contract with the Ericsson Coast Defense Company for one submarine gun and six steel projectiles, the gun and projectiles to be fixed and secured in position on board the steam vessel known as the Destroyer.

It is proposed to make a thorough test of this system of submarine artillery, which possesses undeniable advantages, if applied to special types of vessels, such as the ram designed for work at close quarters. The experiments will be conducted at the torpedo station at Newport.

Cast iron common shell and shrapnel have been manufactured at Washington and supplied to the new ships as fast as needed. The manufacture of cast steel common shell has been discontinued for the present, the results obtained not having proved satisfactory. Efforts have been made to develop in this country a process of making common shell of forged steel, as this shell possesses marked advantages, and it is hoped that before long specimens may be obtained for test, and that the manufacture may be domesticated in the United States.

The specimens of armor piercing projectiles hitherto received from private firms in this country, tempered by various processes, have not proved satisfactory, and the only present prospect of securing what we need is by the adoption of some one of the processes in use abroad. A contract has been made for a quantity of projectiles to be manufactured in America by one of these processes, and the Department is still endeavoring to bring about some arrangement by which it may obtain other armor piercing shells of the best quality of American manufacture.

The great number of inventions, possessing more or less merit, in the way of light rapid firing guns, has multiplied the number of types in use in all the navies of the world. The manifest disadvantage of this extreme diversity of types, each with its special ammunition, on board a single ship, has led the Department to look with favor upon a plan to limit the smaller rapid firing pieces to the 6-pounder and 1-pounder calibers, and to abandon as fast as is practicable the 3-pounders and the 47 mm. and 37 mm. revolving cannon.

The Driggs Ordnance Company have begun work on the ten 6-pounder and ten 3-pounder guns and ammunition ordered last year.

The Hotchkiss Ordnance Company have filled their original contratct with the De-

partment for 94 Hotchkiss guns and ammunition, with the exception of steel shell for the 6-pounder and 3-pounder, in the manufacture of which, of the proper quality, considerable difficulty has been experienced. Deliveries have also been made under later order.

TORPEDOES.

This country has been thus far absolutely without a successful automobile torpedo. This fact has been referred to more or less from time to time, in reports and papers, for several years past, but it does not seem to have received the attention which its gravity demanded. Vague hopes and expectations that something would turn up gradually fixed themselves upon the Howell torpedo as the probable solution of the problem, although it was still in an experimental state. Finally, on January 5, 1889, a contract was made with the Hotchkiss Ordnance Company, the manufacturers of this weapon, for 30 torpedoes, of which 10 were to be delivered by June 1, 1890, and all by September 1 of the same year. This contract has not yet been filled, owing to the loss of two torpedoes at preliminary trials and the failure of the company thus far to produce a weapon that fulfills the requirements of the contract. An extension of the contract time has been granted, and the manufacturers hold out expectations that they will be ready for another trial and for making deliveries by the 1st of January, 1891.

Notwithstanding these expectations, the necessity of possessing a practical torpedo was so great, and the question whether the Hotchkiss Ordnance Company would be able to produce one answering the requirements of the contract so doubtful, that the Department would have fallen short of its duty had it not made an effort to meet, in some other way, the necessities of the situation. Negotiations have therefore been undertaken with the Whitehead Torpedo Company with a view to domesticating the manufacture of their torpedo, the most successful yet produced in the world. Favorable terms have been made, and an order will shortly be placed with an American firm for a number of Whitehead torpedoes. If the Hotchkiss Company shall finally succeed in producing a torpedo to answer the necessary conditions, the two designs will be subjected to competitive tests, with a view to ascertaining the expediency of definitely adopting one or both of them for service use. In the meantime the bureau is continuing its investigations with other designs.

Of torpedoes other than the automobile, one, of the Patrick design, a torpedo electrically directed from the shore, has undergone a successful test. Two others remain to be supplied to complete the three ordered February 26, 1889. It is proposed to use these torpedoes for purposes of instruction in connection with the Naval War College.

Enormous Horse-Power.—It is a very easy matter to talk about 18,000 or 20,000 horse-power, but few persons realize what it means or the enormous force that it exerts. The new White Star steamships, for instance, or the Inman Line's City of New York develop from 18,000 to 20,000 horse-power. They have 12 boilers and 72 furnaces, worked with forced draft. Assuming that the engines will require 18 pounds of steam per horse per hour, then 160 tons of feed water must be pumped into the boilers every hour and 160 tons of steam will pass through the engines in the same time. In 24 hours the feed water will amount to 3840 tons, occupying 138,240 cubic feet. This amount of water would fill a length of 493 feet of a canal 40 feet wide and 7 feet deep. Taking the condensing water at 30 times the feed water it will amount to 4800 tons per hour, or 115,200 tons in 24 hours, or for a six-day transatlantic run not less than 691,200 tons, or 24,883,000 cubic feet. This amount of water would fill a cubical tank 295 feet on the side—a tank into which the Roman Catholic Cathedral, steeples and all, or the *Times* building could be put and completely covered up. The coal consumption is not less interesting. Four hundred tons a day are burned on the 20,000 horse-power pressure. This would fill 400 wagons. It requires for its combustion 8609 tons of air, occupying a space of 222,336,000 cubic feet. It is impossible to put these figures in a shape such that they may be grasped by the average reader, but enough has been cited to show, nevertheless, that the circulating pumps and fan engines of such ships are a hard-working lot.

The Joliet Steel Works Club.

On Saturday, 20th inst., occurred the first anniversary of the opening of the club house of the workmen connected with the Joliet Works of the Illinois Steel Company. It was celebrated by appropriate exercises, held in the auditorium of the club house in the afternoon. A special train was run from Chicago via the Rock Island road, conveying the officers of the company and a number of invited guests to attend the exercises. Many of the latter had never seen the club house, and after they arrived there some time was allowed for an inspection of its features. The workmen of the company were found scattered through the building, taking advantage of its opportunities for physical and mental exercise and amusements. These features of the club house have been set forth on previous occasions in our columns. At 4.30 the exercises began in the auditorium. The club orchestra opened the programme with an overture, which was well rendered on brass and stringed instruments. S. Fewtrell, chairman of the club, who presided, then made an opening address, marked with strong common sense.

W. Crane, superintendent of the club, then read the first annual report, presenting statistics of membership, giving full accounts of the results obtained in the various classes, and in every respect highly commending the members of the club for the interest taken in it and for the most excellent care taken of the property. The club has had on its list during the year 1350 names, but owing to removals and other causes, unnecessary to enumerate, there are now 854 active members. The club has been proved to be a thorough success in every respect and the officers of the company are well satisfied with the showing for the first year. A paper has just been started, called the *Steel Worker*, the first number of which has appeared and which is expected to be an interesting feature of the club work. Mr. Crane made a strong plea for the maintenance of interest in the club by the workmen.

The Philomela Ladies' Quartette rendered some charming vocal music, after which an address on behalf of the trustees was delivered by W. R. Stirling, first vice-president of the Illinois Steel Company. Mr. Stirling having been the originator of the club, his appearance on the platform was the signal for an outburst of hearty applause from the assembled steel workers. His first sentences showed the interest he took in the people of Joliet, as he dwelt upon the calamity which had befallen a number of the company's workmen, who had been killed or seriously injured by the collapse of a blast furnace. The people of Joliet were assured of the company's earnest sympathy with them in their deep bereavement. Mr. Stirling then proceeded to make an earnest appeal to the workmen present to endeavor in every way to improve their minds, and to apply themselves diligently to make the most of their opportunities. He referred to the examples set them by men whom they knew who were born without being specially favored by fortune, but had earned advancement through the deligent use of the opportunities given them, which were in every case not to be compared with the advantages now possessed by themselves. Mr. Stirling's address was an eloquent appeal to the judgment and reason of the men, and his earnestness excited their enthusiasm.

After vocal music by the quartette, an address on patriotism was delivered by Harlow W. Higinbotham of Chicago, but a native of Joliet, born there when the Indians still inhabited the surrounding country, and the boundary line between civilization and barbarism was sharply defined in that locality, now the site of a large manufacturing city. Mr. Higinbotham's address was a stirring appeal for the cultivation of patriotic sentiments, and was well received by the audience. An address was then made on behalf of the club members, by H. W. Spencer, who portrayed in eloquent terms the pleasant rolations existing between the Illinois Steel Company and their Joliet workmen. The exercises closed with the singing of the National Anthem by the entire audience.

Nickel Steel.

An interesting question has been raised in regard to the priority of invention of nickel steel. In a letter to *L'Ancra*, of Saint-Dizier, Charles Walrand, a well know French metallurgist, refers to experiments carried on at the Forges de Montataire, in rolling ferro-nickel with varying proportions of the latter metal. The idea of those who undertook these experiments was to ascertain whether ferro-nickel could not be made to replace copper and white allows in their application because of the property of ferro-nickel of not being subject to oxidizing influences. At Walrand's instigation a certain number of physical and chemical tests were made of the specimens rolled, among them some possessing extraordinary qualities. The alloy used as a base varied in composition as follows:

	Per cent.
Carbon	0.15 to 0.05
Phosphorus	0.02 to 0.05
Sulphur	Trace.
Manganese	0.50 to 0.04
Nickel	25
Iron	74

Mechanical tests gave the following results:

1. On 15 mm. rounds, turned to 12 mm. diameter, a 200 mm. specimen, before annealing, tensile strength, 89 kg.; elongation, 19 per cent.; after annealing, tensile strength, 81 kg., and elongation, 29.5 per cent. Flats, 56 x 6 mm., tooled to 17 x 6, before annealing, tensile strength, 80.5 kg.; elongation, 40 per cent.; after annealing, tensile strength, 73.6 kg.; elongation, 33 per cent.

3. 26 mm. rounds, turned to 12 mm. diameter, without annealing, tensile strength, 87.9 kg.; elongation, 43.5 per cent. Rounds, 12 mm. of the diameter tested without tooling, without annealing, tensile strength, 69.2 and 72 kg., and elongation, 37 and 40 per cent., respectively.

The results of these tests led to negotiations with the Societe le Ferro-Nickel, who were owners of the patents and the Creusot, with the idea of applying the ferro-nickel to special work.

Cold Saw Cutting Off Machines.

There have been many experiments made in cutting metals by means of the large milling cutter or saw. The sawing of thin or light material, such as slotting the heads of screws and other light work, has always been done successfully. Beyond that little has been done in this country, although for many years saws of this description have been used in foreign countries. For some time the Newton Machine Tool Works of Philadelphia have been engaged in the design and construction of cold saw cutting off machines, and now have six sizes of standard machines and a number of special sizes.

Fig. 1 represents the No. 2 machine, which is of the same general design as the standard machines. The work is placed upon the table, which can be adjusted to bring the work in proper position for the saw to cut. The clamping apparatus can be drawn open on one side, the work laid on the table, when the clamp is swung back into place and clamped. The saw is a hollow ground milling cutter clamped to the end of the spindle and running in a bath which cools and lubricates it. The periphery of the saw always travels at the same speed. The automatic feed can be varied, according to the work to be done, from ⅛ inch to 2 inches per minute on all the machines. This is accomplished by means of a friction roller and plate. The pressure of the plate against the friction roller is automatically regulated according to the amount of power required to do the work. The thrust of the worm which drives the feed screw is taken up by the plate passing against the roller, and the heavier the cut the closer the plate will press against the roller. The feeding speed is regulated by moving the roller toward or from the center of the plate.

Fig. 2 shows a machine designed for cutting ship plates for shipbuilders, safe manufacturers and others. It will cut up to 4½ inches in hight and 8 feet long.

The armor plate machine shown in Fig. 3 is constructed upon the same general principles as the others, but is made

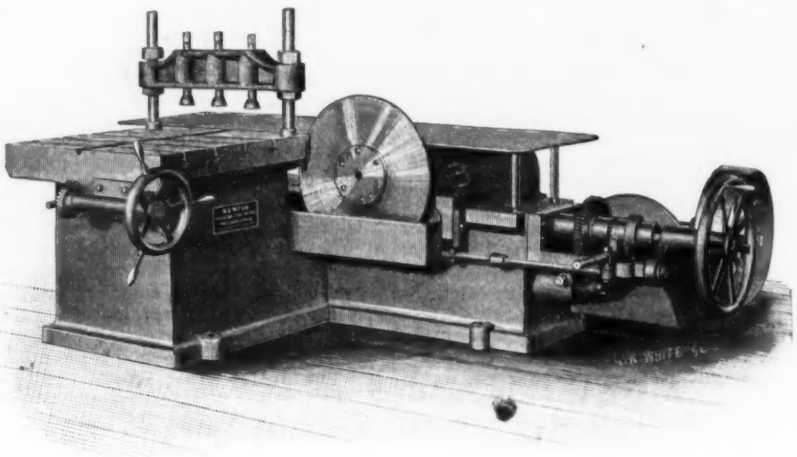


Fig. 1.—Standard Cold Saw Cutting Off Machine.

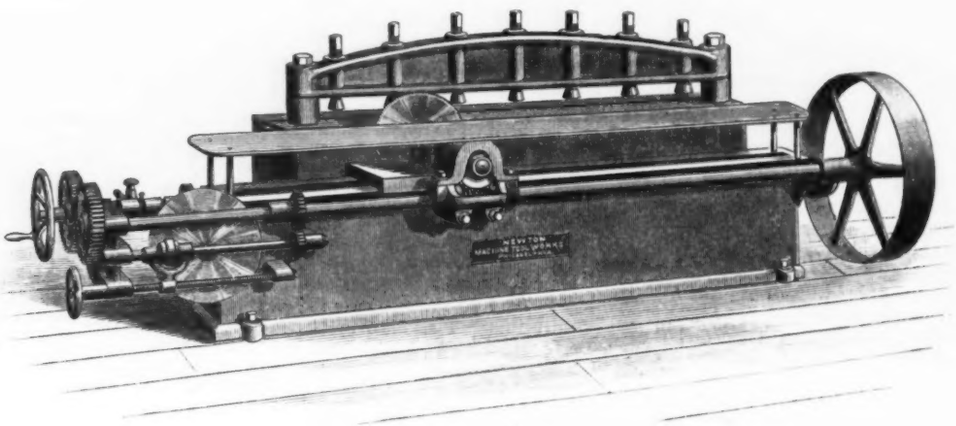

Fig. 2.—Cold Saw Plate Cutting Off Machine.

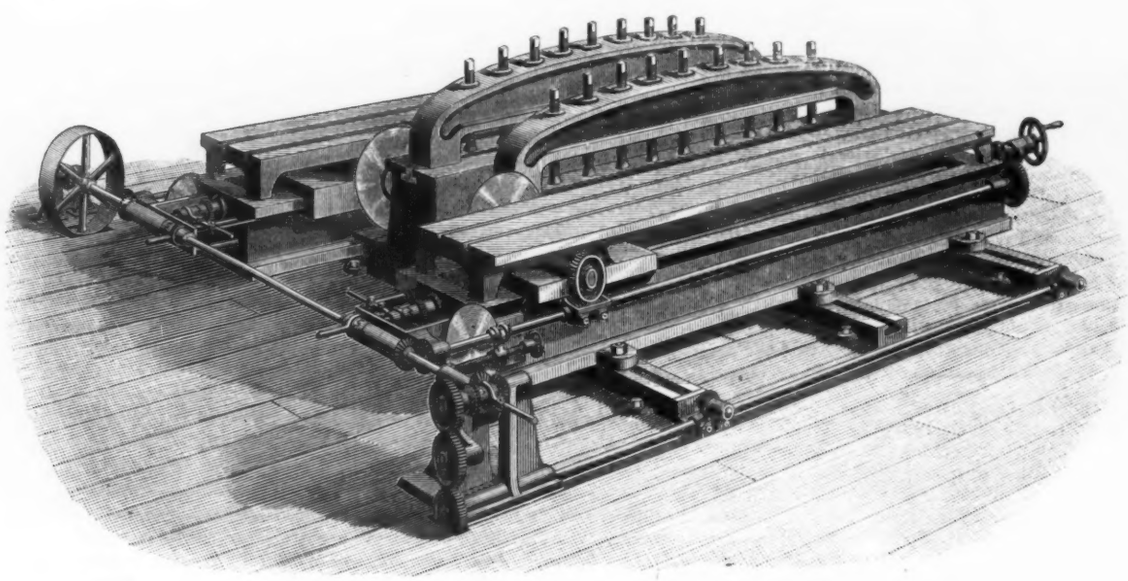

Fig. 3.—Armor Plate Cold Saw Cutting Off Machine.

COLD SAW CUTTING OFF MACHINES.

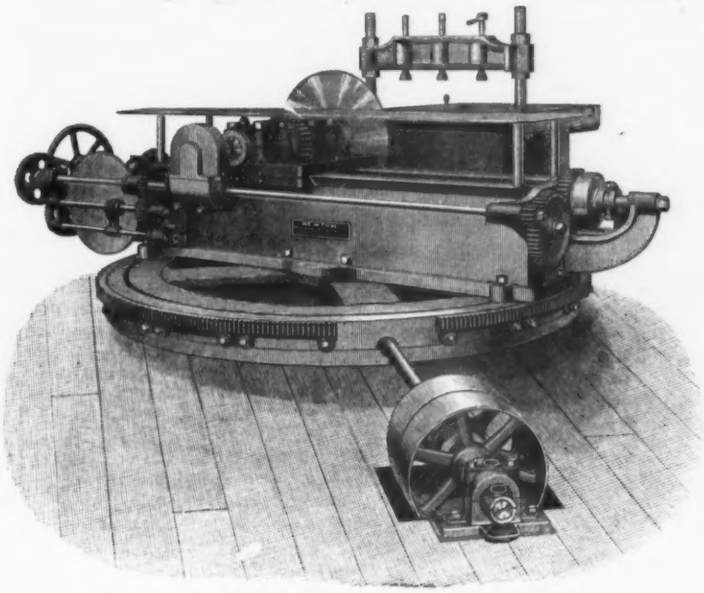

Fig. 4.—Revolving Bed Cold Saw Cutting Off Machine.

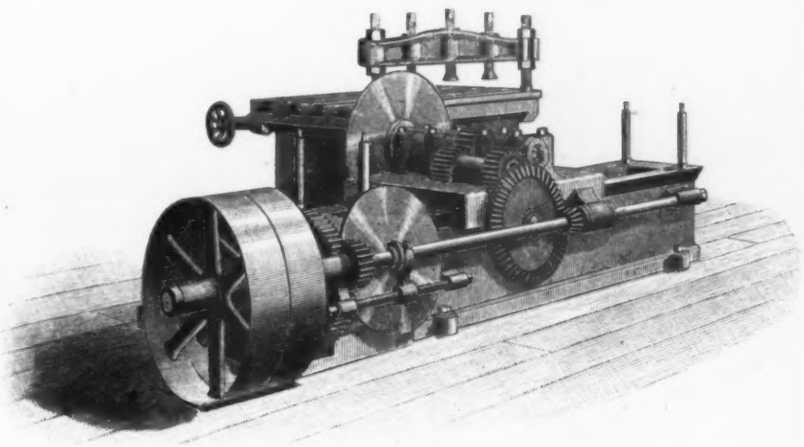

Fig. 5.—Stock Yard Cold Saw Cutting Off Machine.

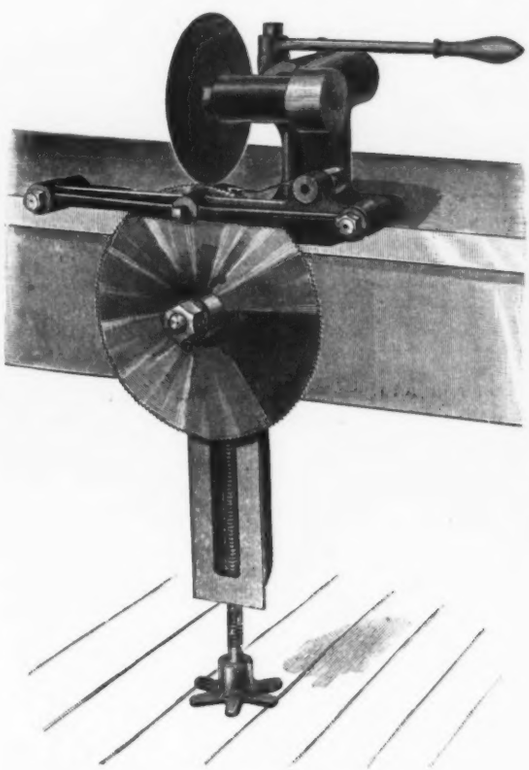

Fig. 6.—Saw Grinding Machine.

doubie, so that two edges can be cut at the same time. The armor plate coming from the mill has rough edges which must be trimmed down before it will be accepted by the shipbuilders. This tool will cut plate up to 10 inches thick and up to 137 inches in length. One bed is stationary and the other is adjustable on three rails to suit plates of different widths. In each of the tables are placed three rollers so mounted that, after the plate has been cut, they can be raised to support the plate, which can then be rolled off the machine.

The machine illustrated in Fig. 4 is intended for the use of bridge builders, structural iron works and others who have long beams to be cut off at different angles. This machine does not differ from the others except that it is driven from one point and is set on a revolving bed which allows the beam to always remain in one position and the machine to be swung round to whatever angle it is desired to cut the beam off. This tool can also be used as a rotary planer. The saw is fastened to the head by means of six countersunk screws, the head being screwed to the end of the spindle the same as the face plate of a lathe. This can be removed and an ordinary face milling cutter put in its place and the machine used as a rotary planer.

The stock yard machine shown in Fig. 5 was designed to take the place of the present high speed saws. It is claimed that it will do the work much cheaper and better, and that, as it does away with the high speed of the other, it will reduce the danger of breaking saws and the excessive wear of belts and bearings. An important item here claimed is the small amount of power required to operate the slow speed saw, this being about one-tenth that required to drive the quick speed saw.

The illustration Fig. 6 represents a simple saw grinder. As the saw is turned, tooth by tooth, the emery wheel is drawn across it and both the face and bottom of the tooth ground. A saw 18 inches in diameter can be sharpened in about three minutes.

Fig. 7 shows specimens of work done by these machines, which are now in use in some of the most prominent bridge, locomotive and steel works.

English Strikes.—A report on strikes in England last year has been made by J. Burnett, labor correspondent of the London Board of Trade, from which it appears that in 1889 strikes took place in

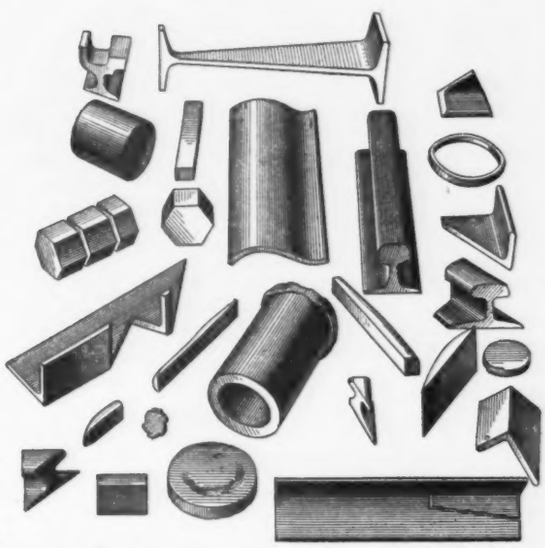

Fig. 7.—Specimens of Work Done on Cold Saw Cutting Off Machines.

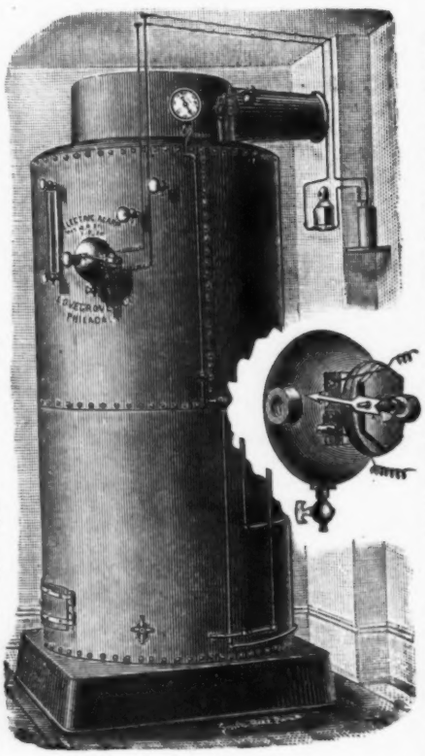
COLD SAW CUTTING OFF MACHINES.

3164 establishments in that country. As in 1888, and due to the same reason—namely, a rising labor market—67 per cent. of the strikes were due to claims for advanced wages, although in some cases there were other points of dispute involved. Of those for advances in wages, 48.3 per cent. were successful. The proportion of those partially successful was 31.5 per cent.; 10.7 per cent. were not at all successful, and the results were unknown in the remaining strikes. Of the financial aspect of strikes some interesting particulars are given. Taking 597 of the strikes, the loss of wages is estimated at £652,000, while the loss to each individual would be a little over £3. 5/. For 930 of the strikes the loss for the 344,840 persons engaged is taken at £1,122,500. In 216 instances it is shown by employers whose men have been on strike that the value of fixed capital laid idle was £14,450,962; while in 162 instances the ratable value of property laid idle was £268,684. In 233 strikes the estimated outlay caused for laying down and reopening the works on strike was £169,219. On the other hand, the returns sent in by trade unions show that in 369 strikes the amount expended in support of men by strike committees or trade unions was £63,636. The returns also show that in 446 strikes the weekly wages earned before the stoppage amounted in the aggregate to £153,504; while the estimated loss of wages in 292 of these strikes was £294,175.

Labor Saving Machinery.



In opposition to Powderly, who is reported to have made a fiery attack upon labor saving machinery in an address to the Farmers' Alliance, at Ocala, the Chicago *Tribune* volunteers a vigorous defense. He spoke of "defrauding workmen of the right to work," &c. The editor says:

Imagine a man talking thus to an audience made up chiefly of Southern planters who, but for the cotton gin, instead of producing yearly 8,000,000 bales of cotton, would not grow 500,000. It is owing to labor saving inventions that the cotton seed, which the planters used to throw away or burn up, has been converted into a commercial product which yields the South over $20,000,000 yearly. Hydraulic cotton compressors, by reducing the bulk of the bale of cotton, whether shipped by sea or land, have lowered the expenses of transportation so much as to make a saving of from 1 cent to 2 cents a pound. Imagine the feelings with which the Western Alliance farmers from Kansas, Nebraska and the Dakotas must have listened to the Chinese anti-labor-saving harangue of the head of the Knights of Labor. These men know that their farms would be valueless to them were it not for steel prairie plows, for twine-binding reapers, mowers, power threshers and cleaners, and scores of other implements, and—most important of all labor-saving devices—a well-equipped railway to carry the products of their farms to a distant market. It is knavish of Powderly to talk as he does when he knows that the labor-saving devices of the last half-century, by increasing the productive power of the workingman, have added 50 per cent. or more to wages in this country and England, and nearly as much in Germany and France. They have increased the purchasing power of wages 50 per cent. because of the greater cheapness of commodities caused by them. Therefore they have doubled fully the rewards of labor, while lessening the amount of toil required of the individual.

The Burton Block, a well-known manufacturing building at the corner of Clinton and Van Buren streets, Chicago, was burned on the 17th inst., seriously inconveniencing a number of manufacturing concerns occupying rooms in it. The total loss is put at $100,000. This is the third time that the building has been burned.

Electric Low Water Alarm.

The electric low water alarm we present an engraving of is positive in its action, and its construction is such that there is nothing to get out of order. The alarm consists of a cylindrical casting, which is attached to boiler or water column by unscrewing the lower gauge cock and screwing in the alarm, after which the gauge cock is screwed in the casting and can be used as usual. The casting contains an improved float which is connected to the atmosphere through the stuffing box by means of the hollow rocker arm, to which the index is attached. This connection is

Electric Low Water Alarm.

a positive preventative of the float filling with water and becoming inoperative.

The alarm bell is an approved wood box bell which gives a clear and distinct sound. The battery is of the dry kind, and requires no charging or attention. The alarm can be attached to any style of boiler, either in the lower gauge cock directly into the shell of the boiler or into the water column. When in operation, as soon as the water is below the first gauge cock, the float and index fall, making the connection or contact, and causing the bell to ring, which will continue until the water reaches its proper level. This device is a new adaptation of the low and high water alarm made by Lovegrove & Co. of 143 North Third street, Philadelphia, Pa.

At a meeting of the stockholders of the Westinghouse Electric and Mfg. Company it was decided to issue $3,000,000 preferred stock. George Westinghouse, president of the company, submitted a statement of the condition of the company, based on figures furnished by a committee appointed to examine into the affairs of the company. The report stated that the assets are $6,280,000 and the liabilities $3,642,045.97. The money derived from the sale of the preferred stock will serve to pull the company through the present stagnant state of business. The capital stock of the company is $10,000,000, of the par value of $50 per share. It was decided to vote on the motion of issuing the $3,000,000 worth of preferred stock by ballot. One hundred and two thousand four hundred and thirty-five shares voted in favor of the issue and 135 against it. The report of the number of lights and stations controlled by the company was as follows: Number of central stations, direct current arc, 71; number of central stations, alternating current arc, 66; number of central stations, incandescent, 357; number of central stations that have increased their capacity since they started, arc stations, 17; incandescent, 101; total light capacity, direct current arc, 5280; alternating current arc, 5510; incandescent, 651,300; number of street car motors, 407.

Co-operative Stores in the Coke Region.—It is announced that the United Mine Workers of the Connellsville coke region are about to begin a movement for the establishment of co-operative stores. The plan proposed is the organization of a company with a capital stock of $25,000, to be used in the erection of a general store building, from which branch stores located at all points throughout the region will secure their supplies. The sum of $2000 has already been subscribed by the miners at one plant located near Scottdale, Pa., where there is plenty of land, and where good railroad facilities are offered. Should this organization of a co-operative company in the coke regions be successfully effected, and the advantages of such a system be made fully manifest, the miners of the other coal and coke regions will also form companies on the same basis. Business is to be commenced next February, or after the annual agreement with the operators has been formulated.

The Illinois Steel Company of Chicago have just issued a very complete book of rail sections, comprising 68 pages. The actual size of each section is given, together with the dimensions of its various parts. In connection with the cuts of special patterns appears the name of the road for which they have been designed. The lightest section shown is that of a 30-pound rail and the heaviest 90 pounds, but the company state that they are prepared to furnish rails of any section from 8 to 100 pounds. A greater variety of patterns is shown of the 56-pound rails than any others, namely 12. The 60-pound rails come next with 11 patterns. Of 52-pound rails there are 6 patterns. Of 65, 70 and 75 pound rails there are 5 patterns each. The 85-pound sections shown are used by the Pennsylvania and the Burlington roads. The 90-pound section was rolled for the Chicago and South Side Rapid Transit Railway Company, now building an elevated road for city passenger service. Sections of tram rails are also shown, as well as a street girder rail of the Illinois Steel Company's standard. A page of interesting information about track materials gives the quantity of each class of materials required to lay a mile of track. The general offices of the company are on the tenth floor of the Rookery, Chicago. Julian L. Yale is general sales agent. The New York offices are at 46 Wall street.

An explosion of gas under the skylight of Cornelius Vanderbilt's art gallery, on West Fifty-seventh street, carried away a portion of the roof and threw fragments of pipe and sheet iron as far as the entrance of Central Park, two blocks distant.

Car Scale.

One of the most difficult problems which railway managers have had to contend with is the devising of some method by means of which the actual weight of the load carried on each car could be obtained at any point on the line. The main considerations were accuracy and rapidity, while, of course, simplicity of construction and durability were prominent features. Attempts to weigh the cars of a moving train as the train passed over stationary scales have not given satisfactory results, owing mainly to the impact of the wheels as they struck the platform, and which, of course, varied widely. The accurate weighing of the load carried by each car is of the utmost importance, since it is now well known that railroad companies transport more freight than they receive pay for owing to overloading and again, the difficulty of weighing the cars without more or less interfering with traffic.

The drawing here presented represents a device which is a radical departure from the usual custom, since each individual car carries its own scale, which is supported from the bottom of the car body, and

Fig. 1.—Elevation of Half of One Side of Scale.

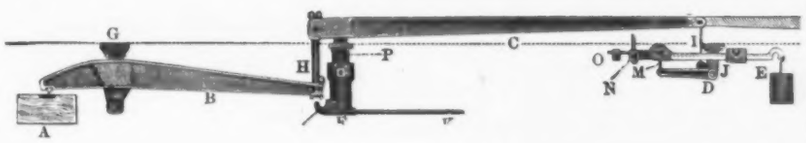


Fig. 2.—Sectional Elevation of Half of One Side of Scale.

THE WANAMAKER CAR SCALE.

which in turn is made to raise the car body clear of the trucks, and as the car body balances the scale the reading on the scale beam shows at a glance the net weight of the load within the car. It is evident that this reading can be obtained at any and all times, when the cars are not in motion, by the simple movement of the hand. This device is the invention of C. B. Wanamaker of Indianapolis, Ind., and may be described as follows: This scale is composed of a system of compound levers, similar to an ordinary platform scale, so arranged as to lift the body of the car free from the trucks by means of hydraulic jacks and take the weight on the levers.

The drawings, Figs. 1 and 2, are views of one-half of one side of the scale, one-half in section and the other half in elevation, the other side being a duplicate except the lever D and the scale beam E. Fig. 1 shows the parts in the positions they occupy when not in use, and Fig. 2 the weighing position; A A cross section of the truck bolsters; B B the main levers; C C the second levers; D the third lever, which is composed of a shaft having four short arms and one long one, placed across the car near the center; E the scale beam, inclosed, along with a small force pump and tank of oil, in a box at one side of the car near the middle; F F the hydraulic cylinders bolted to the sills of the car and fitted with the pistons P P; the upper ends of these pistons form bearings for the levers C; G G the supports and bearings for levers B, bolted to the sills of the car.

All the levers of the scale are fitted with hardened steel knife edges, which when weighing rest on hard bearings. The operation of the scale is as follows, the several parts being in position, as shown in section in Fig. 1: By working the pump oil is forced through the pipes K into the cylinders F, raising the pistons P and with them the levers C. These levers are connected by the links H to the long arms of the levers B. As these are raised the knife edges in the short arms of the levers B come in contact with the plates on the bolsters A. Continuing the upward motion the second knife edges on the levers B come into contact with bearings in the lower ends of the standards G; the further motion of the levers raises the car off the trucks, the distance it is raised being limited by the stops in the cylinders F; the long arm of each of the levers C is connected by the links I to one of the short arms of the lever D, which is raised to its bearings in the standards J; the long arm of the lever D is connected by the link M to the scale beam E, which takes its bearings in the standard N attached to the under side of the top of the scale box. This scale beam has an adjusting poise, O, a sliding poise, counterpoise and movable weights. The pump has a relief valve by which the pressure in the cylinders F is limited to that necessary to lift and hold the maximum load and prevent damage by the application of too much muscle to the pump handle; this valve is also connected to the door of the scale box in such a manner that on closing the door the oil is let out of the cylinders and returns to the tank, allowing all parts to assume their normal positions, the pistons descend, the car body follows until it rests on the trucks; the levers fall away from their bearings on the standards G into supports attached to these standards; the short arms of the levers B leave the bolsters A, the lugs on the long arms of the levers B drop into hooks L on the cylinders F; the links H rest on the backs of the knife edges in the long arms of the levers B; the backs of the knife edges in the short arms of the levers C rest on the links H, the pistons fall away from the second knife edges in the levers C, the knife edges in the long arms of the levers C rest on their backs in the links I, which rest on the back of the knife edges in the short arms of the lever D, the shaft of the lever D rests on the bottom of openings in the standards J; the back of the knife edges in the long arm of the lever D hangs in the lower end of the link M, which hangs on to the back of the second knife edge in the scale beam, the back of the knife edges in the short arm of the scale beam rest on the bottom of openings in the standard N, the outer end of the scale beam rests in a movable support (not shown) fastened to the top of the scale box, and connected to the door in such a way as to allow the counterpoise to drop into a recess in the bottom of the scale box and free the knife edge on which the counterpoise hangs when weighing. Thus all the knife edges are not only relieved of the weight of the load and the parts of the scale, but they are removed from contact and cannot be worn or injured by the jarring of the car when in motion.

Coal versus Gas in Pittsburgh.

A special correspondent of the Pittsburgh *Dispatch* presents data relating to the situation in Pittsburgh on the fuel question.

According to recent reports, there are 14 mills here (not including McKeesport) that have changed back to coal in the puddling furnaces, although in two of these some of the furnaces are yet working on gas. In these mills there are 454 puddling furnaces, while the total number of furnaces in Allegheny County, including McKeesport, is 1152. At the National Tube Works Company, McKeesport, every department of the four rolling mills is again using coal. About 15,000 bushels are being consumed daily. The company intend erecting a coal elevator on the river bank near their works, in order to transport the coal from the barges to the mills. They recently erected at their No. 4 mill 15 double puddling furnaces, and these will now have to be torn down, owing to their not being adapted to the use of coal; either natural or artificial gas must be used in these furnaces.

At the Clinton Mill, on the South Side, five double puddling furnaces are standing idle, while the single furnaces are using coal. At the Republic Iron Works, on Twenty-fifth street, South Side, they are still in a condition of gas shortage. The new puddle forge, consisting of 14 double puddling furnaces, will have to be torn down. The old forge, comprising 26 single furnaces, is back to coal, and a part of the finishing department is likewise back to coal. It is thought that the recent gas strike by Jones & Laughlin, whose mill adjoins there, will urge the Republic to try for gas. At Howe, Brown & Co.'s mill, on Sixteenth street, coal is being partially used. In the Millvale mill the puddling department is equivalent to 36 single furnaces, but only 21 of these are built single. At this mill there are two quadruple furnaces, being about the only furnaces of their kind about Pittsburgh. In one turn the total output of one of these furnaces is about 12,000 pounds, while of a single furnace it is 2500 pounds.

The Pittsburgh Forge and Iron Company are using coal in all their puddling and scrap furnaces, and artificial gas in their heating department. About 7000 bushels of coal will be required daily at this mill. At the Lockhart Iron and Steel Works, Chartiers, the puddling furnaces have been changed back to coal, as has also the puddling department in the Soho mill of Moorehead, McCleane & Co. Lindsay & McCutcheon and Chess, Cook & Co. are now using coal entirely. The consumption in these mills is almost 10,000 bushels per day. At Painter's mill, in the West End, 16 puddling furnaces in the new forge were on last week, and 44 off owing to the shortage of gas; in the old forge 24 furnaces are idle and under repairs to resume coal during the week. The firm is experimenting with the Archer process of fuel gas. It is understood that the La Belle Steel Works of Smith Bros. & Co., in Allegheny, also the United States Iron

and Tin Plate Company, Linden Steel Company, Duquesne Tube Company and the Pittsburgh Tube Company are experimenting on this process.

At the American Iron Works of Jones & Laughlin the puddle furnaces that were changed back to coal when the gas gave out are now being returned to gas, the company having struck two wells of their own that furnish them more than an ample supply of gas. The works are now running full in all departments, with the likelihood of continuing so throughout the winter. The old wells have been plugged and reserved for possible future use. In the Upper Union Mill of Carnegie, Phipps & Co., Thirty-third street, there is still considerable trouble on account of the gas shortage. During the last month the puddling department has been making only from two to three heats per turn, but the finishing department is working full, turning out about 275 tons of finished iron and steel per turn. At Oliver Bros. & Phillips, lack of gas has made it necessary to fall back on coal in the puddling department. Of 42 furnaces, 28 have been changed, as far as we can learn, and these are using the slack and cold blast process, which was the general fuel mostly used by this company previous to the adoption of gas. It is likely that superheated steam and slack will be generally used in the mill.

This is the same process as is used in the entire puddling department of the Vesuvius Mill, of Moorehead Bros. & Co. and the Kensington Mill, of Lloyd, Son & Co. This process is the newest substitute for fuel in puddling furnaces, and it is claimed its cost is only one-half that of gas. It is charged with slack coal, and the combustion is forced by the introduction beneath the grate bars of superheated steam. A water gas is produced by the decomposition of the steam. Park Bros. & Co., are building an 8 and 10rinch natural gas main from the Wildwood field to their Black Diamond Steel Works, on Thirtieth street, costing $80,000, in order to insure a sufficient supply for their works. It is thought that by the first of the year all the mills now undergoing a change to coal will be in a position to run steady. Operations during last month were greatly interrupted by the withdrawal of gas from the puddling furnaces, and the production of muck iron during the month was not over 36,000 tons.

Coking on Lake Superior.—The Lehigh Coal and Iron Company have started the fires in 50 new coke ovens at West Superior, Wis., and report very satisfactory results. The capacity of the West Superior coke plant is now 60,000 tons annually, and the Northwest furnishes an active market for the whole of it. The coal is shipped from Western Pennsylvania. Thus far this is the only coking plant on Lake Superior. The first ovens were built about two years since as an experiment, and at first only the slack coal from shipments of steam coal was used. This slack had formerly been considered waste, but the coke ovens in utilizing it made it as valuable as the lump coal and ultimately led to special shipments of coal for coking. The people of the Lake Superior iron country are deeply interested in the operations of this company, believing that in this way the problem has been solved of manufacturing coke pig iron in their district.

State Mine Inspector Tinslow reports to Governor Hovey 72 coal mines in 11 counties in Indiana, with a capital of $2,081,000, with an output of 8,076,000 tons, an increase over the preceding year of 573,500 tons. During the preceding year the block coal mines were seven months on a strike. The total number of miners is 6550. Air and electric machinery were introduced in a number of the mines during the year. The cost of mining ranged from 37½ to 70 cents, the average being about 60.

The Lead Ore Duty.

The following correspondence will explain itself.

TREASURY DEPARTMENT,
October, 30, 1890.

Sir: The Department is in receipt of a letter, dated the 15th inst., from Special Agent J. C. McCoy, in which he reports that it is the practice at your port in classifying ores imported from Mexico which may contain both silver and lead to only subject the lead contained therein to the payment of duty, it being alleged by him, as it is understood, that you construe the provision in Schedule C, paragraph 199, as imposing the duty of 1½ cents per pound only on the lead contained in such ores.

By reference to said paragraph you will find that it prescribes that lead ore and lead dross shall pay a duty of 1½ cents per pound with the proviso that "silver ore and all other ores containing lead shall pay a duty of 1½ cents per pound on the lead contained therein, according to sample and assay at the portof entry."

Under this paragraph the Department is clearly of the opinion that all lead ores—that is, ores where lead is the component material of chief value—shall pay a duty of 1½ cents per pound upon the weight of the ores as imported, without regard to the question of the quantity of lead which may be contained therein, and that the proviso imposing such duty of 1½ cents per pound on lead contained in silver ores, and all other ores, applies to ores composed of silver and lead, gold and lead, &c., where the lead is not the component material of chief value; in other words, that where silver ore is imported—that is, ore where silver is component of chief value—the duty of 1½ cents per pound is to be exacted on the lead contained therein.

You will cause your practice to conform to the views herein expressed.

Respectfully yours,
O. L. SPAULDING,
Assistant Secretary.

COLLECTOR OF CUSTOMS, El Paso, Texas.

TREASURY DEPARTMENT,
October 30, 1890.

Gentlemen: In reply to your letter of the 16th inst, the Department has to say that, under the existing tariff, paragraph 199, lead ore—that is, ore where lead is component material of chief value—is liable to a duty of 1½ cents per pound on its gross weight as imported into the United States.

With regard to silver and gold ores—that is, ores in which silver and gold are component materials of chief value, respectively—the lead contained therein is also liable to the duty of 1½ cents per pound, the quantity, however, to be ascertained according to sample and assay at the port of entry.

Respectfully yours,
O. L. SPAULDING,
Assistant Secretary.

MESSRS. CHAMBERLIN & PRICE, Minas Prietas, Sonora, Mexico.

Opinion of U. S. Attorney General Above Referred to.

DEPARTMENT OF JUSTICE,
WASHINGTON, November 19, 1890.

Sir: Your communication of the 8th inst. calling my attention to paragraph 199 of Schedule C of the Tariff act of October 1, 1890, and to the letter of Assistant Secretary Spaulding, of date of the 30th ultimo, to the Collector of Customs at El Paso, Texas, and to other inclosures, and to decisions of the Treasury Department, Synopses 4391, 7327, 7543 and 9662, and requesting my opinion as to the construction of said paragraph, was duly received.

Availing myself of the references and suggestions submitted, I have the honor to answer:

The tariff law of June 30, 1864 (13 Stats., 206) imposes a duty as follows: "On lead ore, 1½ cents per pound."

The act of March 3, 1883 (22 Stats., 500), in Schedule C, imposes a duty as follows: "Lead ore, and lead dross, 1½ cents per pound."

Paragraph 199 of the act of October 1, 1890, provides that there shall be levied, collected, and paid upon imported "Lead ore and lead dross, 1½ cents per pound: *Provided*, That silver ore and all other ores containing lead shall pay a duty of 1½ cents per pound on the lead contained therein, according to sample and assay at the port of entry."

The meaning most obviously suggested by a consideration of the language used is, that a duty of 1½ cents per pound shall be paid upon the commodity known as lead ore, and that a similar duty shall be paid upon that known as lead dross; while upon ores that are not known commercially as lead ores, and which yet contain lead of an appreciable value, a duty of 1½ cents per pound shall be paid—not upon these ores, but upon the lead which sample and assay shall show them to contain.

A construction which makes "all other ores" in the proviso cover "lead ore" of the first line, would render the first line meaningless as to lead ore, or would place the same rate of duty upon lead twice in the paragraph.

Under the law of 1883 lead ore, as such, bore the same duty as dross, as such. If only the lead which may be extracted from this ore is now dutiable, then it follows that lead ore and dross have been separated without an express purpose to do so, or that it is only the lead which the dross contains that is dutiable.

In order to discover the intent of Congress in this enactment, it may be instructive to consider the rulings of your Department in relation to the subject matter.

Under date of January 14, 1880 (Synopsis 4391), it is decided as to certain ores claimed to be entitled to free entry from Mexico as silver ore that "the value of the silver contained in the ore being largely in excess of the value of the iron, the Department is of the opinion that the ore is entitled to entry free of duty as 'silver ore.'"

No one denies that Congress by said act of March 3, 1883, placed a duty of 1½ cents per pound on lead ore and lead dross.

Under date of January 25, 1884 (Synopsis 7327), the assistant secretary decides:

"That when silver in any ore predominates in value it is considered to be silver ore, and as such is exempt from duty under the special provisions in the free list for ores of gold and silver; where, however, lead predominates in value the ore is considered as a lead ore, and is subjected to a duty at the rate of 1½ cents per pound under the special provisions in the Tariff act for 'lead ore and lead dross.'"

Under date of May 27, 1886 (Synopsis 7543), the Acting Secretary of the Treasury decides: "That ores composed of silver and lead and iron, or silver and lead, or silver and other base metals, of which silver is the component material of chief value, would, under the ruling of January 25, 1886 (Synopsis 7327), be exempt from duty under the provision in the free list (T. I., new, 752) 'for ores of . . . silver.'" "It is immaterial, in the entry and classification of such ores, whether the ores are imported for use as fluxes in the fusion of other metals or on account of the metals themselves."

Your circular of October 18, 1889 (Synopsis 9662), reviews and approves these rulings, and holds that ores known commercially as ores of silver, although containing lead in appreciable or considerable quantity, are not dutiable under the law of 1883; and that it must be assumed that the rulings and practice of the Department were known to Congress when it passed that act, and that it must be held that the designation of lead ore and silver ore in the tariff in the absence of legislative definition was that of existing decisions.

In view of these instances of official construction Congress enacted the provisions of the act of 1890, above quoted. It is not reasonable to suppose that without employing words clearly indicating a purpose to do so, the classification was changed from "lead ore" to "ores containing lead," while re-enacting in the leading portion of the paragraph the words of the provision of the act of 1883.

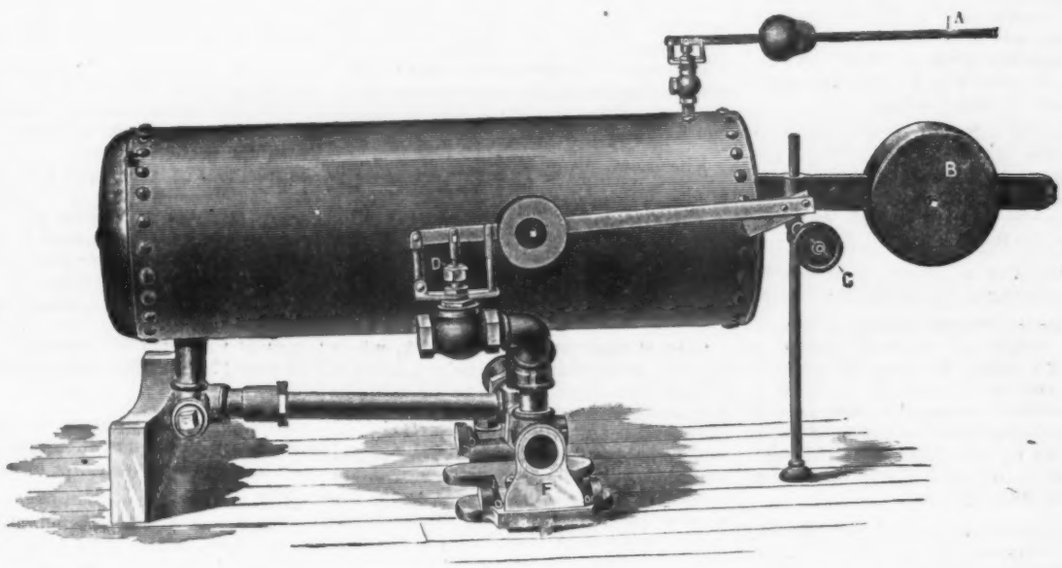
Nor can it fairly be inferred, without words plainly showing such an intention, that the duty was dropped from 1½ cents per pound on lead ore down to the same rate on the lead contained in the ore.

The language which Congress has deemed it proper to employ where it intended to place a duty only upon the metal that an ore contains is shown in the paragraph relating to.

copper, where the following words are used (paragraph 191): "Copper imported in the form of ores, one-half of one cent per pound on each pound of fine copper contained therein."

The rules of statutory construction forbid the conclusion that it was the legislative design to make lead ore dutiable only upon the lead contained therein without the use of the same or equivalent language.

In my opinion it is manifest that the words "all other ores," as used in the proviso of paragraph 199, mean all ores other than those designated by the words "lead ores," construed according to the commercial usage and departmental decision.



I therefore hold that imported lead ore is dutiable at the rate of 1½ cents per pound without regard to the amount of lead which the ore may contain.

W. H. H. MILLER, Attorney-General.

THE SECRETARY OF THE TREASURY.

Automatic Steam Trap.

This trap is intended for returning condensation to the boiler or to the tank. When used for returning the water direct to the boiler, the trap is located at a point above the water level. The steam pipe D, leading from the dome of the boiler,

AUTOMATIC RETURN STEAM TRAP.

connects with the inlet pipe between the check valve F and the inlet chamber. In each of the inlet and outlet pipes is a check valve. When the trap has filled sufficiently to tilt or dump, the valve D opens, admitting steam from the boiler to the top of the water, closing the check valve in the inlet pipe, and forces the water through the outlet pipe past its check valve into the boiler. When the water has run out sufficiently to allow the trap to resume its normal position, the valve D closes, and the boiler pressure closes the check valve in the outlet pipe and the return pressure opens the check valve in the inlet pipe, when the trap refills. The trap for discharging condensation to the tank depends mainly on gravity, and is said to be the only gravity trap made.

This trap, which is made by the Huyett & Smith Mfg. Company of Detroit, Mich., works principally on the weight of water it receives, the varying of the steam pressure being of no consequence, since the trap tilts over one-third before it strikes the valve lever, thereby overcoming the pressure on the valve.

The Montana Consolidated Tin Mining Company, recently incorporated under the laws of Illinois, with an authorized capital stock of $2,000,000, propose to work deposits of tin ore discovered in Montana. These deposits lie along the Madison River in that State, and are said to possess superior advantages for cheap mining and milling. Excellent water power is available, and coal mines are within easy reach, the property lying within ten miles of a railroad. A projected railroad line runs through the company's grounds. The mines have as yet not been sufficiently developed to establish the exact character of the ore, but excellent samples are shown by the projectors of the enterprise. The incorporators are William T. Cessna, Miner Walmsley and James P. Tillotson.

The famous Verrugas Bridge in Peru, built to replace the structure destroyed by flood a year ago, was opened for business on December 17. This is a wrought iron bridge built of materials constructed by Cooper, Hewitt & Co., at their works in Trenton. It is of the cantilever type, is 575 feet long, and at its middle point is 252 feet above the bottom of the valley which it spans. It is supported on two iron towers, and the suspended span is 105 feet long. This bridge is a portion of the Central Railway of Peru, formerly known as the Oroya Railway, which starts from Callao on the Pacific Coast and terminates at Chicla, a mountain city of the Andes, 12,300 feet above the sea level, and 87 miles distant from Callao. The Verrugas bridge is essentially an American structure. It was designed by an American engineer, L. L. Buck of this city, and American laborers, sent out from this city, put the bridge in position.

The Pittsburgh Reduction Company of Pittsburgh, manufacturers of pure aluminum, have cast two cylinders of aluminum bronze to be used in testing that material with reference to its fitness for making guns to throw projectiles filled with explosives. These cylinders were made for Doctor Emmens. They are 8½ inches long, with a bore of 1¼ inches, and the walls are 2 inches thick.

On an appeal on brass chains from duty assessed at 45 per cent. while the appellants claim that the chains should have been classified at 35 per cent., copper being the component of chief value, the appraiser says that the law provides for all manufactures of copper, or of which copper shall be a component of chief value, not specially enumerated, 35 per cent.; also provides for manufactures wholly or in part of copper, not specially enumerated, 45 per cent.; also provides that "if two or more rates of duty should be applicable to any imported article, it shall be classified under the highest of such rates." The decision is affirmed.

Trial of the Newark.

The official trial of the cruiser Newark was completed last Tuesday. Her average revolutions during a four hour trial were 126.8 per minute, giving a speed of 19.54 knots per hour. As in the two preceding trials the Newark's steadiness was noticed by all on board. Under her bows the water divided in two great waves that continuously foamed up to the hight of her hawse pipes, but while she carried so large a bone in her teeth, as sailors say, the run of water along her side and under her counter was very clean and easy. One of the noticeable features of the trial was the regularity and smoothness with which the engines ran. Not a bearing heated and not a single break of any kind took place in even the minor machinery. After the four hour run the afternoon was devoted to testing the quickness with which the ship could be stopped and backed while traveling at full speed and also to show her steering and turning capabilities. A complete turn was made in four minutes and 45 seconds. One minute and 35 seconds covered the time from going ahead full speed to going astern full speed. The latter movement, ordinarily a great strain upon engines, was accomplished without even starting a rivet. After the turning trial the ship steamed back to Delaware Bay and anchored inside the Breakwater.

Orders have been given by the French Minister of War for the construction of ironclad light towers for use in the fortresses along the banks of the Maas. The light will be supplied by a powerful arc lamp with fixed focus, and the approach of an enemy at night without detection is thus rendered impracticable. The dynamo will be driven by a gas engine, and the cupola of the towers will be so made that instantaneous elevation or depression can be effected from different points of the fort. The projectors as well as the men working them will be protected by steel armor

THE WEEK.

A Findlay, Ohio, correspondent confirms the report that the gas fields in that region are rapidly failing. As the investments in lands, leases, and wells since the discovery of natural gas were very heavy in that section of the country, the fact is regarded as serious. In Pennsylvania and Indiana the same indications are noticed, despite the search for new territory. Although Findlay will have gas for years to come, it is feared that the "big gushers" are now things of the past. The tendency of wells to change to oil suggests the probability that crude petroleum will eventually be manufactured into gas as a substitute. It is being introduced in iron manufacture with satisfactory results.

Railroad time by fast trains between New York and Boston will be reduced next spring to five and a half hours, and provide for rapid mail transportation.

The National Wheel Company, or "Wheel Trust," as it is sometimes called, was formed about a year ago, with a capital of $3,000,000. Recently prices have been twice advanced, in the first instance 10 per cent. and then 80 per cent., so that carriage builders speak of "starving out" the trust, by refraining from buying goods for a certain limited period.

The West is still calling for more immigrants. The St. Paul Chamber of Commerce last week resolved to diffuse information with the object of attracting to Minnesota the current which has been flowing to the Southwest.

Newburg has a newly organized ice machine company, with $500,000 capital.

The Canadian Pacific Railway is endeavoring to obtain an Atlantic outlet at the port of Castine. To succeed they must build several short lines of railroad in Maine, besides making arrangements with the Maine Central for the use of their tracks and buying up the Bangor and Piscataqua road, in which the city of Bangor has a controlling interest.

After a protracted contest the Reading Railroad Company have secured the right to improve their terminals in Philadelphia by building an elevated extension to a central part of the city. The estimated cost of the work exceeds $7,000,000.

The attendance of nearly 3,000,000 pupils in the public schools of Japan indicates the progressive spirit of the empire.

The foreign money order business of the New York Post Office during the first two weeks of December amounted to $1,450,000.

Electric street railway service between St. Paul and Minneapolis is now in full operation—time, 50 to 60 minutes.

St. Paul citizens propose to inaugurate a boom that shall promote the manufacturing interests of the town.

Wisconsin Patrons of Husbandry, influenced by the example of Manitoba, favor a State twine factory.

The Norwegian steamship Bratsburg is now loading at New Orleans a cargo of machinery for Port Elizabeth, Africa.

The gross receipts of seven New York racing associations during the season were $582,000, of which 5 per cent. goes to the State Treasury at Albany.

John Haug, marine architect, of Philadelphia has designed for the Standard Oil Company a number of steel barges, to be used in carrying oil in bulk between that port and Boston. They will be 120 feet long, 30 feet beam and 10 feet depth of hold, with a carrying capacity of 250,000 gallons of oil. The barges will be towed by steamers in the same manner as coal barges are now towed between the two ports.

Respecting the future of the American commercial marine there are very few who can dissent from the opinion expressed by the New York *Tribune* and *Sun* alike. Our new cruisers give evidence that American shipbuilders are able to rival, if not to surpass, the best work of European builders. They ought to be the forerunners of a squadron of American merchant vessels, built in American yards and foundries, built of American steel and iron, built by the industry of America's workmen, built for the service of American commerce, built to be launched from American wharves, and to sail under the American flag.

The Mexican State of Tabasco has exempted from State and municipal taxation for five years manufactures and industries that may be established on its soil for the first time. Machinery intended for use in the favored industries is to enter the State without payment of duties.

The Bureau of the American Republics has been established at Washington, with headquarters at the Department of State. The bureau will disseminate useful information concerning the commercial condition and advantages of the several American republics.

The new revenue cutter Galveston, plated with iron $\frac{7}{16}$ to $\frac{1}{2}$ inch thick, was launched at Baltimore last week. She is 186 feet between perpendiculars, 30 feet beam and 12 feet depth of hold. Her displacement is 600 tons, and she has double compound engines with cylinders 16 and 30 inches in diameter.

Colonel Auchmuty of New York, whose success in establishing trade schools is well known, in an address to the business men and merchants of Springfield, Mass., last week, said, with special reference to the plumbing business: "The trades union have attempted to restrict apprenticeships, making the terms long, the number limited, the work disagreeable and unproductive; thus, there is need of some influence to do away with this tyranny. The trades school graduate is liable to persecution for a short time, but the unions for self protection must ultimately admit him to membership. The trade papers which are not union organs are in sympathy with this manual training in New York. The fact that so few high school graduates become mechanics by no means proves that high school education unfits a young man for a trade. It only shows the results of seeking to make a couple of years of drudgery, which can only be done by boys too young to object to it, a preliminary to a trade. The success of the New York Trade Schools had proved that this prejudice against manual labor does not exist on the part of the educated. In the students 31 out of the 44 States in the Union are represented, many coming from distant points at considerable expense to secure the education."

The Howards, at Jeffersonville, Ind., are putting in the machinery for their new steel plant for building river boats.

Preparations for improving the ferry crossings of the river separating New York and New Jersey are yet in their early stages, but are advancing vigorously. One of the ferryboats, with an elevated passenger deck to correspond with the proposed elevated bridges and rail tracks on either side, is already running, and others are building or are in course of adaptation to the improved plan. The keel for a double decked steel ferryboat for the Pennsylvania Railroad has been laid by Samuel L. Moore & Sons Company, at Elizabeth, N. J.

The manufacture of sorghum sugar in this country now promises to become a profitable industry, as a result of experiments in the chemical laboratory of the Department of Agriculture. The success claimed consists in separating "gummy amorphous bodies" without precipitating the sugar, and doing this at a trifling cost.

During the last three years British capitalists have placed, in new securities and forms of investment not before on the market, £540,000,000, or nearly $2500,000,000. For the first ten months of the current year, according to the London *Economist*, these investments reached the enormous sum of $680,000,000. These were in addition to the capital put into the securities already existing and known to investors. The greatest portion of these outlays was not for permanent possession. The promoters of the new schemes at any rate only brought them forward to saddle them upon the public; and most of those who accepted the offer simply took them at a "bargain" to turn them off upon others at the expected advance. This is a type of what, in a lesser degree, has taken place on this side of the water.

Mayor Manning of Albany, while speaking of the effort to deepen the channel of the Hudson River, declared it to be a fact that the traffic on this river, even with its present capacity, is more than double that of the Ohio, the Mississippi and the Missouri rivers combined. While many millions of dollars have been expended upon the last-named rivers during the last 50 years, a mere pittance only has been doled out to the Hudson by the general Government. The largest appropriation for the Hudson by the Federal Government was $335,000, and the total from the year 1797 to 1890 has been $1,461,420 only.

Merchants and bankers in Chili have subscribed $5,000,000 to establish an opposition line of steamships on the Pacific Coast.

The monster four masted clipper ship Shenandoah, at this port from Bath, Me., to load for San Francisco, is nearly three times as big as the Yankee record makers of 30 years ago. The Dreadnaught, which made the fastest voyage of any sailing vessel to Liverpool, measured only 1200 tons. The Shenandoah measures 3409 tons gross and 3258 tons net. She is 325 feet long over all, 308 feet on the water line, 49 feet wide, and 29 feet deep. She draws 27 feet, or about as much as the City of Paris. Her carrying capacity is 5000 tons, or more than some of the largest freight steamships. She has a steel bowsprit, weighing 13 tons, and no jibboom. She is constructed of oak, and was launched from the yards of Arthur Sewall & Co., at Bath, in November.

The Customs Commission at St. Petersburg have decided to increase the duty on agricultural machinery and implements 40 per cent.

The "most favored nation" clause operates as a bar to the Dominion in seeking better trade relations with the West Indies, as she desires to have her goods admitted at a lower rate of duty than the tariff upon productions of other countries. Therefore, efforts are being made to induce the Commercial Treaties Committee of the Imperial Board of Trade to have the objectionable article in the Belgium and German treaties expurgated. These clauses give Germany and Belgium the right to demand as good terms from any British colony as that colony gives to any other British colony. The time for which the treaties run has about expired.

MANUFACTURING.

Iron and Steel.

Emaus Furnace, at Emaus, Lehigh County, Pa., now under lease to Robert H. Coleman, has recently been extensively repaired. It will probably go into blast shortly after the first of the year.

A 76,000-pound casting was successfully made at the ordnance works of the Bethlehem Iron Company, Bethlehem, Pa., recently. The casting is to be used in the construction of the new armor plate mill.

The Topton (Pa.) Furnace has gone out of blast to make repairs, and will be idle about three weeks.

Falling Spring Furnace, at Chambersburg, Pa., blew out on December 17, and will remain idle for four or five months.

The affairs of the Paducah Iron Company, Paducah, Ky., are under litigation. W. H. Hayes, the former president of the company, recently brought suit to recover back salary.

The Napier Iron Company, at Henryville Tenn., have awarded the contract to Stein & Schwarz of Philadelphia, Pa., for the erection of a 12 x 60 foot blast furnace.

At Knoxville, Tenn., the Knoxville Iron Company have recently added two puddling furnaces.

The Twin City Iron Company, with a maximum capital stock of $200,000, have been incorporated at Front Royal, Va., to open iron mines and erect and operate a furnace.

The Tallapoosa Furnace Company are preparing to erect another stack 11 x 60 feet, and enlarge their cast house.

The North Carolina Steel and Iron Company's directors recently held a meeting at Greensboro, N. C., and decided to award a contract at once for the erection of a 120-ton iron furnace.

The South Tredegar Rolling Mill, at Chattanooga, Tenn., closed down last week, pending negotiations for the sale of the plant. It is stated that a $600,000 company to be known as the South Tredegar Iron Company of Cardiff, Tenn., is being organized by Eastern parties for the purpose of purchasing the Tredegar Mills and moving same to Cardiff. It is stated that the sum of $306,000 will be paid for this plant, and that it will be improved and enlarged. A basic steel plant that is to cost $250,000 is to be built and operated by this new company, and a nail mill will also be established.

A receiver has been appointed to take charge of the business of the Henderson Steel Company of Birmingham, Ala., on the petition of one of the directors.

The Southern Malleable Iron Works, at Chattanooga, Tenn., is nearing completion. The company expect to have the building under roof by the end of this month and have the foundry in running condition by the middle of January. Charles A. Barer of Cincinnati, Ohio, will have charge of the foundry. The president and general manager of the company is Charles Heron, and P. A. Browner is secretary and treasurer.

The Principio Forge Company have been incorporated at Wheeling, W. Va., by W. P. Tyler of Washington, Pa., N. E. Whittaker, C. E. Ewing and others.

Parties at Selma, Ala., are endeavoring to organize a company for the purpose of establishing a cotton tie factory.

Fairchance Furnace, of the Fairchance Furnace Company, at Fairchance, Pa., has been closed down for an indefinite period on account of the present dullness in the iron market. It will resume blast again when the condition of the market warrants resumption.

The plate mills of the Lukens Iron and Steel Company, at Coatesville, Pa., are not only the largest east of the Alleghenies, but are the oldest in the United States, and since 1810 have been continuously operated by the Lukens and Huston family. The mill, besides being the largest, also turns out larger plates than any mill in the country. During the past week they turned out plates ⅝ inch thick and 108 inches wide by 300 inches long, weighing 6500 pounds each.

The Canonsburg Iron and Steel Company of Canonsburg, Pa., with branch office at Pittsburgh, have decided to greatly enlarge their capacity. The firm manufacture sheet iron and steel for stamping purposes and galvanizing. Their present capacity is about 4000 tons per year.

The statements published in some of the Pittsburgh papers last week to the effect that men employed at the Edgar Thomson Steel Works of Carnegie Bros. & Co., Limited, at Braddock, Pa., were dissatisfied with the present scale of wages and would demand a new one is without foundation. The scale of wages now in force cannot be annulled unless a 30 days' notice is given by either side, and no such notice has as yet been served by the employees.

An addition is being made to the forge department of the La Belle Iron Works of Wheeling, W. Va. It is 28 x 45 feet in size and will be used for the plate shears.

The output of the plant of the Ætna Iron and Steel Company, at Bridgeport, Ohio, for the past month has been over 3000 tons of finished sheet iron and steel, the largest in its history. The firm contemplate making some extensive improvements in the near future. At present they are adding a new sheet train built for them by the Leechburg Foundry and Machinery Company of Pittsburgh.

The Pottstown Iron Company of Pottstown, Pa., have posted notices of a reduction of 25 cents per ton in the wages of puddlers, and a proportionate reduction in the wages of all employees in their plate and puddling departments.

J. W. Wilkes, formerly connected with the Sharon Iron Company, at Sharon, Pa., will probably build a small mill at that place for the manufacture of muck iron. It is said that nearly the entire amount of money has already been subscribed.

The Pittsburgh Portable Forge Company, recently organized in Pittsburgh, have commenced the erection of their plant on Smallman street, in that city. In addition to forges they will manufacture railings, gratings and steel barrows.

Furnace G, of Carnegie Brothers & Co., Limited, at Braddock, Pa., was blown out last week for relining and repairs.

Riter & Conley of Pittsburgh have secured a contract for the erection of three 18 x 70 fire brick hot blast stoves and an iron chimney 10 x 150 feet for Swede Furnace No. 2, now being erected by Richard Heckscher & Sons at Swedeland, Pa. The first named firm have recently made the first shipment of material for the new blast furnace of the Colorado Coal and Iron Company of South Pueblo, Col.

The nail factory of the Riverside Iron Works of Wheeling, W. Va., resumed operations last week after being idle since September last. The principal reason for shutting down for so long a period was that the foreign orders for steel, deliveries running up to January 1, engaged the capacity of the steel plant and left the factory without a supply of nail plate. The figures at which the company made their sales of steel afforded a much better profit than turning steel into nails at the prices which have been prevailing.

Tasker Tube and Steel Company are opening an office at 22 William street, New York. The company, as indicated in their name, will roll seamless steel tubes under Stephen P. M. Tasker's patents.

Machinery.

The Citizens' Traction Company of Pittsburgh have placed a contract with the Westinghouse Electric and Mfg. Company of that city for a complete equipment of electric street car motors for the extension of their lines from Butler street to Sharpsburg, across the Allegheny River. The order calls for 20 noiseless motor cars, which will be run by the overhead trolley system.

The Philadelphia and Reading Railroad Company are erecting a repair and machine shop at Nicetown, Pa. The structure will be 307 x 176 feet, with an extension 25 x 36 feet, and will cost about $20,000.

The machine and blacksmith shops of the Illinois Central Railway Company, located at Water Valley were destroyed by fire one day last week. The loss is estimated to be in the neighborhood of $40,000. The buildings will probably be rebuilt.

The iron foundry and machine works of Enderline & Baronio were completely destroyed by fire a few days ago. The loss is estimated at about $7000, with only $3600 insurance. The works will probably be rebuilt.

The Ryan-McDonald Mfg. Company of Waterloo, N. Y., are to remove their machine works to Curtis Bay, Md., where a company with $100,000 capital stock will be incorporated, and where a building 350 x 70 feet will be erected.

The Triple Wire Nail Machine Company, who were recently incorporated to establish a Hastings wire nail works at Parkersburg, W. Va., will also erect a plant at Huntington, W. Va

The Luray Foundry and Machinery Company have been organized at Luray, Va., with a capital stock of $20,000, to operate the Broadway Foundry and Machine Works, which are to be moved from Broadway to Luray. S. K. R. Hoovee is president of the company, W. L. Hudson vice-president and H. V. Hudson secretary.

It is stated that the Norfolk and Western Railroad Company will build machine shops at Kenova, W. Va.

It is stated that the Vermont Tool Company of Vermont are in negotiation with prties in Chattanooga, Tenn., for the removal of that plant to the latter place.

The Nashville, Chattanooga and St. Louis Railway Company will establish machine shops and round house at Nashville, Tenn.

The town of Abbeville, S. C., has asked the State Legislature for authority to enter into an agreement with the Georgia, Carolina and Northern Railroad Company for the erection of machine shops in that place.

The American Bridge and Iron Company of Roanoke, Va., will commence at once the rebuilding of their foundry and machine shops, recently destroyed by fire.

An extraordinary heavy snowfall at Roanoke, Va., last week caused the collapse of the roof which covered the blacksmith shop of the Roanoke Machine Works.

The Weimer Machine Works Company of Lebanon, Pa., have shipped the first blowing engine to the Tennessee Coal, Iron and Railroad Company, at South Pittsburg, Tenn. The engine is specially designed for heavy work. The dimensions are: 50-inch steam cylinder, 96-inch air cylinder, 60-inch stroke. The piston speed is 400 feet per minute at 18 pounds pressure. They have also shipped the Weston Furnace Company, Manistique, Mich., and the Detroit Iron Company, Detroit, Mich., engines 36-inch steam cylinder, 72-inch air cylinder, 48-inch stroke. The Cherokee Iron Mfg. Company of Rusk, Texas, have placed an order for a complete furnace top with gas seal arrangement, and one 36 x 72 x 48 inch blowing engine. The following cinder cars, a patent of the company's, have also been shipped: Colorado Coal and Iron Company, Bessemer, Col., three; Kemble Coal and Iron Company, Riddlesburg, Pa., one; E. & G. Brooke Iron Company, Birdsboro, Pa., two, and Woodward Iron Company, Woodward, Ala., two. There are now over 100 cars in use in all parts of the country. The new rotary blower designed and patented by them is nearing completion. It is a positive blower, and will give a blast pressure of 8 pounds per square inch.

Borden, Selleck & Co., 48 and 50 Lake street, Chicago, issue a neat 48-page catalogue descriptive of the Harrison Conveyor, intended for handling coal, sand, clay, ores, shavings, sawdust, lime, cement, &c. This conveyor is made entirely of wrought iron or steel. It consists of a chain in sections of 13 to 25 inches in length, firmly joined together by a patent link, which at the same time fastens to the chain at equal distances a metallic push plate of diamond shape for moving the product. A wooden or composite trough is used, which is made to conform with the shape of the push plates. Being operated as an endless chain, it can be used over any number of wheels. The catalogue illustrates the details of the conveyor and methods of use in handling various materials. The illustrations cover almost every condition to be met in transferring coal and similarly handled products.

The Trethewey Mfg. Company of Pittsburgh, manufacturers of rolling mill machinery, have just completed the erection of a crocodile shear that will cut steel or iron boiler plates up to ¾ inch thick and any diameter up to 6 feet. The shear is specially adapted for making circular cuts, and was built for the Moorhead-McCleane Company, proprietors of the Soho Iron and Steel Works, at Pittsburgh. It weighs about 6 tons. In a recent test a similar shear cut 157 boiler plates 58 inches in diameter and 7-16 inch thick in five hours. These machines are built in smaller sizes, capable of cutting up to ¼ inch in thickness and any diameter up to 6 feet. The same firm are building for Mackintosh, Hemphill & Co., Limited, of Pittsburgh, five 3 and 5 ton hydraulic cranes for use in the new steel plant of the Ashland Steel Company, at Ashland, Ky. The firm are adding to their machinery equipment a 2-ton steam hammer for forging shear knives. In addition to the work mentioned above they have a number of other orders on hand that will keep them fully employed for some time.

Among shipments made during the present week by the Leechburg Foundry and Machine Company of Pittsburgh, may be mentioned the following: One Aiken patent hydraulic billet mold machine with intensifier, shipped to the Detroit Steel and Spring Works of Detroit, Mich.; 10 hydraulic converter bottom lifts to the new rail mill of the Pennsylvania Steel Company at Sparrows Point, and one 32-ton fly wheel in eight sections, with one 18-inch hammered shaft for same, to the Columbia Rolling Mill Company, at Columbia, Pa., and

a large lot of blast furnace machinery to the Max Meadows Furnace Company at Max Meadows, Va. On account of pressing orders the plant will be closed down for a few days only in order to take stock.

William Tod & Co. of Youngstown, Ohio, have recently made a purchase of land adjacent to their plant. For the present the firm will use it for storage purposes, but it will probably be used before long to accommodate a proposed increase to their foundry. The firm have recently added a new 2-ton steam hammer to their forge department. They have also built a heating furnace, put in a new boiler and added a number of new tools. They usually expend about $10,000 per year in the way of improvements, and the present year is not an exception in that respect.

The Lake Shore Iron Works is a new corporation organized at Marquette, Mich., to rehabilitate the works abandoned by the Iron Bray Mfg. Company when they removed to Duluth. They will manufacture a general line of machinery, with special attention paid to mining machinery. The new company are organized with an authorized capital of $100,000, of which $70,000 is paid in. The first board of directors comprises J. M. Longyear, Peter White, Charles Y. Osburn and Alfred Kidder of Marquette, and Carlos D. Shelden of Houghton. J. M. Longyear is president, Peter White secretary and treasurer and Seymour H. Holley general manager. The boilers and engines are in shape for use at once. It is the intention to start up the works just as soon as the machinery can be placed in position, and within two weeks it is expected that the company will be in the field for business They will from the start turn out castings and machine work of every description, and as soon as possible will branch out into the general manufacturing business, for which their location, capital and equipment fit them.

Articles of incorporation have been filed at Albany of the Whitehill Engine and Pictet Ice Machine Company of Newburg, N. Y., with a capitol stock of $500,000. Robert Whitehill is president; William C. Dornin of New York City vice-president; Clarence L. Whitehill secrerary, and L. M. Smith, treasurer.

The Berlin Iron Bridge Company of East Berlin, Conn., are now putting up what will be the finest paper and pulp mill in the world at Madison, Maine, for the Mfg. Investment Company of New York. The buildings will consist of a machine shop, 72 feet wide by 183 feet long, and one story high; a wash room, 74 feet wide by 182 feet long, and two stories high; a digester building, 62 feet wide by 221 feet long, and three stories high; a wheel house 73 feet wide by 78 feet long and two stories high. All the supporting parts of the building are made of iron, as the very heavy loads of a pulp mill necessitate a very heavy construction. The side walls are made of brick supported by iron girders and columns.

The Billings & Spencer Company, Hartford, Conn., are putting up a new forge shop 40 x 250, with an L 40 x 40 for repair shop. This improvement will give room for 60 drop hammers and other forging machinery.

The Sulzer-Vogt Machine Company of Louisville, Ky., have just closed a contract with the Indiana Brewing Company of New Albany, Ind., and also with the Paul Keising Company of the same place, for ice machinery, and also with Henry Conrad for one 15-ton refrigerating plant and ice machine combined. The firm are now working full time getting their machines ready for next season's business, and are in most prosperous shape. They recently purchased a large plot of ground adjoining their present establishment, on which they are erecting a complete boiler tank for making their own boilers, tanks, &c., and which will take the place of their present boiler yard, which is located three blocks away.

The Springfield Emery Wheel Mfg. Company of Bridgeport, Conn., who a short time ago found themselves in financial embarrassment and under the necessity of calling a meeting of their creditors, have been granted the extension of time asked for in which to pay their debts. This guarantees the continuance of the business. The management will be changed somewhat, although the valuable services of the founders will be retained. The works have not lost a day during the trouble, but owing to circumstances only about a two-thirds force was employed. The works will now be pushed to their fullest capacity, and with the large line manufactured and a good supply of orders on hand the outlook is very promising.

The Benicia Agricultural Works of Benicia, Cal., recently turned out what is said to be the largest roller chain traction engine in the world. It weighs 20 tons and will pull 40 plows, doing the work of 70 horses over and above the power required for propulsion. Straw is the fuel used.

The Sebastian-May Company of Cincinnati, Ohio, have been compelled, owing to the rapid and continued growth of their business, to obtain larger manufacturing facilities, and have therefore decided to locate at Sidney, Ohio. This is the third time within seven years that this establishmsnt have outgrown their quarters and been compelled to enlarge. At Sidney they have secured a large tract of land and have completed the erection of buildings especially equipped with the best tools and special appliances obtainable for the rapid production of their lathes.

Hardware.

The private copartnership existing under the name of the Hazen Company, factors for sale of iron and steel, composed of John F. Hazen, W. L. Finch and George E. Day, have been incorporated under the laws of Ohio, with a capital of $300,000. The stock is held by the three gentlemen named and W. H. Freed, president of the American Cotton Oil Works and Col. W. P. Anderson. The business will be conducted as heretofore. The company, we are advised, are erecting a large wire mill and wire nail factory at Anderson, Ind., and, having purchased the Cincinnati Wire Company's plant, will move the same to that city as soon as it is completed. Their general office will remain in Cincinnati.

The coal hod business of Victor Knecht and that of the Cincinnati Screw and Tap Company will, as soon as the necessary buildings are completed, be operated under one roof, the two concerns consolidating and continuing to do business under the name of the Cincinnati Screw and Tap Company. The officers of the new organization are Victor Knecht, president; Louis A. Bode, vice-president, and Joseph Wuerke, secretary and treasurer. The capital stock of the company is $100,000, of which $65,000 is paid in, and the business will be the production of coal hods specialties in stamped work, screws, taps, dies, &c. They will employ 80 hands. A plot of ground 100 x 250 feet on Beekman street adjoining the C., H. and D. R. R. has been purchased, upon which will be erected at once an L-shaped building of brick, three stories in hight, to cost $15,000

The removal of the National Metal Edge Box Company into their new quarters at 621-623 Cherry street, Philadelphia, will, in connection with the recent enlargement of their paper mills at Readboro, Vt., increase their capacity about threefold. The new building is a substantial brick structure, 40 x 120 feet and five stories in hight.

John H. Clay, 1320 Ridge avenue, Philadelphia, manufacturer of fire hose and supplies, reports that he has a number of contracts for fitting up mills and cities with complete fire service. Mr. Clay makes a specialty of this class of work.

John Fuller, Sr., Seneca, Kan., is preparing to put in appliances for retinning the interior of soda fountains, which has never before been done in the West. Work in this line has gone to Boston formerly.

C. Rogers & Bros., Meriden, Conn., manufacturers of spoons, forks, knives, &c., advise us that the volume of their business has been very large and satisfactory. They have made large additions to their plant, and expect to increase the same next January.

Pullman Sash Balance Company, Rochester, N. Y., report that their trade with the railroad companies is constantly increasing, and that they have recently received an order for 500 pair of car window balances from a well known railroad company. They offer to send any railroad company a pair of car window balances, free of charge, to use as sample. This balance is referred to as being very attractive, and as fast superseding the old style of locks.

Hart Mfg. Company, Cleveland, Ohio, manufacturers of Duplex die stock, report that the demand for these goods is constantly increasing. About a year ago they enlarged their works, and now are under the necessity of adding new machinery to their plant to enable them to keep up with orders. They also refer to the large export orders they are receiving, especially from Australia, Germany and Great Britain.

Dixon Crucible Company, Jersey City, N. J., report that in 1890 their business was of greater volume than any previous year, although prices have declined with the increased output of goods. The demands of trade have taxed their facilities to the utmost, which will make it necessary for them to enlarge their plant during the coming year.

Combination Folding Bathtub Company, Marshall, Mich , state that their present capacity for the output of their folding bath is about 50 per week, and that they are now four weeks behind orders. They are intending soon to double their capacity, when they will be in a better position to promptly fill orders. They deal principally with the hardware trade, and their business extends throughout the United States.

Miscellaneous.

The Commonwealth Natural Gas Company of Pittsburgh, with a capital stock of $10,000, were granted a charter on the 17th inst. The company propose to produce gas in Hampton, McCandless, Richmond, Pine, West Deer and Indiana townships and furnish it to the people in Pittsburgh and Allegheny. The directors are Jacob B. Decker, Thomas M. Erwin, Norman W. Nolan, Frank B. Dodson and John Hancock, all of whom have an equal number of shares of stock.

The capital stock of the Peoria (Ill.) Metal Spinning Company has been increased to $75,000, and the name of the concern changed to the Buckeye Mfg. Company.

Twenty-seven locomotives are now under construction in the Baldwin Locomotive Works, Philadelphia, for service in New South Wales.

The new car wheel works at Jefferson, Texas, has been completed, and is awaiting the final construction of the Lone Star Iron Company's furnace, which will go into blast in a month or so. This company are now putting in 45 charcoal kilns.

J. B. Hastings, the inventor of the Hastings wire nail machines, is organizing a company at Salem, Va., to establish a wire nail mill in Salem and a similar plant in Roanoke. Sites have been selected for both plants.

The Acme Sewing Machine Company are negotiating for the establishment of a factory at Harriman, Tenn.

Negotiations are said to be pending between the Lexington Development Company, Lexington, Va., and the owners of a stove foundry at present located in Ohio for the transfer of that plant to Lexington.

It is stated that the Charleston Mining, Mfg. and Improvement Company of Charleston, W. Va., are negotiating for the location of a brass and iron works now operating in New Jersey.

The Chattanooga Saw Works are pushed to fill their orders. Besides saws they are now making a specialty of planer and molder knives.

The St. Louis, Arkansas and Texas Railroad Company have secured a site at Pine Bluff, Ark., for the erection of car shops.

The St Louis Expanded Metal Company are reported to be negotiating at Fort Worth, Texas, for the establishment in that place of a branch plant.

The Norfolk and Western Railroad Company will establish car shops at Radford, Va.

The Schofield Metal Cross Tie Company have been incorporated at Chattanooga, with a capital stock of $100,000, which may be increased to $200,000. L. Schofield is president.

The plant of the Indianapolis Car Works was sold on the 18th inst. to a syndicate of creditors represented by Edward Pollock of Cincinnati for $52,500. The receiver had reported the appraised value of the plant at three times the amount realized. The purchasers, it is reported, propose to operate the plant themselves.

The Connecticut Motor Company, Plantsville, Conn., manufacturers of electric motors for all purposes, have recently adapted several important improvements heretofore used only on the larger motors to the smaller sizes, viz.—2, 3 and 5 horse-power, which machines are made specially for use where power is required in moderate units and where incandescent electric circuits are available.

Among recently authorized corporations in Illinois are the following: Prouty Street Car Motor Company, at Chicago; to manufacture street car motors; capital stock, $300,000; incorporators, Enoch Prouty, J. L. Francis and W. S Gooding. Thomas Brothers Mfg. Company; to manufacture brass goods and machinery; capital stock, $30,000; incorporators, Horatio Thomas, Parker M. Lewis and Charles A. Buell. Walsh Torch Company; to own and control patents of gasoline torches, blow pots, &c., and to manufacture same; capital stock, $50,000; incorporators, John C. Walsh, Edward J. Hanley and Ole A. Johnson. Lytle Springs Company, at Aurora; capital stock, $100,000; to manufacture spiral springs; incorporators, J. O. Curry, George Meredith and E. Q. Hobbs.

The Cowles Electric Smelting and Aluminum Company have removed their office to their works at Lockport, N. Y.

Work on Fort Warren and other fortifications in Boston harbor will be finished next spring. The sea wall will be heavily armored with nickel steel.

The Iron Age

New York, Thursday, December 25, 1890.

The Steel Rail Trade.

The past few weeks have been a period of particular anxiety to those engaged in the steel rail trade. For many years the outlook has not been so discouraging. Orders were very scarce, and even the wealthiest of the mills were made to feel keenly the tightness of the money market. Prices were steadily crumbling away, and the first appearance of large *bona fide* orders was expected to become the signal for cutting to a point close to the lowest ever reached in the history of the industry. Some hopes arose when the Carnegie interest purchased the Allegheny mill, since it was known that negotiations were pending for the consolidation of two Eastern mills, or the purchase of one by the other. The whole matter fell through on the eve of its consummation; and it looked again as though fierce competition would make the manufacture of rails an unprofitable or a losing business to all who were engaged in it. Although it has been frequently clothed with arbitrary and pernicious powers by irresponsible outsiders, the existing association did not possess a shadow of influence over the course of values. Its allotments were disregarded habitually. It was evident that a serious crisis had been reached in the steel rail trade, and that some means must be devised to tide over a dangerous period.

The tendencies in the steel rail trade and the relative position of the different mills have been admirably reviewed in the article published in the Philadelphia *Manufacturer* over the signature "Ironmaster," republished in *The Iron Age*. Exception might be taken on some minor points, such as the relative capacity of the mills and their total possible output. But the fact remains that the seven concerns which occupy any position in the rail trade can each claim advantages and are all powerful, so that unbridled competition among them for work which cannot keep all running would inflict great injury to every one without exception.

The natural result has been that the majority of the mills have been inspired with a desire to make any reasonable concessions for the sake of harmony. All that their managers asked was that they be given a chance to secure a moderate profit. A series of meetings were held, at which a number of different propositions were presented and discussed. They led to little encouragement, but were persisted in until a final meeting was held last week in this city. Even then the situation seemed hopeless until ultimately a plan was brought forward upon which all of the mills represented officially agreed provisionally.

The details of the plan were not made public, but it was understood that it closely resembled the arrangement at one time in force among the Ohio Valley cut nail works.

Percentages were allotted to the mills, the three Western concerns, Illinois, Carnegie and Cambria receiving a fraction over two-thirds of the whole, while the four Eastern mills nearly shared alike the remaining third. It was quite generally believed that the plan would be adopted, but at the last moment one Eastern mill declined to sign, and the arrangement has gone to pieces, with little prospect that anything can be done. It is only too probable that demoralization will follow in the Rail trade, which will not be without its effect in other allied lines of the business. There is only one branch which will regard the collapse of the negotiations without disappointment. To the manufacturers of soft steel billets and slabs the organization was expected to become the source of some anxiety. Some of the rail mills who also produce large quantities of soft Bessemer stock might have believed it to be to their interest to lower general costs by keeping their converting plants working to full capacity. But even there the future could have been very little worse than the present.

The Financial Situation.

The signs are accumulating that confidence is returning among monied men, and that the blight of restricted business operations will be forgotten at no distant date. There can be no question that capitalists have been badly frightened. We know of cases in which large sums of gold coin or certificates were locked away in safe deposit vaults simply because the owners were afraid to entrust it to anybody or to purchase securities however cheap they might appear. The banks, too, have been more liberal and the temptation to divert money into Wall street to secure exceptionally high rates on call loans has well nigh disappeared. Long time loans have been made at moderate rates of interest, and gold has come to us from abroad in payment of goods forwarded, the supply of American securities to be offered for sale at any price by embarrassed foreign speculators having given out. The aggregate amount of stocks and bonds which have been tranferred from foreign to American ownership must have been enormous.

The strain has been borne exceedingly well in nearly all departments of industry, commerce and finance, so that American business men may well, at no distant date, look back upon the troubled period with the renewed conviction in the strength and resources of this country. With confidence being established, as is now doing, credits will be more liberally extended, and old concerns and new enterprises will again go forward. The situation does not warrant the belief that the rush of activity will begin again very soon. The conviction that all danger is over can only be the creation of accumulated favorable evidence. Full confidence can only come slowly, but much is gained when it is generally acknowledged that the worst is certainly over and when every day brings its budget of encouraging news. A good many business men feel that natural conditions will work a sure cure, and that the intervention of legislators can only do harm. So far as the iron trade is concerned, the action of the majority of consumers, and of some large producers indicates that a somewhat lower level of prices is looked forward to as the basis for transactions covering the winter months. The heavy sales of steel at low prices clearly prove that. It is conceded, too, even by some of the producers, that next year's ore and fuel contracts must be made on a lower range. So far as ore is concerned, we understand that some of the lake mining companies express the fear that a reduction of even more than $1 a ton will have to be conceded. Should this prove to be the case, then there will be no obstacle to the development of an enormous demand.

Sixty Years of Peace.

A curious fact has recently been brought out in connection with the proposed establishment of a Western branch by a large and very wealthy Eastern manufacturing concern. The company's intention of transferring a large part of their business to the West had no sooner been made public than the managers were, as usual, overwhelmed with offers of free sites, bonuses and all sorts of other inducements from enterprising town boomers. It would have been easily possible for them to have made arrangements in some localities that would have given them immense advantages over their competitors, if the matter had resolved itself into the simple question of an available site in close proximity to their Western market. The best offer would then have won the prize of securing this reputable establishment. But there were other considerations of greater weight to the management than a free site, a bonus, free fuel, exemption from municipal taxation or any other pecuniary inducement. The original concern, employing thousands of men, had never had a strike in its existence of more than half a century, and the managers proposed to lay the foundation for a similar record for their Western branch. They had enjoyed 60 years of peace, of entire immunity from labor troubles, and desired these happy relations with their workmen to continue. The selection of a site involved the choice of a location which would be healthful for their employees and enable them to enjoy agreeable surroundings. This was regarded as the most important point to settle, consistent with favorable transportation facilities and other essential requirements for cheap manufacturing.

From this statement of the company's position, the keynote of its universally pleasant relations with its workmen will

be apparent. They are not regarded wholly as machines performing certain functions in accordance with the requirements of the company. They are human beings, with tastes, desires and ambitions, and their welfare is a matter of sufficient solicitude to be a leading consideration in the selection of a site. Employers who display such kindly impulses in this respect must surely be influenced by the same sentiments in the daily treatment of their working force. It is not a mere accident, a curious exception to the usual history of industrial establishments, that this concern has for 60 years escaped without a labor trouble. Wise counsels and prudent management must have contributed to this remarkable record. The time covers a succession of periods of prosperity and intervals of depression which must have affected wages in this establishment as well as in all others, and skillful management must have been required to preserve harmonious relations both in times of very high prices and very low prices. The peculiarities of the case are intensified by the statement that these works manufacture iron and steel.

So far as we are aware, no special remedy nor ingenious conciliatory device for preventing labor troubles has ever been adopted by this establishment. Cooperation does not exist in any form, nor is profit-sharing with the employees practiced. The works are run in the orthodox way, with the managers of the company managing affairs in their own style, employing hands of their own selection, and paying them what they consider fair wages. There is no socialism nor communism nor any other theoretical method of reforming human affairs in vogue in the workshops of this company. The owners own and manage, and the workmen perform their tasks and receive their pay. In this case the element of fair dealing between master and man appears to be the sole influential power that has been able so far to makes strikes unknown. This remarkable industrial history proves that strikes can be avoided, that there is a way of circumventing labor agitators and of allaying discontent in advance and not allowing it to ferment until it reaches fever heat. Surely the most successful manager is not he who always beats a strike, but he who is always able to avoid one.

A meeting was held at Des Moines, Iowa, on the 18th inst. by the Railroad Commission of that State and a sub-committee of the Uniform Classification Committee of the several freight associations of the Western railroads. J. W. Midgeley of the Southwestern Freight Association was the principal spokesman for the railroad people, and urged the adoption of the uniform classification. He stoutly protested that the new classification will not advance rates in general, and presented numerous points in which the proposed classification will be superior to the present different and conflicting systems. It is understood that Mr. Midgeley's influence and persuasive eloquence had much to do with the adoption of the uniform classification by the Warehouse and Railroad Commission of Illinois. If his arguments are successful with the Iowa Commission also, he will have made very encouraging progress toward the realization of his hopes.

Instruction of Employees.*

An employer who hires others to work with machinery, in addition to providing them a safe place and safe appliances with which to work, has a responsibility with reference to instructing them as to the use of such appliances, and warning them of the dangers incident to their employment, which cannot be disregarded without entailing upon himself liability for the neglect of that duty. An employee who enters into a dangerous employment contracts with reference to the dangers of which he knows, or from his experience ought to know of, and those risks he is held, as a matter of law, to assume. There are two classes of dangers which a servant is held to have assumed: 1, those which are plainly apparent to him in the course of his employment, and, 2, those which are known to him as a result of his experience in the employment. This is said with reference to the inherent dangers of the employment, and not with reference to the condition of machinery or appliances which we have heretofore considered. The risks which may be assumed because they are plainly apparent must be such as the servant may be reasonably expected to comprehend. A danger may be said to be plainly apparent to a man of mature years, where it could not be said that a boy would realize the presence of the same danger. It is not so much the character of the danger always, as it is the intelligence and understanding of the servant. The second class depends for determination, in like manner, upon the servant rather than the nature of the risk, and is defined only by the experience of the employee. Therefore it is wise in the employer if he take the precaution, as each newly employed servant takes his place, to see that he is specifically warned against such dangers incident to his work and instructed as to the means of avoiding them. In most cases this is the work of a few moments, and if systematically done would result in the prevention of many accidents and the damage suits attendant thereon. In deciding a case in which the question of the inexperience of an employee was involved, the court said upon that point: "The only other defense to the plaintiff's right to recover is that the danger was so plain and open to the observation of any one that a boy of 14 years, wholly unacquainted with the working or use of machinery, if he undertook to obey the order, assumed all the risks attendant thereon, and cannot therefore recover; and the learned counsel for the appellant contend that the second question, which submits that question to the jury, should not have been submitted to them as a question of fact, but should have been decided by the court in favor of the defendant, as a question of law. We cannot agree with the learned counsel for the appellant in this contention. It is not all clear to our minds that a boy 14 years old, wholly inexperienced in the use of or in working about machinery, would clearly comprehend the dangers attendant upon the work he affirms he was directed to do. If he was directed to do the work, as we believe he was for the purpose of this case, without any caution or warning on the part of the person directing it to be done, he would be very likely to do it without much thought as to its being dangerous or otherwise. The danger attendant upon the work would not be likely to occur to him, as he says it did not. It is this tendency to thoughtlessness on the part of the boy, when without experience, which makes it incumbent upon the experienced master to caution him when he puts him in a place of danger."

In another case involving this principle it is said: "It was certainly an act of negligence on the part of the foreman to order a little boy to oil such dangerous machinery while it was in motion. He was too immature to form a correct idea of the danger of the task assigned him, and relied entirely upon the judgment of the foreman. Having intrusted the foreman with the management of the mill, the owners are responsible for his conduct."

The responsibility placed upon employers of inexperienced servants in dangerous work is a heavy one. The law charges the employer, under such circumstances, with all the responsibility, and until by careful instruction he has removed the burden of that responsibility the question of negligence on the part of the servant does not come in. The degree of instruction required must in the nature of things be governed by the circumstances. The nature of the work, the intelligence of the servant, the degree of danger and his previous experience all go to make up the circumstances under and in view of which this employer's duty must be discharged. But, in general, it may be said that the instructions must be such as will give ths servant a full realization of the danger to which he is subjected, and must show him the means by which he can protect himself, and, further than this, the danger of doing otherwise than as directed must be shown to him. As an illustration may be cited a case in which it was the duty of a servant to place certain manufactured articles upon a coil to dry. He had been ordered specifically to put them on at a certain point, at which there was no danger, and had been told to put them nowhere else. He disobeyed this order, and in putting them on at another place fell into a vat and was injured. The court says on this point: "It is not to be expected that a child of 11 years will bear in mind, and always follow, a mere direction to put his work in one place, when he knows no reason why he may not put it in another place near by as well. Common experience teaches not to look for such implicit obedience to orders

* Copyrighted, 1890, Law News Bureau.

from him as may be required of adults. The direction to a child, therefore, must be accompanied with such explanation of danger as to enable him to understand it."

In another case, which has become the leading authority in Massachusetts upon this question, Judge Gray said: "The notice which the defendants were bound to give plaintiff of the nature of the risks incident to the service which he undertook must be such as to enable a person of his inexperience in the business intelligently to appreciate the nature of the danger attending its performance. The question, indeed, on this branch of the case, is not of due care on the part of the plaintiff, but whether the cause of the injury was one of which he knowingly assumed the risk, or one of which, by reason of his incapacity to understand and appreciate its dangerous character, or the neglect of the defendants to take due precautions to effectually inform him thereof, the defendants were bound to indemnify him against the consequences. . . . The obligation of the defendants would not necessarily be discharged by merely informing him that the employment itself, or a particular place or machine in the building or room in which he was set to work, was dangerous. Mere information in advance that the service generally, or a particular thing connected with it, was dangerous, might give him no adequate notice or understanding of the danger which would necessarily attend the actual performance of his work." It will thus be seen that in the employment of inexperienced labor about machinery grave responsibilities are incurred, which may be avoided by the exercise of care, but which, in the absence of proper precautions, are liable to be of considerable moment.

The English Channel Bridge.—The latest information in regard to the bridging of the English Channel will be contained in the report of the French Commission on Bridges and Roads, based upon surveys and other general engineering work performed last summer by M. Renaud, a naval engineer, and by M. Duchanoy, a mining engineer. The depth at every point is known, as well as the character of the ground upon which the bridge pillars are to be erected. The bridge is not to be built in a straight line, but it will make a vast curve, passing over a portion of two banks or ledges, the Colbart and the Varne. The arches are to be at a distance of from 500 to 300 m. from each other, except in the vicinity of the two banks, where navigation is impossible, and where, consequently, the distance separating the arches can be reduced to 250 and even to 100 m. The bridge bed on which the railroad tracks are to be placed will be 55 m. above the level of the sea at high tide, being supported by steel pillars 40 m. high, resting upon large masonry piles. The bridge is to have a total length of 38,600 m., and the cost is estimated at 850,000,000 francs. The annual freight traffic is estimated at 5,000,000 tons, which would produce receipts amounting to 125,000,000 francs. No data are given as to the estimated amount of passenger traffic.

Canadians are expecting to build another suspension bridge across the Niagara from Fort Erie to Buffalo.

Washington News.

(From Our Regular Correspondent.)

WASHINGTON, D. C., December 24, 1890.

Commodore Folger, speaking of the gun factory at the Washington Navy Yard, said: "In the matter of naval ordnance we far surpass England and equal France and Germany. The Germans are making the best high power guns just now. Our guns are as good, but we will not be satisfied until we have unquestionably the best gun in the world." The Commodore said that he did not believe in talking too much about such matters, as results must speak for themselves. He called attention to his annual report, in which he announced the fact that the buildings of the gun factory proper have been completed within the past year, and all the machinery in the south gun shops is in full operation. He says that the 110-ton overhead traveling crane has been erected on its supports in the north gun shop, tested and found to be satisfactory. A few changes in the hoisting purchase are being made by the contractor, upon the completion of which the crane will be accepted. The large gun lathes for this shop have been contracted for by the Department with Messrs. Wm. Sellers & Co. of Philadelphia, Pa. This contract requires the completion and erection of two of the lathes by January 10, 1892, and all of the lathes within 33 months from date of the contract, or by April 10, 1893, and the contract date for the delivery of the forgings for 12 and 13 inch guns is made to correspond with the deliveries of these large machine tools, that there may be no delay in the completion of the main batteries of the battle ships.

The large gun lathes of this contract will be superior in design, capacity, handiness, accuracy of work and finish to any similar machine tools now in use abroad. Tools of this class and size are at present only manufactured by two or three firms, and these in England and France. The shrinkage pit and gun carriage shop have been completed and are in full operation. The railway siding, which has been constructed from the Baltimore and Potomac Railroad into and around the navy yard, has greatly facilitated the delivery of gun forgings and the shipment of ordnance material.

During the year several special machine tools, notably boring mills and boring and turning lathes of the firm of Bement, Miles & Co. of Philadelphia, Pa., have been added, and mention is made of their efficiency and the merits of the manufacture. With the increase in the quality and the amount of the machinery at the naval gun factory and in the adoption of fixed and advantageous methods of shop administration and of settled principles, a large economy has resulted in the production of all material. This is especially apparent in the manufacture of tools, of projectiles, of guns and carriages. The shops have been completely provided with an electric lighting plant and it is at present practicable to work at night in case such course should be demanded. A contract has been made with the Morgan Engineering Company of Alliance, Ohio, for a 15-ton crane, which will be placed upon the tracks of the 40-ton crane now in use in the south gun shop, the latter having been found insufficient to perform the work required of it. These tracks, which now reach but to the shrinkage pit, will be extended throughout the whole length of the north gun shop in order to avoid the disadvantages of shifting weights from one crane to another. The gun factory is at present under the charge of Commander Charles O'Neil, to whom the bureau is indebted for many valuable improvements and suggestions in the development of the machine plant and of the naval material.

Under authority of the acts of 1887 and 1889, the Ordnance Bureau purchased a tract of 659 acres in Charles County, Md., on the Potomac River, and about 26 miles below Washington. A wharf has been built, magazine and instrument houses erected, butts put up, gun platforms for all calibers of guns constructed, and all preparations made for prosecuting the necessary work of proving and ranging guns and testing power, carriages, projectiles and other ordnance material. This important work has been in charge of Ensign R. B. Dashiell. It is proposed to transfer to this point all the work thus far done at the Annapolis proving ground, and it is believed that the difficulties and risks which have attended such work at Annapolis will no longer exist. The greatest advantage to be realized by the transfer, however, will be the saving in time and cost of transportation from the gun factory to and from the proving ground.

It is anticipated that the advantages of the direct contact of the manufacturing establishment with the proof of the material will be at once apparent and result in increased efficiency in all departments of the manufacture.

The Naval Board of Construction have before them the bid of the Bath Iron Works for the construction of Admiral Ammen's harbor defense ram for $930,000. The Bath company, who were the only bidders, in their bid stipulate that the 17 knot speed requirement should be omitted in the contract. The Naval Board, which is composed of the chiefs of the Bureaus of Construction, Engineering and Ordnance, recommended the acceptance of the Bath company bid provided they withdraw their conditional stipulation. The agent of the company has withdrawn the condition and the bid will be accepted. The bids for the torpedo boat are still under advisement. The bid of the Hereschoff company for a small vessel will be accepted.

Secretary Blaine is utilizing every means of bringing about practical results from his efforts in the direction of encouraging trade between the United States and the republics of South America. He has just made public the following circular:

Sir: In pursance of the recommendations of the International American Conference, the Bureau of the American Republics has been established at Washington. The object of this bureau is the dissemination of authentic and useful information concerning the commercial conditions and advantages of the several American republics for the benefit of manufacturers, merchants and others who may be interested in the extension of trade. It is proposed to issue at frequent intervals, for free distribution to the public, printed pamphlets or bulletins, containing:

1. The existing customs tariffs of the several countries and all changes of the same as they occur, with such explanations as may be deemed useful.
2. Official regulations which affect the entrance and clearance of vessels and the importation and exportation of merchandise at the ports of the several countries; also, circulars of instruction which relate to customs procedure or to the classification and appraisement of merchandise.
3. Ample quotations from commercial and parcel post treaties between any of the American republics
4. Important statistics of commerce and other information of special interest.

The bureau will at all times be available as a medium of communication and correspondence to persons applying for reasonable information pertaining to the customs tariffs and regulations, and to the commerce and navigation of the American republics; and any suggestions as to the character of information that may be found useful will receive careful attention. While the utmost care will be taken to insure accuracy in the publications of the bureau, it will assume no pecuniary responsibility for inaccuracies that may occur therein.

Address all communications to the Bureau of the American Republics, Department of State, Washington, D. C.

Very respectfully yours, JAMES G. BLAINE.

Future Growth of the United States.

Robert P. Porter, superintendent of the Census Office at Washington, in submitting official statistics of the present population of the United States, refers to previous estimates of the best recognized authorities in vindication of the correctness of the latest enumeration. He quotes approvingly an article published in the *Atlantic Monthly* for October, 1873, in which General Walker, then superintendent of the census, dealt with the subject of estimates of population, his article being entitled, "Estimates of Population." After setting forth, comparing and discussing the estimates of Elkanah Watson, DeBow and Kennedy, and the elements which affect the ratio of increase or decrease of population, the effect of the war upon population, &c., General Walker continued:

If we shall be able to show, or, rather, if a simple appeal to the daily observations of our readers shall suffice to convince them, that these causes are likely to continue and even to operate with increasing force in the immediate future, we shall reach almost an assurance that the population of the United States at 1900 is to be brought down from its projected hight of 100,000,000, not only below 90,000,000, but even to 80,000,000, 75,000,000, or it may be 70,000,000. And indeed the expectation of the larger result never was a reasonable one, nor could the estimates of Watson and DeBow at any time have been justified by a comprehensive survey of the physical and industrial conditions of the country, or by reference to the experience of any race or people known to history. Geometrical progression is rarely attained and never long maintained in human affairs. Whenever it is found, the most improbable supposition which could be formed respecting it is that it will continue. Gibbon has shown that the further conquest is carried the wider and the weightier become the resistance and the hostility which the conquering power is forced to encounter. So it is with national growth, whether in wealth or population. Not only do the limitations of nature become more and more stringent by reducing the rate of increase, but that increase does of itself create moral and social, not to speak of distinctly political, tendencies which traverse its own course, and if not strong enough to defeat further growth or accumulation, do at least make every successive gain more slow and painful. It was sufficiently hazardous for Mr. Watson, writing after the third census, to predict an uninterrupted and unretarded advance for as many as five decades; but it was far more hazardous for Mr. DeBow, writing after the seventh census, to predict the continuance of the previous rates of increase for the remaining five decades of the century; more hazardous because the long continuance of that ratio was an argument for and not against a change.

The change came—came later even than it had been reasonable to expect it; it began when the people of the United States began to leave agricultural for manufacturing pursuits; to turn from the country to the town; to live in up and down houses, and to follow closely the fashion of foreign life. The first effects of it were covered from the common sight by a flood of immigration unprecedented in history. Even its more recent and more extensive effects have been so obscured by the smoke of war that the public mind still fails to apprehend the full significance of the decline in the rate of the national increase, and vaguely attributes the entire loss of population to the Rebellion. But a close observer must discern causes now working within the nation which render it little less than absurd longer to apply the former rates of growth to the computation of our population at 1880, 1890 or 1900. What rate will be substituted therefor it would be futile to inquire. As the line of agricultural occupation draws closer to the great barren plains; as the old Western States change more and more to manufactures and to commerce; as the manufacturing and commercial communities of the East become compact; as the whole population tends increasingly to fashion and social observance; as diet, dress and equipage become more artificial, and as the detestable American vice of 'boarding," making children truly "incumbrances," and uprooting the ancient and honored institution of the family, extends from city to city and from village to village—it is not to be doubted that we shall note a steady decline in the rate of the national increase from decade to decade. But it would be merely an attempt at imposture to assume that numerical data exist for determining, within eight or ten or twelve millions, the population of the country 30 years from the date of the last census. As long as one simple force was operating expansively upon a homogeneous people, within a territory affording fertile lands beyond the ability of the existing population to occupy, so long it was no miracle to predict with accuracy the results of the census. But in the eddy and swirl of social and industrial currents through which the nation is now passing it is wholly imposible to estimate the rate of its progress, even though we may feel sure that the good ship will steadily hold her course and in time round the point which hopes too fond had—on the strength of a fortunate run made upon a smooth sea, with favoring winds and following floods—predicted would be reached by the blessed year 1900. This much, however, may with diffidence be said: That the best of probable good fortune will hardly carry the population of the country beyond 75,000,000 by the close of the century.

Another Chicago Passenger Station.

Chicago now possesses five well appointed passenger stations, each used by from two to six railroad lines, except the Northwestern Station, which is used by one line only. The latest addition to these buildings, and the most magnificent of all, is the Grand Central Passenger Station, at Fifth avenue and Harrison street, opened to the public on the 8th inst. It cost $1,000,000, and is used by the North ern Pacific, Wisconsin Central, and Chicago, St. Paul and Kansas City railroads, with the Baltimore and Ohio expected soon to be added to the list. The building is described as follows:

The station covers an area of $3\frac{6}{10}$ acres. The frontage on Harrison street is 226 feet and on Fifth avenue 680 feet. The foundation of the building consists of piling, the length of the piles being 30 feet under the lighter parts and 50 feet under the main piers and the tower. The total length of piling driven was 9½ miles Each pile under the tower carries a load of 24 tons. On top of the piles are boxes of foot square oak timbers bedded and filled with concrete. Next follows a course of foot square oak timbers, 4 inches apart and filled in with concrete. An 18-inch concrete bed topped this, and on this bed the dimension stones are laid. The tower is 236 feet high from the foundation, is 27 feet square and weighs 6000 tons. The first 29 feet is built of Connecticut brown stone. There are 15 stories in the tower, nine of which are used for offices, the upper four of these being reached by a special electrical elevator, The clock is the second largest in the United States, having a dial 13½ feet in diameter. The hours are struck on a 5-ton bell by a hammer weighing 250 pounds. The pendulum weighs 700 pounds. This clock electrically controls all the clocks throughout the depot. The flagstaff rises nearly 60 feet above the tower.

The main waiting room is an enormous apartment 71 x 267 feet, with a ceiling 25 feet high. This room projects 27 feet west of the office building above. The floors and walls of which are carried on 16 heavy steel columns 24 feet long and 2½ feet in diameter. Two hundred and forty incandescent lamps light this noble room. The floor is of Champlain and the 8½-foot wainscoting is of Tennessee marble. At the south end of the waiting room is the ladies' parlor, a handsomely furnished room 32 x 40 feet. An 8 foot passage way leads from the center of the south and to the baggage rooms, and over this passage a double marble staircase leads up to the big dining room. 56 x 73 feet, on the mezzanine floor.

The carriage drive is a court underneath the west wing of the building and lies north of the train shed, opening on Harrison street with three full arches each 37 feet span and 21 feet high. This court is 146 x 117 feet, and is surrounded on three sides by a 16-foot sidewalk. The floor of this court is supported on 30 piers and 80 cast iron columns. In this lower space underneath the driveway are two 330 horse-power boilers, three engines to run dynamos, the power for running the three hydraulic elevators and two air compressors. The exhaust steam is used to heat the building. The engines furnish 550 horse-power and run five dynamos and two are light machines with a total lighting capacity of 127,000 candles. The air compressors furnish the power to operate the switches, block signals, the drawbridge and all crossing gates within 4 miles of the station.

The train shed consists of a single arched span of a radius of 59½ feet, making a clear span of 119 feet, with the roof projecting on either side a distance of 13½ feet. giving the shed a total width of 146 feet over all. The roof, of corrugated, galvanized steel and ⅜ inch ribbed glass, is supported on 15 latticed steel arches, placed at 40-foot centers, making the total length of the shed 560 feet. The sides and ends are open for ventilation. The entire floor is covered with lithogen pavement, the four platforms being elevated 10 inches above the rail. These platforms are 19 feet wide, and between them are three pairs of tracks, each pair occupying 23 feet. Midway between each pair of tracks there is a 9-inch sewer with numerous catch basins. A complicated and costly system of construction permits a stream of water to be turned on any part of the floor space, either platforms or tracks, the water escaping immediately to the sewer system below.

Through the center of the shed runs a conduit for a steam pipe to furnish heat to standing cars and to carry a system of electric wires from all trains to the annunciator in the train starter's office. The lighting is done by 60 groups of incandescent lamps, 90 32 candle power lamps at each end arch and seven powerful arc lights high up under the arches. Eleven tracks are employed in the passenger yard. Six tracks under the arch of the shed and one east and another west, eight in all, will be used exclusively for passenger traffic. The most easterly track will be used for express matter and the next two west of this will be used for incoming and outgoing baggage.

The number of foreign business firms in Japan when the last census was taken, almost a year ago, was 202, of which 94 were British, 37 German, 32 American and 14 French. Next to the British among the foreign residents Americans were the most numerous.

TRADE REPORT.

Philadelphia.

Office of *The Iron Age*, 220 South Fourth St., PHILADELPHIA, Pa., December 22, 1890.

There is not much room for remark in regard to the Iron trade. The position is in all respects about as defined in our last report, so that it is unnecessary to go over the ground again. Prices have shown a fair degree of steadiness considering the extreme dullness, and, although most articles are easier to buy, no quotable reduction has been made, except in Muck Bars, which for some time past have been out of proportion with other articles. No appreciable improvement in demand is expected until after the holidays, but it begins to look as though prices have pretty nearly reached bottom, as manufacturers in various departments have about decided that they had better close their establishments than to continue bidding lower and lower in the hope of securing business, which keeps as far away from them as ever. Mills have to close at this season anyway, and the length of time that they will continue closed will be determined after the turn of the year. But the position is probably not as discouraging as might be supposed from immediate appearances. The mere fact that there is no demand at present may mean that it will be just that much heavier when it does set in, although it must be conceded that on that point there is great uncertainty. Productive capacity is enormous, and up to this date has been utilized almost to its fullest extent. The question with the trade now is: How much of this capacity will be required to meet the demand during the coming year? Everything turns on this. If there is to be even a 5 per cent. shrinkage in consumption, it means lower prices, because each concern will endeavor to maintain its quota, and that can only be done by bidding under its competitors. For the present, however, it is impossible to say whether consumption will fall off or not, pending which there is a disposition to await developments before entering into important engagements. No one seems anxious to make offers to buy anything in quantity, and for the same reason sellers are not trying to force business on an unwilling market. The deadlock will be broken before long, but until there is a movement of that kind it is impossible to say what turn prices will take.

Pig Iron.—The demand for good Irons is surprisingly good considering the general dullness in business. Nearly all the favorite brands of both Foundry and Mill Irons (especially the former) are so well sold up that furnaces have practically nothing for immediate delivery. Orders for delivery during the first quarter of 1891 are coming in fairly well, and at about $18 for No. 1, $16.50 for No. 2 and $15 for Gray Forge there is very little difficulty in securing buyers for about the quantities that consumers usually require at this season. Of course there are Irons to be had for less money, and possibly good Irons, too, but it is a market in which a buyer at quoted rates must have precisely the brand he wants, and, as a matter of fact, anything that is not wanted is hardly salable at any price. Quite likely there is a good deal of Iron held under precisely these circumstances, but as yet there is nothing to indicate that there are any large quantities, or that the accumulations are more than usually burdensome. Buyers of round lots for cash have good opportunities for investment, however, but for the present appear to be unwilling to make bids, and, in fact, both sides seem to be "waiting for something to turn up." Small lots have been sold at about last week's quotations, and while there cannot be very much change from the present low prices, buyers have not yet shown any great desire to place orders for anything beyond 30 or 60 days' requirements. Sales of low grade Irons, part Cinder, have been made during the past few days to the extent of about 5000 tons, at prices varying from $13.50 to $13.75, according to point of delivery.

Muck Bars.—The market shows increasing weakness, and while some sales were made early in the week at $28.50 @ $29, delivered, lots were offered toward the close at $28, for spot cash, but not taken. It is, therefore, not unlikely that $28 @ $28.50, delivered, will be a fair average of the market for the next few days, but, as we said before, the feeling is weak and holders anxious to realize.

Steel Billets.—It is difficult to quote the market with exactness, but at the moment prices seem to be steadier at about $28.50, delivered, for Nail Slabs and $29 for 4 x 4 Billets. Some of the local makers quote higher figures, but Pittsburgh and Wheeling are said to be anxious sellers, and on any reasonable chance of a good sized order would probably name extremely low prices. But for the present $28.50 is likely to be an inside rate, and even that might be withdrawn on the first indication of a better demand.

Steel Rails.—There is a fair amount of business in sight. Mills have orders enough to run them through January, and very fair prospects for increasing their lines before the close of the year.

Manufactured Iron.—New business comes in very slowly, and in the general anxiety to secure work to begin the year with prices have been cut in all directions. The result has not brought in as much business as was hoped for, but it has demoralized the market to such an extent that buyers hardly know how low to bid to be low enough. Some of the leading mills are inclined to make a stand at 2¢ for Plates, and 1.80¢ for Bars, although there is some talk of lower figures than these, but in the present unsettled condition of affairs it is difficult to say definitely what the market is. There is no reason to expect much change, favorable or otherwise, until there is a general renewal of demand, which is not looked for now until after the turn of the year.

St. Louis.

OFFICE OF *The Iron Age*, 214 N. Sixth st., ST. LOUIS, December 22, 1890.

Pig Iron.—The market is somewhat unsettled, the primary cause of which is the miners' strike in the Alabama district. One week ago circumstances then prevailing warranted us in predicting a settlement by January 1, but affairs have taken a different turn and it now seems more than probable that the strike will last for an indefinite period. The United Board of the Mine Workers of America have repaired to Birmingham and have taken charge of affairs there. The Amalgamated Association of Iron and Steel Workers have also passed a resolution to work only such material as has been handled by union men. From these facts the outlook is decidedly unfavorable for a speedy termination of the strike, and several furnaces have already blown out. What the outcome will be it is difficult to determine, but it needs no prophet nor the son of a prophet to predict that should this state of affairs continue prices will shortly be moving upward. Transactions during the past week have been of a limited character, the near approach of the new year causing somewhat of a lull in the demand. Prices are holding fairly firm, and in some cases a small advance is asked for special grades. We quote as follows for cash, f.o.b. St. Louis:

Southern Coke, No. 1 Foundry,	$15.50 @ $16.00
Southern Coke, No. 2 Foundry,	14.50 @ 15.00
Southern Coke, No. 3 Foundry,	14.00 @ 14.50
Gray Forge	13.50 @ 14.00
Southern Charcoal, No. 1 Foundry	17.25 @ 17.75
Southern Charcoal, No. 2 Foundry	16.75 @ 17.25
Missouri Charcoal, No. 1 Foundry	16.00 @ 16.50
Missouri Charcoal, No. 2 Foundry	15.25 @ 15.75
Ohio Softeners	17.75 @ 19.25

Bar Iron.—The market shows no particular change. The amount of business offered to the mills is not as heavy as a few weeks since, but yet is of sufficient volume to keep them comfortably employed. Lots from mill are quoted at 1.77½¢ @ 1.80¢; small lots from store are quoted at 1.90¢.

Barb Wire.—Business is unusually brisk in this department, more so than the most sanguine had expected. Prices have reached a level that has induced jobbers and retailers, who generally place their orders after the first of the year, to come in now and take advantage of them. Mills are very busy indeed, and it is intimated that higher prices will be in order after January 1. We quote as follows: Painted, 2.80¢; Galvanized, 60¢ additional; carload lots, 5¢ ₹ cwt. less than above prices.

Chattanooga.

Office of *The Iron Age*, Carter and 9th Sts., CHATTANOOGA, December 22, 1890.

Pig Iron.—The past week has developed nothing new, nor any changes in price in the Iron market. There appears to be a sort of lethargy at present permeating the movements of Pig Iron in all directions. Notwithstanding the prospect of there being a prolonged and serious strike among the miners through Alabama, there has been, as yet, no advance in price, and indeed the market all over the country seems hardly as stiff as it was ten days ago. The prospects are that there will be considerable trouble yet among the mining districts of Alabama. At this time it is very hard to tell what the future will bring forth in regard to prices of Pig Iron.

Louisville.

LOUISVILLE, KY., December 22, 1890.

Pig Iron.—No change in prices. It has been thought that the strike would influence the market and a slight advance could be expected; so far, however, there has been no change, though in the last few days it is evident that the furnaces are beginning to feel that there is no object in offering Iron at present prices, as the indications point to a prolonged strike. It is felt that the present stock of Iron will be shortly exhausted, and if the present heavy demand keeps up prices must advance. Consumers, however, before paying anything but a slight advance will use up the stocks already purchased, and in most instances buyers are in a position to run for 60 days if necessary on Iron already in yard. The last report of stocks shows that there is an increase in portions of the country, but in the South stocks will remain low for some time, owing to the reduced output. Consumption has remained large, though it is feared that after the first of the year it will fall off, owing to the trouble in money matters. For spot cash Iron has been offered as low as $9.75, Birmingham, for Gray Forge, but for future delivery $10 @ $10.25 for Gray Forge is the price asked. Car Wheel Irons have been extremely low; the best Southern Car

Wheel can be bought at $19.75, Louisville, for chilling grades. We quote:

Southern Coke, No. 1 Foundry	$14.00 @ $14.50
Southern Coke, No. 2 Foundry	13.50 @ 14.00
Southern Coke, No. 3 Foundry	13.00 @ 13.50
Southern Coke, Gray Forge	12.50 @ 13.00
Southern Charcoal, No. 1 Foundry	16.00 @ 17.00
Southern Car Wheel	17.00 @ 20.00

Cleveland.

CLEVELAND, December 22, 1890.

Iron Ore.—Certain dealers claim that there have been sales of Ore from the Chapin and other mines in the Menominee Range during the present month for next season's delivery, but maintain that the names of the purchasers can by no possibility be learned. Other dealers state emphatically that not a ton of next season's Ore has been sold, and that there is no possibility of sales before April or May. The fact, however, that Chapin Ore is always so desirable, together with the knowledge that inquiries concerning next season's prices have been made, gives some color to the report, which may or may not be true. Ore is going forward to the furnaces rapidly; about 30,000 tons have been taken from the docks in Cleveland during the past week. There are prospects of some sales of Bessemer during the next 30 days for all rail delivery this winter.

Pig Iron.—The usual holiday inactivity and dullness characterize the market. Nothing whatever is being done. It seems quite probable that no more Coke will be taken until there has been a change either in quotations or in the transportation rates. It is evident, however, that the outlook for good business in January and February is better than at any time during the past three months. Up to the time the stillness always accompanying the holiday season settled down upon the market, inquiries were numerous for Forge, Foundry and Bessemer Irons for delivery in February and March. That these inquiries will be repeated after the beginning of the new year is beyond question.

Old Rails.—No sales are reported. Prices for Old Americans are down to about $24.50 @ $25.

Scrap.—The market is weak and scarcely any business is being done. No. 1 Railroad Wrought is worth about $20 @ $20.50; Wrought Turnings, $10.50 @ $11, and Old Wheels, $17 @ $17.50.

Manufactured Iron.—Little, if anything at all, is being done in the way of sales, although the mills are quite busy upon old orders. No business is looked for until after the holidays.

Detroit.

WILLIAM F. JARVIS & Co., Detroit, Mich., under date December 22, 1890, say: While the stringency in the money market is not so great as it has been, yet it is sufficient to deter a considerable portion of consumers from placing orders for any large amount. The holiday season is usually dull, and the present is no exception. With the exception of a few sales of Southern Iron for delivery extending for the first half of next year, dealings have been confined to small amounts for prompt shipment. A few Southern furnaces have declined orders at present quotations for extended deliveries. They are confident that prices will not go lower, and if there is any change it must be to a higher basis, therefore they have everything to gain and nothing to lose by refusing to sell. There is quite a general feeling that after the first of the year the money market will be easier, and that business will be more active, and some are confident values will range higher as soon as active buying begins. With the market dull and prices moderately firm, we quote as follows:

Lake Superior Charcoal, all numbers	$19.50 @ $20.50
Lake Superior Coke, Bessemer	18.50 @ 18.75
Katahdin (Maine Charcoal)	23.50 @ 24.00
Lake Superior Coke Foundry, all ore	18.00 @ 19.00
Ohio Blackband (40 per cent.)	18.25 @ 18.75
Southern No. 1	16.00 @ 16.50
Southern Gray Forge	14.25 @ 14.75
Jackson County (Ohio) Silvery,	18.50 @ 19.00
Connellsville Coke	4.80 @

Pittsburgh.

Office of *The Iron Age*, Hamilton Building, PITTSBURGH, December 22, 1890.

There is no change of importance to note in the general Iron and Steel situation; new business continues very light, and no improvement is looked for until next month. A large number of firms will shut down about the first of the year to take stock and make repairs, and in the meantime they will not buy a ton of raw material they can do without.

Pig Iron.—There is no improvement to note in the demand; the market is very dull and prices are weak and drooping. Consumers, as a rule, are refusing to buy a ton more than is necessary to carry them through the rest of the present year, and furnacemen, with the exception of those who are pressed for money, are making little or no effort to make sales, for the very good reason that there is little or no margin for profit at present prices, which we quote as follows:

Neutral Gray Forge	$14.50 @ $14.75, cash.
All Ore Mill	15.00 @ 15.50, "
White and Mottled	14.00 @ 14.25, "
No. 1 Foundry	16.75 @ 17.00, "
No. 2 Foundry	15.75 @ 16.00, "
No. 3 Foundry	15.25 @ 15.50, "
No. 2 Charcoal Foundry	21.50 @ 22.00, "
No. 1 Charcoal Foundry	23.00 @ 23.50, "
Bessemer Iron	16.25 @ 16.50, "

In regard to Bessemer, it is rumored that some sales have been made at $16.25 and even $16, cash, to be delivered at Wheeling. So far as we are advised there have been no sales here below $16.50, cash, but it is probable that for immediate delivery $16.25 would be accepted. Several firms in the valleys are piling their Iron up, and say they have none to sell under $17, cash, at furnace, and that they intend to hold until they can get the price quoted.

Muck Bar.—There is little or no demand, and scarcely enough doing to establish prices; may be quoted nominally at $29 @ $30. It is intimated that it might be had below our inside quotations. Contracts were made some time ago for January, February, and even March, at prices from $2 to $2.50 above those now quoted.

Manganese—There is no improvement in demand. nor is it likely that there will be until after the advent of the New Year, now near at hand. Small sales of 80 % Domestic at $66 @ $67 ℔ ton. Consumers are refusing to buy a ton beyond immediate wants.

Manufactured Iron.—Very little new business. No change in prices, although they are weaker, in sympathy with raw material. We quote for first-class Iron as follows: Bars, 1.85¢ @ 1.90¢; Plate and Tank, 2.20¢ @ 2.25¢; No. 24 Sheet, 2.85¢ @ 2.90¢; Grooved Skelp, 1.85¢ @ 1.90¢; small lots for immediate delivery 1.95¢, and Sheared Skelp, 2.15¢ @ 2.25¢; all 60 days, 2 % off for cash.

Nails.—There is nothing doing here in Cut Nails, and prices are nominal at $1.80 @ $1.85 for either Iron or Steel, 60 days, 2 % off for cash. Wire Nails remain as last quoted, and while trade is only fair, it is all that can be expected just at the close of the year. We continue to quote at $2.10, 60 days, 2 % off for cash.

Wrought Iron Pipe.—There is nothing to note of an important character, with the exception that there is more activity in this than any other branch of the Iron business, although there is a falling off in new business, as there always is at this time. Prices remain unchanged. Discounts on Black Butt-Welded, 47½ %; Galvanized, do., 40 %; Black Lap-Welded, 60 %; Galvanized do., 47½ %; Boiler Tubes, 1¼ inches and smaller, 45 %; 2 inches and larger, 50 %; Casing, all sizes, 50 %.

Old Rails.—Continue extremely dull; there is no demand here apparently at any price. Sales are reported out in the Mahoning Valley at $26 and $25.50, and reports from there quote still below lowest price above quoted. There is very little demand anywhere, and the only way to make sales just now is to cut the price away down. Old Steel Rails are just as much neglected as Old Iron, and in the absence of sales may be quoted nominally at $16.50 @ $17.50.

Billets and Slabs.—The dulness noted for some weeks past continues, and prices are weak. While no reliable sales have been reported below $26 and up to $26.50, it is intimated that a desirable order might be placed below our inside quotation. Rumor of a large sale having been effected during the past week is not credited by those in a position to know what is going on.

Structural Iron.—There is some inquiry in regard to future contracts, but very little new business has been placed during the past week. No change in prices, which we quote as follows: Channels and Beams, 3.10¢; Angles, 2.25¢; Steel Bridge Plates, 2.55¢; Universal Mill Plates, Iron, 2.30¢; Refined Bars, 1.90¢ @ 2¢.

Steel Plates.—There is a fair business at unchanged prices: Fire Box, 4¢ @ 4.25¢; Flange, 2.95¢; Shell, 2.75¢, and Tank, 2.35¢.

Merchant Steel.—There is only a moderate business. Prices remain unchanged. Tool Steel, 8¢ and upward; Crucible Spring 4¢; Crucible Machinery, 5¢; Open Hearth Steel, base sizes, 2¼¢ @ 3¢; Bessemer Machinery Steel, 2.40¢; Tire Steel, 2.55¢ rates.

Railway Track Supplies.—Business reported slow. Prices unchanged. Spikes, either Iron or Steel, $2.15, 30 days, f.o.b. at makers' works; Iron Splice Bars, 1.95¢ @ 2.05¢; Steel Splice Bars, 2¢ @ 2.10¢; Track Bolts, 2.90¢ with Square and 3¢ with Hexagon Nuts.

Steel Rails.—There has been no new business reported and prices are nominal. The Allegheny Bessemer Works continue to run entirely on Billets, and the Edgar Thomson Works is the only mill here turning out Rails.

Old Material.—There is very little demand, and so little doing that it is difficult to give reliable quotations. No. 1 Wrought Scrap is quoted nominally at $20.50 @ $21, net ton. It is thought, however, that there will be an improved business next month.

(*By Telegraph.*)

Among furnacemen in Shenango and Mahoning valleys there is a united expression to stop their furnaces on the first day of the new year, unless the Coke operators and railroad agents agree to extend them the relief asked for by reducing rates. What the furnacemen demand from the railroads is: 1. Reduction of 15¢ ℔ ton on all Pig Iron shipped from any furnace in either valley to Pittsburgh; 2, a reduction of 20¢ ℔ ton on Coke consigned from the Connellsville Coke region to their furnace plants; 3, reduction of 25¢ ℔ ton on Limestone from any quarry in

either valley to the furnaces. From the Coke operators they demand a reduction of 40¢ ℔ ton from the present prices paid by them for Coke.

Chicago.

(By Telegraph.)

Office of *The Iron Age*, 59 Dearborn street, } CHICAGO, December 24, 1890. }

The financial situation is improving, and the local banks now promise their customers better treatment in a few days than they have been able to give them for the past month. It is a great point gained to be able to see even this glimmering of daylight and to have this hope of relief from the great strain of money scarcity. The change cannot come too soon, as the lack of cash has been causing serious embarrassment to those conducting large operations, as well as the rank and file of business men. Some concerns of the highest standing and of apparently unlimited financial strength have been compelled to issue notes for the first time in their history. The situation has been more serious than was generally realized, but it is now confidently believed that the worst is over. There may be liquidations still to follow, as weakness has been exposed which cannot be covered up again, but the time for demoralization is over.

Pig Iron.—Dealers report some buying, but only in small lots, and for quick shipment. Inquiries are being received from heavy consumers, who are probably testing the strength of the market, with a view to guiding their future operations, but enough of them are coming forward to give promise of an early resumption of activity. Meanwhile, however, unpleasant experiences are had with numerous parties who have ordered more Iron than they need. Shippers are asked to defer deliveries so that their bills will be dated in January, instead of this month. Reports of offerings at low prices are current, but in almost every case the sellers want cash against bill of lading, and few buyers are able to meet the terms, so such offers are not making the market. So many Southern furnaces are now out of blast that prices for Iron from that section should be affected, but the financial necessities of some Southern companies are so great that they are not able to take advantage of the situation. They would sell considerably under their regular rates for cash, but at the same time it must be said that no transactions have been reported at the very low figures made in the previous week.

Lake Superior Charcoal	$18.50 @ $19.00
Local Coke Foundry, No. 1	15.50 @ 16.00
Local Coke Foundry, No. 2	15.00 @ 15.50
Local Coke Foundry, No. 3	14.50 @ 15.00
American Scotch	18.50 @ 19.00
Southern Coke, No. 1	16.25 @ .....
Southern Coke, No. 2	15.25 @ 15.75
Southern Coke, No. 3	14.25 @ 14.50
Southern, No. 1, Soft	15.25 @ 15.75
Southern, No. 2, Soft	14.75 @ ....
Southern Gray Forge	14.50 @ ....
Southern Mottled	14.00 @ 14.50
Tennessee Charcoal, No 1	18.50 @ ....
Alabama Car Wheel	22.25 @ 23.50

Bar Iron.—A steadier feeling is noted in this line. Small lots only have been sold the past week, but prices show no recession from old rates, makers still quoting 1.75¢ @ 1.80¢, half extras, Chicago, for local brands; valley mills continue to quote 1.70¢ at mill. Combatting the views of those who are looking for very low prices on Bar Iron, manufacturers call attention to the demand now existing for a much better grade of Iron than consumers were formerly satisfied with. They will no longer take Iron made entirely from Old Rails, and besides the supply of Old Rails is too light to enable manufacturers to use them to any great extent if they were so disposed. The low prices of past periods of depression will not be reached unless Pig Iron becomes very cheap. Collections are improving in this line.

Structural Iron.—The local demand is still strong for this class of material, as new buildings and the reconstruction of old ones are going forward vigorously. The Masonic Temple contract is to be placed this week and will call for an immense quantity of material. Quotations, f.o.b. Chicago, in carload lots, are as follows: Angles, 2.35¢ @ 2.40¢; Tees, 2.90¢ @ 3¢; Beams, 3.20¢; Universal Plates, 2.45¢ @ 2.50¢; Sheared Plates, Iron, 2.50¢ @ 2.60¢; Steel, 2.60¢ @ 2.70¢. Beams sell from store in small lots at 3.70¢, but Angles and Tees at 10¢ @ 15¢ ℔ 100 above carload prices.

Plates, &c.—Business has fallen off to some extent, but dealers are still finding it far from dull. They report concessions in price hard to get from the mills regularly supplying this market. Quotations are unchanged at: Nos. 10 to 14 Iron Sheets, 2.75¢ @ 2.80¢; Steel Sheets, 3½¢ @ 3¼¢; Tank Iron, 2.60¢ @ 2.70¢; Tank Steel, 2.80¢ @ 2.90¢; Shell Iron or Steel, 3.25¢; Flange Steel, 3.50¢; Fire Box Steel, 4.25¢ @ 5.5¢; Boiler Rivets, 4¢ @ 4.25¢; Boiler Tubes, 45 % off for 1¼ inch or less; 50 % off for 2 to 4 inch.

Sheet Iron.—Mill orders are scarce and prices are weak. Agents quote 2.90¢, at mill, for No. 27 Common, but this can be shaded on desirable orders. Jobbers quote 3.30¢ @ 3.40¢. Galvanized is unchanged at 60 and 5 % for Juniata.

Merchant Steel.—Trade is quiet, and will probably continue so until after holidays. Regular quotations unchanged. Tire Steel, 2.50¢ @ 2.60¢; Open Hearth Spring, 2.65¢ @ 2.75¢; Open Hearth Machinery, 2.50¢ @ 2.75¢; Bessemer Machinery, 2.25¢ @ 2.30¢; Crucible Spring, 3.50¢; Tool, 7¢ and upward; Plow Steel, 2.50¢ @ 2.60¢; Crucible Sheets, 7¢, 8¢ and 10¢.

Steel Rails and Fastenings.—The Rail business is improving, but roads are not yet ready to place large orders. Makers quote $31 @ $31.50. Splice Bars are steady at 2.05¢ @ 2.10¢ for Iron and 2.15¢ @ 2.20¢ for Steel. Spikes are unchanged at $2.20 @ $2.25. Track Bolts are quiet, with Hexagon Nuts worth 3.10¢.

Old Rails and Wheels.—In Old Iron Rails transactions have been light. They are quoted nominally at $23.50. Old Steel Rails are neglected, with dealers quoting $15 @ $18.50, according to length. Car Wheels are very quiet. Stocks are heavy. They are nominally worth $18 @ $18.50.

Scrap.—Offerings are large, but consumers are not inclined to stock up at present. All classes of Scrap are now very dull. Prices are weak and the cash buyers are able to pick up bargains. Dealers' quotations are as follows ℔ ton of 2000 lb: No. 1 Railroad, $19; No. 1 Forge $18; No. 1 Mill, $14; Fish Plates, $22; Axles, $25; Pipes and Flues, $14; Horseshoes, $18; Cast Borings, $8; Wrought Turnings, $10.50; Axle Turnings, $13; Machinery Cast, $13; Stove Plates, $9; Mixed Steel, $10.50; Coil Steel, $16; Leaf Steel, $17, and Tires $18.

Metals.—Business in Pig Lead has been at a standstill, with no transactions on which to base quotations. Spelter may be quoted at 5.75¢, Lake Copper at 17¢ and casting brands 14¢. Prices are weak, however, and on actual business these rates could possibly be shaded.

Plans have been prepared for the enlargement of the city hall in Boston at a cost of about $1,000,000. Mayor Hart favors a fire proof roof, together with capacious vaults for the storage of books and documents.

New York.

Office of *The Iron Age*, 66 and 68 Duane street, } NEW YORK, December 24, 1890. }

There has been very little change in the situation, the only developments of any interest, and they are far reaching, are those in the Steel Rail trade. Importers are doing next to nothing, and in the lines in which the New York market has more than local influence there is very little to report. As bearing on the financial situation, one of the largest concerns in the country, whose operations extend in all producing sections and in many lines of the Iron and Steel trades, reports that all the obligations due to them have been promptly met, with the exception of one very small one; that they have been involved in only one small failure, and that three-quarters of their open book accounts are paid at the usual time of settlement, while in the case of others good customers' paper is offered.

American Pig.—The market has been very dull and little business is reported. Reports from the Birmingham districts are conflicting. We learn from good authority that through the continuance in operation of a number of the smaller mines quite a considerable quantity of fuel in the aggregate is being produced. We quote $16.75 @ $17.50 for No. 1, $16 @ $16.50 for No. 2 Northern Iron. Southern may be quoted $16.50 @ $17 for No. 1 Foundry, $15.50 @ $16 for No. 2 and $14.50 @ $14.75 for No. 3.

Spiegeleisen and Ferromanganese.—Ealy in the week the great probability that efforts to form a new and strong combination would be successful led to a notable strengthening of the market, the majority of the Eastern mills declining to name less than $30. Early this week the fact developed that one of the Eastern mills declines to approve the agreement, and the whole matter is again in abeyance, with only a very slight chance that anything whatever can be done which will include all of the works. The facts in the case have only too recently become apparent to the other mills to allow them to shape a definite policy, but it is only too probable that a sharp contest will follow. At this writing the market is unsettled, and it is impossible to quote. Before the Windsor Hotel meeting last week Rails were selling in a small way at $28, at Eastern mill. The next week will probably develope at what round lots can be bought. It is feared that a sharp decline is imminent. The only sale reported is that of 11,000 tons by a Western mill to a Southern road. The report for December 1 shows shipments to date of 1,315,556 tons.

Billets and Rods.—Well authenticated reports have it that Steel Billets have sold on special terms of payment at a shade under $25.75, Pittsburgh, and it is reported that Wire Rods can be purchased in the West at $37 with little business doing. Foreign Rods are offered at $43.50 without bringing out any business.

Manufactured Iron and Steel.—Merchants and mill representatives report that there is quite a fair run of small orders, but that large contracts are scarce. The only recent transaction of any consequence in the architectural branch is the closing of the work for the Manhattan Storage Building. One or two other large buildings may soon be taken. We quote Angles 2.20¢ @ 2.25¢; Sheared Plates, 2.25¢ @ 2.30¢; Tees, 2.65¢ @ 2.75¢, and Beams and Channels, 3.1¢, on dock. Steel Plates are 2.25¢ @ 2.35¢ for Tanks, 2.55¢ @ 2.65¢ for Shell, and 2.85¢ @ 3¢ for Flange. Bars are quotable at 1.75¢ @ 1.90¢, delivered, for Refined.

Rail Fastenings.—The market is exceedingly dull, with Spikes nominally

quoted $2 @ $2.10, Angles, 1.65¢ @ 1.75¢, and Bolts and Nuts, 2.80¢ @ 3¢.

Warrant Stocks.—The American Pig Iron Storage Warrant Company report as follows:

	Tons.
Stock in yard, December 16, 1890	64,900
Put in yard seven days ending December 23, 1890	200
Total	65,100
Withdrawn seven days ending December 23, 1890	306
Net stock in yard, December 23, 1890	64,800

FINANCIAL.

The possibility of "panic legislation" by Congress is the single incubus that weighs most heavily in the financial situation. With the silver question eliminated a large amount of gold recently hoarded in anticipation of impending trouble would be restored to circulation; at least this is a view commonly entertained, whereas with free coinage it is surmised that there might be serious contraction. Despite this bar to returning confidence money is working easier, and it is reasonable to assume that after the annual disbursements on account of interest and dividends early in January the period of stringency will cease. Respecting the value of the new railroad compact there is not entire unanimity and until there is some advance beyond the embryonic stage the questions involved will remain as before and continue to be a source of uneasiness. Apart from the uncertainties above referred to the mercantile classes find themselves in a sound position, as indicated by the small percentage of failures during the period of stringency, it being remarked that in every instance noted there was a special cause, such as doubtful assets or overtrading. The total clearings of 52 cities for the week ending December 20 show a decrease of 4.9 per cent. Outside of New York the increase was 1.5 per cent. New York decreased 8.9 per cent.; Boston, 6.4; Philadelphia, 10.9. Holiday dullness prevails in the stock market, there being few movements of importance outside of dealing in silver bullion certificates. The weakness of Pacific Mail was attributed to the failure to push the Subsidy bill through the House. On Monday certificates declined to 102¾, due partly to rumored efforts to prevent the National banks from lending money on the certificates, and partly to a belief that Congress will be unable to do anything further in the way of silver legislation.

Government bonds are steady at quotations as follows:

U. S. 4½s, 1891, registered	103¼
U. S. 4½s, 1891, coupon	103¼
U. S. 4s, 1907, registered	121
U. S. 4s, 1907, coupon	122
U. S. currency 6s, 1895	109

The weekly bank statement was favorable, the surplus having increased $3,891,825, which rises their surplus above the required 25 per cent. on deposits to $4,498,900. The gain resulted from an increase of $3,573,500 in deposits, $4,136,700 in specie and $648,500 in legal tenders. The gain in reserve is partly due to imports of gold amounting to $4,707,500. On the other hand, shipments were unusually heavy, Philadelphia showing the most urgent needs, while Boston is more comfortable, and at Chicago there is steadily increasing confidence. Money has been loaned on time in considerable amounts and commercial paper has been sold at easier rates, usually on the basis of 8 per cent. for the best names. The inquiry was chiefly for short time. The market for commercial paper is narrow, the larger purchasers being country banks which do not care to send their available balances to their New York correspondents.

The merchandise markets generally are slow, attention being given to propositions for taking stock and winding up the season's business. Wheat closed lower on increased stock and the decline in silver and breadstuffs was heavy. Coffee was well supported. In cotton there was further weakness, with more active business. The decline in cotton on Monday brought the January option to 8.95¢, which is the lowest price for the delivery ever known. Provisions were lower, trading light. India rubber receded under a pressure to realize. Room by the steam lines for Liverpool is in increased demand hence for cotton, and there are freer shipments of copper ore.

Sterling exchange was weaker at $4.80½ @ $4.85. Bankers' and commercial bills are in better supply. Money in London was plentiful. German drain of gold amounted during the week to £1,163,000. The withdrawals have now ceased, while the influx into the Bank of England from Brazil and Australia maintains a reserve of bullion sufficient to meet further demands.

The preliminary statement from the Bureau of Statistics for November prints a comparison of the principal classes for two years:

	1890.	1889.
Cotton	$44,565,998	$47,555,038
Provisions	9,439,220	9,726,099
Breadstuffs	7,682,004	10,053,430
Petroleum	4,502,938	4,184,196
Cattle and hogs	2,306,262	2,061,403
Totals	$68,496,422	$73,580,166

These returns show a decrease in the principal items of $5,083,774, of which about $3,000,000 is in value of cotton and about $2,300,000 in value of breadstuffs. On the other hand, the imports at New York for the month of November were $43,151,123, against $38,015,176 for the same month last year, showing a gain of $5,135,947, and December exports promise an exceptionally heavy trade.

Coal Market.

The Anthracite Coal market is dull, very dull, there probably being less animation than a week ago. And as for prices, quotations are useless, schedules being a thing of the past, or, at least, until production shall sustain a normal relation to demands for consumption. In other words, it is a "go as you please market," every one for himself, with wide varietions in prices, according to circumstances and conditions. As one dealer remarked, "Things are all broken up; there's no market and no prices." Well, is $4 for store, f.o.b., a fair basis for negotiations? "Coal," said he, "has sold down to $3.35, and from that figure up to $4.25, showing wide fluctuations." Pea and Buckwheat, on the contrary, are strong on account of the scarcity of Bituminous for steam purposes. The talk now is of a suspension of mining all round during the holidays, which would help to stiffen the market, and the railroad companies are apparently doing something to relieve the glut by pleading scarcity of cars. Bituminous is quite active. Doubts are expressed respecting the probability of advancing railroad tolls. The production of Anthracite Coal for the week ending December 13 was 704,194 tons, or 15,651 tons less than last year, making the total output for the year 34,201,617 tons, being 143,120 tons more than last year. The production of Anthracite Coal for November was 3,501,487 tons, or 127,673 tons more than for the same month of last year, and for the 11 months ending November 30 the total output was 32,799,966 tons, an increase of 117,991 tons over last year. The amount of Coal on hand at tidewater shipping points on November 30 was 608,479 tons, a decrease of 24,619 tons during the month.

Two new railroads are going through the Indiana Coal fields, the Illinois Central to Brazie direct.

An extensive cave-in occurred at the Laurel Hill mine, four miles from Wilkesbarre, owned by the Delaware and Hudson Coal Company.

Allison O. Smith was appointed receiver for the Clearfield Creco Coal Company, of which ex-Senator Wallace is principal owner.

Thomas Thedford was elected president of the New York Retail Coal Exchange at its annual meeting. The membership numbers 167 firms.

The Pennsylvania Railroad reports for the year 11,251,000 tons of Coal, an increase of 829,000 tons. The Reading Railroad shipped 24,000 tons to Port Richmond last week and 20,000 tons to Port Liberty.

The miners' convention at Altoona, Pa., yesterday adopted a resolution that after January 1 the price of mining Coal in the districts represented shall be 50¢ ℔ net ton, the present price being 50 ℔ gross. Should the demand be refused a strike is expected.

Metal Market.

Copper.—It is reported on very good authority that the Lake Superior mining companies have decided upon 15¢ ℔ lb as their price to the home trade for early 1891 deliveries. Whether any considerable orders have been placed up to the present time is not clear. Consumers, it is stated, are not inclined to make a "pool" purchase, however, but prefer to act individually, taking their chances on prices moving up or down in the future. Quotations equivalent to 14¼¢ here have been made in the foreign markets to attract export business, and rumor has it that 14¢ would very probably be accepted. A line of about 1,000,000 lb Tamarack is said to have been sold for export at about 14¢. For other varieties of Copper prices are as yet rather uncertain, there being little business. About 13¾¢ @ 14¢ for Arizona and 13¢ for common casting brands would appear to be near the mark.

Tin.—Prices for Straits Tin have further declined in this market, chiefly under the weight of lower quotations from London, at which point values have fallen about £1 during the week. Business of a speculative nature has been slow at the decline and purchases by jobbers and consumers have hardly reached the average volume for the season. For ordinary jobbing quantities, out of store, 20¾¢ @ 20⅞¢ is quoted at this writing. Ten-ton lots for prompt delivery were about 20.45¢ @ 20.55¢, net cash. January delivery was 20¢ bid, 20.35¢ asked, and February, 20¼¢ @ 20.35¢ on Tuesday at the Metal Exchange.

Lead.—There has been very little change in the Lead market the past week. Consumers have purchased sparingly, being well supplied for the present, and from other quarters the demand has continued light. Producers are sellers at the prices that ruled a week ago, but make no further concessions, and outside lots are offered no lower. For the present 4.05¢ bid, 4.10¢ @ 4.15¢ asked, would appear to fairly reflect market values.

Spelter.—The situation is practically the same as it was a week ago. Spot supplies are still light, and holders ask 6¼¢ @ 6½¢ for small quantities of prime Western out of store. Near shipments are quoted firm at 5.95¢ @ 6¢, and still offered with more or less reserve. The demand at present is slow.

Antimony.—For small parcels there is about the usual demand, but round lots are not inquired for. Prices are barely steady, with 19¢ quoted for Cookson's, 17¾¢ for L. X., and 16¾¢ for Hallett's.

Tin Plate.—The market has continued rather weak, in the face of advices of a firmer feeling at primary points, and neither spot stock nor futures have been taken in other than moderate quantities, even where seemingly attractive low prices were offered as an inducement. Quotations for large lots on the spot are as follows: Coke Tins—Penlan grade, IC, 14 x 20, $5.15; J. B. grade, do., $5.20. Bessemer do., $5.15. Stamping Plates—Bessemer Steel, Coke finish, IC basis, $5.40; Siemens Steel, IC basis, $5.45 @ $5.50; IX basis, $6.50. IC Charcoals—Melyn grade, $6.12½; for each additional X add $1.50; Allaway grade, $5.75; Grange grade, $6; for each additional X add $1. Charcoal Ternes—Worcester, 14 x 20, $5.40 @ $5.45; 20 x 28, $10.50; M. F., 14 x 20, $7.87½; do., 20 x 28, $16; Dean, 14 x 20, $5; do., 20 x 28, $10.25; D. R., D. grade, 14 x 20, $4.75; do., 20 x 28, $9.50; Mansel, 14 x 20, $4.90; do., 20 x 28, $9.85; Alyn, 14 x 20, $4.90 @ $5; do., 20 x 28, $9.87½; Dyffryn, 14 x 20, scarce; do., 20 x 28, $10; Wasters—S. T. P. grade, 14 x 20, $4.60; do., 20 x 28, $9.25; Abercarne grade, 14 x 20, $4.55; do., 20 x 28, $9.25.

The Matthiessen & Hegeler Zinc Company of La Salle, Ill., under date of December 19, 1890, issue a new price-list for Sheet Zinc. The price has been reduced from $7 to $6.75 for 100 lb for Sheet Zinc in 600-lb casks, of the thickness between Nos. 9 to 15 inclusive, and of the widths between 32 to 46 inches, and of the lengths between 84 to 90 inches. The company announce the following:

Extras, in Cents per 100 Pounds.

Nos.	5	6	7	8	9	10	11	12	13	14	15
32 to 40 x 84	85	40	25

New York Metal Exchange.

The following sales are reported:

FRIDAY, December 19.

50 tons Tin, January .....20.35¢

MONDAY, December 22.

25 tons Tin, January.....20.20¢

TUESDAY, December 23.

10 tons Tin, March.....20.30¢
10 tons Tin, December.....20.15¢
25 tons Tin, January.....20.10¢
25 tons Tin, ex S. S. Duro, C. A. D.....19.95¢

British Iron and Metal Markets.

[*Special Cable Dispatch to The Iron Age.*]

LONDON, TUESDAY, December 23, 1890.

Operations in Pig Iron Warrants have been dull. The approaching holidays tend to check operations through causing general general slackness in business. Producers are forcing stocks down with a view to establishing a higher level of prices. The damping of some Cleveland furnaces caused slightly freer buying of Cleveland warrants, under the effect of which prices recovered from 42/7½ to 43/. Latest sales of Scotch were at 46/3 @ 46/6 and Hematite at 54/ @ 54/6.

The Pig Tin market was firm early in the week, under the influence of the advance in the price of silver and small shipments from the Straits that led to freer purchases of futures. Later the movement turned in the opposite direction, and prompt delivery sold off to £91. 2/6.

Copper warrants have reacted from £54. 10/ early in the week to £52. 7/6, and the market is at present unsettled. A want of confidence is shown by outside holders, who are affected by uncertainty as to the policy of financiers who control a large amount of the stock held here. Consumers are light buyers, although their reserves are very low.

At the trial on the 18th inst. of the case of the mining companies *vs.* the Société des Métaux, the contracts were declared void.

The demand for Tin Plate has been better, and prices have improved somewhat. Many makers are confident of an upward movement in January and refusing to quote.

There has been more activity in the Steel trade. An order for 18,000 tons for an Indian railway has been secured by Bolckow, Vaughan & Co., and the Magdeburg Railways of Germany have ordered 8000 tons, seller's name not reported. A larger trade in Ship Plates is also noted.

Scotch Pig Iron.—Dealings in makers' Iron are moderate, but prices are firm, owing to diminished supplies.

No. 1 Coltness,	f.o.b.	Glasgow	..

No. 1 Dalmellington,	"	"	50/
No. 1 Eglinton,	"	"	48/6

Steamer freights, Glasgow to New York, nominal: Liverpool to New York, 10/.

Cleveland Pig.—Makers' Iron is in limited demand, but holders are firm, and quote at 43/ @ 43/3 for No. 3 Middlesborough, f.o.b.

Bessemer Pig.—There has been rather more demand, but prices are still irregular. Makers quote 55/ for West Coast brands, Nos. 1, 2 and 3, f.o.b. shipping port.

Spiegeleisen.—Former prices rule, and the demand continues fair. English 20 % quoted at 100/, f.o.b. shipping port.

Steel Rails.—There has been more business, but prices have undergone no change. Heavy sections quoted at £4. 17/6 and light sections £6, f.o.b. at N. W. England shipping point.

Steel Blooms.—The demand very moderate and prices without change. Makers quote at £4. 15/ for 7 x 7, f.o.b. at N. W. England shipping point.

Steel Billets.—The movement has been smaller, but makers hold for previous prices. Bessemer, 2½ x 2½ inches, £5, f.o.b. at N. W. England shipping point.

Steel Slabs.—Demand is slow and prices are unchanged. Bessemer quoted at £5, f.o.b. at N. W. England shipping point.

Old Iron Rails.—There is very little doing and sellers have named lower prices. Tees quoted at £3 @ £3. 2/6 and Double Heads £3. 2/6 @ £3. 7/6, f.o.b.

Scrap Iron.—No improvement in the demand nor any change in sellers' figures. Heavy Wrought quoted at £2. 5/, f.o.b.

Crop Ends.—The market very quiet and without change. Bessemer quoted at £3 @ £3. 2/6, f.o.b.

Tin Plate.—Improved demand gives the market more tone and holders ask higher prices. We quote, f.o.b. Liverpool:

IC Charcoal, Alloway grade	18/9 @ 19/
IC Bessemer Steel, Coke finish	@ 17/9
IC Siemens " " "	@ 18/
IC Coke, B. V. grade	@ 17/3
Charcoal Terne, Dean grade	17/3 @ 17/6

Manufactured Iron.—Aside from a slight reduction on Black Sheets there has been no further change in prices. Business continues slow. We quote, f.o.b. Liverpool:

	£	s.	d.		£	s.	d.
Staff. Marked Bars				@	9	0	0
" Common "				@	6	15	0
Staff. Bl'k Sheet, singles				@	7	15	0
Welsh Bars (f.o.b. Wales)	6	2	6	@	6	5	0

Tin.—The market dull at the close, with prices barely steady. Straits quoted at £91. 2/6, spot, and £91. 12/6 for three months' futures.

Copper.—Demand light at the close and the market rather weak. Merchant

Bars quoted at £52. 7/6, spot, and £53. 2/6, three months' futures. Best Selected, £60.

Lead.—Business has been light and prices show little change. Quoted at £12. 15/ for Soft Spanish.

Spelter.—Demand has continued slow and prices are rather in buyers favor. Quoted at £23. 5/ for Ordinary Silesian.

Connellsville Coke Reduced.

By Telegraph.—Connellsville Coke has been reduced to $1.90.

Damage Allowance on Tin Plate.

In the matter of the protest, No. 233 *b*, of Schultz & Hosea, against the assessment of duty by the Surveyor of the Port of St. Joseph, Mo., on merchandise imported by them August 26, 1890, per Thames, September 12, 1890, the Board of United States General Appraisers has rendered the following decision:

The appellants paid duty on a certain consignment of tin, consisting of 329 boxes, which arrived at New Orleans on August 26, 1890. Of this cargo 1789 pounds were damaged by salt water and rust, so as to render it unfit for use. The importers contend that there should have been no duty exacted on the damaged portion of the tin.

The question is settled by Section 23 of the act of June 10, 1890, which reads as follows:

That no allowance for damage to goods, wares and merchandise imported into the United States shall hereafter be made in the estimation and liquidation of duties thereon, but the importer thereof may, within 10 days after entry, abandon to the United States all or any portion of goods, wares and merchandise included in any invoice and be relieved from the payment of the duties on the portion so abandoned, provided, that the portion so abandoned shall amount to 10 per cent. or over of the total value or quantity of the invoice, and the property so abandoned shall be sold at public auction, or otherwise disposed of for the account and credit of the United States under such regulations as the Secretary of the Treasury may prescribe.

The manifest purpose of this section is to abolish allowances for damages, which were provided for by Section 2927 of the Revised Statutes, page 566. Under the present law, which was in force when the importation in question was made, no such allowance can be made except on the condition precedent of a formal abandonment to the United States of the portion of the merchandise claimed to be damaged, provided this portion shall be 10 per cent., or over, of the total value or quantity of the invoice. In such case only can the importer be "relieved from the payment of the duties on the portion so abandoned." Where the ratio of damage is less than 10 per cent, no allowance or deduction of duties is authorized.

In this case there is no pretense that there was any offer to make such abandonment. The amount of damage, so far as we can justly approximate it, seems in fact to fall below 10 per cent. In any aspect of the case, therefore, no right accrued to a deduction of duties on the portion of the tin alleged to be damaged.

The decision of the surveyor is affirmed.

Reuben J. Flick, the well known banker and business man of Wilkesbarre, Pa., died on December 18 of blood poisoning resulting from kidney trouble. Deceased was born at Flicksville, July 10, 1816. He was director in many of the prominent manufacturing industries of the city, including the Vulcan Iron Works, the Iron Bridge Company, the Penn, Lehigh and Eastern Railway Company, and was a trustee of the City Hospital and the Home for the Friendless. He was also a trustee of the Board of Trade, of the Female Institute, and of the Lincoln University of Oxford, Pa.

New England Notes.

Efforts are being made to organize and locate a new sewing machine plant at Bridgeport, Conn.

The Nashua Iron and Brass Foundry, at Nashua, N. H., is increasing its capacity.

James H. Sheridan, who has been foreman at the Pettee Machine Works, at Newton, Upper Falls, Mass., for the past 15 years, has severed his connection with that company.

Application has been made to the Shelton Probate Court, by the creditors of the insolvent Birmingham Plane Company, for permission to look over the books of that company. These creditors claim that something must be wrong when the assets amount to but $6000, while the liabilities reach nearly $40,000. It is alleged that the officers of the company have brought in very large bills for back salaries.

J. B. Crawford and C. S. Burke of Boston, Mass.; G. A. Smith of Philadelphia, Pa., and others, have recently organized the Southern Iron and Timber Company at Newport, Tenn., and will, it is stated, erect six wood working factories, a tannery, shoe factory and a $300,000 iron plant.

A company composed of Massachusetts and Philadelphia parties has purchased from the Holmes Mfg. Company of Providence, R. I., the right to manufacture the Holmes' lubricant bearing in the United States. The price paid is said to be several hundred thousand dollars.

NEW PUBLICATIONS.

GEOLOGICAL SURVEY OF NEW JERSEY. Report of the State Geologist. Second Volume. Second Part (Vol. II, Part II) of the Final Report. Zoology. Large 8vo, 824 pages.

This volume contains a full catalogue of the insects and of the vertebrates found in New Jersey. *The Iron Age* has specially noticed the first volume of this report. The insects have been catalogued by John B. Smith, the vertebrates by Julius Nelson, Ph.D. Mr. Smith has gathered his collections through numerous persons interested in insectology, living in New Jersey and Philadelphia, who made their field of collection in New Jersey, and has added to all lists largely from his own collections and experience. There have been listed 6098 species, embraced in 238 families and 2307 genera. The Linnean orders have been followed rather than the more numerous divisions of Braner or Packard. The descriptive catalogue of the vertebrates is a revision with numerous changes in nomenclature and classification of Dr. Charles C. Abbott's catalogue of the vertebrated animals of New Jersey, which was published as "Appendix E, Geology of New Jersey, 1868." This was a valuable and laborious collection, and yet it has been no slight work to note the changes made in 20 years. A description of each species has been added, especially as to the features distinguishing it from its allies, where easily confounded by the general observer. The birds and fishes have been distinguished in this way to aid the sportsman and angler who may desire to identify species. Technical and anatomical terms have been as much as possible avoided. The manuals of the vertebrates of the Northern United States by Professor Jordan, and of the birds of North America by Robert Ridgway, and the synopsis of the fishes of North America by Jordan and Gilbert, have each been freely used in this part. A great amount of interesting information in natural history has therefore been succinctly given in this report, which makes it desirable to every intelligent farmer, physician, sportsman and other practical and zealous students of nature.

HOWSON & HOWSON PATENTS. 12mo, pp. 86, 1890. Geo. H. Buchanan & Co., Philadelphia.

This is a formal circular by these well-known attorneys at law and solicitors of patents, with offices in New York, Philadelphia and Washington, D C. It gives in concise and intelligible language the information that one seeking for a patent for his invention needs to direct his uncertain steps in the Interior Office and to throw light on the mysterious ways of Patent Office officials. The points of law most involved are clearly made, and the manual will prove of service from the large experience which has suggested it.

BIBLIOTHECA POLYTECHNICA. First annual issue. Edited by Fritz von Szczepauski. Size 5½ x 7½; 80 pages; crown 8vo; cloth. Published by the International News Company. Price 75 cents.

This little work, as its name indicates, is a directory of technical literature, consisting of a classified list of all books, annuals and journals published in America, England, France and Germany, including their relations to legislation, hygiene and daily life. It has been compiled with a great deal of care, and will be found a useful book of reference for all publications of a technical character. The catch words are presented in three languages—English, French and German—thus greatly facilitating reference and increasing its value in a corresponding degree. The work is plainly printed upon good paper and bound in a durable manner.

POPULAR MECHANICS. The English and American Mechanic and Every Day Hand Book for the Workshop and the Factory. By B. Frank Van Cleve. New, Revised, Enlarged and Improved Edition, edited by Emory Edwards, M. E., illustrated by 85 engravings, 5 x 7½ inches, bound in cloth; 475 pages. London: E. & F. Spon. Philadelphia: Henry Carey Baird & Company. Price $2.

The use of engineers' hand books is gradually extending. Formerly it was restricted to professional men and to students; more recently the business man and the mechanic have learned how to employ them advantageously, but there still remains a wide gulf between the every day wants of a mechanic and business man of ordinary education and attainments and the extreme formulæ with with which the engineers' books abound. Again, there is a large amount of information omitted from these volumes, comprehensive though they be, that is daily required. Hence the need of such a volume as that before us, and which bears the broad and significant title "Mechanic." It is a very handy book for the workshop and the factory, and abounds in receipts, rules and tables indispensible to the mechanic, the artisan and the manufacturer. The original work, which attained considerable popularity, has been revised by Emory Edwards, the well known author of a number of works relating to the steam engine, and has been adapted to the wants of American as well as English readers. The book may be described as an encyclopedia of useful technical knowledge, so arranged and indexed as to be valuable for almost every purpose. At the outset practical geometry is introduced, and a number of problems are presented which are absolutely necessary to the mechanic in almost every line. Applications are made to sheet metal work, giving it a special value in that direction. Following is a miscellaneous collection of tables, epitome of mensuration, a chapter on the

slide rule, some pages devoted to the steam engine, a chapter on belts, strength of materials, a chapter on gearing, &c. The new matter appears in the form of addenda, and includes still further diagrams of sheet metal work. The addenda also contains a short chapter on algebra and a large number of tables arranged under the significant title of "Wrinkles for Engineers." Part II of the book is devoted to rare and valuable receipts and tables. The addenda to Part II is devoted to alloys, bronzing, cements and mortars, lacquers, &c. As already mentioned, there is a very complete index to the book, thus increasing its usefulness.

The Largest Pneumatic Gun.

Taunton, Delmard, Lane & Co. of Birmingham, England, are just finishing the largest dynamite gun which has yet been made. The designing and construction of the gun have been carried out by Mr. Lane, engineer to the company, under the supervision of the inventor, Lieut. J. W. Graydon of the United States Navy, who has been residing in Birmingham with that object. The contract with Taunton & Co. is for a 15-inch torpedo projector which will throw a charge of 600 pounds of dynamite a distance of 3 miles; but it is expected that this contract will be followed by orders for still larger weapons. As soon as the gun now in hand is delivered there will be a trial of its powers at Portsmouth against the Zalinski gun, not with dummy shells, as in the case of the American experiments, but with actual charges of dynamite. The noise of the discharge being small the projectile might be dropped into a fort or on to a ship without giving the besieged any intimation of the quarter from which the attack came. The concussion when the dynamite exploded would in all probability be violent enough to put a large garrison *hors de combat*, even if they were not wounded by *débris*; and, truly aimed, a single shell would destroy an ironclad. The barrel, or pneumatic tube, of the gun is of Whitworth forged steel, and weighs about 11 tons. The discharging valves are a peculiar arrangement of the piston type, and are packed on the hydraulic system. All valves and pipes, where not forged, are of Whitworth cast steel. The carriage on which the barrel is mounted is constructed of heavy steel plates, with massive trunnion bearings of cast iron secured to it by means of numerous turned bolts. The carriage is supported on the roller path with conical rollers, geared together and actuated by a Heenan and Froude spherical engine, the motive power of which also is compressed air. The roller path, which will ultimately be imbedded in concrete, is made in sections of cast iron. It is 21 feet in diameter, and is planed on its surface.

Grateful Germans.—Hon. Abram S. Hewitt, president of the American Institute of Mining Engineers, has received the following cable dispatch, signed by President Lueg, of Oberhausen, dated December 21: "Five hundred members assembled in meeting of the Verein Deutscher Eisenhuettenleute send hearty and thankful greeting." The meeting in question is the first of two which will be particularly interesting to Americans, since leading members of the party visiting this country will report to their associates. A. Thielen will make the introductory remarks. J. Schlink and A. Schilling will speak on the blast furnace practice, ore and coal resources and methods of transportation, and A. Spannagel on steel manufacture and rolling mill practice. The same subject will be treated at the second meeting, January 11, by R. M. Daelen. E. Klein will deliver a paper on rolling mill machinery, while Haedicke will review the manufacture of hardware and E. Macco is to speak on American railroads.

The United States Rolling Stock Company.—Adolfo Hegewisch, as receiver of the United States Rolling Stock Company, was authorized to-day by Judge Blodgett, in the United States Court, to issue receiver's certificates to prevent the sale of capital stock of the company put up as collateral security. The unfunded and unsecured indebtedness of the company consists of $470,666 in bills payable and $347,918 in open accounts, all incurred for materials, supplies and services rendered prior to the receiver's appointment. Collateral loans made by the company from various banks aggregate $351,608, and securities given consist principally of Car Trust or equipment bonds, amounting to $490,214. A loan of $48,666, held by Crews, Lichstentadt & Co., due December 1, is secured by a deposit of about $450,000 of the capital stock of the company as collateral. The receiver says that the excess of the assets of the company over its liabilities is over $2,000,000.

The plant of the Huntingdon Car and Car Wheel Works at Huntingdon, Pa., operated by the Iron Car Equipment Company of New York, was closed down on Saturday, the 20th inst., preparatory to the sale thereof, on Tuesday, January 6, 1891, by the trustees recently appointed by the court. All outstanding claims have either been liquidated or satisfactorily provided for, and it is probable that the Iron Car Equipment Company will buy in the plant at the trustees' sale.

REVIEW OF THE WHOLESALE MARKET IN PAINTS AND OILS.

It should be understood that the prices quoted in this column are strictly those current in the wholesale market, and that higher prices are paid for retail lots. The quality of goods frequently necessitates a considerable range of prices.

Paints and Colors.

The dullness incidental to trade in Paints and Colors at this season of the year is the only conspicuous feature of the market at the present time. Probably inaction is more prominent than usual in some departments, as the monetary situation has more or less bearing, while the uncertainty as to what reduction, if any, will be made in prices of White Lead tends to restrain operations, not only in the pigment itself but in various other Paints, the value of which is affected more or less by the cost of White Lead. Prices of Colors in Oil are, as a rule, adjusted to the reduced cost consequent upon the decline in prices of Linseed Oil, and the situation in that branch is in shape for business immediately after the holidays, by which time, it is believed, the matter of White Lead prices will also be settled.

White Lead.—No change is yet announced in corroders' prices for pure pigment, and the corroders do not encourage the belief that a revision is contemplated, although the trade have for some time considered it a foregone conclusion. Manufacturers of cheap Leads are doing nothing pending information on the subject, and the movement of all varieties of Lead is on a very small scale.

Red Lead and Litharge.—The list prices remain unchanged, and are generally adhered to by sellers on what little business passes. At the present time orders are small and come in slowly.

Zincs.—The deliveries of American Oxide to large consumers continue liberal, but there is little new demand from any quarter. The distribution by jobbers is light. Supplies are in good shape at first hands and prices remain firm. Foreign Zincs remain without change in price, and are selling to a moderate extent only.

Colors, &c.—Fair purchases have been made of some lines of grinders' Colors, but speculations in house painters' Colors, Dry or in Oil, are of small volume. Prices show but little and unimportant variation. The demand for Ready Mixed Paints is light.

Miscellaneous.—Block Chalk in bulk is is quoted at $2.35 @ $2.50, ex-ship, and sells from store at previous prices. Whiting is steady, as is also Paris White, but rather slow of sale.

Oils and Turpentine.

Linseed Oil.—A sharp decline in the price of domestic Flaxseed has served to cause renewed pressure of Western Linseed Oil for sale in various Eastern markets, and offers at the lowest prices quoted last week have been frequent. It does not appear, however, that the product has been sold in any considerable quantities in this locality. Comparatively few buyers are in a position to handle carload lots, on which alone the extreme low prices are quoted, whilst the 3¢ ℔ gallon rebate allowed by city crushers on the return of package, the uniformity and superiority of quality, the fact that every package contains all the Oil it is supposed to, and various other favorable conditions, cause city brands to be given a preference over Western at a difference of 4¢ @ 6¢ ℔ gallon in gross price; hence crushers keep their figures at 58¢ for domestic Seed and 62¢ for Calcutta Seed product, in the face of offers of Western at 52¢ @ 54¢, and rumors that as low as 50¢ would be accepted on orders for carload lots

Cotton Seed Oils.—Business has been of very much the same general character as it was during the preceding week, and the market is devoid of new features. A considerable quantity of both crude and refined product has arrived, and been delivered on back orders, but neither exporters nor home buyers have made other than moderate-sized new purchases. Strictly prime quality Oil continues scarce, and is firmly held at full prices, but plenty of inferior quality can be secured at old figures.

Lard Oil.—Raw material has ruled lower in price, but no further change in quotations for Oil have been made by sellers of either city or out-of-town brands. The demand has fallen off somewhat, but is probably up to the average volume for the season.

Fish Oils.—There has been very little movement of crude Sperm Whale or Menhaden Oils. Supplies are in about the same position that they were about a week ago, and prices are without change. The manufactured goods are moving fairly in moderate quantities at former prices.

Miscellaneous.—Cocoanut Oil is offered to arrive, ex-ship nearly due, at slightly lower prices, but store parcels are held at old quotations. Olive and Palm Oils remain quiet and unchanged. Western Saponified Oil has been sold to the extent of about 100 barrels at 4⅛¢ @ 4¼¢ here, to arrive.

Spirits of Turpentine.—During the week under review Turpentine, in O. D. barrels, was sold at 37¼¢ @ 37½¢, and stock in machine barrels at prices relatively nearly as low. This reduction led to purchases under which receivers' stocks were cut down to the extent of several hundred barrels and prices reacted to 38¢ @ 38¼¢, closing fairly firm.

HARDWARE.

Condition of Trade.

WITH THE ADVENT of the holiday season, travelers at home, the trade purchasing only for the supply of their immediate needs, and manufacturers and merchants being occupied closing up the year's accounts and making their plans for the coming season, the volume of general business is reduced to a minimum. There has been a good holiday trade, which still continues in fair volume, and the seasonable winter weather stimulates the sale of Skates, Sleds, &c. But while the market as a whole is quiet, large buyers are giving attention to lines which, on account of low prices ruling, are regarded as a safe purchase.

Chicago, by Telegraph.—Business in Shelf Hardware is now tapering off as the end of the year approaches, and an air of unwonted quiet pervades establishments which have for five months been the scene of unabated hustling to get out orders. This is not because the demand for goods has shrunken, but salesmen are now withdrawing from the road for the holiday season or coming into headquarters to talk over the campaign of '91. Mail orders are being received to an encouraging extent, and jobbers look forward to another season of good trade after the new year has fairly opened.

Prices.

Barb Wire.—As usual at this time of the year, the local demand is sluggish and prices are rather weak. Quotations for small lots in New York are 3.25 to 3.35 cents for Galvanized Four Point, Painted being held at 2.75 to 2.85 cents.

Chicago, by Telegraph.—Conditions are practically the same as those prevailing last week. Manufacturers report a heavy demand, especially from the South, while jobbers are having a quiet trade. Carload lots of Painted are quoted at 2.70 cents, and Galvanized 3.25 cents, while jobbers quote 2.80 cents and 3.40 cents for small lots.

Wire Nails.—The price for small lots from store is $2.40 to $2.45, carload lots from factory being quoted generally at $2.15, though in some exceptional cases $2.10 is made. It is reported that some very large orders from Western jobbers have been placed, aggregating something like 50,000 kegs, at a close price. The volume of general business is referred to as fair, the trade showing a disposition to avail themselves of the prevailing prices.

Chicago, by Telegraph.—Wire Nails are in good demand, both from mill and from stock. Large inquiries are being received from heavy buyers for next year's delivery. Jobbers report a heavier carload trade than for a long time. The low prices have stimulated buying, and country merchants are laying in good stocks. Factories have been unable to advance prices owing to the competitions of new works, and extremely low rates are still reported on heavy contracts. Carload rates Chicago are now $2.25 to $2.30 and small lots from stocks sell at $2.35.

Cut Nails. — The condition of the market, while its general features are substantially the same as at our last review, is apparently improved in some respects. It is characterized by a somewhat firmer tone, and there are indications of a disposition on the part of the mills, after disposing of their stocks, to suspend operations rather than to continue to make the low prices now ruling. A meeting of the Atlantic Nail Association was held a few days ago, not so much for the making of a change in prices as to confer in regard to the situation, and while no formal action was taken, it is thought that a somewhat conservative policy will be pursued. Quotations are on the basis of $1.80, f.o.b. New York, for Iron or Steel Nails, small lots from store being held at $1.85 to $1.90 for Iron, the usual 10 cents additional being asked for Steel.

Chicago, by Telegraph.—The demand for Steel Nails is, generally speaking, very light both as to large and small lots, but some heavy buyers are now in the market for exceptionally large amounts, evidently believing that the present is a good time to place contracts for next season. Low as present ruling prices are, they expect to purchase considerably cheaper. The Wheeling Mills quote $1.70 at mill for usual average, but local makers name $1.75, Chicago. Small lots are selling from store at $1 85.

Cordage.—Since our last report there has been a further decline in the price of Manila Rope, which is now quoted at a basis of 11¼ cents, subject to the usual trade discount. The revised prices are as follows, from which it will be understood that the discount of ¼ cent per pound is made to the trade; terms, f.o.b. factory:

	Per lb.
Manila, ½ inch and larger	11¼¢
" ⅜ "	12¼¢
" ¼ and 5/16 inch	13¼¢
" Tarred Rope	11 ¢
" Hay Rope	11½¢
Sisal, ½ inch and larger	8 ¢
" ⅜ "	8½¢
" ¼ and 5/16 inch	8¼¢
" Hay Rope	8 ¢
" Tarred Rope	7½¢
" Medium Lath Yarn	7 ¢
New Zealand, ½ inch and larger	7¾¢
" " ⅜ "	8¼¢
" " ¼ and 5/16 inch	9½¢
" " Hay Rope	7¾¢
" " Tarred Rope	7½¢

As indicated in this further decline, the market is in a weak and unsatisfactory condition, and several causes are operating to produce this state of things. It is understood that the National Cordage Company are leading in the reduction of prices, with a view, it is thought, of inducing outsiders to join the combination; but the outside companies are meeting the prices made by the associated manufacturers.

Shot.—There has been no change in the prices of Shot since our last issue, the Eastern manufacturers quoting at the figures then named. The following prices were announced by Gulf Shot and Lead Works, New Orleans, under date December 12, the prices being subject to a discount of 2 cents per bag, 25 pounds, if paid within five days from receipt of bill:

Drop Shot, per bag, 25 pounds	$1.30
Buck and Chilled Shot, per bag, 25 pounds	1.55

Miscellaneous.—The Easy Horse Shoes manufactured by the Burden Iron Company, Troy, N. Y., are sold at $4.25 per keg; terms f.o b. Troy, N. Y.

Miners' Lamps—Hunt & Connell, Scranton, Pa., are manufacturers of a line of Miners' Lamps of different patterns. Their Solid Spout Miners' Lamps, tin body and spout (in one piece), brass collar and breast (in one piece), are sold at $9 per gross, and the same styles all brass, for surveyors' use, at $3 per dozen.

Trade Items.

THE HARDWARE AND MANUFACTURERS' ASSOCIATION of Philadelphia held their annual banquet at the Manufacturers' Club, 1409 Walnut street, last Thursday evening. There were 30 members present, also 16 invited guests, including some from New York and Boston. The floral decorations were beautiful, while the music was furnished by one of the best orchestras in the city. It was pronounced by all who were present as being the finest entertainment yet given under the auspices of the association, and the feeling was general that a few hours spent together in this way did more to promote good feeling and a better appreciation of each other than a dozen meetings "to fix prices." It is suggested that it would be a good thing if other cities would, in this respect, follow the example of Philadelphia.

THE MARLIN FIRE ARMS COMPANY, New Haven, Conn., are sending out cards to be hung in business houses, calling attention to their Fire Arms. These cards have a black back ground with the words, Marlin Safety Repeating Rifles, in raised white letters; also a representation of one of their repeating Rifles, raised, in black and white. The card is striking in appearance and can be seen at quite a distance.

ANNOUNCEMENT IS MADE that on January 1 the Burger-Alexander Hardware Company, jobbers and importers of Hardware, Tin Plate and Cutlery, Hastings, Neb., will consolidate their stock with the Denver Hardware Company of Denver, Col., under the firm name of Denver Hardware Company. We are advised that the former have a paid-up capital of $100,000 and the latter of $150,000, so that the consolidation of the two companies will form a jobbing house creditable to Denver and in a position to cultivate efficiently the important territory of which that city is the center. We are advised that the new concern will increase their force of traveling salesmen and extend their trade into territory that has not yet been canvassed by Denver jobbers. George H. Corning of Denver, Col., will be president and P. S. Burger of Hastings, Neb., vice-president and general manager. We are advised that Mr. Burger, the founder of the Burger-Alexander Hardware Com-

pany, has been engaged in the Hardware business for 15 years and is thus familiar with it in all its details. The business of the Burger-Alexander Hardware Company will be closed by their secretary and treasurer, M. L. Alexander, Hastings, Neb.

IN CONNECTION with the Barb Wire litigation, to which reference was made in our last issue, circulars have been sent out respectively by Washburn & Moen Mfg. Company and St. Louis Wire Mill Company, the former after the granting of the injunction by Judge Allen, and the latter on its dissolution. In these circulars reference is made to the matter as seen from the standpoint of the different parties, and referring, in addition, to the general features of the litigation with which the trade are familiar.

WINCHESTER REPEATING ARMS COMPANY, New Haven, Conn., New York and San Francisco, have issued an attractive calendar for 1891. It is 15 x 24 inches, with metallic end, which is largely filled with hunting scenes in color. Across the center of the card is the word "Winchester" in prominent letters, surrounded by evergreen boughs. The arrangement of matter, combination of color and the pleasant effect produced as a whole makes it an attractive calendar.

THE NUMEROUS FRIENDS of A. C. Bartlett, vice-president of Hibbard, Spencer, Bartlett & Co. of Chicago, will regret to learn of the decease of his wife on the 19th inst. Mrs. Bartlett had been an invalid for some time. She was a native of Vermont, but had removed with her parents to Wisconsin at the time of her marriage to Mr. Bartlett in 1867.

OUR READERS will note the change in address of the Nubian Iron Enamel Company in their advertisement in this issue. They are now located at Cragin Station, Chicago, where they occupy works with ½ acre of ground under roof and plenty of additional space to build on if that is not enough. Although driven out of their old quarters by fire, they would have been obliged to move next spring at the furthest to secure more room for their continually expanding trade. Their New York office remains at 77 Warren street, and Hall & Carpenter of Philadelphia carry a full stock for that section.

WILLIAM F. RUSSELL, who has been for many years connected with Wallace & Sons, New York, has made an engagement with the Brooklyn Brass and Copper Company, John Davol & Sons, 100 John street, New York agents.

THE ADVERTISEMENT of Storrs & Candee, Hartford, Conn., on another page of this issue, will be of interest to our readers, as an opportunity is thus offered to a dealer in Tools and Shop Supplies to combine with another dealer in the same line in issuing a catalogue, and by so doing making a saving of nearly one-half.

THE MORRIS HARDWARE COMPANY, Youngstown, Ohio, are about to erect a new building for the accommodation of their enlarging business. It will front 45 feet on Federal street, with a depth of 180 feet, an L 90 feet in length extending it to Market street, on which the frontage will also be 45 feet. The four floors of the building will thus each have an extreme length of 270 feet. The establishment will be fitted with two hydraulic elevators, one for freight and one for passengers, and will be equipped with all the latest improvements known to the Hardware trade.

WE UNDERSTAND that the establishment of the Matthews Mfg. Company, Worcester, Mass., manufacturers of pipe collars, radiator foot rests, ferrules, stove trimmings and other seamless sheet metal specialties, is a direct outcome of the dissolution of the Worcester Ferrule and Mfg. Company, which occurred last spring, when A. T. Matthews withdrew from that company, and with John Reed and F. E. Reed formed a copartnership known as the Matthews Mfg. Company of 116 Gold street, Worchester, Mass. The machinery owned by this company, it is said, consists of the latest improvements for the manufacture of these goods and enables them to turn out a high grade of product at a reasonable cost.

W. F. FAAS, having retired on account of failing health from the firm of W. F. Faas & Co., Minerva, Ohio, and J. A. Grinder and W. H. Taylor having each purchased a third interest in the business, the firm name has become Roller, Taylor & Grinder.

W. M. CALDWELL, 75 Chambers street, New York, notifies the trade that he has severed his connection with Mason & Parker, Winchendon, Mass.

Trade Topics.

A CORRESPONDENT of *The Office* makes the following suggestion with reference to a simple method which might be adopted to facilitate collections:

A business manager is often called upon to give a customer who is backward in payments a gentle hint of the fact, and yet not so pointed as a letter would make it. A method the writer has found of value is to take the statements as they come from the bookkeeper, and "arrow" the terms of the sale, referring to same by printing a rubber stamp of a hand beneath this, as shown in the following copy:

June	3	*To Acct. as rendered*.....		
		To Mdse. at 30 days, as per bill rendered.....	49	80

This has the appearance of being an offhand request for payment; at the same time, it is thoroughly significant. I can recommend it to others in cases where the customer is a good one, though slow, and requires to be handled with care—like packages marked "glass."

The following advices from Foster & Robertson, Portland, Ore., will be read with interest, referring as they do to the condition of business and giving information in regard to other trade matters:

With the exception of a slight decline in the price of Bar Lead, there have been no changes in prices during the last two weeks. The sales of Wostenholm's Pocket Cutlery have fallen off considerably, owing to the advanced prices. The trade in Sheet Iron, Tin Plate and other metals has been very active and at firm prices. The stock of Iron Pumps and Gas Pipe has been, if anything, a little short of the demand. There has been considerable movement of Blasting Powder, Gun Powder, Loaded Shells and other fixed ammunitions. Orders from travelers continue equal in volume to October and November, while the mail orders are even larger. Since our last communication the railroads have done better in the matter of furnishing transportation, and wheat is moving in a measure, with prospects of increased movement in the next few weeks. Naturally, collections have improved and the outlook is very good indeed. The year's business, both as to volume and profits, is generally regarded as very satisfactory, both by jobbers and retailers. There have been some changes on the part of the retail trade in the last two or three weeks. Messrs. Bilger and Goeing, two well known coast travelers, the former representing for a number of years Messrs. Honeyman, De Hart & Co., and the latter Messrs. Goldsmith & Loewenberg of this city, have purchased the business of S. Williams, at Olympia, Wash., and doubtless with the thorough experience which both men are possessed of, will greatly enlarge the same. Messrs. Hunt & Chapman, formerly of Hastings, Neb., have succeeded R. H. Thompson of this city, and, together with increased stock and Eastern methods, are in a fair way to capture a goodly portion of the retail Hardware trade of this city.

An inquiry from a merchant, which appears in a recent issue of the London *Ironmonger*, will doubtless be of interest, in which he seeks a remedy from moisture condensing on show windows. He says:

My shop has three front windows. The goods in one of them are incased with glazed sashes; in another they have no protection from the shop; and in the third, which is a small window where I exhibit my best Cutlery and Plate, they are in a glass case, which I believe to be perfectly air tight. During wintry weather the exterior plate glass window of one and all becomes covered with condensed moisture inside, so that the contents are hardly visible from the street, and I fear they will be damaged. The shop is kept rather warm by hot water pipes; still I think there is plenty of ventilation through it.

The difference in temperature between the inside and the outside air is the cause of moisture condensing on the glass and consequent frosty windows. It may be some of our readers have found a solution of this trouble, and applied a satisfactory remedy.

Export Notes.

WE ARE ADVISED that large export orders for Europe of Hay and Manure Forks have been placed for 1890-91. It is stated that this trade was for a time checked or diminished by the production in Germany of the American style of forks at very low prices. The German forks have proven of very inferior quality, and the superiority of the American goods is again giving them the English and Continental markets.

Consul Turner of Cadiz, Spain, expresses a belief that Spain is an excellent market for the introduction of American farm machinery. At present their implements are of the most primitive kind, and thousands of untilled acres are awaiting the advantages of improved machinery. A large acreage of land within that country does not yield more than 40 per cent. of its capacity, although the needs of a very large population are to be supplied. The unremunerative farms could be made as productive as well tilled sections of this country by the use of our implements. The English and German tools at present take the lead, while of the large assortment of machinery in this country only the "harvester" and "cultivator" manufactured here have found there way to Spain. The Plows and Harrows of the English are finding ready market in preference to German tools, which are cheaper, though much inferior to the English in durability.

Elbel & Co., Canton, Ohio, manufacturers of Saddlery Hardware, have issued a Spanish catalogue and price-list of their goods. It is fully illustrated and contains about 90 pages. It is intended for export trade and may be had upon application by the houses who deal in these goods. A discount sheet accompanies the catalogue.

Arrangement of Stores.

WE GIVE BELOW the conclusion of description of the Hardware store of John Bellamy, 27 Eliot street, Boston, the first part of which was published in our last issue:

A case displaying Forstner Bits stands back of the show window on the right of the structure with samples of the work

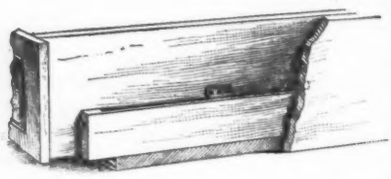

Fig. 640.—Slide Used on Drawers throughout the Store.

they are capable of doing. This and another case containing small tools closes the passage way to the back of the counter. Shelving extends along this side of the room to the steps, with cases, drawers, boxes, &c., arranged with especial reference to the class of goods they contain. A case for Files, 32 inches wide and 36 inches high, contains 90 drawers, 3 inches wide and 2½ inches high. These drawers are 18 inches deep, part being partitioned to take two sizes of Taper Files. A description giving the name and size of the Files contained in each drawer is painted on the strip above the drawer. Small brass knobs are used as drawer pulls, and the face of the drawers is stained a dark cherry color. Above this case are heavy pasteboard boxes, covered with green paper, containing Stubbs' Files, with sizes plainly marked on each drawer. The shelving from this case to the steps is 36 feet long and 8 feet high to the extreme

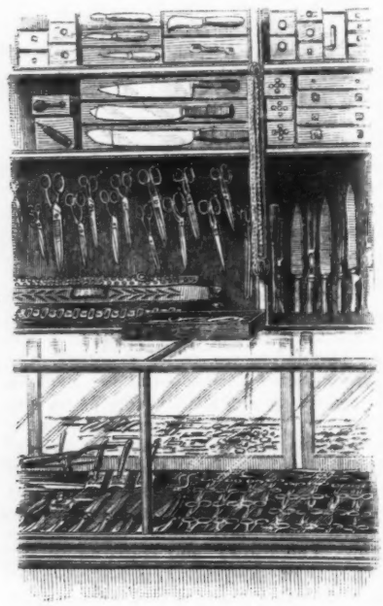

Fig. 641.—Show Case of Cutlery, with Carvers and Scissors in Shelving.

top. The space above the shelving is utilized for keeping stock in unbroken packages. A light movable ladder is used to reach the higher goods. This shelving contains Mechanics' Tools in uniform boxes sampled with the goods each contain. Sample Plyers, for instance, are fastened to the boxes with copper wire. No uniform plan for fastening samples is rigidly carried out, but Screws, Staples, Nails or Wire are used as the occasion demands, with the various classes of goods. Carpenter's Tools follow the Machinist's Tools in the shelving; the last section being devoted to boxes for Chisels, which arrangement calls for special mention. These shelves are 18 inches deep, and project 4 inches beyond the other shelving, are 32 inches wide and 8 inches high, accommodating 15 boxes to each shelf. The extra depth of the shelves allows all the boxes to stand with the ends to the counter, the ends being covered with green paper and neatly lettered with size and kind of contents. Under this 36-foot length of shelving are three tiers of drawers, those in the upper tier being 38 inches long, while the two lower tiers are but half that length. These are used for Brushes, Dusters, &c., and such light goods as are usually kept in drawers. The show cases immediately in front of the shelving display a large variety of Machinist Tools of the finer grades, arranged

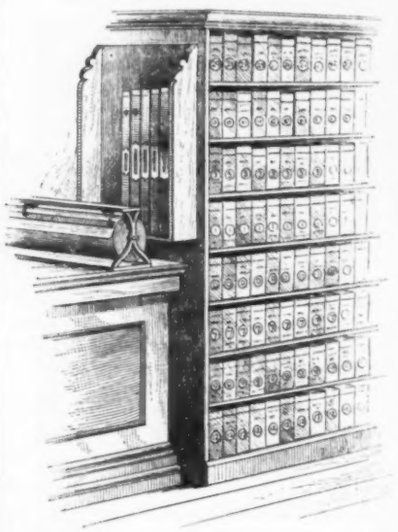

Fig. 642.—Hand Saw Case, with Level Case on the End.

to show them to the best advantage. The space set apart for the office is at the top of the three steps already mentioned, and commands a view of the entire store. The office is divided from the rest of the store by desks, giving the required space in the center. Outside of the desks are tables, on which are circulars intended for mailing or distribution, also a letter-press. An artistic telephone room, with stained glass door and windows, is convenient to the office. Shelves for catalogues, pamphlets and circulars are a part of the office fixtures. A large skylight immediately above this portion of the store distributes the light required. A dumb waiter or small elevator runs from this part of the building to the basement, and not only serves for a sample of elevator fixtures, for which Mr. Bellamy is agent, but is also used for bringing heavy goods up from the basement. A wrapping table in front of the elevator is 5 x 9 feet, with twine and paper for doing up packages. Under this table on one side is a row of drawers; the remainder of the space under the table is devoted to goods on shelving. Following the wall we next come to four shelves, supported by shelf

Fig. 643.—Showing Stairway, High Shelving and Ladder.

brackets, on which are sample Bronze Locks, Door Pulls, Door Bells, &c., which are mounted on wood standards.

Fig. 640 represents an arrangement of slides which are used on the drawers throughout the store, to prevent them from sagging or dropping down in front when drawn out their extreme length. They are of wood, 4 inches high, ⅜ inch wide, and are the same length as the drawer on which they are used. A cast iron guide is fastened to the upright on each side of the drawer, and another guide of the same kind is fastened on each side of the drawer, a lug on the end of the guides engaging in the groove in the top of the slide. The bottom of the slide runs on the same level as the bottom of the drawer. In the front of the store are a variety of show goods, selected and arranged with reference to the season of the year. On the left side of the store, upon entering the door, is a long show case, Fig. 641, for Pocket Cutlery, Carvers, Scissors, Razors, &c. The space of three shelves back of this case is lined with black velvet, upon which is sampled Shears, Carvers and Table Cutlery. The shelves above are used for smaller goods, in sampled green boxes; such goods as Picture Nails, Curtain Nails, Furniture

Nails, &c. Beyond the Cutlery showcase is a square case containing Thermometers, Razor Strops, &c. Between the stairway to the basement and the washroom is an arch 18 feet long and 4 feet deep. The four sections of shelving within the arch, also the showcase in front, are devoted to the stock and display of Dog Collars, Pad and Chest Locks, &c. Beyond the short counter is a case for Hand Saws, Fig. 642, contained in the original boxes. It is 7 feet 6 inches high, 25 inches wide and 31 inches deep, accommodating 28-inch Rip Saws. The ten openings between the shelves are about 8 inches high and will hold eight to ten Saw boxes in each opening. On the end of the Saw case is fastened a box for holding Plumbs and Levels. This is 36 inches high, 24 inches long and 3½ inches deep, the Levels standing on end, Fig. 642. Shelves containing planes are at the foot of the steps, Fig. 643 showing the shelving just beyond this. The high shelving is reached by a traveling ladder of Mr. Bellamy's design, and is referred to as working satisfactorly. A short description of the construction may be of interest. At the top of the shelving is fastened a strip of 1¼ inch pine 4 inches wide, running the entire length of the shelving. To this is fastened Lane's barn door track. Hanging on this track by a pair of 4-inch Scranton hangers is a frame of wood reaching down to the third shelf from the top. The frame is furnished with two stay rollers, one at each side just under the wooden strip, to prevent friction should the frame tilt to either side. At the lower end of the frame are two stationary casters, which run on the edge of the shelf. On the front of the frame are two handles. The ladder is attached to the bottom of the frame, from where it slants to the floor, the bottom being supplied with two Payson's truck casters, No. 188.

The basement is the same size as the store, giving room for Shovels, Nails, Roofing Paper, Transom Lifts, Screen Wire, Screen Doors, and duplicate stock of Hardware. The store throughout is arranged for comfort in doing business and showing goods to the best advantage. Root's handy price cards are largely used. A very convenient list of the square feet of Screen Wire by length and width has been arranged, intended to save figuring the number of square feet each time a price of Wire Screen is sold. It covers the widths from 24 to 36 inches, and lengths from 1 to 4 feet, jumping 3 inches between each length. The shelving, sample cases, desks, display table and furniture are antique oak.

From this description, which, however, leaves some interesting points untouched, it is evident that this store is exceptionally well arranged, with attractive display and convenient disposal of goods. It certainly bears evidence to Mr. Bellamy's taste and skill and the enterprise with which his business is conducted.

It is reported that Edgar A. Brown's Hardware store, at Churchville, N. Y., was recently damaged by fire.

Delays in Delivery.

DELAYS in filling orders sent to factories, is made a subject of discussion in a recent issue of the London *Ironmonger*, showing that the same trouble exists there, as is frequently experienced in this country. On this point it is said :

Whatever the cause or causes may be, it is a well established fact that in almost all businesses it is difficult at all times to obtain prompt deliveries of goods. If orders can be filled from stock they are usually attended to promptly, but if the goods required have to be made delay appears to be inevitable. Whether the delays complained of are longer than they need be is a matter which merits the due consideration of manufacturers. The period differs, no doubt, in individual instances, and depends upon the kinds of goods which are wanted. If a manufacturer receives an order for a few dozen or hundredweight of an article which he can produce more profitably on a large scale, or, perhaps, only produce at a profit when a certain quantity is turned out at a time, the delay can be understood readily.

They suggest as another cause for delay that the manufacturers have dropped into a dilatory way of doing business, for which no adequate excuse can be offered. It would appear from this suggestion that there is not the sharp competition nor the energy displayed among English manufacturers that we see in this country, where the rivalry displayed in securing orders and the continued introduction of new goods in almost every line leaves no room for doubt that manufacturers are alive to the necessity of untiring energy. A correspondent of the same paper attributes the cause of delays largely to the intemperance of workmen who indulge too freely at the end of the week, who are described as coming back on Tuesday and Wednesday glad to earn a day's work wherewith to buy the necessaries of life, their wages all being spent on drink. We hope, however, that this is an exceptional case, and can hardly think that it explains the general complaint that orders are not filled more promptly. It is a fact that delays at the factory cause much annoyance, and often serious losses, and that manufacturers should endeavor to remove the causes. On this point the article referred to says:

If delay is inevitable its cause should be at once made known to the buyer, so that he may decide whether he or his customer can wait, or whether he will endeavor to get his order filled more promptly in some other quarter.

While this provides no remedy for the trouble, such action on the part of the manufacturer would be no more than justice to the merchant ordering the goods, as it would relieve his mind of any uncertainty in the matter.

Price-Lists, Circulars, &c.

HIBBARD, SPENCER BARTLETT & CO., Chicago: Manicure Sets, Manicure Scissors, Polishers, Knives, Files, Tweezers, Paper Knives, &c.

E. C. MEACHAM ARMS COMPANY, St. Louis, Mo.: Gymnasium and Christmas Goods, illustrations of Bowling Alleys, Rowing Machines, Playing Cards, Boxing Gloves, Pocket Cutlery, Baby Carriages, &c.

THE NORTHERN REFRIGERATOR COMPANY, Grand Rapids, Mich.: Ice King Refrigerators, Ice Chests, Sideboard Refrigerators, Cold Storage Rooms, &c. The point is made that every Ice King Refrigerator has six walls to preserve the ice, and all are lined with throughout with zinc. The tilting device for ice chamber illustrated in our last issue is shown in it

J. F. WOLLENSAK, Chicago: Catalogue No. 10, covering Electrical, Mechanical and Air Bell Sets for Front Doors, Chambers, Dining Rooms, Barns, Offices, Factories, Elevators, Steamers, Cars, Yachts, &c. Each set is packed in a neat box ready for shipment and use. A revised price-list accompanies the catalogue. Prices of the Electrical Sets range from $2.30 to $10. Mechanical Sets range from $1.50 to $2.20. Air Bell Sets range from $5 to $7.20 each. A great variety of goods is shown in this catalogue, although it is of small size and comprises but 38 pages. The sets listed in it have been carefully selected and designed to meet the popular demands on each of its kind. Preference is given to the Leclanche Disque Batteries, but other batteries are packed with the sets if desired. Bells and pushes are varied to suit special requirements.

C. ROGERS & BROS., Meriden, Conn.: Spoons, Forks, Knives, &c. These goods are shown in a large variety of styles and patterns. A number of pages in the back of their catalogue are devoted to list prices.

THE SHUNK PLOW COMPANY, Bucyrus, Ohio: Shunk's New Model Plow, Steel Breaking Plows of all kinds, Double and Single Shovel Plows, and Plow Fixtures. They issue a large card for hanging with metallic ends, illustrating eight different styles of their Plows, these being interspersed with colored views of Niagara Falls and vicinity.

SMALLEY MFG. COMPANY, Manitowoc, Wis.: Feed Cutters, Horse Powers, Mountings for Powers, Sweep Powers and Jacks, Feed Grinders, Self-Feeding Drag Saw, Cut Off Saws, Farm Engines, &c.

THE PLATT CARRIAGE COMPANY, Mansfield, Ohio: Fine Carriages, Surreys, Jaggers, Road Wagons and Phaetons. They direct attention to the material, workmanship, beauty and style of their vehicles.

HAMILTON INDUSTRIAL WORKS COMPANY, Hamilton, Canada: Wringers, Washers, Mangles, Churns, Carpet Sweepers, Meat Choppers and Kitchen Sundries. The above firm are agents for American goods in the above lines, as well as manufacturers.

SPRINGFIELD ARCHITECTURAL IRON WORKS, Springfield, Ohio: Iron Fences, Gates, Lawn Vases, Settees, Stairs, Jail Cells, Hitching Posts, Lawn Mowers, &c.

ROBERT DONAHUE, Burlington, Iowa: Circular relating to Gautier Steel Toe Calks, Cutter Stuff, Bob Sled Stuff, Cast and Wrought Sled Runners, Cutters, Children's Sleds, Burden Horse Shoes, &c. An attractive calendar for 1891 is also issued.

THE EMPIRE MFG. COMPANY, Forestville, N. Y.: Step Ladders, Clothes Bars, Acme Wash Bench, Skirt Boards, Molding Boards, Rock Maple Steak Boards, Horse Pokes, Extension Ladders, &c.

COMBINATION FOLDING BATH TUB COMPANY, Marshall, Mich.: Combination Folding Bath, Family Chair Bath. The Folding Bath Tub contains a water heater, with a stated capacity of heating 20 gallons of water in 25 minutes, and can be operated by oil, gasoline, gas or natural gas. It requires but little room when folded. The great advantage claimed for it is that the expense of putting in heating boilers with ranges or furnaces with cold and hot water pipes is entirely done away.

HENRY SCHADE, 56 and 58 Ainslie street, Brooklyn, N. Y.: Electro Silver Plated Ware, Communion Sets, Ice Pitchers, Tea Sets, Dinner Casters, Cake Baskets, Berry Dishes, Cups, Butter Dishes, Trays, Flat Ware in cases, Spoons, Forks, Bells, &c.

THE H. M. MYERS COMPANY, Beaver Falls, Pa.: Shovels, Spades, Scoops and Drain Tools. In their catalogue for 1891 they state to the trade that their goods are the result of a quarter of a century of careful and practical application to the necessities of the consumer, and call particular attention to the desirability of their Patent Solid Steel Socket Strap Shovels.

PARLIN & ORENDORFF COMPANY, Canton, Ill.: Catalogue E, illustrating their line of Plows, Cultivators, Harrows, &c. They are among the oldest manufacturers of agricultural implements in the West, hav-

ing been established in 1842. Their catalogue presents a very great variety of Plows, Listers, Corn Drills, Gang Plows, Cultivators, Potato Diggers, Rotary Disk Harrows, Harrow Seeders, Stalk Cutters, Cotton and Corn Planters, Tooth Harrows, &c., meeting almost every conceivable demand for special implements in this line. Cuts of parts of the machines are given in complete detail, together with full lists of prices and a telegraph code, for the convenience of those ordering machines or repairs. The catalogue comprises 80 pages, and is very handsomely printed, the illustrations being particularly fine.

George S. Douglass.

GEORGE S. DOUGLASS, whose sudden death on the 16th inst., at the age of 33 years, was announced in these columns a week ago, was born in Brooklyn May 25, 1857. His first business experience was in the employ of D. G. Gautier & Co., Jersey City, N. J., afterward Gautier Steel Department of Cambria Iron Company, Johnstown, Pa., of which his father was superintendent. In 1880, on the organization of the Iowa Barb Wire Company, he was given the responsible position of treasurer, an office which he filled up to the time of his death, and in which, during the development of the company's business, he showed marked ability which led to his filling a leading position in the management of their affairs. He also became prominent among manufacturers in this line, and in Barb Wire councils he occupied an influential position, so much so that he was regarded as a leader among men many of whom were his seniors in years and experience. He was widely known among the trade in the East and West, and made many friends by his genial ways and cheerful disposition. He was unquestionably an able business man, and with the careful study which he gave to the market and his well balanced judgment, his views were regarded as of especial weight. Much regret is expressed and sincere sorrow felt, that one so highly esteemed, with so promising a future, should be taken so early from the scene of his activity and usefulness.

GEORGE S. DOUGLASS.

Duty on Guns.

THE GENERAL APPRAISERS have sustained the Collector of the Port in his decision in the matter of duties to be levied on importations of gun stocks and gun barrels. The case was that of Schoverling, Daly & Gales, who protested against the duty assessed on 12 finished gun stocks with locks and mountings, brought in by the steamer Amsterdam. The Assistant Appraiser held that the stocks were ready to attach to gun barrels which arrived in another shipment, and that the two attached to one another made breech loading guns complete. As breech loading guns, valued at not over $6 each, the Collector assessed the duty at 35 per cent. ad valorem and $1.50 specific duty. The importers protested that gun stocks were not complete firearms, and should be classed as manufactures in part of steel, dutiable at 45 per cent. In deciding the case the appraisers take the view that the stocks and the barrels were imported to be put together in this country, and that therefore the importations should pay duty as breech loading shotguns. The case, which is made by the importers of this city a test case, will, we are advised, be carried into the courts.

Stamping Imported Goods.

SINCE OUR RECENT ARTICLE on this subject there has been further correspondence between importers and the Treasury Department in regard to the interpretation of the law requiring goods which are stamped to be so stamped as to indicate the country of their origin. The Treasury Department is evidently disposed to consider the law as requiring that the mark shall distinctly name the country of origin, and the letters given below show the strictness with which in their judgment this should be required. Under date December 4 the well known Hardware house of Alfred Field & Co., 93 Chambers street, New York, addressed the Secretary of the Treasury, inquiring if goods branded with the name of the different countries in the German Empire will meet the requirements of the section in question—that is to say, in cases where goods are made in Prussia, if they are branded "Prussia;" when made in Bavaria, if branded "Bavaria," &c. Under date December 9 the following reply was made by O. Z. Spaulding, Assistant Secretary:

In reply to your letter of the 4th inst., I have to state that, in the opinion of the Department, it will be sufficient under the provisions of section 6 of the act of October 1, 1890, if goods produced in and imported from the German Empire are "marked, stampod, branded, or labeled" with the name "Germany."

While a name of a State of the German Empire on goods imported on and after March 1, 1891, might be construed as a compliance with the above mentioned provision, it is deemed that such provision would be more closely complied with if the name of the mother country of origin were made to appear. No objection, however, exists to marking goods with the name of the State, if the name of the country also appears, as, for example, "Prussia," Germany.

In reply to the above letter Alfred Field & Co., December 10, wrote the Department as follows:

We are duly in receipt of your favor of December 9 in reference to stamping and labeling goods in accordance with the new branding law, as per section 6 of the new Tariff law.

You admit that stamping the name of the different kingdoms of the German empire might fairly be construed to meet the requirements of the law, but that it is deemed the section would be more closely complied with if the name of the mother country of origin were made to appear.

The difficulty is that while it is desirable to stamp the names of the several kingdoms in which the goods are made, it is objectionable to stamp both the names of the kingdoms and the empire, for the reason that in most cases there is not room for both names. It would seem that if it should be ruled that stamping the kingdoms of the German empire is not sufficient to meet the requirements of the law, then, in that case, it would be necessary in cases where goods are made in England, Scotland or Wales to stamp such goods "Great Britain," and that "England," &c., would not be sufficient. We should, therefore, much like to have a clear decision on this matter, as it is of considerable importance to us, and we have already some goods in process of manufacture, which are being stamped "England" and "Prussia," as fairly covering the requirements of the law.

To this letter the Assistant Secretary made reply December 17, to the following effect:

In reply to your letter of the 10th inst, further in regard to the requirements of section 6 of the act of October 1, 1890, as to the marking, stamping, &c., of imported goods on and after the 1st of March, 1891, I have to state that the above requirements will be fully met if the goods you mention shall bear the name of the "country of their origin" stamped or marked in legible English words, such as "Great Britain," "France," "Germany," &c., as the case may be, with or without the addition of the name of a state or division of such country of origin, as the shipper may desire.

I may add that the language of the section mentioned is so plain as hardly to require any interpretation by this Department.

It is obvious that this letter leaves the matter in unsatisfactory shape, and with a somewhat embarrassing uncertainty as to the interpretation of the Department inasmuch as it fails to give an explicit reply to the inquiry of Alfred Field & Co. It is obviously intended by the Department to convey the impression that goods, for example, marked "England" simply are not to be regarded as meeting the requirements of the law, the opinion being that they should be marked "Great Britain." This interpretation will, however, hardly commend itself as reasonable, and it is very questionable whether the attempt will be made to apply it.

It is Reported—

THAT J. M. LeBeau & Co., Escanaba, Mich., have opened a General Builders' and Mechanics' Supply office in that city.

That the Hardware store of Smith & Carnahan, Washington, Ind., was damaged by fire December 13. It was insured for $2600.

That W. R. Dean's Hardware establishment, Minden, Neb., was recently burned out.

That H. M. Lane has bought George Hubbard's interest in the Hardware firm of Hubbard & Black, Cortland, N. Y.

That Howard Ames, formerly engaged in the Hardware business at Mt. Morris, N. Y., was married in St. Louis on the 11th inst. to Miss Nellie Boynton.

That F. C. Chapman has opened a Hardware store at South Dennis, Mass.

That C. F. Behrends has embarked in the Hardware business at Sioux City, Iowa.

That E. P. & L. L. Blarm have opened a Hardware store at Monroe City, Ind.

That Charles Tanzer, Hardware and Tin, Croghan, N. Y., was burned out recently. Loss, $8,000.

That E. F. Birdsall & Co., Evart, Mich., Hardware dealers, have moved into a new store.

That H. P. Burt, Stoves, Tin, &c., Clayville, N. Y., has sold out to Green Bros.

That James M. Edwards, Dansville, N. Y., is closing out his Hardware business and will move to Minneapolis.

That the establishment of J. V. Carlisle & Co., dealers in Hardware, Paints, Oils, Glass, &c., Wilmington, Del., was slightly damaged by fire on the 16th inst.

That the Hardware firm of Colton & Chapman, Toledo, Ohio, was dissolved on the 17th inst. The business will be continued by the Chapman Hardware Company, Frank H. Chapman acting as manager. The new firm will handle a full line of building and general Hardware, especial attention being given to Stoves, Bicycles, House Furnishing Goods and Cabinet Hardware.

That the firm of Jack Bros., Braidwood, Ill., has been dissolved, Thomas B. Jack retiring. William Jack, Jr., George Jack and John Jack will continue the business.

That Hewlett Scudder, of the firm of Stoyle & Scudder, dealers in Stoves, Tin, &c., Huntington, N. Y., has retired from the business, which will be continued by W. H. Stoyle.

That the Hardware store of Samuel Peloubet, Bloomfield, N. J., was entered by burglars on the 17th inst., and $60 worth of Cutlery and other goods stolen. No clue to the thieves has yet been obtained.

That Jeremiah Black will open a new Hardware store in Boone, Iowa.

That the Parkersburg Hardware and Mfg. Company have been incorporated at Parkersburg, West Va., by C. B. Smith and others, to manufacture and deal in Hardware.

That the Hardware store of L. J. Soisson, Connellsville, Pa., was recently damaged by fire to the extent of $50.

That C. F. West will open a new Hardware store at Chattanooga, Tenn.

That Schrader & Anderson, Sandborn, Ind., Hardware merchants, have sold out their business to H. L. Renner.

That Miles & Maderis, dealers in Hardware, Lyons, Kan., have disposed of their business to F. H. Wonderly.

That P M. Smith, Hardware, Stoves, &c., Kirksville. Mo., was recently burned out.

That George E. Hill will open a hardware store in Sioux Falls, South Dakota.

Exports.

PER BARK FRANCESCA T., NOVEMBER 29, 1890, FOR MELBOURNE, AUSTRALIA.

By Meriden Britannia Company.—12 packages Plated Ware.
By Russell & Erwin Mfg. Company.—29 packages Hardware.
By Dunbar, Hobart & Co.—80 cases Nails.
By Edward Miller & Co.—1 box and 91 packages Lamp Goods.
By R. W. Forbes & Son.—3 cases Hardware, 2 gross Hardware, 1 case Metal Goods.
By A. S. Lascelles & Co.—34 dozen Axes, 1 case Hardware.
By W. H. Crossman & Bro.—6 dozen Bush Hooks, 4 dozen Hay Forks, 4 dozen Lanterns, 6 dozen Pruning Shears, ½ dozen Meat Choppers, 2 cases Hardware, 350 pounds Tacks, 1 case Agricultural Implements, 18 Lawn Mowers, 8 cases Hardware, 10 dozen Forks.
By V. Basanta.—1 dozen Choppers, 2 dozen Axes, 2 dozen Knives, 15½ dozen Hardware, 56 pounds Washita Stone, 4 dozen Wringers, 2 dozen Springs, 2 dozen Saw Sets, 3 dozen Forks, 1½ dozen Spoke Shaves, 15 dozen Axes, 10 dozen Saws.
By H. W. Peabody & Co.—18 packages Hardware, 5 barrels Lamp Ware, 7 packages Stamped Ware, 3¼ dozen Miter Boxes, 11 dozen Primers, 10 packages Rakes, &c., 14 cases Lawn Mowers, 8 packages, Hardware, 33 gross bolts, 5 cases Agate Ware, 8 cases Wringers.
By McLean Bros. & Rigg.—99 Plows, 11 dozen Locks, 1½ dozen Wrenches, 1 dozen Revolvers, 3½ dozen Wrenches, 20 dozen Braces, 5 dozen Bush Hooks, ½ dozen Hoes, 2 dozen Vises, 2000 Metallic Cartridges, 6 dozen Augers, 3 Carbines, 1 dozen Seed Planters, 560 pounds Whetstones.
By Arkell & Douglas.—2240 pounds Axes, 460 pounds Axles, 11,200 pounds Stoves, 5 dozen Axes, 2 dozen Plated Ware, 1 dozen Hay Knives, 160 pounds Clips, 13½ dozen Oil Stoves, 6 dozen Thermometers, 4 dozen Traps, 3 dozen Hooks, 2 dozen Wringers, 3 dozen Bits, 6 Stoves, 4 dozen Traps, 12 dozen Lamp Ware, 1½ dozen Lawn Mowers, 2 dozen Axes, 3 dozen Oil Cans, 4 dozen Saws, ½ dozen Hoes, 4 dozen Drills, 2 dozen Pumps, 4 dozen Wringers, 3 dozen Dust Pans, 8 dozen Blocks, 3 dozen Hoes, ½ dozen Rifles, 44,862 pounds Barb Wire, 20 dozen Axes, 2 dozen Locks, ½ dozen Punches, 2670 pounds Bolts, 2 dozen Axes, 3 dozen Wrenches.

PER BARK TROS, DECEMBER 1, 1890, FOR ADELAIDE, AUSTRALIA.

By J. A. Gifford.—6 packages Hardware.
By Adriance, Platt & Co.—12 Mowers.
By Strong & Trowbridge.—22,400 pounds Barb Wire.
By R. W. Forbes & Son.—8 packages Carriage Hardware.
By A. Field & Co.—9 Refrigerators, 2 dozen Wringers, 80 dozen Tinware.
By W. H. Crossman & Bro.—4 packages Lamps, ½ dozen Guns, 10,000 Cartridge Shells, 20,000 Primers, 20,000 Cartridges, 16 sets Axles, 12 dozen Lanterns, 52 cases Carpenters' Tools, 12 cases and 8 packages Hardware, 1 dozen Axes.
By H. W. Peabody & Co.—6 cases Hardware, 580 reels Barb Wire, 18 cases Edge Tools, 6 packages Stoves, &c., 35 crates Stoves, 3 cases Hardware, 1 case Money Drawers, 1 cask Lamp Ware, 3 cases Meat Choppers, 1 case Tacks, 48 Wringers, 2 packages Traps, 3 cases Hardware, 1 gross Egg Beaters, 6 cases Edge Tools, 2½ gross Traps, 1 package Cork Pullers, 1 package Barometers, 3 packages Hardware, 1 package Whetstones, 7840 pounds Barb Wire, 1 case Hardware.
By McLean Bros. & Rigg.—4 dozen Saws, 1 dozen Wringers, 2 dozen Hammers, 3 dozen Bush Hooks, 6 dozen Door Springs, ¾ dozen Planes, 3 dozen pairs Butts, 6 dozen Hay Forks, 36 dozen Mouse Traps, 7 dozen Drills, 5 dozen Whetstones, 4 dozen Lemon Squeezers, 5 dozen Locks, 4 dozen Mattocks, 12 dozen Door Springs, 9 cases Agate Ware, 6 dozen Fly Traps, 30 Oil Stoves, 9 dozen Wrenches, 15 dozen Axes, 3 dozen Bench Screws, 12 dozen Mouse Traps, 4 dozen Drills, 1 Meat Cutter, 10 gross Harness Menders, 72 dozen Cages, 1 case Plated Ware, 2 cases Saws, 4 packages Lamp Goods.

PER BARK XENIA, DECEMBER 10, 1890, FOR SYDNEY, NEW SOUTH WALES.

By B. F. Avery & Sons.—40 Plows.
By Winchester Repeating Arms Company.—12 Guns.
By W. K. Freeman.—4 Scales.
By Meriden Britannia Company.—13 barrels Plated Ware.
By Edward Miller & Co.—124 packages Lamp Goods.
By Collins & Co.—429 dozen Edge Tools.
By V. Basanta.—5 dozen Hammers, 117 Planes, 13 dozen Hardware, 8½ dozen Chisels, 4 dozen Braces.
By Tower & Lyon.—3 cases Hardware, 8 barrels Tackle Blocks, 6 cases and 2 crates Glue, 4 cases Hardware.
By H. W. Peabody & Co.—18 dozen Brushes.
By R. W. Forbes & Son.—9 dozen Hardware, 2 boxes Carriage Hardware, 3 packages Hardware.
By V. Basanta.—18 Wringers, 86 dozen Saws, 2 dozen Sad Irons, 3 dozen Churns, 6 dozen Tills, 22 dozen Locks.
By Coombs, Crosby & Eddy.—1 crate Stone, 8 dozen Wringers, 31½ dozen Tools, 15 gross Hardware, 3 gross Egg Beaters, 2 dozen Carpet Sweepers, 4 dozen Carpenters' Tools.
By W. H. Crossman & Bro.—3¾ gross Shovels, 4 casks Lamp Goods, 6 dozen Sifters, 35 dozen Axes, 17 dozen Cow Bells, 6 dozen Grindstone Fixtures, 20,000 Cartridge Shells, 30,000 Primers, 3 packages Lamp Goods, 18 cases Hardware, 4½ dozen Churns.
By McLean Bros. & Rigg.—131 sets Axles, 18 dozen Locks, 42 dozen Door Springs, 9 dozen Drills, 147 dozen Pulleys, 38 dozen Saws, 2 Drills, 2 gross Rat Traps, 1 Drill, 1 dozen Chucks, 12 dozen Axes, 55 packages Lamp Goods, 1 dozen Wringers, 50 Churns, 1 gross Mop Handles, 6 dozen Hames, 18 dozen Axes, 40 pounds Whetstones, 9 Plows.
By Ilsley, Doubleday & Co.—5 gross Tools, 1 box Hardware, 18 dozen Horse Brushes.
By Arkell & Douglas.—6 cases Axes, 375 pounds Wooden Hames, ½ dozen Tire Shrinkers, 224 pounds Tacks, ½ dozen Wringers, 3 dozen Axes, 17 dozen Axes, 11,219 pounds Barb Wire, 100 dozen Lampware, 103 dozen Tinware, 20 dozen Picks, 1½ dozen Lawn Mowers, 1629 pounds Bolts, 20 dozen Axes, 490 dozen Lampware, 6 dozen Hinges, 120 pounds Nails, 4 dozen Wrenches, 19 dozen Saws, 1 dozen Cork Pullers, 12 Stoves, 32 Harrows, ½ dozen Scales, 6 dozen Saws, 20 dozen Bush Hooks, 20 dozen Hammers, 6 dozen Forks, 9 dozen Saws, 6 dozen Hatchets, 14 dozen Lamps, 15 dozen Locks, 7 dozen Axes, 1 dozen Wringers, 37 dozen Axes, 6 dozen Traps, 29 dozen Axes, 8 dozen Saws, 18 dozen Axes, 5 dozen Axes, 2106 pounds Bolts, 14 Stoves, 13 dozen Wire Goods, 2 dozen Broilers, 18 dozen Picks, 55 dozen Axes, 3 Shellers, 18 dozen Lampware, 329 pounds Iron Nuts, 416 pounds Bolts, 62 pounds Hames, 16 pounds Springs, 2 dozen Jacks, 127 pounds Nails.

PER BARK MARY HASBROUCK, DECEMBER 11, 1890, FOR BRISBANE, AUSTRALIA.

By H. B. Moore.—9 packages Plows and parts.
By Edward Miller & Co.—15 barrels Lamp Goods.
By V. Basanta.—3 dozen Churns, 6 Wringers.
By R. W. Forbes & Son.—2 dozen Axes, 10 pounds Oil Stoves, 11 boxes Plows, 3 packages Hardware, 14 packages Carriage Hardware, 1 Saw, 1 case Hardware.
By H. W. Peabody & Co.—6 cases Lead Pencils, 28 dozen Forks, 21 packages Hardware, 16 Oil Stoves, 4 packages Sifters, 24 Stepladders, 6 packages Hardware, 2 cases Lampware.

The Irwin Solid Center Stem Bits.

The Irwin Auger Bit Company, Wilmington, Ohio, are manufacturing auger bits, as illustrated herewith. These have been a line of goods which are probably new to many hardware dealers. They are made in auger, car and machine bits; also in boring machine and carpenters' augers. The cuts will convey an idea of the construction of these goods. Attention is directed to the following points and claims made by the manufacturers: That having only one cutter they only require half the power in boring, and they cut equally fast; that it is impossible for them to choke, as they have only one crimp, and therefore have twice the clearance of any other bit; that no pressure is required in boring; that they will bore equally well in the end or side of any kind of wood, having a solid center, rendering them strong. It is stated these points will be appreciated by millwrights, car and bridge builders, mechanics and manufacturers generally.

Fig. 1.—The Irwin Solid Center Stem Auger Bit.

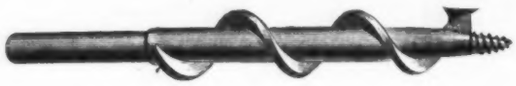

Fig. 2.—The Irwin Boring Machine Augers.

The Invincible Clothes Wringer.

The Lovell Mfg Company, Erie, Pa., are putting upon the market the Invincible Wringer, as illustrated herewith. It is claimed that this wringer has solid white rubber rolls, vulcanized on the shaft, and an oil tempered steel spring so arranged as to give the wringer great capacity without injury to the spring. The rolls are described as being driven by a small gear on the handle, that turns on a stud between the two larger gears, as shown in the cut; the upper large gear being on the shaft of the upper roll, while the lower large gear is on a counter shaft that passes through the frame of the wringer below the under roll. The gears on the handle drive the under roll by gears on the counter shaft and under roll, at the other or opposite end of the wringer, these gears not being shown in the cut. It is stated that by this arrangement of gearing the tubs, and the wringer turned either way; or may be be used as any wringer upon round or square portable tubs. The point is made that the boxes for the roll bearings are made of hard wood, boiled in oil, to remove the necessity for oiling those bearings, and to prevent any surplus grease which would be apt to soil the clothes in wringing.

The Invincible Clothes Wringer.

Nicholson's Duplex Chimney Top.

Graham & Murphy, Fourth avenue and 126th street, New York City, are offering the trade a patent duplex chimney top, some idea of the general construction of which may be obtained from an inspection of the accompanying illustrations. The manufacturers claim that the use of this device does away with long stretches of galvanized pipes on the side of high buildings, and that the chimney top will work with entire satisfaction upon any chimney, whether high or low and whatever be the side of the building as regards the points of the compass. Fig. 1 shows a general view of the Nicholson Patent Duplex Chimney Top, while Fig. 2 shows a sectional view through the top, the arrows indicating the course of the air currents with the wind blowing from different directions. The manufacturers claim that the construction of this device is such that when there is no wind to speak of the up drafts are improved, while the same may be said of horizontal drafts when there is a wind. The smoke is said to be drawn out of the chimney with increased force and choking up of the flue with soot is prevented.

Nicholson's Duplex Chimney Top.—Fig. 1.—General View of the Device.

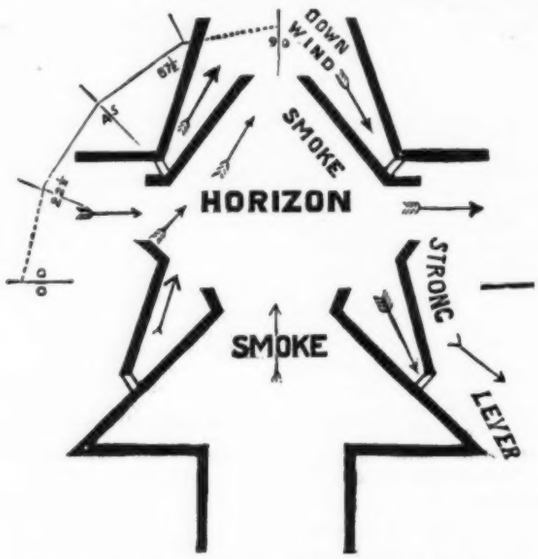

Fig. 2.—Vertical Section through the Chimney Top.

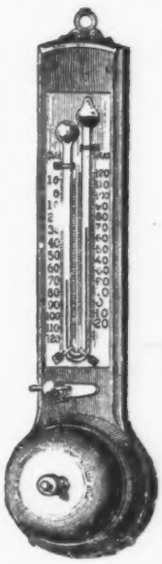
Krick's Handy Thill Anti-Rattler.

Theo. J. Ely Mfg. Company, Conneautville, Pa., are introducing an anti-rattler, as illustrated herewith. This is spring steel formed in the shape shown in the cut. Through the arched piece in the center is a bolt with a thumb screw on the end. When the thumb screw is turned up the two ends separate to the required distance. The anti-rattler is to be inserted at the under side of the coupling without removing nut or bolt. It is stated that any desired degree of pressure required to avoid rattling may be secured by screwing up the thumb nut, and that the device may be placed in position in two minutes by the operator without assistance.

Krick's Handy Thill Anti-Rattler.

The North Star Refrigerator.

For the purpose of explaining the construction of the refrigerators made by the G. M. Shirk Mfg. Company, 112 and 114 Lake street, Chicago, an illustration is herewith presented of a sideboard refrigerator, which they have just brought out. Refrigerators of this pattern have a tank to catch the drippings from the ice. The walls are not filled, but are constructed with hollow spaces which have no openings and thus contain dead air, which, it is claimed, insures perfect protection against outside heat, as air is the best known non-conductor of heat. The ice chamber is lined with galvanized steel, instead of zinc, and, it is claimed, is thus not so liable to be performed by the ice pick. The bottom

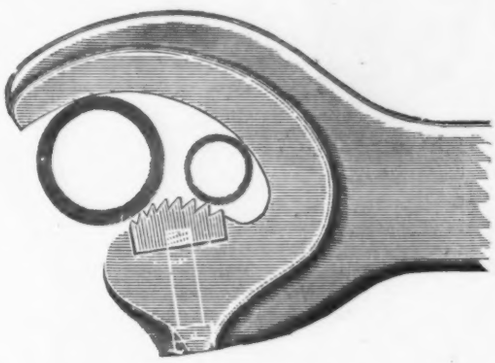


North Star Refrigerator.

of the provision chamber has a patent drain trough, to carry into the waste pan all spilled liquids or water used in washing it out. A ventilator is placed in the top of the lid. The trimmings used on these refrigerators are of the best character. The hinges are of solid bronze, of ornamental pattern, made with a curve to exactly fit the swell in the door. The lock is of a new pattern. It is an air-tight wedge lever lock, with a drop handle. The latch is raised by slightly turning the handle, which is mounted on a revolving plate.

Electric Alarm Thermometer.

The Nassau Electrical Company, 19 Park place, New York, are putting on the market an alarm thermometer, as illustrated herewith, which is operated by one of their electric capsule batteries, a description of which was given in our issue of the 18th inst. These thermometers are adapted for use in breweries, malt houses, Turkish baths, cold storage houses, factories, &c., to control any given range of temperature. For offices, living and sleeping rooms, conservatories, nurseries sick rooms, hospitals, schools, railway cars, sleepers, &c., the thermometer is usually given a range of 4° above and below 70°, as 70° is the temperature most conducive to health and comfort in such places. When the mercury reaches either extreme of this range the alarm bell rings, and continues to ring until the



Nassau Electric Alarm Thermometer.

temperature changes or the switch is turned. Thus it provides a safeguard against the dangers to health which arise from variations of temperature. The alarm can, when desired, be arranged to sound at any distance from the thermometer itself, and in this way be used as a guard against the risk of fire. When no alarm is needed, as in summer, the bell is silenced altogether by turning the switch. The electric capsule which operates the alarm bell is described as perfectly dry, needing no attention, and will last, it is stated, from one to three years, according to the frequency with which the alarm is sounded; it can be instantaneously replaced by a new capsule at a nominal cost.

Paragon Pipe Wrench.

The Paragon Novelty Company, New Haven, Conn., are introducing a pipe wrench, as illustrated herewith. It is described as having the jaws made of the best

Paragon Pipe Wrench.

of steel, hardened and tempered, and made interchangeable. They can be taken out, and when dull sharpened and replaced. New jaws may be obtained when desired. It is stated that this wrench will grip any round or irregular object, as gas pipe, square or hexagon nuts, and needs no adjustment from pipe to coupling. These wrenches are made in five sizes, ranging from ⅛-inch pipe to 2-inch coupling.

The Perfect Cork Extractor.

Alford & Berkele Company, 77 Chambers street, New York, are introducing a cork extractor, as illustrated herewith,

Fig. 1.—The Perfect Cork Extractor.

and manufactured by E. Donally, Sixteenth street and Third avenue, New York. The body of the extractor is made of a flat strip of spring metal, the upper end of which is looped over a handle,

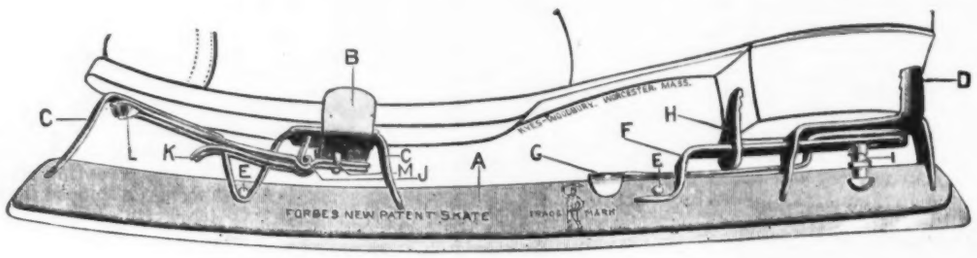


Fig. 2.—The Perfect Cork Extractor, as Used.

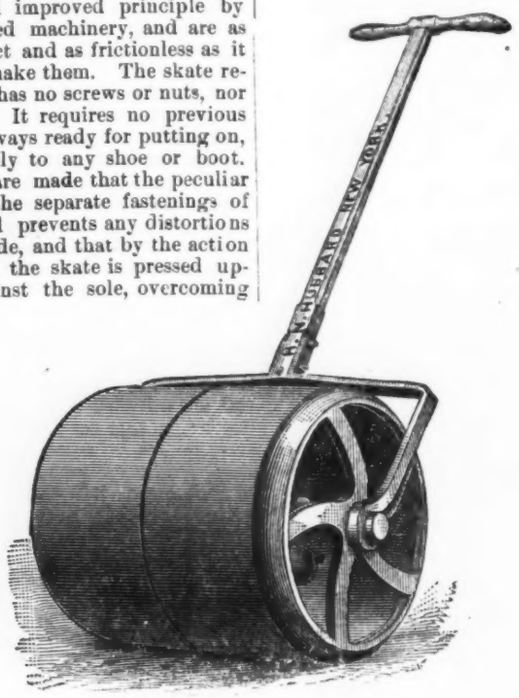
while at a short distance from its lower end are outward and upward extending claws; another set of similar claws being arranged at a point higher up on the strip, Fig. 1. The extractor is designed to pull corks from the inside of bottles, jugs, demijohns, &c., as illustrated in Fig. 2. It is stated the operator does not have to see the cork, nor hunt for it as the extractor does both without assistance. The handle has one tapering end, to be used in forcing the cork down into the bottle, in case of full bottles or where the cork has lodged in the neck, after which the cork is withdrawn as described.

Forbes' New Patent Skate.

Merwin, Hulbert & Co., 26 West Twenty-third street, New York, are introducing Forbes' skate, as illustrated herewith. It will be seen from the following description that it embodies features not found in other skates. The runner is unusually broad on the bottom, being ⅝-inch wide in front and tapering to nearly a point at the back, making a gradual curve the length of the runner. The advantage



Forbes' New Patent Skate.

of this form is referred to as presenting a smaller surface to the ice when making curves, and consequently less friction. The bottom of the runner is curved vertically from about the center part, taking advantage of the natural spring of the instep to accommodate any part of this curve as the particular poise may require. This form also gives firmness when standing on the skate, without the unpleasant feeling of tipping backward. It is stated that the bottom of the runner is ground upon an entirely new and improved principle by specially designed machinery, and are as absolutely perfect and as frictionless as it is possible to make them. The skate requires no key, has no screws or nuts, nor any loose parts. It requires no previous fitting, but is always ready for putting on, and fastens firmly to any shoe or boot. The statements are made that the peculiar arrangement of the separate fastenings of the sole and heel prevents any distortions of the skate blade, and that by the action of putting it on the skate is pressed upward firmly against the sole, overcoming the sensation of any looseness. The clamps in front, upon being fastened, bend over, drawing the sole down on to the skate, and obviating the necessity of placing the skate on the ice and pressing the sole tightly to the skate before fastening it. The clamps in front are fastened by a ratchet clutch and those at the heel by a friction clutch. This skate is referred to as being the outcome of 30 years' experience of Mr. Forbes, the patentee of the Acme, receiving at the hands of the inventor a more scientific treatment than has ever before been given to the subject. The skate is neat in appearance, finely finished, and the trade are assured by the manufacturers that only the very finest quality of steel is used, the object being to produce the very best article of its kind that can be made.

Hubbard's Improved Garden Roller.

The Boonton Agricultural Works, Boonton, N. J., and 96 Chambers street, New York, are manufacturing a garden roller, as illustrated herewith. The improvement consists in the rounded edges of the section to prevent dirt being thrown up in turning the roller round at the ends or corners of the plat to be rolled. It is stated that in operating the old style it is necessary to keep the roller rolling in a straight line, or the square outer edges dig into the soil and throw up dirt in sufficient quantity to seriously interfere with the work already accomplished. The wood handles are made from seasoned oak, and referred to as being preferable to iron in every respect. Upon the shafts are hung weights for the purpose of keeping the handles erect and to give greater weight to the rollers. These rollers are manufactured in both two and three sections, from 20 to 28 inches in diameter, all having 12-inch face, making six sizes in all.

Hubbard's Improved Garden Roller.

Wonderful growth has attended the general prosperity of Pittsburgh industries this year. The *Dispatch* says: "Though many of the mills are now changing back to coal or adopting other substitutes for natural gas fuel, nearly all of them are enlarging their plants in the expectation of doing more business next year than they have done this year. These signs are particularly welcome and encouraging in view of the late financial flurry and disturbance of business in other sections."

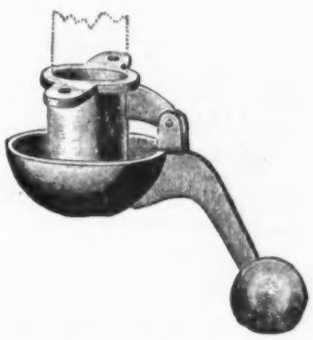
The Acme and Beebe Hoes.

Withington and Cooley Mfg. Company, Jackson, Mich., are introducing to the trade, two hoes, as illustrated in Figs. 1 and 2. The Acme Hoe is referred to as a weeding hoe for gardeners' use, while the Beebe hoe is for general field use. Withington & Cooley Mfg. Company are conspicuous for the number of special styles of hoes which they have introduced and manufacture. In this connection they state that they do not take up a tool unless both judgment and trial approve it, and that their goods for this reason stay in the market for the general or special use for which they are made.

Fig. 1.—The Acme Cultivator Hoe.

Fig. 2.—The Beebe Hoe.

Both of the above hoes are the invention of Calvin T. Beebe, after whom they are named.



The Eureka Company, Rock Falls, Ill., referring to their compression coil spring, which they use on road carts, remark that it cannot be overloaded without recourse. When entirely compressed it is as much at rest as if no load was upon it. There are coil springs used upon other vehicles; most of them expand or grow longer with the applying of a load, while theirs are so fixed with a center rod and outside yoke as to compress the spring, thereby bring-

ing out the greatest carrying capacity with the least risk of breaking. Another prominent feature in their line is their quick turn gear, which they use on four wheel vehicles, mostly of the delivery style. In connection with this department of their work they mention that the use of this gear enables the builder to hang the body of the wagon very low, to build his body wide and to use high wheels both front and back, and notwithstanding this he can turn very short and his front wheels will not strike the body in turning. They make a heavy delivery wagon with an 8-foot body that will turn readily in 15-foot diameter, while it takes an ordinary wagon 26 to 30 feet.

Attention is also directed to their all metal runner for converting wheeled vehicles into sleighs, which, it is stated, can be adapted to almost any style spring vehicle without the aid of a mechanic, being fastened to the axle by clips and ties, doing entirely away with hubs. It is referred to as fitting any make of vehicle, and adjustable to wide, narrow, or side track.

The North Star Refrigerator Trap.

Illustrations are herewith presented of a very ingenious trap patented and manufactured by the G. M. Shirk Mfg. Company, 112 and 114 Lake street, Chicago, and used by them on their North Star Refrigerators. Fig. 1 shows the trap in position to catch the waste water and thus effectually seal this opening into the refrigerator. Fig. 2 shows the cup turned down to be cleaned or emptied. The weighted arm causes the cup to automatically take its place as soon as it is released and holds it firmly in position. The device is screwed to the bottom of the refrigerator and cannot become loose or let the cold air escape. It is made of malleable iron, japanned, and is a most excellent device for the purpose.

North Star Refrigerator Trap.—Fig. 1.—Trap in Position to Catch Waste Water.

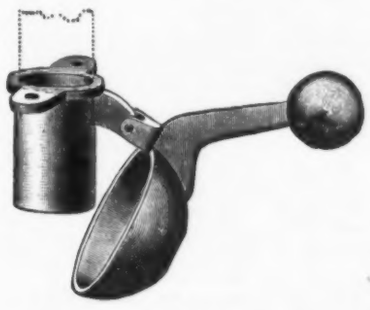


Fig. 2.—Position for Emptying Trap.

Carnegie, Phipps & Co., Limited, of Pittsburgh have established an emergency hospital at their Homestead Steel Works, at Homestead, Pa.

PERSONALS.

Edward P. Botsford has withdrawn from the Shenandoah Furnace Company, Shenandoah, Va., and Howard Winston, bookkeeper for the company, has been elected secretary and treasurer to fill the place vacated by Mr. Botsford.

H. Adkinson, who has been secretary and treasurer of the Anniston Rolling Mills, Anniston, Ala., has resigned, and George A. Hoerle has succeeded him.

Dr. David T. Day of Washington, D.C., who has charge of the collection of statistics regarding the mining interests of the country for the census of 1890, and who has for several years collected such statistics for the United States Geological Survey, is being suggested by his friends as a candidate for the position of chief of the department of mines and mining of the Chicago World's Fair. Dr. Day is eminently qualified for this position both by attainments and experience, and his appointment would be a very happy selection by the World's Fair directory.

Chief Constructor Wilson of the United States Navy was re-appointed for four years. During the war he was superintending inspector and acting constructor at Rowland's Continental Iron Works, New York, handling in the aggregate over $7,000,000 of contract work.

W. B. Worthen, ex-president of the Society of Civil Engineers, has been chosen as chief engineer of the Chicago Drainage Company, to succeed L. E. Cooley.

Charles Paine, for some years vice-president and general manager of the Philadelphia Natural Gas Company of Pittsburgh, has severed his connection with that company, and has removed to Tenafly, N. J. In the future Mr. Paine will give his entire time to the engineering firm of Charles Paine & Sons of New York City, of which he is the senior member. No action has yet been taken looking to filling the vacancy caused by Mr. Paine's resignation.

Thomas Deegan, for some years business manager for James P. Witherow, engineer and contractor, at Pittsburgh, has resigned his position and has located in Chicago, where he will represent the Stirling Boiler Company of New Portage, Ohio. E. C. Darley succeeds him.

Jay Cox, formerly manager of the Bessemer steel plant of the Otis Iron and Steel Company, has accepted the position of manager of the steel plant of the Bellaire Nail Works, at Bellaire, Ohio, made vacant by the resignation of John Cabot, who has located in the South.

Fornsten Berg, chief draftsman at the Homestead Steel Works of Carnegie, Phipps & Co., Limited, at Homestead, Pa., has returned to Pittsburgh after a three months' trip to Europe in the interests of his firm.

Mr. Cramp, the shipbuilder, in speaking recently of the two model steamships of the Inman Line, the City of New York and the City of Paris, as reported by the New York *Tribune*, said that they represented the highest results that had yet been accomplished in the direction of fast and comfortable ships. He said that it would not be possible to make two ships similar to those of the Inman Line for the price for which they were contracted. The cost of each was about $1,750,000. Mr. Cramp says that the Teutonic, which was built after the style of these two steamers to rival them, cost the White Star Line $2,000,000. For this sum his company could build even a better ship. He said that the American style of finishing ships was much superior to the work of foreign contractors. Mr. Cramp said further that no ship could be deemed a success from the shipbuilder's point of view that had to carry ballast when she was fully loaded. He said that the Teutonic did not meet the conditions of a perfect ship in this regard. The two models of the Inman Line when loaded require no ballast and their model of construction, as regards steadiness in a heavy sea, is such as will make them copied for a long time.

Nearly 1,500,000 tons of coal were handled at the tin docks at Duluth and West Superior during the season just closed. Shipments are made from thence to the Dakotas, to Montana, Nebraska, Northern Iowa, Missouri, Minnesota and Wisconsin, and each season witnesses a large increase in tonnage.

CURRENT HARDWARE PRICES.

DECEMBER 24, 1890.

Note.—The quotations given below represent the Current Hardware Prices which prevail in the market at large. They are not given as manufacturers' prices, and manufacturers should not be held responsible for them. In cases where goods are quoted at lower figures than the manufacturers name, it is not stated that the manufacturers are selling at the prices quoted, but simply that the goods are being sold, perhaps by the manufacturers, perhaps by the jobbers' at the figures named.

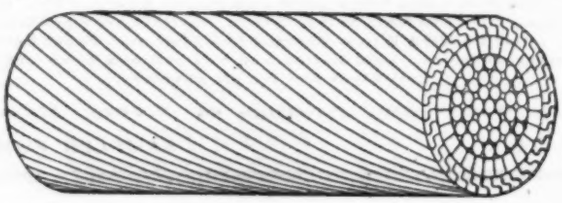
THE TRENTON IRON CO., Trenton, N. J. COOPER, HEWITT & CO., New York.



—MANUFACTURERS OF—

IRON AND STEEL WIRE

of every description, plain, galvanized, tinned and lead-coated; spiral ribbon fence wire; steel wire ties for baling hay, straw, rags, excelsior, &c., &c., &c.

IRON AND STEEL WIRE ROPE

for all purposes, including cables of the best quality and of any desired length for street cable roads. The attention of all users of wire rope is specially called to the Trenton Iron Co.'s

Patent Locked Wire Ropes

which are far superior to any other in tensile strength and durability; from the fact that the wires in these ropes are interlocked, "unstranding" or projection of broken wires is impossible, and consequently a smooth surface only is constantly presented to the sheave or drum, causing these latter to last indefinitely. One of these locked wire ropes working under ordinary conditions will outwear two or three ropes of the ordinary style. The Trenton Iron Co. also call attention to their

Patent Wire Rope Tramways (Bleichert system)

also their hoisting and conveying plants for quarries, open cut mines, docks and contractor's work. Haulage and transmission of power by wire ropes a specialty. Surveys made and plans furnished at moderate rates by competent engineers.

JUST PUBLISHED.

The Metallurgy of Steel.

BY

HENRY M. HOWE.

Price, - - - - *$10.00*

This work is the most notable contribution to the literature of iron and steel metallurgy ever published. This series of papers on the subject have, during the past two years, attracted world-wide attention and have received the heartiest commendation from all quarters. The volume now published presents this material in much more convenient shape, with considerable additional matter, giving the results of the most recent research, experiment and practice. Also presenting a complete review of all important conclusions reached by earlier investigators. Every statement and citation has been carefully weighed and verified, and the references to the literature of the subject are given minutely, the book thus furnishing in itself a key to the whole range of steel metallurgy. It also furnishes the results of much new and original investigation, specially undertaken for the present work. Every metallurgist, every manufacturer of steel in any form, and all who are interested in the iron or steel industries, and all engineers who use iron or steel should have this standard work and cannot afford to be without it.

TABLE OF CONTENTS:

Chapter I.—Classification and Constitution of Steel.
Chapter II.—Carbon and Iron, Hardening, Tempering and Annealing.
Chapter III.—Iron and Silicon.
Chapter IV.—Iron and Manganese.
Chapter V.—Iron and Sulphur.
Chapter VI.—Iron and Phosphorus.
Chapter VII.—Chromium, Tungsten, Copper.
Chapter VIII.—The metals occurring but sparingly in iron.
Chapter IX.—Iron and Oxygen.
Chapter X.—Nitrogen, Hydrogen, Carbonic Oxide.
Chapter XI.—The Absorption and Escape of Gas from Iron.
Chapter XII.—The Prevention of Blowholes and Pipes.
Chapter XIII.—Structure and related subjects.
Chapter XIV.—Cold Working, Hot Working, Welding.
Chapter XV.—Direct Processes.
Chapter XVI.—Charcoal-Hearth Processes.
Chapter XVII.—The Crucible Steel Process.
Chapter XVIII.—Apparatus for the Bessemer Process.
Appendix I.—Special Steels.
Appendix II.—Anti-Rust Coatings.
Appendix III.—Lead Quenching.

Is the "Trade" name for Plates of Soft Steel cut and opened out into webs of diamond or other shaped mesh.

SUBSTANTIAL, LIGHT AND CHEAP.

FENCING.

Is used extensively for **Rail Road, Cemetery, Farm, Village and Lawn Fences, Gates, Skylight, Window and Elevator Guards, Office Railings and Partitions, Chicken Yards, Tree Guards, Grape Arbors, Lattice and Ornamental Lawn Work. More durable than wire.**

Our Steel Lath commends itself to Architects and Builders as the best metallic lath in use.

It requires no stretching or furring; its form makes it rigid, and yet it can be readily molded to any required curve or angle. Gives a perfect "key" throughout.

Specify our Lath to reduce the fire risk on your buildings.

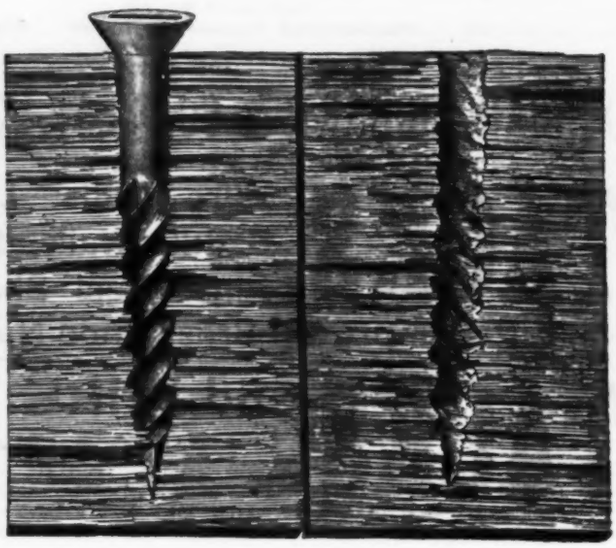
AMERICAN SCREW COMPANY

PROVIDENCE, R. I.

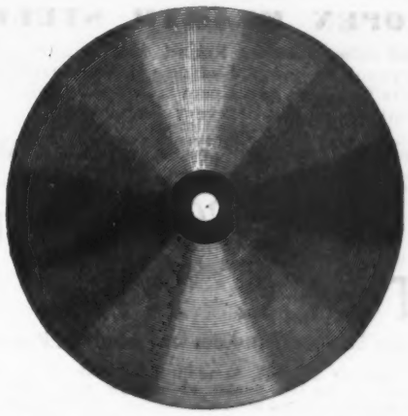


Chicago Store, No. 19 Lake St. EUROPEAN AGENTS, THOMAS & STIRLING, Liverpool.

"ROGERS' DRIVE SCREWS."

Patented May 10, 1887; July 19, 1887; July 10, 1888. Other patents pending.

A common cut thread screw as ordinarily inserted—*i.e.*, driven two-thirds of its length with a hammer and the balance with a screw driver. Fibres of the wood are necessarily broken, and holding power of screw much impaired.



The "ROGERS' DRIVE SCREW" driven with a hammer its entire length. It revolves as it goes in and does not break the fibres of the wood, but makes its own nut of the cavity it forms.

The foregoing illustrations speak for themselves, but we call attention to a few advantages of the "ROGERS' DRIVE SCREWS."

1. Stiffness, adapted for driving with a hammer.
2. Rapidity of insertion.
3. Increased holding surface.
4. Ability to be driven with hammer and withdrawn with Screw Driver numerous times from same hole.
5. Superior Head, which will withstand blows of a hammer and not impair the slot.
6. Improved Slot, admitting the use of a heavier Screw Driver.
7. A "ROGERS' DRIVE SCREW" of small diameter will hold as much as a common screw of larger diameter.

List prices, same as common iron wood screws. Discount for Flat Heads, 66⅔%.

AUTOMATIC IN FUEL AND WATER SUPPLY. NO ENGINEER.

STATIONARY AND MARINE.

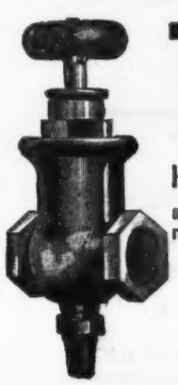
1, 2, 4, 6 and 8 Horse-Power. Single
8, 12, 16 and 22 " " Compound.

SIMPLE, RELIABLE, EFFICIENT. The most satisfactory power for Creameries, Pumping, Grain Elevators.

Testimonial of Dr. Peter Collier.

NEW YORK AGRICULTURAL EXPERIMENT STATION,
GENEVA, N. Y., January 9, 1890.

Shipman Engine Co., 200 Summer St., Boston, Mass.



Gentlemen:—The Shipman engine has now been in use at the Experiment Station for nearly five years. First a one-horse power Rochester model; but this proved too small for the work required, but gave good satisfaction, and has since been replaced by a two horse-power Boston model.

The engine is used in our experimental dairy for running a centrifuge for churning and for supplying steam and has given good satisfaction from the first. Very truly yours, PETER COLLIER, Director.

Send for Catalogue. Mention *The Iron Age.*

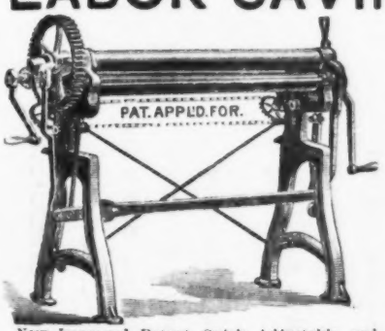
IMPROVED BELT PUNCH.

This Punch is made from the best *Tool Steel*, and each one carefully tempered. The increased strength in this Punch over the regular Punch is readily seen. Each Punch is stamped with my name and *fully warranted*. Prices low.

MIDGLEY PATENT WIRE BELT.



Either single or double ply. Of plain wire or covered with rubber. By government test is more than nine times stronger than Leather of same weight, and is sold cheaper than Leather Belting of same size.

It is secured by more than 20 patents in the United States, also patented in England, France, Belgium, Norway, Sweden and Hindostan, and is now being manufactured in England.

Address The Midgley Wire Belt Co., Beaver Falls, Pa., U. S. A.,

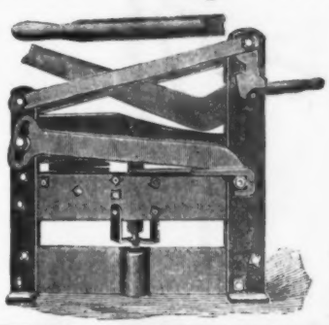
For new Price-list and Book of Instructions, soon to be issued.

LABOR SAVING TOOLS AND MACHINERY

New Improved Patent Quick Adjustable and Self-Opening Slip Roll Formers, all sizes required. A revolution as to quickness and ease of operations. The mere outward swing of the top roll hinge housing will elevate top roll to remove the formed metal. Same is perfectly balanced and is thus opened and closed in one operation, as will more clearly be seen by another cut, this space in another issue. Other Improved Quick Adjustments of merit not mentioned. All sizes, 2-in. to 14-in. Rolls, also Crimping or Corrugating Rolls.

Improved patent general purpose Punch and Stock Shear for bar iron and slitting sheets, &c.

Two levers, (7) sizes, for light or heavy work. Also Lever Stock Shears and Punches made separate, and Power Punches.



Improved Combined Squaring and Slitting Shears, with 12 in., 15 in. or 18 in. throat, to slit wide sheets as may be desired, and of any length. Complete for tin or iron up to No. 16 or 14 gauge with the Patent Lever Attachment for additional power. Provided with drop leaf tables and trimming gauge. Eight different styles up to 10 ft. in length. Also light and heavy Power Shears.

The Champion 1890 Blower.

Guaranteed the King of all Blowers.

PHILLIPS' BUGGY WORKS,

Manufacturers of Buggies, Phaetons and Spring Wagons.
Dealers in Carriage Hardware and Woodwork.
Nos. 38, 40 and 42 South Second St.,

IRONTON, OHIO, April 10, 1890.

CHAMPION BLOWER & FORGE CO., Lancaster, Pa.

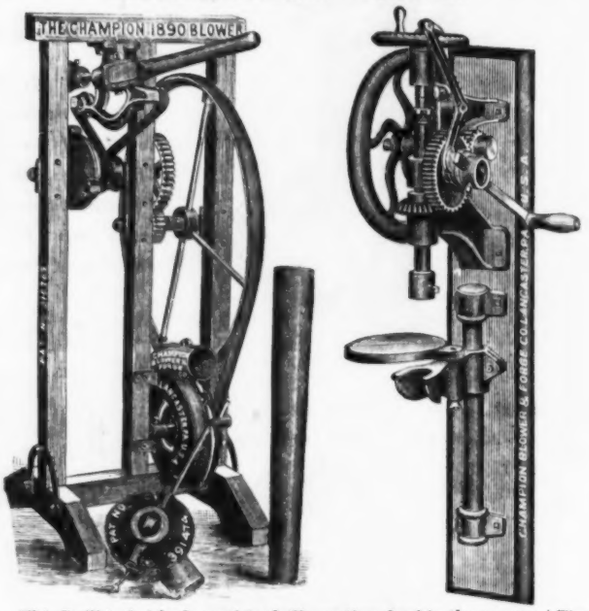
Gentlemen:—We received your 1890 Blower and after giving it a trial with my own hands I have no hesitancy in saying it is the finest thing I ever saw in a shop and an old fashioned bellows is no comparison. Any one needing a Blower would do well to give it a trial as I have and they will use no other, as I consider it the greatest improvement of the age.

Yours respectfully,

PHILLIPS' BUGGY CO.,

Per JOHN PHILLIPS.

No. 1 Blacksmith Forge, size of hearth not including water tank, 44x30 inches, with a sloped bottom coal box large enough to hold one half bushel of coal without extra charge.



Forge No. 1. Made only in Half-Hood.

The World's Champion

New Upright Self-Feed $10 Post Drill.

Every Drill guaranteed. Will drill to center of 14-inch circle, and bore from ⅛ to 1-in. hole. Weight 100 lbs.

This Drill is finished equal to drills costing double the money. The entire spindle and feed screw are of steel with brass connections. The self-feed may be used or not as desired, and can be easily changed to slow or fast feed. The swing table can be fastened at any desired point by a simple clamping device.

KNOWLES SLOTTING MACHINE.

Built in two sizes, patented and manufactured by the Knowles Loom Works, of Worcester, Mass. The most efficient machine for cutting Slots in Pulleys, Gears, and other parts of machinery ever invented. It is noiseless and rapid in its action, making all slots uniform and absolutely perfect. The piece to be slotted is placed on a Bushing upon a Faceplate, and the **slot cut by a single passage of the cutter** in from ten to twenty seconds. The slots may be made absolutely straight or may be made on any taper required, by a change in the Bushing upon which the work is placed. One great saving of time is effected by the use of this machine from the fact that the work does not have to be fastened to the machine, but is immediately brought to position and held by the Bushing through which the cutter passes.

SEND FOR CIRCULAR.

DAVID WILLIAMS, 66 & 68 Duane St., New York.

HOISTING APPARATUS AND TRAMWAYS.

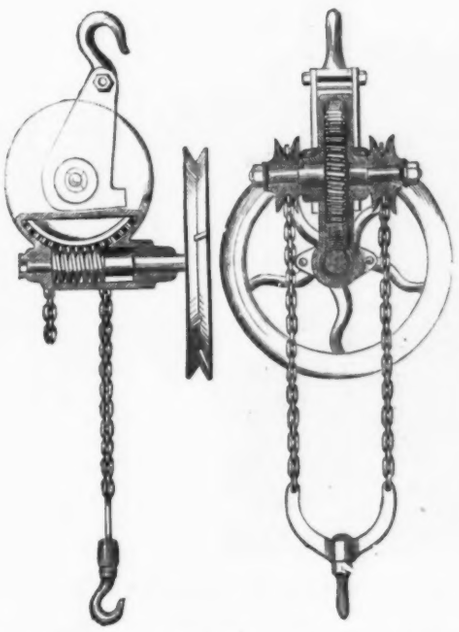
IN THE AUGUST NUMBER was illustrated our system of overhead railway in connection with the **HARRINGTON HOIST,** a cut of which is shown below. One of the many advantages to buyers of this hoist is the fact that when repairs are necessary any of the various parts may be ordered by mail, simply naming the number of each part and capacity of hoist, as shown by cut below

In the cut above is also shown another cheap arrangement of overhead track, consisting of flat bar iron supported by hangers. By the use of such a system we are prepared to make a practical demonstration in our own shops of an actual saving of 50 per cent. in addition to the fact that it lessens very materially the liability to accident.

Two men are enabled to handle a large casting much easier than six men formerly would the old way.

Another important feature is, that goods can be transported about a room by raising them to clear, and thereby avoid any moving or handling of other work that may be in the path, on the floor.

By use of templets in drilling the hangers and rail and men experienced in handling, we are prepared to make estimates and furnish the entire outfit ready to be placed in position at a moderate expense. If desired, we are also prepared to put the railway in position.



We are also prepared to furnish a Traveling Bridge where the railway is not desirable; also a very convenient iron Crane.

We will be pleased to furnish estimates for any amount of tramway.

REGULATE

This cut shows the Mason Steam Damper Regulator, which is a most mechanically constructed little machine, weighing in its two sizes only 15 and 30 pounds, yet it will control as well and as sensitively the pressure in a steam boiler as any regulator on the market. Every machine is nickel plated, and in order that it may be set up properly we send free with each a bracket, a weight and 25 feet of steel chain. It is an ornament to any room. The price of the two sizes is $60 and $100, net. Among the prominent firms who are using this regulator we can refer to the following: N. Y. World Building; the new Penn. R. R. Shops at Altoona; Fitchburg Machine Co.; Thompson-Houston Electric Co., Lynn, Mass.; Harrison Woolen Mills, Worcester; Frick Coal and Coke Coke Co. and Ridley Park Water Works, Penn.; Walter Baker's Chocolate Mills, Milton, Mass.; Boston Button Co. An inspection of the following sectional view will convince any one of the correct mechanical principles upon which it is constructed.

YOUR

The boiler pressure, which is connected through a small strainer at the pipe **G**, comes into the chamber **E**, the top of which is formed by a diaphragm, on which rests the main spring **S**. If the boiler pressure rises above the required point, or sufficiently to overcome the tension of the spring **S**, the diaphragm is raised very slightly and the steam passes down the passage **X**, to the upper surface of the piston **D**, which it forces down. This piston being connected with the wheel on the shaft **H**, by a chain, or rack and pinion, turns it around, communicating a like motion to the outside wheel, and thence to the damper in the flue.

When the boiler pressure falls, the diaphragm comes on to its seat, which covers the passage **X**, and steam pressure is removed from the top of the piston **D**, while the weight on the damper brings the wheel **P** back to its original position.

It is the general opinion among engineers that a regulator which suddenly opens or closes a damper to its full capacity wastes coal, which is undoubtedly true, therefore, a device, which is known as a compensating lever is provided in the lever **M**, which rests on the cam **L**. As the shaft **H** turns, the lever is thrown over and works a cam, **K**, which changes the tension on the main spring, immediately the regulator commences to act. By this means it is found that the damper is kept more constant and the draft steady.

The small pipe **Z** is connected to any drip pipe, and carries away all condensation caused by steam, which may enter the chamber **A**, as the piston **D** is fitted loosely.

MULLINS'

Fluor-Spar and Lead Mining Co.,

220 First National Bank Building

CHICAGO, ILL.

This Company owns, at Mineral City, on the Ohio River, the largest Mines of Fluor-Spar ever discovered.

We are working a large force of miners; our new mills and tram railway are running, and we are now prepared to furnish the purest Fluor-Spar in any quantities to Iron and Steel Manufacturers, to Smelters of Gold, Silver and Copper, and to Paint, Paper and Glass Makers.

Fluor-Spar is pronounced the most powerful of fluxes; it facilitates the reduction of the most refractory materials. For Alkalies, Clays, and all Metallic Oxides it has a remarkable solvent power; it reduces the melting point, and saves fuel; it diminishes the loss of metal, saves labor, and keeps the cupola clean; reacts strongly upon scaffolds and cloggings.

One part of Fluor-Spar is more effective than ten parts of Limestone. Limestone is an enemy to iron; Fluor-Spar is a friend.

Directions for the proper use of Fluor-Spar given our patrons.

We ship Lump, Gravel, Crushed and Ground, in bulk or barrel.

SPECIAL NOTICE

TO CONSUMERS OF CHARCOAL IRON.

Wyebrooke Charcoal Pig Iron, strictly cold blast.
Has splendid chilling qualities and great strength.
Furnace now in blast and orders can be filled promptly.
For sale by

L. & R. WISTER & CO.,

257 S. 4th St., Philadelphia, Pa.

THE ROBERT W. HUNT & CO.

The iron mines of the Central Virginia Iron Co., situated in Amherst and Nelson Counties, Virginia, on the Richmond and Allegheny Railroad and on the James River.

Metallic iron, from 52 % to 69 %
Phosphorus, from trace to 0.3
Average, - - 0.07 %

For particulars, apply to

L. DREIER,

45 Wall Street, New York.

Desirable Investment for Capitalists.

HIGH CLASS MILL ESTATE FOR SALE.

This estate is in the center of the City of Hartford, Conn., and within five minutes' walk of the Post Office and Court House.

The estate fronts for 187 feet on Charter Oak street, one of the principal streets in the central part of the city, and extends for about 900 feet to and across Sheldon street to Park or Mill River, including the dam and water privileges thereon.

The present Factory Buildings are all substantial structures, having a floor surface of 38,000 square feet. They are located on the Sheldon street front, and are equipped with a pair of 200 horse-power condensing engines, and with high class boilers, with fire pumps, heating pipes, etc., of the best construction and arrangement.

These buildings are now occupied for manufacturing purposes by 13 tenants at will, returning an income of about $10,000 per annum.

The total area of the land exceeds 3 acres, more than 2 acres of which are clear of buildings, and intending purchasers will be shown plans for the erection thereon of spacious one story buildings designed to meet the requirements of tenants renting room and power for light or heavy manufacturing, for which there is now a pressing demand from occupants of inconvenient and less accessible locations, too far removed from the center of the city; or the unoccupied land can be profitably divided into house lots.

Unless previously disposed of at private sale, the estate will be offered at auction on the 20th of October, 1890, at 12 o'clock noon.

For inspection of the estate apply to the agent in charge, Mr. R. J. Gibbs, on the premises at 133 Sheldon street, Hartford, Conn., but address all correspondence to the undersigned.

AMERICAN SCREW CO., Providence, R. I.

Affaires avec la France.

Firms wishing to push their Export Trade and do business with France in Machinery and Patents in connection with the Iron and Hardware Trades should see during his stay in New York a French engineer whose prominent position in his own country will enable him to procure for them the very best agents in France. All communications to be addressed to MR. P. BAYARD, care of the Institute of Mining Engineers, Park Avenue Hotel, New York, from November the 1st to the 15th.

FOR $25,000

I will sell a very profitable Manufacturing Plant, all running in good shape; goods sold as fast as produced; poor health the only motive for selling; experience not essentially necessary, as all work is produced by the piece; margin of profit very large. Running 15 years without a stop. This is an extraordinary chance for an energetic young man. Address
"MANUFACTURING PLANT,"
office of *The Iron Age*, 66 and 68 Duane st., N. Y.

Iron Bridge M'f'r's.

The demand in the South for Iron Bridges and buildings is now very large and growing. A Bridge and Structural Iron Works in the South would have an abundance of orders and pay large dividends from the start, if it was located accessible to coal, on competing lines of R. R., and where material of good quality could be readily secured. Buchanan, Va., presents all of these advantages. It is on two trunk lines of R. R., with two more located; it is in the midst of the great iron and coal fields of the Virginias, and the Central Land Co., of Buchanan not only offers free sites but financial aid from its large cash development fund ($400,000). This is a rare opportunity to a pushing, energetic Bridge Builder. Buchanan also seeks associate industries on similar terms. Address CENTRAL LAND CO. of Buchanan, Buchanan, Va.

CAPITAL WANTED.

From $30,000 to $40 000 capital from either one or two parties, to be invested in a limited partnership to lease a steel plant and manufacture steel and forgings. Well located, where coal and labor are low. Mill is well equipped for making the following kinds of steel: Tool, spring, all kinds of plow and agricultural steel and shapes, rake teeth, also crowbars, pickeyes, railroad picks, mattocks and other kinds of paying specialties. Forge has several hammers and is in good order. The advertisers own the plant and have a market for the product, and will furnish their portion of capital. Parties furnishing capital can have secretary and treasurership. None but principals need apply. Address "STEEL & IRON," office of *The Iron Age*, 220 S. 4th St., Philadelphia.

Portland's Great Peninsular Property.

Portland, Oregon, is as large as both St. Paul and Minneapolis were in 1880. She will have 400,000 in 1900, as they now have. The old city is on the Willamette's west bank, containing but eight square miles. The development is rushing across on the 18 square miles of the Peninsula between the Willamette and Columbia Rivers, with 18 miles of deep water front, already containing Portland's shipping, and soon to hold her wholesale and manufacturing interests. Property purchased now for hundreds may soon sell for thousands.

Foundrymen.

Writer wants to place orders for 50,000 Castings weighing 10-11 lbs. each. Delivery points New York, Chicago and St. Louis; prompt cash. Send address for particulars.
H. H. MANSFIELD,
52 Wall St., New York.

A RARE OPPORTUNITY.

A valuable manufacturing plant will be leased for a term of years, rent free, to any reliable company who will give regular employment to 50 or more men; the plant is suitable for a Foundry and Machine Shop, or similar industries. For particulars address
THE GLEN ROCK IMPROVEMENT ASSOCIATION, Glen Rock, Pa.

FOR SALE. BLOWING ENGINE.

Vertical pattern, with balanced steam slide, valve gear, steam cylinder 14 in. diameter, air cylinder 40 in. diameter, stroke 24 in.; engine new. For price and particulars address
JAMES LEFFEL & CO.,
Springfield, Ohio.

WANTED.

A second-hand 5-ton Steam Hammer; must be in first-class order. State price and where tool can be seen.
THE BERLIN IRON BRIDGE CO.,
East Berlin, Conn.

To Those Looking

—FOR—

Manufacturing Sites

IN THE SOUTH.

The most desirable locations in the South for manufacturing wagons, stoves, agricultural implements, furniture, or for foundries, machine shops, rolling mills, muck bar mills, nail works, glass works, cotton or woolen mills and tanneries, are to be found in Virginia along the line of the Norfolk & Western Railroad from Norfolk to Bristol, and upon its branch lines. Hard wood of every variety; pig-iron from the furnaces at Lynchburg (2), Roanoke (2 in operation and 1 now under construction), Pulaski (1), Ivanhoe (1), Radford (1, to be built in 1890), Salem, Graham, Max Meadows and Bristol (1 at each point now under construction), bar iron from the rolling mills at Roanoke, Lynchburg and Richlands (1 to be built in 1890); coke and semi-bituminous coal from the Pocahontas Flat Top field; superior gas coals from the mines on the Clinch Valley extension; glass sand from Tazewell County; cotton from the markets of the Southern States, and wool from all the Western and Southwestern States and Territories, at advantageous freight rates. Favorable freight rates made upon raw materials to all factories established upon its line, as well as to points in the United States and Territories upon the manufactured articles.

Those seeking new fields for manufacturing establishments should not fail to investigate the wonderful development of iron, coal and coke industries that has been made within the past five years along the line of the Norfolk & Western Railroad, and the advantages offered by the State of Virginia in the supply of cheap raw materials, by the Norfolk & Western Railroad in the matter of freight facilities and rates upon raw materials, and for reaching home, far distant and foreign markets, and by the cities and towns along its line in the way of advantageous sites at moderate cost. Many of the cities and towns exempt manufacturing establishments from taxation for a series of years.

For further information as to freight rates and sources of supply of raw materials, apply to A. POPE, General Freight Agent, Roanoke, Va., or to

CHAS. G. EDDY,
Vice-President, Roanoke, Va.

WE HAVE FOR RENT one of the most extensive manufacturing properities on the Hudson, within 13 miles of Grand Central Depot unsurpassed for its railroad and dock facilities; with engine, boiler and other machinery; manufacturers looking for such a property, will do well to give this consideration; send for diagram and description.
WILLIAM H. HOYT & CO.,
5 Vanderbilt Ave., opposite Grand Central Depot, New York.

PORTLAND, OREGON.

To Merchants, Bankers, and Manufacturers.

Your attention is invited to the large opportunities for Jobbing of every kind, Banking and Manufacturing in the City of Portland. Portland is the second city and coming metropolis of the Pacific Coast, as New York City denominates the Atlantic Coast.

Without trans-Atlantic railroads till 1883, she already has secured more trans-continental roads than any other city on the Pacific coast. She is nearer Chicago and New York and reached quicker by rail than any other city on the Pacific coast. (See maps and railroad time-tables.)

Portland is situated at the mouth of more miles of river navigation than any city, except New Orleans, in the United States. Over 1000 miles of the Columbia and Willamette rivers and tributaries are navigated by river steamers contributing to Portland's Commerce Portland has 250,000 square miles of area distinctively her own trading territory, in which are now being operated 3400 miles of railway with 1000 miles more to be added before the end of 1891.

Portland has exclusive lines of vessels trading coastwise to San Francisco, 772 miles south, to Puget Sound points and British Columbia points, and to Alaska, 1500 miles north.

She also has exclusive lines of vessels plying between Portland and New York City, between Portland and Japan, and between Portland and China. In addition, Portland loads annually at her wharves over 100 seagoing vessels coming in on special charters after cargoes of salmon, flour, wheat and ship timbers, going to nearly every well-known port in the world.

The tributary territory of Portland is about the size of New England, New York, Pennsylvania and Ohio combined. In 1880 it had scarcely 225,000 inhabitants. To day there are over 1,000,000 and increasing 1000 daily, and must steadily grow to 10,000,000 or more. The immigrants are chiefly farmers.

Portland controls the trade of ten times the fertile acreage tributary to any other Pacific coast point

AND MORE THAN ALL OTHER PACIFIC COAST POINTS COMBINED.

Portland has Unlimited Water Power for Manufactories. Vast Water Power at the Entrance to Deep Sea Navigation is Rare, and Exceedingly Valuable to Portland's Mfg. Development.

Portland has electric, cable and horse-car lines, charming parks and boulevard drives, hotels costing as high as $900,000, churches costing as high as $150,000, a grand system of public and private schools, including a high school costing $127,000, several colleges, and an air of refinement and culture which makes people from the larger Eastern cities feel perfectly at home.

Portland's Leading Commercial Interests are Exporting, Banking and Wholesaling, with Manufacturing Rapidly Developing

The Salmon fisheries of the Columbia river produce $2,000,000 to $3,000,000 annually. The export trade has multiplied several fold in recent years, as the country develops. The banking capital has grown to fourteen banks controlling six millions of capital. Our wholesale trade has grown from $75,000,000 in 1888 to $115,000,000 in 1889, and is yet in its infancy and growing at the rate of over 25 per cent. annually. Our manufacturing output in woolen goods, lumber, boots and shoes, paper, iron and many other lines aggregated over $20,000,000.00 in 1889, and is not yet fairly begun.

All these interests are thriving and yet there is room for enlargement on every hand in a region richer in agricultural resources than Illinois and sister States, in iron and coal similar to Pennsylvania and Alabama, greater in lumber than Minnesota and Maine and unrivalled in the more precious metals.

There has never been a failure of a bank or wholesale house in Portland.

The recent enormous development of the trade of Portland has outgrown all her facilities and her capital. Therefore the Oregon Immigration Board urges and invites correspondence and personal visits from people in all lines of Wholesale Trade, Banking and Manufacturing.

$20,000,000.00 additional capital would find immediate employment, producing profits very large to people with Eastern ideas, yet with unqualified safety. While in several lines we need houses commanding $500,000.00 to $1,000,00.00 capital, in many other lines there is room for young merchants and manufacturers to begin on limited capital, and "grow up with the country."

THE OREGON IMMIGRATION BOARD is an institution supported by several hundred of the more prominent business men of Portland. The commissioners who direct its affairs are the following gentlemen: CHAS B. DODD, President of the Board, Wholesale Hardware Dealer; H. W. CORBITT, Vice-President, First National Bank; D. P. SHERMAN, Cashier Oregon National Bank; T. F. OSBORNE, Mfr. of Bags, Sails, &c., also President of Chamber of Commerce; D. S. COHEN, Wholesale Notions and Fancy Goods; WM. McFALL, Wholesale Paper; JAS. L. DUNLAP, Real Estate Broker; H. E. DOSCH, Retired Wholesale Boot and Shoe Merchant; ELLIS G. HUGHES, Capitalist.

All communications will receive the most careful attention. Personal visits to Portland are strongly advised. Seeing is Believing. Address correspondence simply.

The Oregon Immigration Board.

Portland, Oregon.

FOR SALE.

A new specialty manufacturing business; last year's business $6,000; this year's business $25,000, and a prospect of nearly double next year; good reasons for selling; price $13,500; goods can be manufactured anywhere. Address

"SPECIALTY" Box 818,
office of *The Iron Age*, 66 and 68 Duane St., N. Y.

LARGE BUSINESS FOR SALE.

Wyeth Hardware & Manufacturing Company, doing a successful hardware and saddlery hardware business for 30 years; all under one head, but with separate salesmen, traveling men and management; propose to sell the hardware portion of their business, as the only capitalist in the corporation has, for some years, been physically unable to give it sufficient attention and desires to relieve himself of the burdens of business.

The amount of capital should be about $300,000, and a third or half interest may be retained, if parties proposing to purchase should prefer, and would be satisfactory as regards their financial standing and business record.

To any prosperous business house located where territory for business is limited, this is an opportunity rarely offered; the business is well organized, well established, and the best known house of the kind in this section, and every facility would be accorded purchasers.

The business can be increased as much as the capital will justify; the territory extends north, south and west and to a limited extent east, is unsurpassed in fertility of soil, in extent, and the high character of progressive, active business firms.

The railroad facilities are excellent, running in all directions and commanding equal or greater advantages than other markets.

All branches of the mercantile business are more fully represented than elsewhere in the Missouri Valley; this is the original wholesale market of the valley and has always retained the lead.

Communications should be addressed to

W. M. WYETH,
St. Joseph, Mo.

FOR SALE.

In West Chelmsford, Mass., all the Real Estate and Machinery formerly owned by the Hiscox File Co.; the real estate consisting of about 7 acres of land together with the buildings and water power, and the machinery, being such as was used by them in the manufacture of files, machine knives, sword blades and edge tools. There is also on the premises a good 75 horse-power Harris-Corliss engine and good boiler, also a large amount of shafting, belting and supplies. This property is situated about five miles from Lowell, and is very easy of access by railway, with excellent facilities. The entire property will be sold very cheap, either as a whole or in part, and will afford some party an excellent chance to enter into this business. For terms, &c., inquire of

J. W. BENNETT, Lowell, Mass., or
F. G. SARGENT, Graniteville, Mass.

Rare Opportunity.

Best Hardware business in a thriving Ohio city of 20,000 inhabitants; stock. $25,000 to $30,000; annual sales, $80,000 to $90,000, with good profits; no hand stock; open until Jan. 1, 1891.

Address "BEST,"
office of *The Iron Age*, 66 and 68 Duane St., N.Y.

AN OLD-ESTABLISHED HARDWARE and House-furnishing business For sale, on a leading avenue of New York City; stock about $8500; discount for cash; established 50 years. Address "GOOD OPPORTUNITY,"
office of *The Iron Age*, 66 and 68 Duane St., N. Y.

FOR SALE.—Hardware, Tool and Factory Supply Store, well established in a good manufacturing district; will be sold at inventory.

HINDLEY & KEEHAM,
61 Greenpoint Ave., Brooklyn, E. D., N. Y.

WANTED.—An experienced business manager who can control $50,000, by a Chicago manufacturing corporation, whose present output capacity is contracted for up to January 1st, 1891, and which needs both a competent financier and additional capital. Address FRANK R. GROVER.
115 Dearborn St., Chicago.

TO MANUFACTURERS.

Long experience makes it quite possible for me to find "out-of-the-way" markets for any line that manufacturers prefer to sell at reduced prices rather than create friction with their regular customers, viz.: seconds, off sizes, overstocks, old styles, etc. Send memorandum with quantities and lowest cash figures.

W. M. CALDWELL, agent for the sale of special lots, 75 Chambers St., New York.

WANTED.

Competent and reliable parties to Manufacture and Sell **Cook's Rotary Ash Sifter** on royalty, in the Eastern, Western, Northern and Southern States.

Send for circular.

BURTON H. COOK,
21 Grand Ave., Brooklyn, N. Y

FOR SALE.

The well-established business, known as THE GAYLORD, CROSS & SPEIRS CO., located in Waterbury, Conn., is offered for sale. This plant is on the corner of Benedict and Meadow Sts.; consisting of land, brick and frame buildings, &c.; the foundry and all machinery goes with sale; there is between $10,000 and $12,000 to go with the business. The lot fronts on two streets, 164 feet on Meadow and 219½ feet on Benedict Sts.; there is ample room for another large machine shop or any kind of manufacturing business without being cramped for room; this plant is only two minutes' walk from depot. The reason why this valuable property is put in the market at the price asked is because the owner is West and cannot give the attention that it requires. Take the business in consideration, both in foundry and machine work, it is a rare opportunity that does not occur every day, where one can buy an established business for the low figure, $45,000. The land and buildings alone are worth the price I ask, without the machinery. Address

L. J. BOWEN, Receiver,
Waterbury, Conn.

COAL at **50 cents per ton for twenty years; $1,000,000 cash,** and desirable location, with railway facilities, at **$100 PER ACRE,** worth $500, as special inducements to encourage new manufacturing industries

MEANS that **PITTSBURG, Kansas,** with its unequaled railway connections, is the best point on this continent for the establishing of smelting works, foundries and machine shops and any kind of manufacturing industry consuming coal and looking to the U. S. and Mexico for a market; guaranteeing

PROSPERITY to every dollar invested and every man employed. Gas, 75 cents per thousand. Taxes 3 per cent. on a 30 per cent. valuation; four trunk railways; $7,000,000 invested in industrial enterprises, best of free schools, property cheap. **Now**

TO PITTSBURG is the time to invest. Come and investigate. Write for information and Maps. **PITTSBURG TOWN CO.,**
Pittsburg, Kan. A. W. GIFFORD, General Agent.

SOFT STEEL PLATES.

We are making a specialty of soft steel plates for Blanking and Stamping, with clean, smooth surface, rolled carefully as to gauges, ranging from No. 9 to 16 inclusive, and to any multiples of length desired.

We can also furnish plates freed from scale and so treated as not to rust readily before using.

By the use of these, instead of raw plates in Stamping, the great saving of wear on costly dies and increased production of better work will more than cover the increase of cost over that of raw plates. Trial orders solicited in small or large quantities.

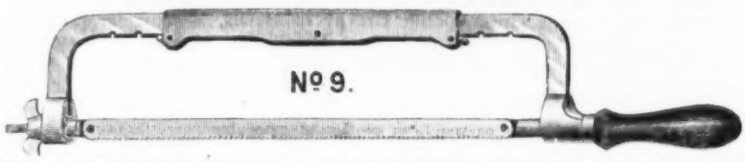
Also manufacturers of the **BUCKEYE LAWN MOWERS, Buckeye Wrought Iron FENCING, Cresting, etc.** Write for Circulars and Prices.

STAR ★ SAWS.

It is cheaper to buy a new saw than to file an old one. As our saws are never to be filed they are tempered so high that one will last four times as long as an ordinary saw with one filing. This will be a very great saving in money, and also in the delay of filing. Look at the prices below and you will never file another saw of these kinds.



We fully warrant all saws marked with a star and bearing our name.

Take notice that Blades and Frames are listed separately, and order what you want of each kind.

STAR HACK ★ SAW BLADES.

Length of Blade,	6,	7,	8,	9,	10,	11,	12:	assorted, 6 to 9.
Price, per dozen,	55c.	60c.	65c.	70c.	85c.	95c.	$1.05	65c.

HACK SAW FRAME.

This frame holds blades from 8 to 12 inches in length. It is an extension frame covered by a steel sheath, as seen in the cut. The sheath makes it very stiff, and at the same time very light. It is polished and nickel plated. The blades may be faced in either direction. We sell this frame at the same price of the No. 0 in our last Catalogue, and expect it will take the place of the old 0 and 1, as it seems to be a great improvement on these.

Price per dozen,.....$12.00.

F. E. MYERS & BRO. ASHLAND. O.

Purifies by Aeration.

BUCKET PUMP AND PURIFIER

For Wells and Cisterns of any Depth.

Warranted to Purify a Foul Well or Cistern in Ten Days' Use or Money Refunded.

It will draw ten gallons of water per minute.
Never has to be packed, primed or thawed out.
A ten-year old boy can draw water with ease from a 40-ft. well.
No iron tubing to rust or burst. No suckers or valves to wear out.
It has no wooden tubing to wear out, decay or pollute the water.
It will not rust or corrode, as the chain is made of galvanized iron.
It is the simplest and most durable structure made for raising water.
It can be set up in 15 minutes, as there is nothing to fasten below the platform.
It will not freeze, having stood the test of a Dakota winter, 38 degrees below zero, as the buckets discharge themselves.
Has no leather, rubber or wood in contact with the water to contaminate it.
You do not have to pump out a pailful of water to get a fresh, cool drink for every bucket goes down full of air to the bottom and fills with cold water as the air escapes.

E. C. ATKINS & CO., Indianapolis, Indiana.

The Famous "Dexter."

Second only to the Silver Steel Diamond, and equal to it when made of the same class of steel, is the **Patent Concaved Tooth Dexter.** The patent by which this saw is protected consists of a depression of the face of the cutting teeth through the centre from point to base, thus removing all friction while in use, giving strength and stiffness to the teeth and increasing threefold the durability of the "set." This saw never fails to give the best satisfaction.

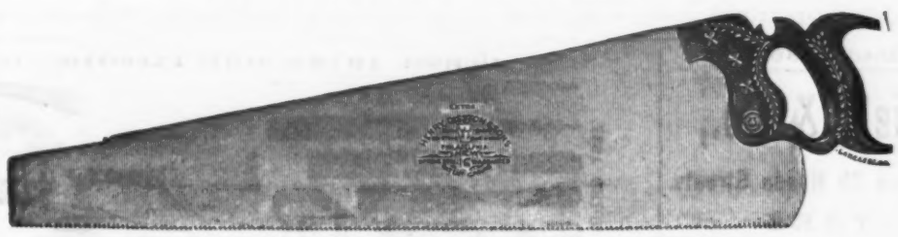
THE SAWS THAT LEAD THEM ALL

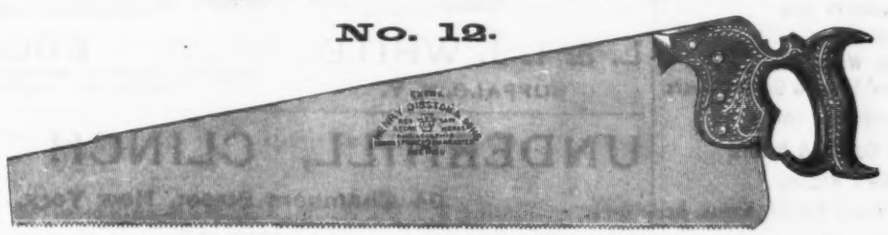
"THE SAW;" HOW TO CHOOSE IT, AND HOW TO KEEP IN ORDER, Sent Free on Receipt of Name and Post Office Address.



DISSTON & SONS' PATENT D-8 HAND SAW.

This Saw combines all the valuable improvements in Hand-saws that have been made by us of late. The first and most important is the hollow or skew-back, the success of which can best be attested by the number sold. The peculiar shape of the butt or heel, coupled with the new method of fastening to the handle, give a full stroke of the blade without fear of catching or hooking in the work; and as the handle is put further on the blade you have a full stop on the proper point and a greater command over your Saw, by reason of being two inches nearer the point, which must give more power.

The Saw being let into the handle on a circle, has a perfect bearing, which, with the new screws, makes it stronger and almost impossible to work loose, and avoids the unsightly gap that is seen on the back of the old style handle. All the above features are patented.



Our New No. 16 Premium Saw.

AN EXTRA FINE SAW IN EVERY RESPECT.

The Leonard Patent Portable Storm Houses.

A long-felt Want Supplied. Comfort and Economy Assured.

The sides and roof are constructed of Corrugated Iron set in a frame of Michigan Pine. The front is a good five panel sash door set in a frame of 2 x 4 pine. The upper panel is set with glass. The whole is neatly painted—two coats and two colors. Has a good latch with porcelain knob, and door spring. It is **Ornamental, Light, Strong, Cheap and Durable.** Anybody can set it up or take it down. Not necessary to have a carpenter. Storm Doors can be taken away in case of removal. The sides of the house are hinged to the front and fold inwards. The gables are hinged to the roof and fold inwards. The whole structure is only six inches thick when folded. To set it up, hook the edges to the door frame and adjust the roof to the top of the door frame. A notch may be sawed in the bottom rail for a projecting step or threshold if necessary. They save their cost in fuel every year, besides the comfort they give. Exclusive agencies given.

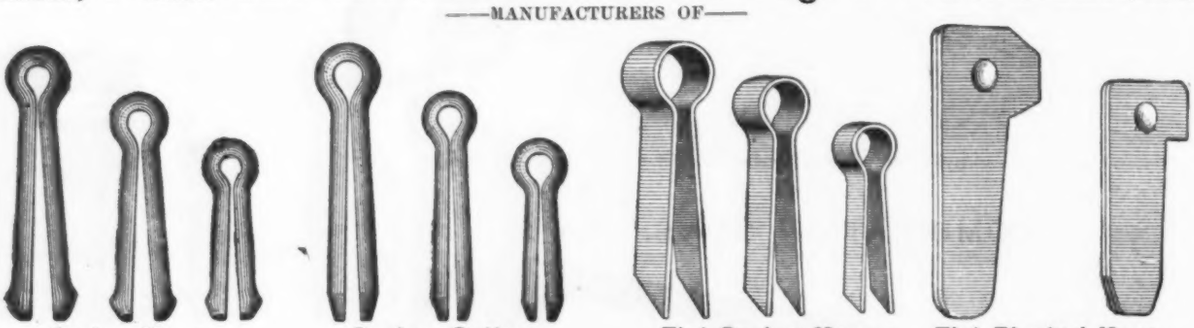
By Royal Letters Patent.
V. R.
PETER WRIGHT'S
SOLID WROUGHT
ANVIL
Made of Best Scrap Iron!
THE BICK FACE AND END ALL IN ONE SOLID PIECE!

The high reputation attained by these Anvils has led makers of an inferior anvil to imitate the brand, with the view of thereby more readily marketing their goods. You are cautioned in buying to see that each anvil is stamped with the full trade-mark on one side and has the green label affixed to the other; fac-similes of both are shown above.



☞ *These celebrated Anvils may be obtained from all the principal Hardware Dealers.*

SENECA FALLS MFG. CO., 255 Water St., Seneca Falls, N. Y.

If you **want the best Scythe-stones** buy the following celebrated brands:—The **"Indian Pond Red Ends,"** which have been made for about 70 years, and the sale of them extends to-day all over the world, and the demand for this stone exceeds all others. They are quick cutting, strong and do not glaze. The **"Lamoille Scythe-stone"** is also well-known, and has the reputation of being the best stone in the world to give a keen, smooth edge. The **"Black Diamond Scythe-stone"** is of the same grit, but superior finish, and is the handsomest scythe-stone in the market. The **"Ragg," "Willoughby Lake." "Green Mountain," "Diamond Grit," "White Mountain," "Farmer's Choice,"** and **"Extra Quinnebaug"** are all choice stone, coming from the best quarries which have been discovered in long years of effort and experience. These stones are carefully selected and handsomely packed and are sure to sell with satisfaction and profit.

The Schneider & Trenkamp Co.

Cleveland, O.

HUMPHREY'S IMPROVED AWL HAFT.

OUR NEW HANDLE has many points of improvement and beauty over any other Awl Haft now on the market. The metal portions are nickel, making a fine contrast with the fancy wood of the handle. The Awl has a square shank, which prevents turning, and it cannot pull through the cap when used in the hardest wood. The tools, 8 awls, 1 screw driver and 1 point, are held in separate cells under the ring at the top of the handle. The ring has one hole in it, which when revolved passes over each cell containing the tools, and is automatically locked at any desired point. It also forms a covering for all the tools when not in use. *Send for prices.*

BRADLEY & PIERSON MFG. CO.,

No. 135 Duane Street, - New York.

BEWARE.

Several styles of axe wedges have been put on the market the past year or two, all of which, so far as I know, are infringements of my patent. *All parties are hereby warned* against selling or using such wedges. One suit has been settled in my favor, another settled without suit, and other parties will be called to account soon. I still manufacture and sell the above, which has more practical merit than any other thus far made.

SUPERIORITY IN EVERY POINT UNIVERSALLY CONCEDED.

SEND FOR DESCRIPTIVE CIRCULAR.

FOREHAND & WADSWORTH'S

New Model Automatic Shell-Extracting Revolver

32 and 38-100 Center Fire.

We claim for this Pistol some important advantages over other makes of pistols of this kind. It has REBOUNDING LOCK, which obviates all liability of accidental discharge when closing the arm after charging the cylinder, a very important feature in an arm of this kind. It has a very simple and superior method of holding the cylinder to the barrel, which can be removed instantly by pressing a CATCH in front of the CYLINDER. The workmanship on this arm is very superior. All the parts are INTERCHANGEABLE, and are made from Drop Forgings. The frame of Cast Steel—no Malleable Iron about it.

FOREHAND & WADSWORTH,

Worcester, Mass, U. S. A.

Sold by all Dealers in Arms generally throughout the United States.

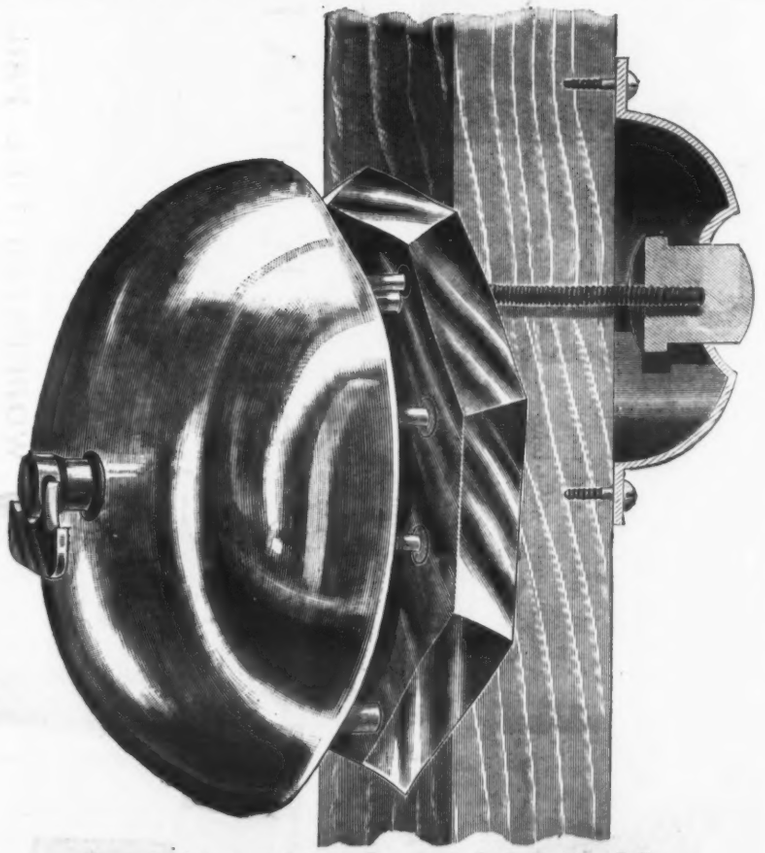
PRICE, $1.50

LADD'S DISCOUNT BOOK.

For Example, we desire to find the net of $73.00 at discount 65, 20, 7½, 5 and 2½ per cent. By the oldway we take our pencil, and, after a deal of figuring, conclude (if we haven't made an error) that the result should be $17.51, but we are not sure of it till we prove it. By the new way (the use of Ladd's Discount Book), we put our finger right on it in a moment, and know that the result is correct.



The book contains over 100,000 computations, and is indispensable where percentages are employed. Price, per mail, $3.00. Double Indexed Edition, $4.00.

Sent, Post-paid, on Receipt of the Price, by

DAVID WILLIAMS, *PUBLISHER & BOOKSELLER*

66 and 68 DUANE ST., NEW YORK.

ELECTRICITY OUTWITTED BY THE "EUREKA" AND "VENI VIDI VICI" DOOR BELLS.

Busby's Latest and New Improved Push Button Bell.

The Cheapest, Handsomest and most Thorough Made Bell on the Market.

Nos. 10 and 11.

They have *negative movements*, that is, are required to be *wound up*. There is *no defacing them when winding them*, as the *only part* that is *touched* is the *arbor key* on *end of winding arbor*. They have *merits never before brought forth in a mechanical push button bell*, viz. : *Full power* is given over *all* "*lost motion*" or "*back slack*" by an adjustable push rod. All *master craftsmen* will appreciate this, as they are aware *lost motion* will occur unless there is a way to *obviate it*. There is *no dropping out of push rod or losing push button* when the bell hanger or carpenter is *putting them up*, as *each is secured by a thread cut at each end of push rod*. There are *no spiral springs* about them, no *twisting off thread* on *end of arbor* or breaking of *springs*. They have *no wire "pinion" geers to come apart*. All our "*pinion*" *geers* are *solid steel*. There is *no straightening* of *Push Rods*, saving *valuable time* to *Carpenter* and *Bell Hanger*.

Our Nos. **1, 2, 10** and **11 Bells** are **Negative Bells**, *i. e.*, they **have to be wound up. They can be used on the door,** on the **side** of **the casing** of **the door, over the door** or **in the distance,** but we **advise** the **public not to be deceived** in the **use of a Negative Bell** for **heigth** or **distance,** *i. e.*, a **bell** that **that has to be wound up,** for our experience of many years (as we are no juveniles) in the bell business has **taught us** that a **bell** that **winds up** is **only fit for local use,** for if **put out** of **reach** and **stools** or **step-ladders are used** in **order** to **get at them** to **wind them up** when **run down,** and **they are apt to be so when most needed, they become a nuisance rather than a comfort or pleasure.** The **only bells** of **our make we would recommend** for **distance** are **our perpetual or positive movement bells,** which are Nos **5, 6 and 8.** These **never require any attention after once properly hung** and **can be used any distance.** There is **no winding to them.** They are the only reliable positive movement spring bells on the market; they have no double back action or spiral springs about them and never miss an alarm.

We believe in **dealing** in **facts with the trade** rather than putting **trash goods** on the **market** and **impose on the public** for the **sole purpose** of **gain** rather than **presenting merits** and **first-class goods.**

Our **aim** will **always be** to **give the best that killed craftsmen can bring forth.**

Before getting **LOADED** with **Table Bells** wait until you have seen the **latest** and **best,** one **that gives** the **"electric" sound** and **does not have to be wound up.** There is **no tarnishing them** or the **nuisance** of **having** to **wind them,** as they are **positive** or **perpetual motion bells.**

Our U. S. Patents date Nov. 2, '86, April 12, '87, March 12, '89. Trade-Mark granted Oct. 19, '86. Foreign Patents Sep. 21, '86, Dec. 6, '86. July 18, '87. All of our Patents are of our own brains and Production not BOUGHT ONES or WARMED OVER "CHESTNUTS."

Western Depot:

HIBBARD, SPENCER, BARTLETT & CO.

CHICAGO, ILL.

"WHAT ARE THEY?"

They are door or Call Bells that give the same result as the Electric Bells without the use of a battery, magnet or air, avoiding all filling freezing or breaking of jars.

"HOW IS IT ACCOMPLISHED?"

Simply by a mechanical device the nearest to *perpetual motion* that has ever been found to be *practical*.

"ARE THEY DURABLE?"

They will outwear all other bells on the market, owing to their construction; they are *simple, solid, practical* and made of the *best material* and in the *best workman-like manner*. We make *no "trash goods."* They are the work of *master craftsmen*. *All our goods are warranted. Any imperfection will be made good at our expense.*

"WHAT IS THEIR COMMERCIAL VALUE?"

They cost no more than any first-class bell, and when once placed in position *that ends all expense, care or trouble*, and are not affected by heat, cold, dust or moisture.

"CAN THEY BE PUT UP ANYWHERE?"

Yes, and in any position or place, and will work with *any pull or lever. Old door pulls or levers work as well as new ones.* Old trimmings can be used without making any extra expense or defacing your doors or house in any manner. They are made in sizes from 2½ inches and upwards to meet all demands of the trade. *They are the handsomest bells on the market.*

To comply with the wants of the trade we classify our bells as follows:

No. 1 Bell has a *negative movement* and *has to be wound up*. It has a brass bell and japan base, and can be used on the door or over it the same as No. 3 and 4 Bells are used.

No. 2 Bell has a *negative movement* same as No. 1, except it has a nickel bell and base. Used the same as No. 3 and 4.

Nos. 3 and 4 Bells are positive or perpetual movements and require no attention after placed in position. They work on centre of door with any manufacturers' Levers, old or new, and over the door with any manufacturers' Pulls, old or new.

No. 5 Bell has a *positive movement* and is for a **long or short range, no limit to distance.** This bell is brass, with japan base,

No. 6 Bell has a *positive movement* like No. 5, except it has a nickel bell and base, long or short range.

No. 7 Bell has a *positive movment* finished only in nickel and used for *hospitals and sick rooms*.

No. 8 Bell has a *positive movement*, is six inch, finished in brass. This is used for elevators mines, toboggans, double-runner sleds, &c.

No. 9 Bell is a ten inch bell, used for fire alarm in hotels, or on fire apparatus of all kinds, cable or motor cars and school houses. Made only to order,

No. 10 is a *Push Bell*, japan base, brass bell and *negative movement—i. e.*, has to be wound up.

No 11 is a *Push Bell*, has a japan base, nickel bell, and a *negative movement—i. e., has to be wound up.*

No. 12 is a Bicycle Bell, finished only in nickel. The best Bicycle Bell ever put on the market. It has a *positive* or *perpetual movement.*

OSBORNE'S PATENT

Meat Juice Presses.

PRICES:

No. 1, $1.25. No. 2, $1.75. No. 2, with clamp, $2.00. No. 3, $3.50. No. 4, $5.00. No. 5, $10.00.

DISCOUNT TO THE TRADE.

These presses are designed to extract the juice from freshly **BROILED STEAK.** The yield should be about six ounces from one pound of round steak, costing from six to twelve cents. It has been found that **BEEF TEA,** however made, contains no nourishment. The albumen coagulates at so low a temperature, nearly 100° below the boiling point, that it is unsafe to warm the expressed juice above the temperature of the body. Tepid water may be added, but avoid **HOT WATER.** Ask your physician about it.

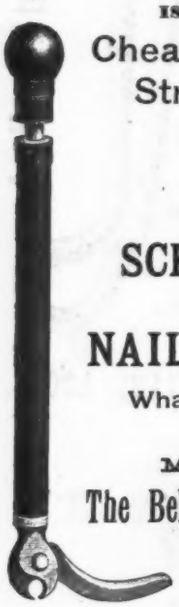
"WHEAT WHEN READY TO BE GROUND"



Must be carried to the mill to be made into flour, as every one knows, but it is highly probable that a good portion of the population of the U. S. is not aware of the fact that such flour would still further be improved if first sifted in a "HUNTER'S SIFTER" before being used. Any dealer that will explain this fact to his lady customers can greatly increase his trade by offering the "Hunter Sifter" as a leader. Write us for particulars and ascertain what we can do for you.

Wrought Steel Hollow Ware.

"Empire" Cold Handle Steel Spiders.

PATENTED.

The "Empire" Cold Handle Spiders are made from cold rolled wrought steel of the highest grade and finish, and are stamped from a SINGLE PIECE, and polished perfectly smooth and bright. The thickness of the steel of which the Empire Spiders are made (No. 14 Standard gauge) is a guarantee that they cannot break, bend or warp. An important feature also is that they are made without rivets, and cannot leak or the handles become loose.

The handle is reinforced in an attractive manner with a cover made of heavy tin, making a hollow ventilated handle which keeps always cool and comfortable to the hand.

The Empire SPIDERS will be found on inspection the most perfect ever made and cannot fail to give satisfaction. Our 1890 Catalogue of Patented Specialties, Acme Fry Pans, and Edgars' Patent Stove Shovels, mailed on application.

MANUFACTURED BY **JOSEPH LAY & CO., Ridgeville, Ind.** Send for Catalogue.

WE HAVE OFTEN

Been asked why we did not dwell more upon the excellent features of the "Wayne Washer" as other manufacturers are in the habit of doing. We answer that while we believe in "blowing our own horn," to a certain extent, we also think that too much of it has a tendency to react against those practicing it; besides, "The Wayne" needs only to be seen and tried to be appreciated.

Now, in order to make this "ad'v't" earn its cost will you write us, whereby you will gain some knowledge that would be appreciated by your customers were you to impart it to them, and which would prove profitable to you as well.

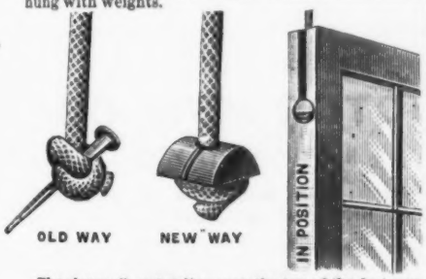
MANUFACTURED ONLY BY

"THOMAS MORTON,"



65 Elizabeth Street,

Write for Prices. **NEW YORK.**

The Detachable Empire Sash Cord Fastener

(Patent Applied for.)

The simplest and best method of attaching Sash Cords to Window Sashes ever invented, and a great saving in time and patience in putting in or taking out Window Sashes. Every window requires them that is hung with weights.

The sharp rib extending over the top of the fastener, through the centre, is by the weight of the sash caused to sink into the frame and thus hold from moving. The most useful invention for Window Sash ever put on the market. Every window requires them.

Reasons why you should use them: It costs less than one and one-half cents per Sash; requires no nails or screws; can be put in or taken out in less than one minute; prevents the knot from fraying out and getting between the sash and frame; does not split the sash like nails or screws; prevents the cord from running back into the weight pocket. Manufactured by the

THE GIANT PAD LOCK.

Centennial Award. "Superior in Every Respect.

This is one of the best selling locks in the market, and affords the dealer a large profit. It is thoroughly and strongly made—of the best material—very handsome in appearance, and every Lock is warranted. Orders solicited.

THE GIANT METAL SASH CHAIN

is a substitute for cord in hanging weights to windows. It is manufactured by us only, and by automatic machinery, patented and owned exclusively by ourselves, and whereby we secure uniformity of construction and quality. We have been to great expense in producing a metal having all the qualities and conditions requisite for making suitable chain for this purpose, and to prevent other chain of the same pattern of link and of the same general appearance, but made from an inferior metal, being offered as the same thing, we patented the word "Giant" as a Trade-Mark, as applied to either metal or chain. Trade-Mark Registered April 16, 1878, and October 22, 1878, and our metal is therefore known in the market as "Giant Metal," and our chain as "Giant Metal Sash Chain."

THE "SPRING" CURRY COMB.

PATENTED IN U. S, JULY 16, 1889

Foreign Patents in

Germany, France, Belgium, Great Britain and Canada, Austria, Italy, India, Australia.

A Comb that combines the strength of metal with the elasticity of a brush.

The flexibility of the loops makes this comb a wonderful device.

A FEW POINTS

"**It is as soft as a brush,**" because the loops *give* and enable the combing surface to get down into the hollows and slip over the elevations, to the great comfort of the animal and the great convenience of the hostler.

"**It is a perfect self-cleaner,**" and "**The best shedder known,**" because it is a spring, and the vibration of the coils readily frees them from all dirt and hair.

"**It cleans a horse quicker and better than other combs,**" because it has three hundred and twenty teeth which do not *track*, and because it "does not grate harshly over the surface," but accommodates itself to any and all parts of a horse, from his ears to his heels.

"**It is a very strong and well made comb,**" since the coil is made of very tough spring steel, and the shank is cast malleable and *all parts are riveted together.*

"**Its teeth do not bend out of shape**" from rough usage, because of its circular form, and because it is elastic.

"**The back is an excellent sweat scraper.**" The reasons are apparent.

The above Claims are endorsed by experts and the trade and guaranteed by the manufacturers.

DROP-FORGED

STEEL LATHE DOGS.

These Dogs are forged from mild steel, giving the greatest strength and toughness for the least weight, while they are also heavier than other Dogs of corresponding sizes made elsewhere.

The cross section is shaped similarly to an ogee, forming a rib, as it were, on the back, by which the metal is utilized to its greatest advantage at the point of severest strain.

The screws are made of steel to the U. S. Standard Gauge; the points are hardened, and they are from one-sixteenth to one-eighth of an inch larger in diameter than those generally used in Lathe Dogs offered for sale.

Twelve sizes, from 3/8 inch to 4 inch inclusive.

PATENT COMBINATION WRENCH.

Case-Hardened Throughout. Parts Interchangeable.

This wrench not only combines the superior qualities of a Gas Pipe Wrench but also all the requisite combinations of a regular Nut Wrench, thus making a combination which has no equal.

No. 3 PATENT PIPE WRENCH.

The serrated jaws of the Wrench are interchangeable; that is, the same serrated plate may be used for either the stationary or sliding jaw, so that if one plate is broken another can be furnished adapted to either jaw without express designation. The slides, nuts and various parts are also interchangeable, thus easily repairing the Wrench at very small expense, and with as perfect practicability for further use as when the Wrench was new.

For Circulars and Price List, address

This Wrench can be Furnished with Long Nut or Sleeve.

"RIVAL" PATENT Lawn Sprinkler.

Cheapest and Best in Use.

Agents Wanted. Liberal discount to buyers.

The Spray from it covers upwards of 1000 *sq. feet of lawn.* It is the only patent adjustable Sprinkler which is adaptable to any water pressure, being made of brass, and having no revolving parts to wear out, or small opening to clog up, it can be operated with sandy or muddy water as well as clear, and will last for years. To operate, screw Sprinkler on end of hose, stick the rod into the ground in a vertical position, adjust the acorn to suit pressure and spray wanted and it is ready for use. It may be so regulated as to throw a spray *as coarse as rain or as fine as mist*, and will make one of the most beautiful fountains imaginable. It is unequaled in merit, requires no attention and is sold at a less price than any sprinkler in the market. Remember, the RIVAL is the only Sprinkler made by which the coarseness of the spray and the area to be wet can be regulated. They are packed 1 doz. in a box, and finished either plain or nickel plated.

FULL SIZE.

¾ Inch Regular Hydrant Thread, for Pipe Thread, no order) per doz. $7.50

A MAN OF SAMPLES.

Something About the Men he Met "On The Road."

BY WM. H. MAHER.

Should be read by every business man in the country.

It is a book full of keen points about business men and business methods, from the pen of a successful merchant who has not only been "on the road" but has been book-keeper, buyer and head of a house doing a large trade.

The merchant who stays at home can see how men work on the road.

The book-keeper can learn how his letters and drafts are looked upon by the men he writes to.

The stock clerk can get points about shipping goods and filling orders.

Those who advertise can learn from one of the best advertisers in the United States.

Actual names of men and houses are given, but not a line in the book has been paid for in any way.

If men were complimented, it was because the author felt that they deserved it, and others are condemned fearlessly.

Sent, postpaid, on receipt of the price, 75 cents, by

DAVID WILLIAMS, Bookseller and Publisher, - 66 and 68 Duane St., New York.

Rat and Mouse Traps.
F. F. Adams & Co., Erie, Pa.
Estey, W. S., 71 Fulton, N. Y.
Hotchkiss, E. S., Bridgeport, Conn.
Ripley Mfg. Co., Unionville, Conn.
Waddel, Jno. M. Mfg. Co., Greenfield,O.

Razors.
Am. Knife & Razor Co., St. Louis, Mo.
Electric Cutlery Co., 91 Chambers, N.Y.
Southington Cutlery Co., Southington, Conn.
J. R. Torrey Razor Co., Worcester, Mass.

Refrigerator Door Fasteners.
Conroy, P. J. & Co., Philadelphia.

Registering Machines.
Ives, Geo. E., New Haven, Conn.

Rivets.
Blake & Johnson, Waterbury, Conn.
Disosway & Henderson, 165 Greenwich, N. Y.
Plymouth Mills, Plymouth, Mass.
Reed & Prince, Worcester, Mass.
Townsend, W. P. & Co., New Brighton, Pa.

Rivet Machines.
Sweetser, Wm. A., Brockton, Mass.

Road Carts.
Creamer & Scott Co., Indianapolis, Ind.
Parry Mfg. Co., Indianapolis, Ind.

Rolling Mill Machinery.
Birmingham Iron F'dry, Pirmingham, Conn.
Booth, The Lloyd, Co., Youngstown, O.
Robinson-Rea Mfg. Co., Pittsburgh.
Totten & Hogg Iron and Steel Fdry Co., Pittsburgh, Pa.
Waterbury Farrell Foundry & Mch. Co., Waterbury, Conn.

Rolls, Chilled, Sand and Steel.
Booth, The Lloyd, Co., Youngstown, O.
Chicago Foundry Co., Chicago, Ill.
Garrison, A. & Co., Pittsburgh, Pa.
Johnson Foundry Co., Johnstown, Pa.
Seaman, Sleeth & Black, Pittsburgh.
Totten & Hogg Iron and Steel Fdry Co., Pittsburgh, Pa.

Roofing.
Cambridge Roofing Co., Cambridge, O.
Cincinnati Corrugating Co., Piqua, O.
Thompson Mfg. Co., Cleveland, O.

Rules. *Manufacturers of.*
Lufkin Rule Co., Cleveland, Ohio.
Mumford, C. M., Springfield, Mass.
Stanley Rule & Level Co., 29 Chambers,

Sash Balances.
Caldwell Mfg. Co., Rochester, N. Y.

Sash Cords and Chains.
Bridgeport Chain Co., Bridgeport, Conn.
Morton, Thos., 65 Elizabeth, N. Y.
Samson Cordage Works, Boston, Mass,
Smith & Egge, Mfg. Co., Bridgeport.

Sash Cord Fasteners.
Empire Portable Forge Co., Cohoes, N.Y.

Sash Locks.
Champion Safety Lock Co., Cleveland, O.
Clancy, J. R., Syracuse, N. Y.
Ives, H. B. & Co., New Haven, Conn.

Sash Pulleys.
Empire Portable Forge Co., Lansingburg, N. Y.
Moore Mfg. & Fdry Co., Milwaukee, Wis.
Palmer Hardware Mfg. Co., Troy, N. Y

Sash Weights.
Brown, E. E. & Co, Philadelphia, Pa.
U. S. Foundry Co., 56 Pine, N. Y.

Sausage Stuffers.
Enterprise Mfg. Co., Philadelphia, Pa.

Saws, *Makers of.*
Atkins, E. C. & Co., Indianapolis, Ind.
Disston, Henry & Sons, Phila., Pa.
Jennings, C. E. & Co., 97 Chambers, N.Y.
Wheeler, Madden & Clemson Mfg. Co. Middletown, N. Y.

Saw Sets.
Chieftain Hay Rake Co., Canton, Ohio.

Saw Vises.
Seneca Falls Mfg. Co., Seneca Falls, N.Y
Stearns, E. C. & Co., Syracuse, N. Y.

Scales, *Manufacturers of.*
Buffalo Scale Co., Buffalo, N. Y.
Chatillon, John & Sons, 85-89 Cliff, N.Y.
Richle Bros., Philadelphia.

Screens, Door and Window.
Queen Anne Screen Co., Burlington, Vt.

Screw Cutting Machinery.
Wells Bros. & Co., Greenfield, Mass.
Wiley & Russell Mfg. Co., Greenfield, Mass.

screw Drivers.
Brown, R. H. & Co., New Haven, Conn.
Decatur Coffin Co., Decatur, Ill.
Eclipse.
Gay & Parsons, Augusta, Me.

Screw Plate and Pipe Cutter.
Jarecki Mfg. Co., Erie, Pa.

Screws, *Makers of.*
American Screw Co., Providence, R. I.
Blake & Johnson, Waterbury, Conn.
Wm. H. Haskell Co., Pawtucket.
Miles, F. S., 205 Quarry, Philadelphia.
National Screw & Tack Co., Cleveland, Ohio.
Reynolds & Co., New Haven, Conn.
St. Louis Screw Co., St. Louis, Mo.
Worcester Machine Screw Co., Worcester, Mass.

Scroll Saws.
Barnes, W. F. & John, Rockford, Ill.
Seneca Falls Mfg. Co., Seneca Falls, N.Y.

Scythe Stones and Whetstones.
Pike Mfg. Co., Pike Stat'n, N. H.
Cleveland Stone Co., Cleveland, O.

Shafting. *Makers of.*
Cresson, Geo. V., Philadelphia, Pa.
Fairmount Mch. Co., Philadelphia, Pa.
Fitzsimons & Co., Cleveland, Ohio.
Pierson & Co., 24-27 West, N. Y.
s, Wm. & Co., Inc. Phila. Pa.

Shears and Scissors.
Acme Shear Co., Bridgeport, Conn
Empire Knife Co., West Winsted, Conn.
Henry Seymour Cutlery Co., N. Y.

Sheep Shears.
Henry Seymour Cutlery Co., N. Y.

Sheet Zinc.
Matthiessen & Hegeler Zinc Co., La Salle, Ill.

Show Cases.
Goddard, Curtis, Alliance, Ohio.

Sinks.
Douglas, W. & B., Middletown, Conn.

Skates, Ice.
Dame, Stoddard & Kendall, Boston, Mass.
Peck & Snyder, 124 Nassau, N. Y.

IRON AND STEEL WIRE

of every description, plain, galvanized, tinned and lead-coated; spiral ribbon fence wire; steel wire ties for baling hay, straw, rags, excelsior, &c., &c., &c.

IRON AND STEEL WIRE ROPE

for all purposes, including cables of the best quality and of any desired length for street cable roads. The attention of all users of wire rope is specially called to the Trenton Iron Co.'s

Patent Locked Wire Ropes

which are far superior to any other in tensile strength and durability; from the fact that the wires in these ropes are interlocked, "unstranding" or projection of broken wires is impossible, and consequently a smooth surface only is constantly presented to the sheave or drum, causing these latter to last indefinitely. One of these locked wire ropes working under ordinary conditions will outwear two or three ropes of the ordinary style. The Trenton Iron Co. also call attention to their

Patent Wire Rope Tramways (Bleichert system)

also their hoisting and conveying plants for quarries, open cut mines, docks and contractor's work. Haulage and transmission of power by wire ropes a specialty. Surveys made and plans furnished at moderate rates by competent engineers.

JUST PUBLISHED.

The Metallurgy of Steel.

BY

HENRY M. HOWE.

Price, - - - - *$10.00*

This work is the most notable contribution to the literature of iron and steel metallurgy ever published. This series of papers on the subject have, during the past two years, attracted world-wide attention and have received the heartiest commendation from all quarters. The volume now published presents this material in much more convenient shape, with considerable additional matter, giving the results of the most recent research, experiment and practice. Also presenting a complete review of all important conclusions reached by earlier investigators. Every statement and citation has been carefully weighed and verified, and the references to the literature of the subject are given minutely, the book thus furnishing in itself a key to the whole range of steel metallurgy. It also furnishes the results of much new and original investigation, specially undertaken for the present work. Every metallurgist, every manufacturer of steel in any form, and all who are interested in the iron or steel industries, and all engineers who use iron or steel should have this standard work and cannot afford to be without it.

TABLE OF CONTENTS:

Chapter I.—Classification and Constitution of Steel.
Chapter II.—Carbon and Iron, Hardening, Tempering and Annealing.
Chapter III.—Iron and Silicon.
Chapter IV.—Iron and Manganese.
Chapter V.—Iron and Sulphur.
Chapter VI.—Iron and Phosphorus.
Chapter VII.—Chromium, Tungsten, Copper.
Chapter VIII.—The metals occurring but sparingly in iron.
Chapter IX.—Iron and Oxygen.
Chapter X.—Nitrogen, Hydrogen, Carbonic Oxide.
Chapter XI.—The Absorption and Escape of Gas from Iron.
Chapter XII.—The Prevention of Blowholes and Pipes.
Chapter XIII.—Structure and related subjects.
Chapter XIV.—Cold Working, Hot Working, Welding.
Chapter XV.—Direct Processes.
Chapter XVI.—Charcoal-Hearth Processes.
Chapter XVII.—The Crucible Steel Process.
Chapter XVIII.—Apparatus for the Bessemer Process.
Appendix I.—Special Steels.
Appendix II.—Anti-Rust Coatings.
Appendix III.—Lead Quenching.

"ROGERS' DRIVE SCREWS."

Patented May 10, 1887; July 19, 1887; July 10, 1888. Other patents pending.

A common cut thread screw as ordinarily inserted—*i.e.*, driven two-thirds of its length with a hammer and the balance with a screw driver. Fibres of the wood are necessarily broken, and holding power of screw much impaired.

The "ROGERS' DRIVE SCREW" driven with a hammer its entire length. It revolves as it goes in and does not break the fibres of the wood, but makes its own nut of the cavity it forms.

The foregoing illustrations speak for themselves, but we call attention to a few advantages of the "ROGERS' DRIVE SCREWS."

1. Stiffness, adapted for driving with a hammer.
2. Rapidity of insertion.
3. Increased holding surface.
4. Ability to be driven with hammer and withdrawn with Screw Driver numerous times from same hole.
5. Superior Head, which will withstand blows of a hammer and not impair the slot.
6. Improved Slot, admitting the use of a heavier Screw Driver.
7. A "ROGERS' DRIVE SCREW" of small diameter will hold as much as a common screw of larger diameter.

List prices, same as common iron wood screws. Discount for Flat Heads, 66⅔%.

Lathes, Planers, Drill Presses, &c. Patent Double Chain Screw Hoists, Overhead Tramway-Switch, &c.
Gear Cutting a Specialty.

J. G. SPEIDEL,

READING, PA.,

Patentee and Manufacturer of the celebrated

Economic Safety Hoist.

One man can lift two to three times as fast as with any other self-holding chain hoist. Spur gearing in connection with the automatic brake holds the load at any place, reducing friction to a minimum. The hoist has two speeds, is built strong and durable and guaranteed to give satisfaction. Cheaper than any other reliable hoist.

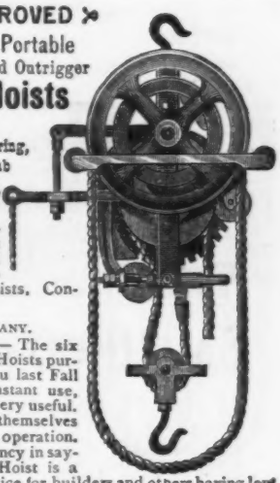
Overhead Tramways and Portable Derricks. Hand Power Elevators.

Send for illustrated catalogue. Agents wanted.

TEAL

Portable Hoist.

Pat'd April 8, 1884.



Quick hoisting and lowering of empty hook by pulling on lift chain.

All spur gears, giving great ease and speed in use.

No worm gearing to run dry and cut. Steel hooks and best material throughout.

MARIS MACHINE CO.,
146 Bread St.,
PHILADELPHIA.

IMPROVED
Patent Portable Hatchway and Outrigger
Rope Hoists

Quick Lifting, Quick Lowering, Elevator and Dumb Waiter Gearings, etc.

A large number are in use and endorsed by leading railroads, machinists, Contractors, etc.

ONE OF MANY.

GENTLEMEN — The six portable Rope Hoists purchased from you last Fall I have in constant use, and find them very useful. They paid for themselves in one building operation. I have no hesitancy in saying that your Hoist is a very useful device for builders and others having low or short lifting. Yours respectfully,

THOMAS BENNETT,
Philadelphia, Mar. 5, '90. Contractor and Builder.

ENERGY MFG. CO.
1115 to 1123 S. 15th St., - PHILADELPHIA, PA.

The Moore & White Co.,

PHILADELPHIA.

DON'T YOU WANT GOOD WORK?

Then provide your packing box or shipping department with our new surfacer. Specially designed for planing a smooth surface on any kind of wood. They take up but little room, require small power and any one can operate them. Their cost is small, too. Your packing room is not complete without one. For further information concerning them or any other wood working machine, address

THE EGAN CO., 179 to 199 W. Front Street, Cincinnati, Ohio. U. S. A.

SOFT STEEL PLATES.

We are making a specialty of soft steel plates for Blanking and Stamping, with clean, smooth surface, rolled carefully as to gauges, ranging from No. 9 to 16 inclusive, in widths up to 15½ inches, and to any multiples of length desired.

We can also furnish plates freed from scale and so treated as not to rust readily before using.

By the use of these, instead of raw plates in Stamping, the great saving of wear on costly dies and increased production of better work will more than cover the increase of cost over that of raw plates. Trial orders solicited in small or large quantities.

No. 116 Water St., Pittsburgh, Pa. **CHESS, COOK & CO.**

THE ELEMENTS OF ELECTRIC LIGHTING,

Including Electric Generation, Measurement, Storage and Distribution.

By PHILIP ATKINSON, A.M., PH.D.,

Author of Elements of Static Electricity.

260 PAGES, 12MO, 104 ILLUSTRATIONS. PRICE, $1.50.

The most complete and comprehensive treatise on electric lighting ever published; giving the latest practical facts, with the least amount of technicality and mathematical formulæ: with full treatment of the DYNAMO, the STORAGE BATTERY and the principles of DIRECT and ALTERNATE CURRENT lighting.

Fluor-Spar.

MULLINS'

Fluor-Spar and Lead Mining Co.,

220 First National Bank Building

CHICAGO, ILL.

This Company owns, at Mineral City, on the Ohio River, the largest Mines of Fluor-Spar ever discovered.

We are working a large force of miners; our new mills and tram railway are running, and we are now prepared to furnish the purest Fluor-Spar in any quantities to Iron and Steel Manufacturers, to Smelters of Gold, Silver and Copper, and to Paint, Paper and Glass Makers.

Fluor-Spar is pronounced the most powerful of fluxes; it facilitates the reduction of the most refractory materials. For Alkalies, Clays, and all Metallic Oxides it has a remarkable solvent power; it reduces the melting point, and saves fuel; it diminishes the loss of metal, saves labor, and keeps the cupola clean; reacts strongly upon scaffolds and cloggings.

One part of Fluor-Spar is more effective than ten parts of Limestone. Limestone is an enemy to iron; Fluor-Spar is a friend.

Directions for the proper use of Fluor-Spar given our patrons.

We ship Lump, Gravel, Crushed and Ground, in bulk or barrel.

SPECIAL NOTICE

TO CONSUMERS OF CHARCOAL IRON.

Wyebrooke Charcoal Pig Iron, strictly cold blast.
Has splendid chilling qualities and great strength.
Furnace now in blast and orders can be filled promptly.

45 Wall Street, New York.

Desirable Investment for Capitalists.

HIGH CLASS MILL ESTATE FOR SALE.

This estate is in the center of the City of Hartford, Conn., and within five minutes' walk of the Post Office and Court House.
The estate fronts for 187 feet on Charter Oak street, one of the principal streets in the central part of the city, and extends for about 900 feet to and across Sheldon street to Park or Mill River, including the dam and water privileges thereon.
The present Factory Buildings are all substantial structures, having a floor surface of 38,000 square feet. They are located on the Sheldon street front, and are equipped with a pair of 200 horse-power condensing engines, and with high class boilers, with fire pumps, heating pipes, etc., of the best construction and arrangement.
These buildings are now occupied for manufacturing purposes by 13 tenants at will, returning an income of about $10,000 per annum.
The total area of the land exceeds 3 acres, more than 2 acres of which are clear of buildings, and intending purchasers will be shown plans for the erection thereon of spacious one story buildings designed to meet the requirements of tenants renting room and power for light or heavy manufacturing, for which there is now a pressing demand from occupants of inconvenient and less accessible locations, too far removed from the center of the city; or the unoccupied land can be profitably divided into house lots.
Unless previously disposed of at private sale, the estate will be offered at auction on the 20th of October, 1890, at 12 o'clock noon.
For inspection of the estate apply to the agent in charge, Mr. R. J. Gibbs, on the premises at 133 Sheldon street, Hartford, Conn., but address all correspondence to the undersigned.

AMERICAN SCREW CO., Providence, R. I.

Affaires avec la France.

Firms wishing to push their Export Trade and do business with France in Machinery and Patents in connection with the Iron and Hardware Trades should see during his stay in New York a French engineer whose prominent position in his own country will enable him to procure for them the very best agents in France. All communications to be addressed to MR. P. BAYARD, care of the Institute of Mining Engineers, Park Avenue Hotel, New York, from November the 1st to the 15th

NEW TOOLS

Wanted by a party contemplating erecting a Wire Rod Mill in the West to roll 40 tons wire rods single turn, with all necessary appurtenances, including power. Address correspondence, with estimates and proposition, to

C. R. PARSONS,
140 Nassau Street, Room 86, New York.

FOR SALE.

Whole or half interest in Foundry and Machine Shop in the best town in the West. Everything new and running at full capacity on paying business. Good reasons given for selling.

Address
BOX 43, Pittsburg, Kansas.

FOR SALE.

In West Chelmsford, Mass., all the Real Estate and Machinery formerly owned by the Hiscox File Co.; the real estate consisting of about 7 acres of land together with the buildings and water power, and the machinery, being such as was used by them in the manufacture of files, machine knives, sword blades and edge tools. There is also on the premises a good 75 horse-power Harris-Corliss engine and good boiler, also a large amount of shafting, belting and supplies. This property is situated about five miles from Lowell, and is very easy of access by railway, with excellent facilities. The entire property will be sold very cheap, either as a whole or in part, and will afford some party an excellent chance to enter into this business. For terms, &c., inquire of

J. W. BENNETT, Lowell, Mass., or
F. G. SARGENT, Graniteville, Mass.

FOR SALE.

27 Gross Tons Steel Rails, 4 feet long and over.

SIMON & BLONDER BROS.,

OFFICE and Yard: 158 and 160 WEST CHICAGO AVENUE,

CHICAGO, - ILLINOIS.

WANTED.

A Left-hand Automatic Horizontal Engine, 20, 22 or 24 in. diameter, 24, 26 or 28 in. stroke; second hand.

STANDARD LUMBER CO., Dubuque, Iowa.

Iron Bridge M'f'r's.

The demand in the South for Iron Bridges and buildings is now very large and growing. A Bridge and Structural Iron Works in the South would have an abundance of orders and pay large dividends from the start, if it was located accessible to coal, on competing lines of R. R., and where material of good quality could be readily secured. Buchanan, Va., presents all of these advantages. It is on two trunk lines of R. R., with two more located; it is in the midst of the great iron and coal fields of the Virginias, and the Central Land Co., of Buchanan not only offers free sites but financial aid from its large cash development fund ($400,000). This is a rare opportunity to a pushing, energetic Bridge Builder. Buchanan also seeks associate industries on similar terms. Address CENTRAL LAND CO. of Buchanan, Buchanan, Va.

FOR SALE.

The well-established business, known as THE GAYLORD, CROSS & SPEIRS CO., located in Waterbury, Conn., is offered for sale. This plant is on the corner of Benedict and Meadow Sts.; consisting of land, brick and frame buildings, &c.; the foundry and all machinery goes with sale; there is between $10,000 and $12,000 worth of machinery that goes with the business. The lot fronts on two streets, 164 feet on Meadow and 219½ feet on Benedict Sts.; there is ample room for another large machine shop or any kind of manufacturing business without being cramped for room; this plant is only two minutes' walk from depot. The reason why this valuable property is put in the market at the price asked is because the owner is West and cannot give the attention that it requires. Take the business in consideration, both in foundry and machine work, it is a rare opportunity that does not occur every day, where one can buy an established business for the low figure, $45,000. The land and buildings alone are worth the price I ask, without the machinery. Address

L. J. BOWEN, Receiver,
Waterbury, Conn.

COAL at **50 cents per ton for twenty years; $1,000,000 cash,** and desirable location, with railway facilities, at **$100 PER ACRE,** worth $500, as special inducements to encourage new manufacturing industries

MEANS that **PITTSBURG, Kansas,** with its unequaled railway connections, is the best point on this continent for the establishing of smelting works, foundries and machine shops and any kind of manufacturing industry consuming coal and looking to the U. S. and Mexico for a market; guaranteeing

PROSPERITY to every dollar invested and every man employed. Gas, 75 cents per thousand. Taxes 8 per cent. on a 30 per cent. valuation; four trunk railways; $7,000,000 invested in industrial enterprises, best of free schools, property cheap. **Now is the time to invest. Come and investigate.** Write for information and **Maps.**

TO PITTSBURG

PITTSBURG TOWN CO.,
Pittsburg, Kan. A. W. GIFFORD, General Agent.

FOR $25,000

I will sell a very profitable Manufacturing Plant, all running in good shape; goods sold as fast as produced; poor health the only motive for selling; experience not essentially necessary, as all work is produced by the piece; margin of profit very large. Running 15 years without a stop. This is an extraordinary chance for an energetic young man. Address

"MANUFACTURING PLANT,"
office of *The Iron Age*, 66 and 68 Duane st., N. Y

FOR SALE. BLOWING ENGINE.

Vertical pattern, with balanced steam slide, valve gear, steam cylinder 14 in. diameter, air cylinder 40 in. diameter, stroke 24 in.; engine new. For price and particulars address

JAMES LEFFEL & CO.,
Springfield, Ohio.

WANTED.

A second-hand 5-ton Steam Hammer; must be in first-class order. State price and where tool can be seen.

THE BERLIN IRON BRIDGE CO.,
East Berlin, Conn.

To Those Looking

—FOR—

Manufacturing Sites

IN THE SOUTH.

The most desirable locations in the South for manufacturing wagons, stoves, agricultural implements, furniture, or for foundries, machine shops, rolling mills, muck bar mills, nail works, glass works, cotton or woolen mills and tanneries, are to be found in Virginia along the line of the Norfolk & Western Railroad from Norfolk to Bristol, and upon its branch lines. Hard wood of every variety; pig-iron from the furnaces at Lynchburg (2), Roanoke (2 in operation and 1 now under construction), Pulaski (1), Ivanhoe (1), Radford (1, to be built in 1890), Salem, Graham, Max Meadows and Bristol (1 at each point now under construction), bar iron from the rolling mills at Roanoke, Lynchburg and Richlands (1 to be built in 1890); coke and semi-bituminous coal from the Pocahontas Flat Top field; superior gas coals from the mines on the Clinch Valley extension; glass sand from Tazewell County; cotton from the markets of the Southern States, and wool from all the Western and Southwestern States and Territories, at advantageous freight rates. Favorable freight rates made upon raw materials to all factories established upon its line, as well as to points in the United States and Territories upon the manufactured articles.

Those seeking new fields for manufacturing establishments should not fail to investigate the wonderful development of iron, coal and coke industries that has been made within the past five years along the line of the Norfolk & Western Railroad, and the advantages offered by the State of Virginia in the supply of cheap raw materials, by the Norfolk & Western Railroad in the matter of freight facilities and rates upon raw materials, and for reaching home, far distant and foreign markets, and by the cities and towns along its line in the way of advantageous sites at moderate cost. Many of the cities and towns exempt manufacturing establishments from taxation for a series of years.

For further information as to freight rates and sources of supply of raw materials, apply to A. POPE, General Freight Agent, Roanoke, Va., or to

CHAS. G. EDDY,

Vice-President, Roanoke, Va.

WE HAVE FOR RENT one of the most extensive manufacturing properities on the Hudson, within 13 miles of Grand Central Depot unsurpassed for its railroad and dock facilities; with engine, boiler and other machinery; manufacturers looking for such a property will do well to give this consideration; send for diagram and description.

WILLIAM H. HOYT & CO.,
5 Vanderbilt Ave., opposite Grand Central Depot, New York.

PORTLAND, OREGON.

To Merchants, Bankers, and Manufacturers.

Your attention is invited to the large opportunities for Jobbing of every kind, Banking and Manufacturing in the City of Portland. Portland is the second city and coming metropolis of the Pacific Coast, as New York City denominates the Atlantic Coast.

Without trans-Atlantic railroads till 1883, she already has secured more trans-continental roads than any other city on the Pacific coast. She is nearer Chicago and New York and reached quicker by rail than any other city on the Pacific coast. (See maps and railroad time-tables.)

Portland is situated at the mouth of more miles of river navigation than any city, except New Orleans, in the United States. Over 3000 miles of the Columbia and Willamette rivers and tributaries are navigated by river steamers contributing to Portland's Commerce Portland has 250,000 square miles of area distinctively her own trading territory, in which are now being operated 3409 miles of railway with 1000 miles more to be added before the end of 1891.

Portland has exclusive lines of vessels trading coastwise to San Francisco, 772 miles south, to Puget Sound points and British Columbia points, and to Alaska, 1500 miles north.

She also has exclusive lines of vessels plying between Portland and New York City, between Portland and Japan, and between Portland and China. In addition, Portland loads annually at her wharves over 100 seagoing vessels coming in on special charters after cargoes of salmon, flour, wheat and ship timbers, going to nearly every well-known port in the world.

The tributary territory of Portland is about the size of New England, New York, Pennsylvania and Ohio combined. In 1880 it had scarcely 225,000 inhabitants. To day there are over 1,000,000 and increasing 1000 daily, and must steadily grow to 10,000,000 or more. The immigrants are chiefly farmers.

Portland controls the trade of ten times the fertile acreage tributary to any other Pacific coast point

AND MORE THAN ALL OTHER PACIFIC COAST POINTS COMBINED.

Portland has Unlimited Water Power for Manufactories. Vast Water Power at the Entrance to Deep Sea Navigation is Rare, and Exceedingly Valuable to Portland's Mfg. Development.

Portland has electric, cable and horse-car lines, charming parks and boulevard drives, hotels costing as high as $900,000, churches costing as high as $150,000, a grand system of public and private schools, including a high school costing $127,000, several colleges, and an air of refinement and culture which makes people from the larger Eastern cities feel perfectly at home.

Portland's Leading Commercial Interests are Exporting, Banking and Wholesaling, with Manufacturing Rapidly Developing

The Salmon fisheries of the Columbia river produce $2,000,000 to $3,000,000 annually. The export trade has multiplied several fold in recent years, as the country develops. The banking capital has grown to fourteen banks controlling six millions of capital. Our wholesale trade has grown from $75,000,000 in 1888 to $115,000,000 in 1889, and is yet in its infancy and growing at the rate of over 25 per cent. annually. Our manufacturing output in woolen goods, lumber, boots and shoes, paper, iron and many other lines aggregated over $20,000,000.00 in 1889, and is not yet fairly begun.

All these interests are thriving and yet there is room for enlargement on every hand in a region richer in agricultural resources than Illinois and sister States, in iron and coal similar to Pennsylvania and Alabama, greater in lumber than Minnesota and Maine and unrivalled in the more precious metals.

There has never been a failure of a bank or wholesale house in Portland.

The recent enormous development of the trade of Portland has outgrown all her facilities and her capital. Therefore the Oregon Immigration Board urges and invites correspondence and personal visits from people in all lines of Wholesale Trade, Banking and Manufacturing.

$20,000,000.00 additional capital would find immediate employment, producing profits very large to people with Eastern ideas, yet with unqualified safety. While in several lines we need houses commanding $500,000.00 to $1,000,00.00 capital, in many other lines there is room for young merchants and manufacturers to begin on limited capital, and "grow up with the country."

THE OREGON IMMIGRATION BOARD is an institution supported by several hundred of the more prominent business men of Portland. The commissioners who direct its affairs are the following gentlemen: CHAS H. DODD, President of the Board, Wholesale Hardware Dealer; H. W. CORBITT, Vice-President, First National Bank; D. F. SHERMAN, Cashier Oregon National Bank; T. F. OSBORNE, Mfr. of Bags, Sails, &c., also President of Chamber of Commerce; D. S. COHEN, Wholesale Notions and Fancy Goods; WM. McFALL, Wholesale Paper; JAS. L. DUNLAP, Real Estate Broker; H. E. DOSCH, Retired Wholesale Boot and Shoe Merchant; ELLIS G. HUGHES, Capitalist.

All communications will receive the most careful attention. Personal visits to Portland are strongly advised. Seeing is Believing. Address correspondence simply.

The Oregon Immigration Board.

Portland, Oregon.

FOR SALE.

A new specialty manufacturing business; last year's business $6,000; this year's business $25,000, and a prospect of nearly double next year; good reasons for selling; price $13.500; goods can be manufactured anywhere. Address

FOR SALE AT ST. PAUL.

The well-known Hardware Business of B. F. Knauft & Co., doing a General and Builders' Hardware, Furnace, Stove, Tin and House-furnishing Hardware business; established in present location in 1872; has the confidence of the people and enjoys a large trade. We own the building we occupy and can give favorable lease; good reason for selling. Splendid opportunity for parties with push and ability. Address
B. F. KNAUFT,
338 and 342 E. 7th St., St. Paul, Minn.

10 TO 15
YEARS ON A ROOF!

A Tin Roof well painted with

GRAPHITE PAINT

will not need repainting for 10 to 15 years. It covers more surface and lasts 5 times longer than any white lead or mineral paint. We shall be glad to send you a convincing circular.

JOS. DIXON CRUCIBLE CO.,
JERSEY CITY, N. J.

FOR SALE.

An old-established Wholesale General Hardware Business, located at Burlington, Iowa. Has the advantages of both rail and water communications, and one of the best distributing points on the Upper Mississippi River; good trade already established and am to-day doing a good business; stock on hand about $70,000; have five salesmen on the road; do business in Western Illinois, Northern Missouri, Eastern Nebraska, Southern Dakota and Minnesota and a large portion of Iowa.

The largest portion of my trade comes from Iowa. The territory can be extended and trade increased if desired. This is a rare opportunity for any one wishing to step into a good business already thoroughly established. Reason for wishing to sell out—poor health. For any information desired pertaining to the business and location, I would refer you to Ross & Fuller, 33 Chambers St., N. Y.; Clement M. Biddle & Co., Philadelphia; the National State Bank of Burlington, Iowa, or the undersigned

LYMAN H. DRAKE.

COLLECTIONS.

The Hardware Board of Trade (Limited), incorporated in 1877, Nos. 4 and 6 Warren street, New York, make **COLLECTIONS** in all parts of the United States and Foreign Countries of past due accounts, notes, checks and all other evidences of indebtedness.

Your business is solicited.

JAS. H. GOLDEY, Treasurer.

LEWIS BROS. & COMPANY,

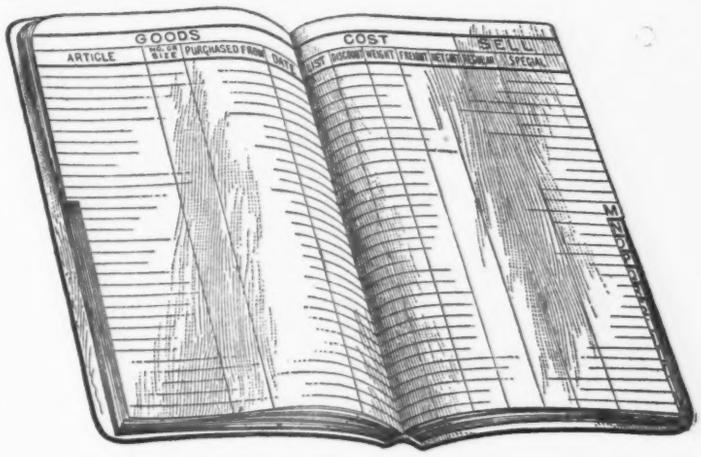
ENGINEERS AND CONTRACTORS, **LEWIS BLOCK, PITTSBURGH, PA.**

—THE IRON AGE—

HARDWARE PRICE BOOKS.

Arranged by R. R. WILLIAMS, Hardware Editor of The Iron Age.

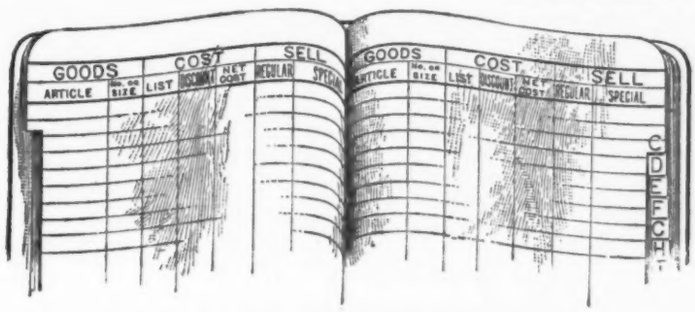
THESE BOOKS are printed on paper of superior quality and bound in grain seal leather. They are all, as indicated in the cuts, indexed through, care being taken to give each letter the proper amount of space for the accommodation of Hardware articles.



BOOK A.

Columns are provided for the name and number or size, for noting from whom purchased, date of quotation or purchase, list and discount, and for entering freight expenses as an element of cost. Under the heading of selling prices, the regular and any special price or remarks in regard to the goods are given place. This book goes into considerable detail in describing the goods and cost prices. It has been arranged in accordance with the views of many Hardwaremen whose methods are careful and exact.

Size, 4 x 7 in.; grain seal leather.



FOUR EDITIONS:

A, 200 pages,	$1.00
A F, 200 pages with flap,	1.25
A 2, 400 pages,	1.50
A F 2, 400 pages with flap,	1.75

Hardware Price Book A.

BOOK B.

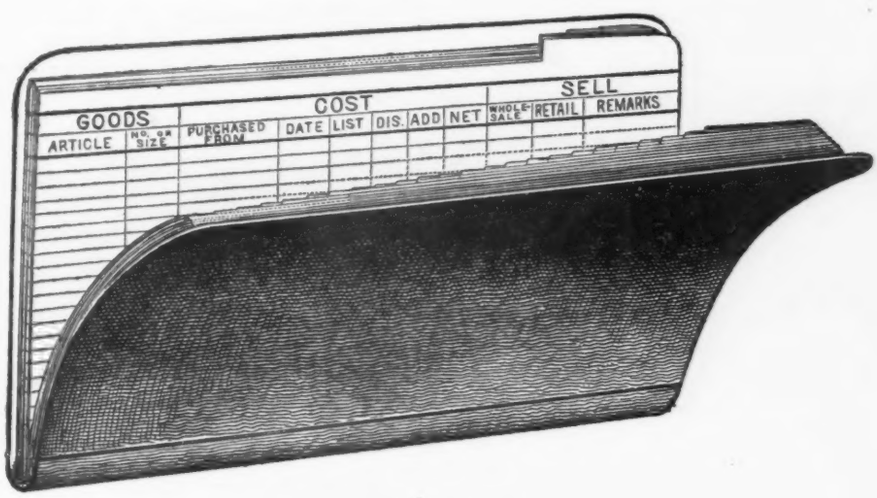
Hardware Price Book B.

In this book each page is complete, and the record of prices does not, as in Book A, run across two pages. Thus it accommodates a larger range of goods with much less detail in the record. It is adapted for office or store use, and by the use of familiar abbreviations sufficiently large for the convenient and concise record of prices.

Size, 4 x 7 in.; grain seal leather.

FOUR EDITIONS:

B, 200 pages,	$1.00
B F, 200 pages with flap,	1.25
B 2, 400 pages,	1.50
B F 2, 400 pages with flap,	1.75



BOOK C.

The headings in book C run across the top, in a line parallel with the hinge. In this way a very complete record can be kept on a single page. The details of weight and freight contained in book A are omitted, and a single column headed "Add" given for the insertion of freight or other expenses which it is desirable to include in the cost. Under the selling prices space is left for the wholesale price, the retail price and also for any remarks in regard to cost of the goods, desirability of pushing them or other matters.

Size, 4½ x 7¾ in.; grain seal leather.

FOUR EDITIONS.

C, 200 pages,	$1.00
C F, 200 pages with flap,	1.25
C 2, 400 pages,	1.50
C F 2, 400 pages with flap,	1.75

Hardware Price Book C.

Sent, post-paid, on receipt of price by DAVID WILLIAMS, Publisher, 66 and 68 Duane St., New York, from whom any book published in this country or abroad may be obtained without extra charge. Catalogues of scientific, technical and useful books sent on application.

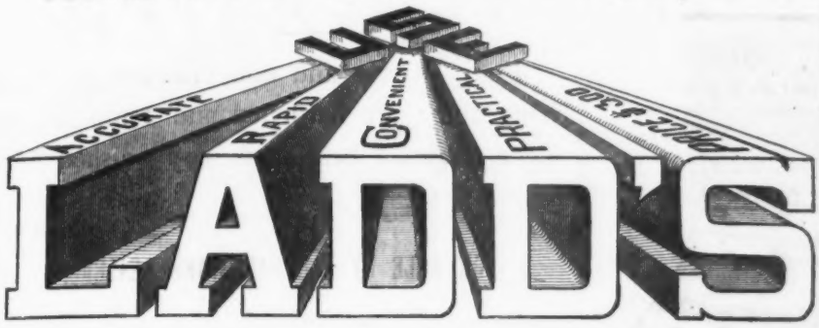
FIBRE HEAD MALLETS

PATENTED JANUARY 18, 1887.



Wood Body and Handle, thoroughly Kiln-dried. Malleable Bands. Heads easily replaced.

The heads of our Mallets and Chisel Handles are tipped with a layer of Vulcanized Fibre This is a Vegetable Compound, which by means of chemical processes and being subjected to a pressure of 200 tons is changed to a solid. It is tough, elastic and practically indestructible.

We claim that a mallet or handle reinforced with this material will outwear ten ordinary ones.

E. C. Stearns & Co., Syracuse, N. Y.

DISCOUNT BOOK.

COMPRISING

Nearly 200 pages of carefully prepared and positively accurate Tables.

THESE pages contain about one hundred and twenty thousand computations, giving at a glance the net of any sum whatever, at all discounts from 1 per cent. to 95, together with a great range of combinations.

The purpose of the book is to save computing percentage in its various forms and to give results that can be depended upon without proving, thereby avoiding much brain work and the mental strain attending hastily worked computations, which have to be proved, and saving time, money and patience. The book is nicely printed and handsomely bound, and is meant for every-day use.

It covers the whole range of discounts, both simple and complex, and is therefore almost indispensable, not only to the Hardware Trade, but to

EVERY BUSINESS IN WHICH PERCENTAGE IS USED.

It will be found complete and prove its value for finding the net costs of goods, making list prices, making discounts, comparing prices, adding profit, &c.—there is no limit to its application. A few days' use by Buyer, Price Clerk, Manufacturer, or any one who has to make prices or figure discounts, will verify the claim that the book is accurate, rapid, convenient and practical.

PRICE, $3.00; DOUBLE INDEXED EDITION, $4.00.

"If you want a Saw it is best to get one with a name on it which has a reputation.
A man who has made a reputation for his goods knows its value as well as its cost and will maintain it."—HENRY DISSTON.

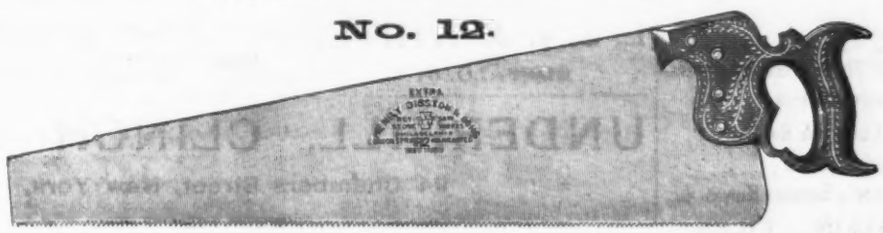
THE SAWS THAT LEAD THEM ALL

"THE SAW;" HOW TO CHOOSE IT, AND HOW TO KEEP IN ORDER, Sent Free on Receipt of Name and Post Office Address.

DISSTON & SONS' PATENT D-8 HAND SAW.

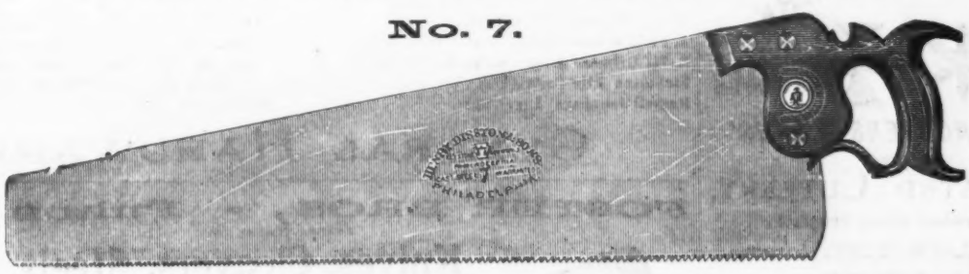
This Saw combines all the valuable improvements in Hand-saws that have been made by us of late. The first and most important is the hollow or skew-back, the success of which can best be attested by the number sold. The peculiar shape of the butt or heel, coupled with the new method of fastening to the handle, give a full stroke of the blade without fear of catching or hooking in the work; and as the handle is put further on the blade you have a full stop on the proper point and a greater command over your Saw, by reason of being two inches nearer the point, which must give more power.

The Saw being let into the handle on a circle, has a perfect bearing, which, with the new screws, makes it stronger and almost impossible to work loose, and avoids the unsightly gap that is seen on the back of the old style handle. All the above features are patented.



Our New No. 16 Premium Saw.

AN EXTRA FINE SAW IN EVERY RESPECT.



Having the Latest Close up Handle, Spring Steel Blade, Extra Thin Back, Finely Grained, with an Apple Handle and Four Brass Centennial Screws.

No. 12.

DISSTON & SONS' Extra Refined London Spring Steel, Selected and highly Polished Blade, Handle Carved and Polished, 4 Improved Brass Screws, the finest Hand Saw manufactured.

No. 7.

DISSTON & SONS' Cast-Steel, Warranted, Beech Handle, Polished Edge, 4 Improved Screws, Grained Blade.

"POCKET EDITION OF THE SAWYER" and "LUMBERMAN'S HAND BOOK," Sent Free on Receipt of Name and Post Office Address.

SOLE MANUFACTURERS OF THE

"S. Tubb's," "Wood's Cutlery Co.," and "Goodell's Best" Shoe Knives.

"The best shoe knife is cheapest"—"a poor one is dear at any price." We make a specialty of this branch of our business. The best material is used. Great care is exercised in every department of their manufacture, especial care is given to the tempering, and by reducing our work to a system and the use of suitable machinery we are able to produce goods that will stand beside any **"hand forged knife"** in the world, at about one-half the cost.

We lead them all. We make a larger variety of shapes and sizes. Our sales are greater. We produce a better knife for business than any other Shoe Knife manufacturer in the world.

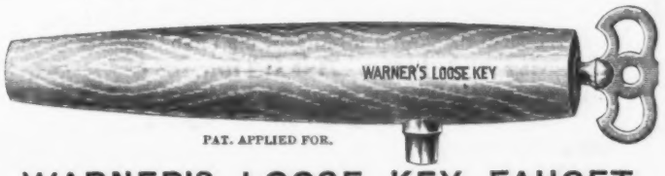
BLUE-STONE, SCYTHE-STONE,

WHETSTONES, OIL-STONES, RAZOR HONES,



AND EVERY THING FOR

SHARPENING

EDGE-TOOLS.

If you **want the best Scythe-stones** buy the following celebrated brands:—The **"Indian Pond Red Ends,"** which have been made for about 70 years, and the sale of them extends to-day all over the world, and the demand for this stone exceeds all others. They are quick cutting, strong and do not glaze. The **"Lamoille Scythe-stone"** is also well-known, and has the reputation of being the best stone in the world to give a keen, smooth edge. The **"Black Diamond Scythe-stone"** is of the same grit, but superior finish, and is the handsomest scythe-stone in the market. The **"Ragg," "Willoughby Lake." "Green Mountain," "Diamond Grit," "White Mountain," "Farmer's Choice,"** and **"Extra Quinnebaug"** are all choice stone, coming from the best quarries which have been discovered in long years of effort and experience. These stones are carefully selected and handsomely packed and are sure to sell with satisfaction and profit.

The Leonard Patent Portable Storm Houses.

A long-felt Want Supplied. Comfort and Economy Assured.

The sides and roof are constructed of Corrugated Iron set in a frame of Michigan Pine. The front is a good five panel sash door set in a frame of 2 x 4 pine. The upper panel is set with glass. The whole is neatl painted—two coats and two colors. Has a good latch with porcelain knob, and door spring. It is **Ornamental, Light, Strong, Cheap and Durable.** Anybody can set it up or take it down. Not necessary to have a carpenter. Storm Doors can be taken away in case of removal. The sides of the house are hinged to the front and fold inwards. The gables are hinged to the roof and fold inwards. The whole structure is only six inches thick when folded. To set it up, hook the edges to the door frame and adjust the roof to the top of the door frame. A notch may be sawed in the bottom rail for a projecting step or thresnold if necessary. They save their cost in fuel every year, besides the comfort they give. Exclusive agencies given.

The HENDRYX Braided Cord has in each cord the full number of wires stated. Finished in Tinned, Gilt or Gold, and will not tarnish.

Every box contains twelve rolls of 25 yards or 25 feet each.

Every roll contains exactly the length marked on package.

Keep the HENDRYX in stock—it is the leading cord.

WIRE PICTURE CORD.

You cannot afford to sell "short cord."

Nobody puts up short-length cord, of course; but did you ever test yours by measuring? Try it and see.

The HENDRYX is absolutely full length.

WRITE FOR CATALOGUE.

Cronk's Patent Wire Cutter and Bender.

This surpasses any Plier in the market for Cutting and Bending Wire, and can also be used in place of Hill's Hog Ringer. Is specially adapted to farmers' use in building Wire Fence, &c.

Our reasons for claiming that we have the best Pliers in the market are:

FIRST.—We use the best Tool Steel and they are nicely finished.

SECOND.—We combine both Flat and Round-Nosed Pliers in one, the concave and convex circles between the handles are used for bending wire in any desired shape.

THIRD.—The cupping in the Nose is used for pulling tacks, brads or nails, and can also be used in place of Hill's Hog Ringer.

FOURTH.—We can cut Barb Wire, Barb Belt or any kind of Wire used for Fencing, purposes. We also claim that we have the only Plier made that the Cutting Jaws cannot be broken.

By passing the Wire through the Pliers it makes a very handy cut and also holds the Wire after it is cut.

WHEELER PATENT CAN OPENER COMPANY.

Surpasses all other instruments for opening cans, irrespective of shape or size.
They are well recommended by those who have them in use. It is the only can opener that will cut off the top of paint pails. There are hundreds in use for this purpose.
It cuts stove pipe, tin pipe, &c., to perfection. The blade is made of the best cutlery steel, and the spring is of the most reliable make. For sale by all wholesale hardware dealers. Samples will be forwarded to any address on receipt of 50c. Address **Wheeler Patent Can Opener Co.,** 102 South Main St., St. Louis, Mo.

Claims Don't Amount to Anything

unless sustained by facts. We made the following claim for the BUFFALO DAMPER before the Judges of Award at the Paris Exposition. How they regarded the claim and what they thought of the Damper is indicated by its receiving the Highest Award at their hands.

Damper for Stove Pipe.

Damper Clip for Hot Air Pipe.

CLAIM. Being supported by a single bearing, this damper takes its proper position when the tension is applied. As it does not require a hole in the pipe for an opposite bearing, it avoids the necessity for care in placing the holes directly opposite each other, so that the damper plate may hang true and not strike either side of the pipe. The necessary tension is supplied by a screw, thus avoiding making use of the elasticity of the casting or of a separate spring, which are liable to lose their elastic qualities when subjected to heat. The handle being made of wood, does not become disagreeably warm. The simplicity of construction and the ease and rapidity with which the damper may be inserted in the pipe are all important considerations, and those qualities, together with the avoidance of the use of springs, and the fact that it has a cool and attractive handle, are the points in which we claim that the BUFFALO DAMPER excels all others.

Wrought Steel Hollow Ware.

"Empire" Cold Handle Steel Spiders.

PATENTED.

The "Empire" Cold Handle Spiders are made from cold rolled wrought steel of the highest grade and finish, and are stamped from a SINGLE PIECE, and polished perfectly smooth and bright. The thickness of the steel of which the Empire Spiders are made (No. 14 Standard gauge) is a guarantee that they cannot break, bend or warp. An important feature also is that they are made without rivets, and cannot leak or the handles become loose.

The handle is reinforced in an attractive manner with a cover made of heavy tin, making a hollow ventilated handle which keeps always cool and comfortable to the hand.

The Empire SPIDERS will be found on inspection the most perfect ever made and cannot fail to give satisfaction. Our 1890 Catalogue of Patented Specialties, Acme Fry Pans, and Edgars' Patent Stove Shovels, mailed on application.

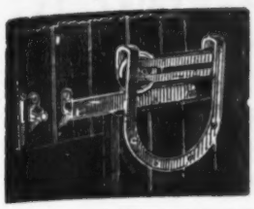
THE SWIFT MILL.



ESTABLISHED 1845.

The annexed cut shows one of the many styles of Coffee Mills of our manufacture, especially adapted to Grocers' use and all retailers of coffee. They are highly ornamental and workmanship of the very best. We make more than 30 styles.

Lane's Measuring Faucet.

LANE'S PATENT STEEL DOOR HANGER.

The most perfect Anti-Friction Hanger in the Market, because

It is made of steel throughout, except the wheel, which has a steel axle. It will not break. It is practically free from wear. It is almost noiseless in action. It requires no oil. It has a broad bearing on the door, and keeps in line. It is by far the most durable. It may be used with any track. It is always in order. LANE'S PATENT TRACK is made of steel and is easily put in position. Catches and holds no snow or ice. Door hung thereon cannot jump the track. Is not subject to decay. Requires no fitting, but is ready at once. May be used with hangers of other manufacture. Send for circulars.

Manufactured by **LANE BROS.,** Poughkeepsie, N. Y.

JOHN H. GRAHAM & CO., General Agents, 113 Chambers Street NEW YORK.

DON'T BUY A NEW LOCK, JUST BUY A DIFFERENT KEY.

A CHANGEABLE KEY Self-Setting Combination LOCK. ABSOLUTE SECURITY.

MANUFACTURED BY THE UNIVERSAL Lock Co. OF NEW YORK.

This lock differs from all others in the fact that it will set itself to any one of 4013 different keys with which the user may choose to lock it. Only the key used in locking will unlock it.

The advantage will naturally become apparent when for any reason whatever the user wishes to change the means of securing his premises, he need only buy a new key. Obviously as many different locks for securing the premises will be available as there are keys in the possession of the holder.

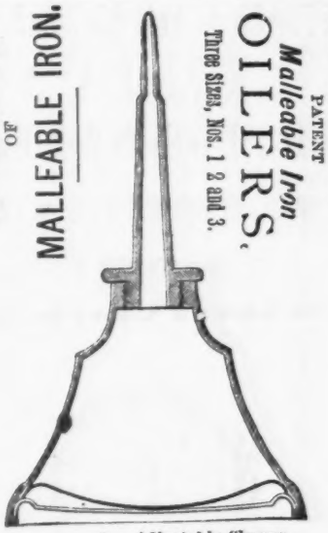
THE ART OF SELLING.



By F. B. GODDARD. 12mo, Flexible Cloth, 50 Cents.

In this book the author lets the reader into the secrets of the accomplished and successful salesman, illustrates his tact and finesse, and tells how he masters men; but beyond this, the work embraces much information which will be instructive and useful to all classes of business men. Besides suggestions to buyers, it contains chapters on "Changes in Business Conditions and Methods," "Salesmen's Compensation," "Retail Merchants and Salesmen," "Saleswomen," "How to Read Character," with a collection of clearly and tersely put important Legal Principles and Decisions Governing Sales. Sent, post-paid, upon receipt of price, by

DRUM TAPS

Leaves from the Diary of a Commercial Traveler.

By WM. H. MAHER, author of "On the Road to Riches" and "A Man of Samples."

Cloth Covers. Price 75 Cents.

Every traveling man will want to compare the author's experience with his own, and those connected with business, whether merchants or clerks, will be interested in seeing the routine of life "on the road."

There are added two addresses by Mr. Maher delivered to traveling men, helpful talks that were widely copied in all the trade papers of this country and in England, and which many of the most prominent merchants here desired to have in more convenient and permanent form.

Sent, post-paid, upon receipt of price, by

Bemis & Call Hardware & Tool Co

PATENT COMBINATION WRENCH

Case-Hardened Throughout. Parts Interchangeable.

This wrench not only combines the superior qualities of a Gas Pipe Wrench but also all the requisite combinations of a regular Nut Wrench, thus making a combination which has no equal.

This Wrench can be Furnished with Long Nut or Sleeve.

No. 3 PATENT PIPE WRENCH.

The serrated jaws of the Wrench are interchangeable; that is, the same serrated plate may be used for either the stationary or sliding jaw, so that if one plate is broken another can be furnished adapted to either jaw without express designation. The slides, nuts and various parts are also interchangeable, thus easily repairing the Wrench at very small expense, and with as perfect practicability for further use as when the Wrench was new.

For Circulars and Price List, address

BEMIS & CALL HARDWARE & TOOL COMPANY, Springfield, Mass.

THE TRIMO PIPE WRENCH.

TRIMO TRADE MARK

Send for Circular and Price List.

For Sale by all Supply Houses.

Made of forged steel, and is interchangeable in all its parts. It grips the pipe firmly without loss motion. Releases its hold readily. Causes no trouble when used in close quarters. It does not crush the pipe.

Rat and Mouse Traps.
F. F. Adams & Co., Erie, Pa.
Estey, W. S., 71 Fulton, N. Y.
Hotchkiss, E. S., Bridgeport, Conn.
Ripley Mfg. Co., Unionville, Conn.

Razors.
Am. Knife & Razor Co., St. Louis, Mo.
Electric Cutlery Co., 91 Chambers, N.Y.
Southington Cutlery Co., Southington, Conn.
J. R. Torrey Razor Co., Worcester, Mass.

Refrigerator Door Fasteners.
Conroy, P. J. & Co., Philadelphia.

Registering Machines.
Ives, Geo. E., New Haven, Conn.

Rivets.
Blake & Johnson, Waterbury, Conn.
Disosway & Henderson, 165 Greenwich, N. Y.
Plymouth Mills, Plymouth, Mass.
Townsend, W. P. & Co., New Brighton Pa.

Rivet Machines.
Sweetser, Wm. A., Brockton, Mass.

Road Carts.
Parry Mfg. Co., Indianapolis, Ind.

Rolling Mill Machinery.
Birmingham Iron Fdry, Pirmingham, Conn.
Booth, The Lloyd, Co., Youngstown, O.
Robinson-Rea Mfg. Co., Pittsburgh.
Totten & Hogg Iron and Steel Fdry Co., Pittsburgh, Pa.
Waterbury Farrell Foundry & Mch. Co., Waterbury, Conn.

Rolls, Chilled, Sand and Steel.
Booth, The Lloyd, Co., Youngstown, O.
Chicago Foundry Co., Chicago, Ill.
Garrison, A. & Co., Pittsburgh, Pa.
Johnson Foundry Co., Johnstown, Pa.
Seaman, Sleeth & Black, Pittsburgh.
Totten & Hogg Iron and Steel Fdry Co., Pittsburgh, Pa.

Roofing.
Cambridge Roofing Co., Cambridge, O.
Garry Iron Roofing Co., Cleveland, O.
Thompson Mfg. Co., Cleveland, O.

Rules. *Manufacturers of.*
Lufkin Rule Co., Cleveland, Ohio.
Mumford, C. M., Springfield, Mass.
Stanley Rule & Level Co., 29 Chambers,

Sash Balances.
Caldwell Mfg. Co., Rochester, N. Y.

Sash Cords and Chains.
Bridgeport Chain Co., Bridgeport, Conn.
Morton, Thos., 65 Elizabeth, N. Y.
Smith & Egge, Mfg. Co., Bridgeport.

Sash Cord Fasteners.
Empire Portable Forge Co., Cohoes, N.Y.

Sash Locks.
Champion Safety Lock Co., Cleveland, O.
Clancy, J. R., Syracuse, N. Y.
Ives, H. B. & Co., New Haven, Conn.

Sash Pulleys.
Empire Portable Forge Co., Lansingburg, N. Y.
Moore Mfg. & Fdry Co., Milwaukee, Wis.
Palmer Hardware Mfg. Co., Troy, N. Y

Sash Weights.
Brown, E. E. & Co, Philadelphia, Pa.
U. S. Foundry Co., 56 Pine, N. Y.

Sausage Stuffers.
Enterprise Mfg. Co., Philadelphia, Pa.

Saws, *Makers of.*
Atkins, E. C. & Co., Indianapolis, Ind.
Disston, Henry & Sons, Phila., Pa.
Wheeler, Madden & Clemson Mfg. Co. Middletown, N. Y.

Saw Sets.
Chieftain Hay Rake Co., Canton, Ohio.

Saw Vises.
Stearns, E. C. & Co., Syracuse, N. Y.

Scales, *Manufacturers of.*
Buffalo Scale Co., Buffalo, N. Y.
Chatillon, John & Sons, 85-89 Cliff, N.Y.
Riehle Bros., Philadelphia.

Screens, Door and Window.
Queen Anne screen Co., Burlington, Vt.

Screw Cutting Machinery.
Wells Bros. & Co., Greenfield, Mass.
Wiley & Russell Mfg. Co., Greenfield, Mass.

Screw Drivers.
Brown, R. H. & Co., New Haven, Conn.
Eclipse.

Screw Plate and Pipe Cutter.
Jarecki Mfg. Co., Erie, Pa.

Screws, *Makers of.*
American Screw Co., Providence, R. I.
Blake & Johnson, Waterbury, Conn.
Wm. H. Haskell Co., Pawtucket.
Miles, F. S., 205 Quarry, Philadelphia.
National Screw & Tack Co., Cleveland, Ohio.
Reynolds & Co., New Haven, Conn.
St. Louis Screw Co., St. Louis, Mo.
Worcester Machine Screw Co., Worcester, Mass.

Scroll Saws.
Barnes, W. F. & John, Rockford, Ill.
Seneca Falls Mfg. Co., Seneca Falls, N.Y.

Scythe Stones and Whetstones.
Pike Mfg. Co., Pike Stat'n, N. H.
Cleveland Stone Co., Cleveland, O.

Shafting, *Makers of.*
Cresson, Geo. V., Philadelphia, Pa.
Fairmount Mch. Co., Philadelphia, Pa.
Fitzsimons & Co., Cleveland, Ohio.
Pierson & Co., 24-27 West, N. Y.
Sellers, Wm. & Co., Inc. Phila. Pa.

Shears and Scissors.
Acme Shear Co., Bridgeport, Conn
Henry Seymour Cutlery Co., N. Y.

Sheep Shears.
Henry Seymour Cutlery Co., N. Y.

Sheet Zinc.
Matthiessen & Hegeler Zinc Co., La Salle, Ill.

Show Cases.
Goddard, Curtis, Alliance, Ohio.

Sinks.
Douglas, W. & B., Middletown, Conn.

Skates, Ice.
Dame, Stoddard & Kendall, Boston, Mass.
Peck & Snyder, 124 Nassau, N. Y.
Winslow, Sam'l, Skate Mfg. Co. Worcester, Mass.

Smelting Works.
Reeves, Paul S., 760 S. Broad, Phila.

Speaking Tubes.
Ostrander, W. R. & Co., N. Y.
Wollensak, J. F., Chicago, Ill.

Spelter.
Manning & Squier, 111 Liberty, N. Y.
Matthiessen & Hegeler Zinc Co., La Salle, Ill.

Splice Bars, Iron and Steel.
Springfield Iron Co., Springfield, Ill.

Spool Wire.
Tate & Co., Malden, Mass.

Spoons and Forks.
Holmes & Edwards Silver Co., Bridgeport, Conn.
Rogers, The Wm. Mfg. Co., Hartford, Conn.
Wallace, R. & Sons Mfg. Co., Wallingford, Conn.

Sporting Goods.
Hartley & Graham, 19 Malden Lane, N. Y.

Springs.
Dunbar Bros., Bristol, Conn.
Morgan Spring Co,, Worcester, Mass.
Sabin Machine Co., Montpelier, Vt.
Titus & Babcock, Rochester, N. Y.
Tuck Mfg. Co., Brockton, Mass.
Wolff, R. H. & Co., Ltd., 118th St. and Harlem River, N. Y.

Spring Cotters.
Whitman & Barnes Mfg. Co., Syracuse, N. Y

Spring Hinges.
Bardsley, J., 59 Elm, N. Y.
Stover Mfg. Co., Freeport, Ill.
Union Mfg. Co., 103 Chambers, N. Y.
Van Wagoner & Williams Co., 82 Beekman, N. Y.

Spring Keys.
Whitman & Barnes Mfg. Co., Syracuse, N. Y.

Stamping Works.
Avery Stamping Co., Cleveland, O.
Niagara Stamping and Tool Co., Buffalo, N. Y.

Staples.
Binghamton Wire Goods Co., Binghamton, N. Y.

Steam Fittings.
Kuhn Bros., Dayton, Ohio.

Steam Hammers, &c., *Makers of.*
Dieneit & Eisenhardt, Philadelphia.
Dudgeon, Richard, 24 Columbia, N. Y.
Duncan, W. P. & Co., Bellefonte, Pa.

Steel, Cold Rolled Strip.
Wilmot & Hobbs Mfg. Co., Bridgeport, Conn.

Steel Figures and Alphabets.
Krogsrud, W., 52 Fulton, N. Y.
Stutzman, J. M., 181 William, N. Y.

Steel Importers.
Abbott, Jere & Co., N. Y. and Boston.
Hobson, Francis & Son, 97 John, N. Y.
Jessop, Wm. & Sons, Sheffield, England, or 91 John, N. Y.

Steel, *Manufacturers' Agents.*
Gautier, D. G. & Co., 114 John, N. Y.
Hicks & Dickey, Philadelphia, Pa.
Thompson, Richard Co., Ltd., 105 Chambers, N. Y.

Steel Nails.
Bellaire Nail Works, Bellaire, Ohio.

Steel, Sheet.
Ætna Iron & Steel Co., Bridgeport, O.
Cambridge Iron & Steel Co., Cambridge, Chess, Cook & Co., Pittsburgh, Pa. Ohio.
Standard Iron Co., Bridgeport, Ohio.

Steel Spiral Springs, *Manufacturers*
Cary & Moen, 234 W. 29th, N. Y.
Chatillon, John & Sons, N. Y.
Roland, Wm. & Harvey, Frankford.

Steel Tires.
Latrobe Steel Works, Latrobe, Pa.

Steel, Tool.
Frankford Steel Co., Philadelphia.
Jessop, Wm. & Sons, Sheffield, England, 91 John, N. Y.
Leng, John S., 4 Fletcher, N. Y.
Smith Bros. & Co., Pittsburgh, Pa.

Stocks and Dies.
Besly, C. H. & Co., Chicago, Ill.
Billings & Spencer Co., Hartford, Conn.
Butterfield & Co., Derby Line, Vt.
Hart Mfg. Co., Cleveland, O.
Saunder's Sons, D., Yonkers, N. Y.
Wells Bros. & Co., Greenfield, Mass.
Wiley & Russell Mfg. Co., Greenfield, Mass.

Stove Linings.
Ostrander, Jas. & Son, Troy, N. Y.

Stoves, Oil, Vapor and Gasoline.
Central Oil Stove Co., Boston, Mass.

Strops.
Electric Cutlery Co., 91 Chambers, N.Y.
J. R. Torrey & Co., Worcester, Mass.

Sulphuric Acid.
Matthiessen & Hegeler Zinc Co., La Salle, Ill.

Swaging Machines.
Excelsior Needle Co., Torrington.

Tack and Nail Machinery.
Sweetser, W. A., Brockton Mass.

Tack Pullers.
Hagen & Reid, W. Troy, N. Y.

Tacks, Brads, Staples, &c.
A. Field & Sons, Taunton, Mass.
American Tack Co., 116 Chambers, N.Y.
Disosway & Henderson, 165 Greenwich, N. Y.
Dunbar, Hobart & Co., 39 Warren, N Y.
Florence Tack Co., Florence, Mass.
National Screw & Tack Co., Cleveland, Ohio.
Phillips, E. & Sons, South Hanover.
Plymouth Mills, Plymouth, Mass.
Trufant, W. E., Whitman, Mass.

Taps and Dies.
Butterfield & Co., Derby Line, Vt.
Manning, Maxwell & Moore, 111 Liberty, N. Y.
Wells Bros. & Co., Greenfield, Mass.
Wiley & Russell Mfg. Co., Greenfield, Mass.

Testing Machines.
Riehle Bros., Philadelphia,

Thill Springs.
Butts & Ordway, Boston, Mass.
Frost Thill Spring Co., Boston, Mass.

Toe Calks, Steel.
Burke, P. F., Boston, Mass.

Tools.
Am. Bit Brace Co., Buffalo, N. Y.
Atkins, E. C. & Co., Indianapolis, Ind.
Britton, Horace E., Stoughton, Mass.
Brown, R. H. & Co., New Haven, Conn.
Humphrey Tool Co., Warren, Mass.
Standard Tool Co., Athol, Mass.
Stanley Rule & Level Co., 29 Chambers, N. Y.
Starrett, L. S., Athol, Mass.

Tool Chests.
Am. Tool Co., 200 W. Houston, N.Y.

Tools and Machines (Tinners').
Niagara Stamping and Tool Co., Buffalo, N. Y.

Tools, Blacksmith and Wheelwrights.
Barlass Bros., Janesville, Wis.
Illinois Iron & Bolt Co., Carpenterville, Ill.
Silver Mfg. Co., Cleveland, O.

Tools, Steam and Gas Fitters'.
Enterprise Co., Sandwich, Ill.
Saunders' Sons, D., Yonkers, N. Y.
Todd, H. B., Meriden, Conn.

Torches, Gasolene.
Dangler Stove & Mfg. Co., Cleveland, O.
Schneider & Trenkamp, Cleveland, O.
Standard Lighting Co., Cleveland, O.

Transom Lifters.
Wollensak, J. F., Chicago, Ill.

Tripoli.
Am. Tripoli Co., Carthage, Mo.

Trucks, *Manufacturers of.*
Boston & Lockport Block Co., Boston, Mass., and Lockport, N. Y.
Lansing Wheelbarrow Co. Lansing, Mich.
Riehle Bros., 9th St., Phila.

Tube Scrapers.
Chalmers-Spence Co., 419 8th, N. Y.

Tubes, Seamless Drawn Copper.
Ansonia Brass & Copper Co., 19 and 21 Cliff, N. Y.
Bridgeport Brass Co., 19 Murray, N. Y.
Randolph & Clowes, Waterbury, Conn.

Tubes, Steel.
Leng, John S., 4 Fletcher, N. Y.
Spiral Weld Tube Co., 5 & 7 Beekman St., New York.

Tumbling Barrels.
Henderson Bros., Waterbury, Conn.

Turnbuckles.
Anthony & McElroy, Philadelphia, Pa.
Carnegie, Phipps & Co., Ld., Pittsburgh, Pa.
Cleveland City Forge and Iron Co., Cleveland, O.
Merrill Bros., Brooklyn, E. D.

Typewriters.
Smith-Premier Typewriter Co., Syracuse, N. Y.

Twist Drills, *Makers of.*
Cleveland Twist Drill Co., Cleveland.
Morse Twist Drill & Machine Co., New Bedford, Mass.
Standard Tool Co., Cleveland.

Valves, Gas, Water and Steam.
Chapman Valve Mfg. Co., Boston.
Jenkins Bros., 71 John, N. Y.
Leng, John S., 4 Fletcher, N. Y.
Ludlow Valve Mfg. Co., Troy, N. Y.
Lunkenheimer Brass Mfg. Co., Cincinnati, Ohio.
McNab & Harlin Mfg. Co., 56 John N. Y.
Mason Regulator Co., Boston, Mass.

Vises.
Howard Iron Works, Buffalo, N. Y.
Prentiss Vise Co., 25 Dey, N. Y.

Wagon Jacks.
Boston & Lockport Block Co., Boston Mass., and Lockport, N. Y.
Higganum Mfg. Corp., Higganum, Conn

Washers.
Mason Iron Co., Philadelphia, Pa.
Milton Mfg. Co., Milton, Pa.

Welding Machines.
Thomson Electric Welding Co., Boston

Well Machinery.
American Well Works, Peoria, Ill.

Wheelbarrows.
Lansing Wheelbarrow Co., Lansing, Mich.
McNeil, G. C., Akron, Ohio.

Wheels.
Quincy Metal Wheel Co., Quincy, Ill.

White Lead.
Atlantic White Lead and Linseed Oil Co., 287 Pearl, N. Y.
Lewis, John T. & Bros. Co., Phila.
Southern White Lead Co., St. Louis, Mo.

Wire, *Manufacturers of.*
Ansonia Brass & Copper Co., 19 and 21 Cliff, N. Y.
Cary & Moen, 234 W. 29th, N. Y.
Emmons, F. R. & Bro., 21 Warren, N. Y.
Fuller Bros. & Co., 139 Greenwich, N. Y.
Gautier Steel Department of Cambria Iron Co., Johnstown, Pa.

—MANUFACTURERS OF—

IRON AND STEEL WIRE

of every description, plain, galvanized, tinned and lead-coated; spiral ribbon fence wire; steel wire ties for baling hay, straw, rags, excelsior, &c., &c., &c.

IRON AND STEEL WIRE ROPE

for all purposes, including cables of the best quality and of any desired length for street cable roads. The attention of all users of wire rope is specially called to the Trenton Iron Co.'s

Patent Locked Wire Ropes

which are far superior to any other in tensile strength and durability; from the fact that the wires in these ropes are interlocked. "unstranding" or projection of broken wires is impossible, and consequently a smooth surface only is constantly presented to the sheave or drum, causing these latter to last indefinitely. One of these locked wire ropes working under ordinary conditions will outwear two or three ropes of the ordinary style. The Trenton Iron Co. also call attention to their

Patent Wire Rope Tramways (Bleichert system)

also their hoisting and conveying plants for quarries, open cut mines, docks and contractor's work. Haulage and transmission of power by wire ropes a specialty. Surveys made and plans furnished at moderate rates by competent engineers.

The Metallurgy of Steel.

BY

HENRY M. HOWE.

Price. - - - - *$10.00*

This work is the most notable contribution to the literature of iron and steel metallurgy ever published. This series of papers on the subject have, during the past two years, attracted world-wide attention and have received the heartiest commendation from all quarters. The volume now published presents this material in much more convenient shape, with considerable additional matter, giving the results of the most recent research, experiment and practice. Also presenting a complete review of all important conclusions reached by earlier investigators. Every statement and citation has been carefully weighed and verified, and the references to the literature of the subject are given minutely, the book thus furnishing in itself a key to the whole range of steel metallurgy. It also furnishes the results of much new and original investigation, specially undertaken for the present work. Every metallurgist, every manufacturer of steel in any form, and all who are interested in the iron or steel industries, and all engineers who use iron or steel should have this standard work and cannot afford to be without it.

TABLE OF CONTENTS:

Chapter I.—Classification and Constitution of Steel.
Chapter II.—Carbon and Iron. Hardening, Tempering and Annealing.
Chapter III.—Iron and Silicon.
Chapter IV.—Iron and Manganese.
Chapter V.—Iron and Sulphur.
Chapter VI.—Iron and Phosphorus.
Chapter VII.—Chromium, Tungsten, Copper.
Chapter VIII.—The metals occurring but sparingly in iron.
Chapter IX.—Iron and Oxygen.
Chapter X.—Nitrogen, Hydrogen, Carbonic Oxide.
Chapter XI.—The Absorption and Escape of Gas from Iron.
Chapter XII.—The Prevention of Blowholes and Pipes.
Chapter XIII.—Structure and related subjects.
Chapter XIV.—Cold Working, Hot Working, Welding.
Chapter XV.—Direct Processes.
Chapter XVI.—Charcoal-Hearth Processes.
Chapter XVII.—The Crucible Steel Process.
Chapter XVIII.—Apparatus for the Bessemer Process.
Appendix I.—Special Steels.
Appendix II.—Anti-Rust Coatings.
Appendix III.—Lead Quenching.

EXPANDED METAL

Is the "Trade" name for Plates of Soft Steel cut and opened out into webs of diamond or other shaped mesh.

SUBSTANTIAL, LIGHT AND CHEAP.

FENCING.

Is used extensively for **Rail Road, Cemetery, Farm, Village and Lawn Fences, Gates, Skylight, Window and Elevator Guards, Office Railings and Partitions, Chicken Yards, Tree Guards, Grape Arbors, Lattice and Ornamental Lawn Work. More durable than wire.**

Our Steel Lath commends itself to Architects and Builders as the best metallic lath in use.

It requires no stretching or furring; its form makes it rigid, and yet it can be readily molded to any required curve or angle. Gives a perfect "key" throughout.

Specify our Lath to reduce the fire risk on your buildings.

LATHING.

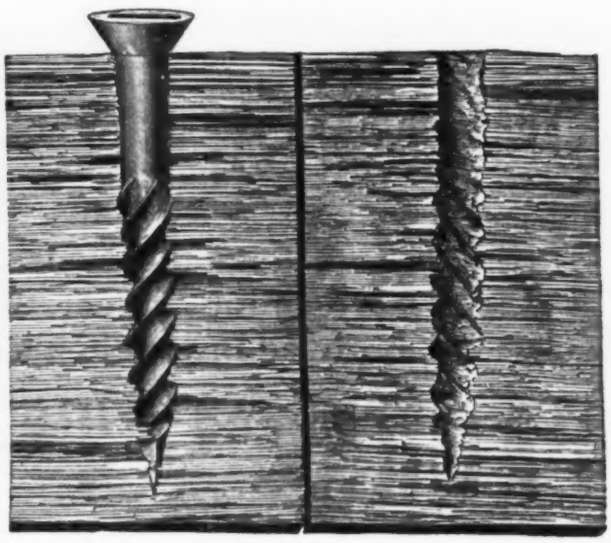
AMERICAN SCREW COMPANY



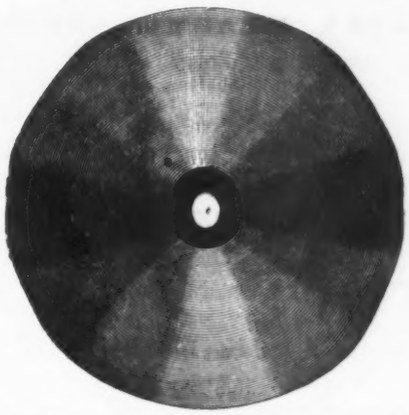
PROVIDENCE, R. I.

Chicago Store, No. 19 Lake St. EUROPEAN AGENTS, THOMAS & STIRLING, Liverpool.

"ROGERS' DRIVE SCREWS."

Patented May 10, 1887; July 19, 1887; July 10, 1888. Other patents pending.

A common cut thread screw as ordinarily inserted—*i.e.*, driven two-thirds of its length with a hammer and the balance with a screw driver. Fibres of the wood are necessarily broken, and holding power of screw much impaired.



The "ROGERS' DRIVE SCREW" driven with a hammer its entire length. It revolves as it goes in and does not break the fibres of the wood, but makes its own nut of the cavity it forms.

The foregoing illustrations speak for themselves, but we call attention to a few advantages of the "ROGERS' DRIVE SCREWS."

1. Stiffness, adapted for driving with a hammer.
2. Rapidity of insertion.
3. Increased holding surface.
4. Ability to be driven with hammer and withdrawn with Screw Driver numerous times from same hole.
5. Superior Head, which will withstand blows of a hammer and not impair the slot.
6. Improved Slot, admitting the use of a heavier Screw Driver.
7. A "ROGERS' DRIVE SCREW" of small diameter will hold as much as a common screw of larger diameter.

List prices, same as common iron wood screws. Discount for Flat Heads, 66⅔%.

Gautier Steel Dept. of Cambria Iron Company

STEEL HARROW DISKS

of all standard sizes. EDGES ROLLED, making them harder and more durable than any other pattern offered to the trade. Finish and quality unexcelled. Capacity greater than ever before, insuring deliveries promptly after receipt of orders. Regular sizes, 13, 16 and 20 inches diameter, gauges Nos. 8 to 10. These goods are patented, and infringements will be contested. Inquiries solicited.

We desire to announce that we possess the best facilities for the ***complete erection and equipment*** of plants for the manufacture of

Tin and Terne Plates.

We invite correspondence from parties who are contemplating engaging in this industry. All inquiries will be cheerfully answered and full information furnished.

LEWIS BROS. & COMPANY,

ENGINEERS AND CONTRACTORS, **LEWIS BLOCK, PITTSBURGH, PA.**

Archer Gas and Fuel Process.

HOME OFFICES FOR UNITED STATES—ROOMS, 178-179. 45 BROADWAY, NEW YORK.

The ARCHER GAS-FUEL PROCESS solves the Problem of Cheap Gaseous Fuel, meeting EVERY REQUIREMENT OF NATURAL GAS as to EFFICIENCY and ECONOMY.

It has been in Successful Operation on a large scale, from 3 to 36 months in many of the largest Iron, Steel, Glass, Pipe, Ware and other manufacturing establishments in the United States.

It is the only Practically Running and Commercially Successful Water-Oil Gas System in the World.

The Iron-Masters' LABORATORY.

Exclusively for the

Analysis of Ores of Iron, Pig and Manufactured Iron, Steels, Limestone, Clays, Slags and Coal for Practical Metallurgical Purposes.

339 Walnut St., Philadelphia.

With Branch at Warrenton, Virginia.

J. BLODGET BRITTON.

This laboratory was established in 1866, at the instance of a number of practical Iron Masters, expressly to afford prompt and reliable information upon the chemical composition of the substances above mentioned, for smelting and refining purposes, the object being to make it at once a convenient, practically useful, and comparatively inexpensive adjunct to the Furnace, Forge and Rolling Mill.

THE WELLS PROCESS.

PIPE CASTINGS, ARCHITECTURAL WORK.

DESCRIPTIVE CATALOGUE ON APPLICATION TO

THE WELLS RUSTLESS IRON CO.,

Little Ferry, N. J. 52 John St., New York.

SOFT STEEL PLATES.

We are making a specialty of soft steel plates for Blanking and Stamping, with clean, smooth surface, rolled carefully as to gauges, ranging from No. 9 to 16 inclusive, in widths up to 15½ inches, and to any multiples of length desired.

We can also furnish plates freed from scale and so treated as not to rust readily before using.

By the use of these, instead of raw plates in Stamping, the great saving of wear on costly dies and increased production of better work will more than cover the increase of cost over that of raw plates. Trial orders solicited in small or large quantities.

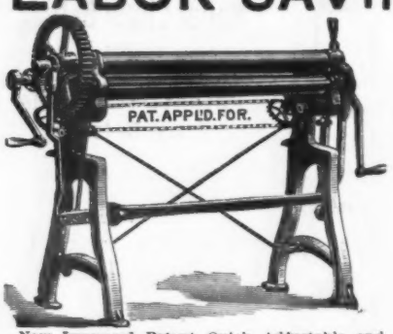
MIDGLEY PATENT WIRE BELT.



Either single or double ply. Of plain wire or covered with rubber. By government test is more than nine times stronger than Leather of same weight, and is sold cheaper than Leather Belting of same size.

It is secured by more than 20 patents in the United States, also patented in England, France, Belgium, Norway, Sweden and Hindostan, and is now being manufactured in England.

Address The Midgley Wire Belt Co., Beaver Falls, Pa., U. S. A.,

For new Price-list and Book of Instructions, soon to be issued.

LABOR SAVING TOOLS AND MACHINERY

New Improved Patent Quick Adjustable and Self-Opening Slip Roll Formers, all sizes required. A revolution as to quickness and ease of operations. The mere outward swing of the top roll hinge housing will elevate top roll to remove the formed metal. Same is perfectly balanced and is thus opened and closed in one operation, as will more clearly be seen by another cut, this space in another issue. Other Improved Quick Adjustments of merit not mentioned. All sizes, 2-in. to 14-in. Rolls, also Crimping or Corrugating Rolls.

Improved patent general purpose Punch and Stock Shear for bar iron and slitting sheets, &c.

Two levers, (7) sizes, for light or heavy work. Also Lever Stock Shears and Punches made separate, and Power Punches.

Improved Combined Squaring and Slitting Shears, with 12 in., 15 in. or 18 in. throat, to slit wide sheets as may be desired, and of any length. Complete for tin or iron up to No. 16 or 14 gauge with the Patent Lever Attachment for additional power. Provided with drop leaf tables and trimming gauge. Eight different styles up to 10 ft. in length. Also light and heavy Power Shears,

Nos. 20 to 26 Main Street,

CARPENTERSVILLE, KANE CO., ILL.,

MANUFACTURERS OF THE

BAILEY DRILL.

No. 4.

Possesses more points of merit than any other Drill on the market, among which are the following: The entire spindle and feed-screw are of Steel. The self-feed may be used or not, as desired, and can easily be changed to slow or fast feed. Table can be fastened at any desired point by an improved cam. Through an intermediate gear, balance wheel may easily be disconnected. Different speeds may be obtained by changing crank from one shaft to another. All parts are interchangeable, and every Drill is set in perfect line and tested before shipping.

Proprietors of the Patents of Prof. Elihu Thomson.

MANUFACTURERS OF MACHINES AND APPLIANCES FOR

Welding, Brazing, Shaping, Forging, Etc., of Metals by Electricity.

Among the special advantages of our process are the following:

1. The homogeneous nature of the weld.
2. Localization of heat at the weld.
3. Absolute control over the heat, as the welding process can be continually watched.
4. Avoidance of flaws.
5. Prevention of blistering, scaling, etc.
6. Rapidity and cleanliness of the work.
7. Flexibility of the process.
8. Great economy in time and material.

Chicago Office, 16 South Canal St.

The illustration herewith was taken direct from a photograph taken during the construction of the iron Ship Shed built by us for the Newport News Shipbuilding & Dry Dock Co., at Newport News, Va. The frame of the building is made of iron and between the outside posts a light 8-inch brick wall is carried up to protect the contents of the building from the weather. The plan particularly commends itself where foundations are expensive, as the walls are supported by girders underneath with piers from 10 to 40 feet apart.

Fluor-Spar.

MULLINS'

Fluor-Spar and Lead Mining Co.,

220 First National Bank Building

CHICAGO, ILL.

This Company owns, at Mineral City, on the Ohio River, the largest Mines of Fluor-Spar ever discovered.

We are working a large force of miners; our new mills and tram railway are running, and we are now prepared to furnish the purest Fluor-Spar in any quantities to Iron and Steel Manufacturers, to Smelters of Gold, Silver and Copper, and to Paint, Paper and Glass Makers.

Fluor-Spar is pronounced the most powerful of fluxes; it facilitates the reduction of the most refractory materials. For Alkalies, Clays, and all Metallic Oxides it has a remarkable solvent power; it reduces the melting point, and saves fuel; it diminishes the loss of metal, saves labor, and keeps the cupola clean; reacts strongly upon scaffolds and cloggings.

One part of Fluor-Spar is more effective than ten parts of Limestone. Limestone is an enemy to iron; Fluor-Spar is a friend.

Directions for the proper use of Fluor-Spar given our patrons.

We ship Lump, Gravel, Crushed and Ground, in bulk or barrel.

SPECIAL NOTICE
TO CONSUMERS OF CHARCOAL IRON.

Wyebrooke Charcoal Pig Iron, strictly cold blast.
Has splendid chilling qualities and great strength.
Furnace now in blast and orders can be filled promptly.

Desirable Investment for Capitalists.

HIGH CLASS MILL ESTATE FOR SALE.

This estate is in the center of the City of Hartford, Conn., and within five minutes' walk of the Post Office and Court House.

The estate fronts for 187 feet on Charter Oak street, one of the principal streets in the central part of the city, and extends for about 900 feet to and across Sheldon street to Park or Mill River, including the dam and water privileges thereon.

The present Factory Buildings are all substantial structures, having a floor surface of 38,000 square feet. They are located on the Sheldon street front, and are equipped with a pair of 200 horse-power condensing engines, and with high class boilers, with fire pumps, heating pipes, etc., of the best construction and arrangement.

These buildings are now occupied for manufacturing purposes by 13 tenants at will, returning an income of about $10,000 per annum.

The total area of the land exceeds 3 acres, more than 2 acres of which are clear of buildings, and intending purchasers will be shown plans for the erection thereon of spacious one story buildings designed to meet the requirements of tenants renting room and power for light or heavy manufacturing, for which there is now a pressing demand from occupants of inconvenient and less accessible locations, too far removed from the center of the city; or the unoccupied land can be profitably divided into house lots.

Unless previously disposed of at private sale, the estate will be offered at auction on the 20th of October, 1890, at 12 o'clock noon.

For inspection of the estate apply to the agent in charge, Mr. R. J. Gibbs, on the premises at 133 Sheldon street, Hartford, Conn., but address all correspondence to the undersigned.

AMERICAN SCREW CO., Providence, R. I.

Affaires avec la France.

Firms wishing to push their Export Trade and do business with France in Machinery and Patents in connection with the Iron and Hardware Trades should see during his stay in New York a French engineer whose prominent position in his own country will enable him to procure for them the very best agents in France. WANTED.

Hardware Specialties to manufacture in Iron Brass, Bronze, Sheet Steel or Malleable Iron.
THE PERKINS LOCK MFG. CO.,
Cleveland, Ohio.

Iron Bridge M'f'r's.

The demand in the South for Iron Bridges and buildings is now very large and growing. A Bridge and Structural Iron Works in the South would have an abundance of orders and pay large dividends from the start, if it was located accessible to coal, on competing lines of R. R., and where material of good quality could be readily secured. Buchanan, Va., presents all of these advantages. It is on two trunk lines of R. R., with two more located; it is in the midst of the great iron and coal fields of the Virginias, and the Central Land Co., of Buchanan not only offers free sites but financial aid from its large cash development fund ($400,000). This is a rare opportunity to a pushing, energetic Bridge Builder. Buchanan also seeks associate industries on similar terms. Address CENTRAL LAND CO. of Buchanan, Buchanan, Va.

ROD MILL

Wanted by a party contemplating erecting a Wire Rod Mill in the West to roll 40 tons wire rods single turn, with all necessary appurtenances, including power. Address correspondence, with estimates and proposition, to

C. R. PARSONS,
140 Nassau Street, Room 86, New York.

FOR SALE.

Whole or half interest in Foundry and Machine Shop in the best town in the West. Everything new and running at full capacity on paying business. Good reasons given for selling.

Address
BOX 43, Pittsburg, Kansas.

FOR SALE.

In West Chelmsford, Mass., all the Real Estate and Machinery formerly owned by the Hiscox File Co.; the real estate consisting of about 7 acres of land together with the buildings and water power, and the machinery, being such as was used by them in the manufacture of files, machine knives, sword blades and edge tools. There is also on the premises a good 75 horse-power Harris-Corliss engine and good boiler, also a large amount of shafting, belting and supplies. This property is situated about five miles from Lowell, and is very easy of access by railway, with excellent facilities. The entire property will be sold very cheap, either as a whole or in part, and will afford some party an excellent chance to enter into this business. For terms, &c., inquire of

J. W. BENNETT, Lowell, Mass., or
F. G. SARGENT, Graniteville, Mass.

FOR SALE.

27 Gross Tons Steel Rails, 4 feet long and over.

SIMON & BLONDER BROS.,

OFFICE and Yard: 158 and 160 WEST CHICAGO AVENUE,

CHICAGO, - ILLINOIS.

A CHARCOAL FURNACE PLANT

for sale at great sacrifice, on accommodating terms, with 13,000 acres, mostly timber land; fine ore supplies in vicinity. Directly on "Frisco" Railroad. Address,
"MISSOURI,"
office of *The Iron Age*, 230 S. 4th St., Philadelphia.

To Those Looking

—FOR—

Manufacturing Sites

IN THE SOUTH.

The most desirable locations in the South for manufacturing wagons, stoves, agricultural implements, furniture, or for foundries, machine shops, rolling mills, muck bar mills, nail works, glass works, cotton or woolen mills and tanneries, are to be found in Virginia along the line of the Norfolk & Western Railroad from Norfolk to Bristol, and upon its branch lines. Hard wood of every variety; pig-iron from the furnaces at Lynchburg (2), Roanoke (2 in operation and 1 now under construction), Pulaski (1), Ivanhoe (1), Radford (1, to be built in 1890), Salem, Graham, Max Meadows and Bristol (1 at each point now under construction), bar iron from the rolling mills at Roanoke, Lynchburg and Richlands (1 to be built in 1890); coke and semi-bituminous coal from the Pocahontas Flat Top field; superior gas coals from the mines on the Clinch Valley extension; glass sand from Tazewell County; cotton from the markets of the Southern States, and wool from all the Western and Southwestern States and Territories, at advantageous freight rates. Favorable freight rates made upon raw materials to all factories established upon its line, as well as to points in the United States and Territories upon the manufactured articles.

Those seeking new fields for manufacturing establishments should not fail to investigate the wonderful development of iron, coal and coke industries that has been made within the past five years along the line of the Norfolk & Western Railroad, and the advantages offered by the State of Virginia in the supply of cheap raw materials, by the Norfolk & Western Railroad in the matter of freight facilities and rates upon raw materials, and for reaching home, far distant and foreign markets, and by the cities and towns along its line in the way of advantageous sites at moderate cost. Many of the cities and towns exempt manufacturing establishments from taxation for a series of years.

For further information as to freight rates and sources of supply of raw materials, apply to A. POPE, General Freight Agent, Roanoke, Va., or to

CHAS. G. EDDY,

Vice-President, Roanoke, Va

WE HAVE FOR RENT one of the most extensive manufacturing properities on the Hudson, within 13 miles of Grand Central Depot. unsurpassed for its railroad and dock facilities; with engine, boiler and other machinery; manufacturers looking for such a property will do well to give this consideration; send for diagram and description.

WILLIAM H. HOYT & CO.,
5 Vanderbilt Ave., opposite Grand Central Depot, New York.

PORTLAND, OREGON.

To Merchants, Bankers, and Manufacturers.

Your attention is invited to the large opportunities for Jobbing of every kind, Banking and Manufacturing in the City of Portland. Portland is the second city and coming metropolis of the Pacific Coast, as New York City denominates the Atlantic Coast.

Without trans-Atlantic railroads till 1883, she already has secured more trans-continental roads than any other city on the Pacific coast. She is nearer Chicago and New York and reached quicker by rail than any other city on the Pacific coast. (See maps and railroad time-tables.)

Portland is situated at the mouth of more miles of river navigation than any city, except New Orleans, in the United States. Over 1000 miles of the Columbia and Willamette rivers and tributaries are navigated by river steamers contributing to Portland's Commerce. Portland has 250,000 square miles of area distinctively her own trading territory, in which are now being operated 3409 miles of railway with 1000 miles more to be added before the end of 1891.

Portland has exclusive lines of vessels trading coastwise to San Francisco, 772 miles south, to Puget Sound points and British Columbia points, and to Alaska, 1500 miles north.

She also has exclusive lines of vessels plying between Portland and New York City, between Portland and Japan, and between Portland and China. In addition, Portland loads annually at her wharves over 100 seagoing vessels coming in on special charters after cargoes of salmon, flour, wheat and ship timbers, going to nearly every well-known port in the world.

The tributary territory of Portland is about the size of New England, New York, Pennsylvania and Ohio combined. In 1880 it had scarcely 225,000 inhabitants. To day there are over 1,000,000 and increasing 1000 daily, and must steadily grow to 10,000,000 or more. The immigrants are chiefly farmers.

Portland controls the trade of ten times the fertile acreage tributary to any other Pacific coast point

AND MORE THAN ALL OTHER PACIFIC COAST POINTS COMBINED.

Portland has Unlimited Water Power for Manufactories. Vast Water Power at the Entrance to Deep Sea Navigation is Rare, and Exceedingly Valuable to Portland's Mfg. Development.

Portland has electric, cable and horse-car lines, charming parks and boulevard drives, hotels costing as high as $900,000, churches costing as high as $150,000, a grand system of public and private schools, including a high school costing $127,000, several colleges, and an air of refinement and culture which makes people from the larger Eastern cities feel perfectly at home.

Portland's Leading Commercial Interests are Exporting, Banking and Wholesaling, with Manufacturing Rapidly Developing

The Salmon fisheries of the Columbia river produce $2,000,000 to $3,000,000 annually. The export trade has multiplied several fold in recent years, as the country develops. The banking capital has grown to fourteen banks controlling six millions of capital. Our wholesale trade has grown from $75,000,000 in 1888 to $115,000,000 in 1889, and is yet in its infancy and growing at the rate of over 25 per cent. annually. Our manufacturing output in woolen goods, lumber, boots and shoes, paper, iron and many other lines aggregated over $20,000,000.00 in 1889, and is not yet fairly begun.

All these interests are thriving and yet there is room for enlargement on every hand in a region richer in agricultural resources than Illinois and sister States, in iron and coal similar to Pennsylvania and Alabama, greater in lumber than Minnesota and Maine and unrivalled in the more precious metals.

There has never been a failure of a bank or wholesale house in Portland.

The recent enormous development of the trade of Portland has outgrown all her facilities and her capital. Therefore the Oregon Immigration Board urges and invites correspondence and personal visits from people in all lines of Wholesale Trade, Banking and Manufacturing.

$20,000,000.00 additional capital would find immediate employment, producing profits very large to people with Eastern ideas, yet with unqualified safety. While in several lines we need houses commanding $500,000.00 to $1,000,000.00 capital, in many other lines there is room for young merchants and manufacturers to begin on limited capital, and "grow up with the country."

THE OREGON IMMIGRATION BOARD is an institution supported by several hundred of the more prominent business men of Portland. The commissioners who direct its affairs are the following gentlemen: CHAS H. DODD, President of the Board, Wholesale Hardware Dealer; H. W. CORBITT, Vice-President, First National Bank; D. F. SHERMAN, Cashier Oregon National Bank; T. F. OSBORNE, Mfr. of Bags, Sails, &c., also President of Chamber of Commerce; D. S. COHEN, Wholesale Notions and Fancy Goods; WM. McFALL, Wholesale Paper; JAS. L. DUNLAP, Real Estate Broker; H. E. DOSCH, Retired Wholesale Boot and Shoe Merchant; ELLIS G. HUGHES, Capitalist.

All communications will receive the most careful attention. Personal visits to Portland are strongly advised. Seeing is Believing. Address correspondence simply,

The Oregon Immigration Board.

Portland, Oregon.

FOR SALE.

A new specialty manufacturing business; last year's business $6,000; this year's business $25,000, and a prospect of nearly double next year; good reasons for selling; price $13,500; goods can be manufactured anywhere. Address

"SPECIALTY" Box 818,

office of *The Iron Age*, 66 and 68 Duane St., N. Y.

FOR SALE.

The well-established business, known as THE GAYLORD, CROSS & SPEIRS CO., located in Waterbury, Conn., is offered for sale. This plant is on the corner of Benedict and Meadow Sts.; consisting of land, brick and frame buildings, &c.; the foundry and all machinery goes with sale; there is between $10,000 and $12,000 worth of machinery that goes with the business. The lot fronts on two streets, 164 feet on Meadow and 219½ feet on Benedict Sts.; there is ample room for another large machine shop or any kind of manufacturing business without being cramped for room; this plant is only two minutes' walk from depot. The reason why this valuable property is put in the market at the price asked is because the owner is West and cannot give the attention that it requires. Take the business in consideration, both in foundry and machine work, it is a rare opportunity that does not occur every day, where one can buy an established business for the low figure, $45,000. The land and buildings alone are worth the price I ask, without the machinery. Address

L. J. BOWEN, Receiver,
Waterbury, Conn.

COAL at **50 cents per ton for twenty years; $1,000,000 cash,** and desirable location, with railway facilities, at **$100 PER ACRE,** worth $500, as special inducements to encourage new manufacturing industries

MEANS that **PITTSBURG, Kansas,** with its unequaled railway connections, is the best point on this continent for the establishing of smelting works, foundries and machine shops and any kind of manufacturing industry consuming coal and looking to the U. S. and Mexico for a market; guaranteeing

PROSPERITY to every dollar invested and every man employed. Gas, 75 cents per thousand. Taxes 3 per cent. on a 30 per cent. valuation; four trunk railways; $7,000,000 invested in industrial enterprises, best of free schools, property cheap. **Now**

TO PITTSBURG **is the time to invest. Come and investigate.** Write for information and **Maps.** **PITTSBURG TOWN CO., Pittsburg, Kan.** A. W. GIFFORD, General Agent.

FOR $25,000

I will sell a very profitable Manufacturing Plant, all running in good shape; goods sold as fast as produced; poor health the only motive for selling; experience not essentially necessary, as all work is produced by the piece; margin of profit very large. Running 15 years without a stop. This is an extraordinary chance for an energetic young man. Address

"MANUFACTURING PLANT,"
office of *The Iron Age*, 66 and 68 Duane st., N. Y

FOR SALE. BLOWING ENGINE.

Vertical pattern, with balanced steam slide, valve gear, steam cylinder 14 in. diameter, air cylinder 40 in. diameter, stroke 24 in.; engine new. For price and particulars address

JAMES LEFFEL & CO.,
Springfield, Ohio.

OLD METAL WANTED.

Heavy Brass, Copper and Brass Turnings; state quantity and price for spot cash.

E. A. WILLIAMS & SON,
107 Plymouth St., - - Jersey City, N. J.

AN old-established Manufacturing Concern, employing a capital of over $100,000 and 125 men, being cramped for space, owing to a steady growth of business, desires a new location with good railroad and water facilities; offers of land and a cash bonus to cover cost of new buildings and moving will have careful consideration.

Address

WM. B. STEWART,
Sing Sing, N. Y.

The best investment now offered to speculative capital is

Coal, Zinc and Mineral Lands

in Southwest Missouri and Southeast Kansas. If you want to buy, investigate by addressing

FRANK PLAYTER,
Investment Broker,
Pittsburg, Kan.

FOR SALE AT ST. PAUL.

The well-known Hardware Business of B. F. Knauft & Co., doing a General and Builders' Hardware, Furnace, Stove, Tin and House-furnishing Hardware business; established in present location in 1872; has the confidence of the people and enjoys a large trade. We own the building we occupy and can give favorable lease; good reason for selling. Splendid opportunity for parties with push and ability. Address

B. F. KNAUFT,
335 and 342 E. 7th St., St. Paul, Minn.

FOR SALE.

An old-established Wholesale General Hardware Business, located at Burlington, Iowa. Has the advantages of both rail and water communications, and one of the best distributing points on the Upper Mississippi River; good trade already established and am to-day doing a good business; stock on hand about $70,000; have five salesmen on the road, do business in Western Illinois, Northern Missouri, Eastern Nebraska, Southern Dakota and Minnesota and a large portion of Iowa.

The largest portion of my trade comes from Iowa. The territory can be extended and trade increased if desired. This is a rare opportunity for any one wishing to step into a good business already thoroughly established. Reason for wishing to sell out—poor health. For any information desired pertaining to the business and location, I would refer you to Ross & Fuller, 33 Chambers St., N. Y.; Clement M. Biddle & Co., Philadelphia; the National State Bank of Burlington, Iowa, or the undersigned

LYMAN H. DRAKE.

SOUTHERN CALIFORNIA.

CLIMATIC PARADISE OF THE U. S.

No Snow. No Cyclone.

A Store For Sale.

Good will and stock of about $4,000 in Hardware Crockery and House Furnishing goods. Price of the two-story brick building (21 x 45 feet), garden and yard (together 12,131 square feet) $7,000. The city of Anaheim (population 1,500), the oldest settlement of Southern California, is surrounded by an extensive farming country, has the finest drinking water and has for healthfulness no rival on the coast. It is situated about 26 miles southeast of Los Angeles and 14 miles from the Pacific Ocean. The store lies between the Southern Pacific and Santa Fé Railroad depots. Address: Charles Pamperl, Anaheim, Orange County, California.

FOR SALE,

For cash only, to quit business, a nice new stock of Hardware, Cutlery, Guns and Ammunition; established about five years ago, in the great Natural Gas City of Muncie, Ind; stock will invoice about six thousand dollars. Will rent you the room, which is 18 by 60 feet, and is in a first-class situation, opposite the Court House, east side.

L. L. HODGE & BRO.,
104 No. Walnut St., Muncie, Ind.

A RARE CHANCE.

DAVID WILLIAMS, Publisher AND Bookseller,

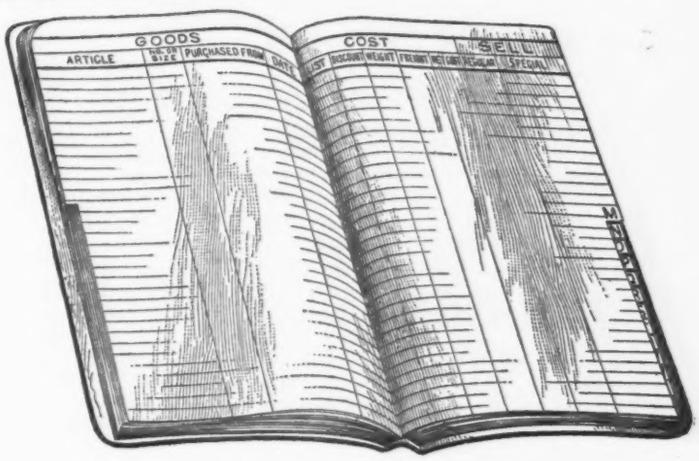
66 and 68 DUANE STREET, NEW YORK.

—THE IRON AGE—

HARDWARE PRICE BOOKS.

Arranged by R. R. WILLIAMS, Hardware Editor of The Iron Age.

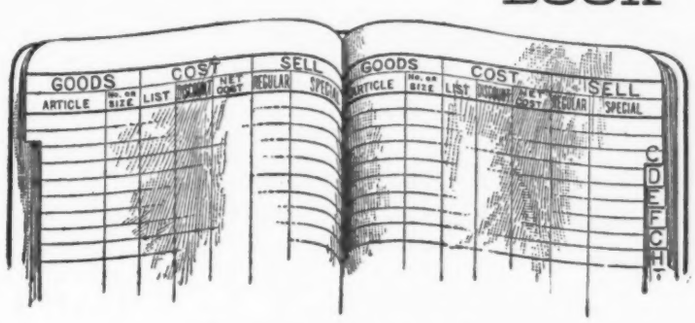
THESE BOOKS are printed on paper of superior quality and bound in grain seal leather. They are all, as indicated in the cuts, indexed through, care being taken to give each letter the proper amount of space for the accommodation of Hardware articles.



BOOK A.

Columns are provided for the name and number or size, for noting from whom purchased, date of quotation or purchase, list and discount, and for entering freight expenses as an element of cost. Under the heading of selling prices, the regular and any special price or remarks in regard to the goods are given place. This book goes into considerable detail in describing the goods and cost prices. It has been arranged in accordance with the views of many Hardwaremen whose methods are careful and exact.

Size, 4 x 7 in.; grain seal leather.



FOUR EDITIONS:

A, 200 pages,	$1.00
A F, 200 pages with flap,	1.25
A 2, 400 pages,	1.50
A F 2, 400 pages with flap,	1.75

Hardware Price Book A.

BOOK B.

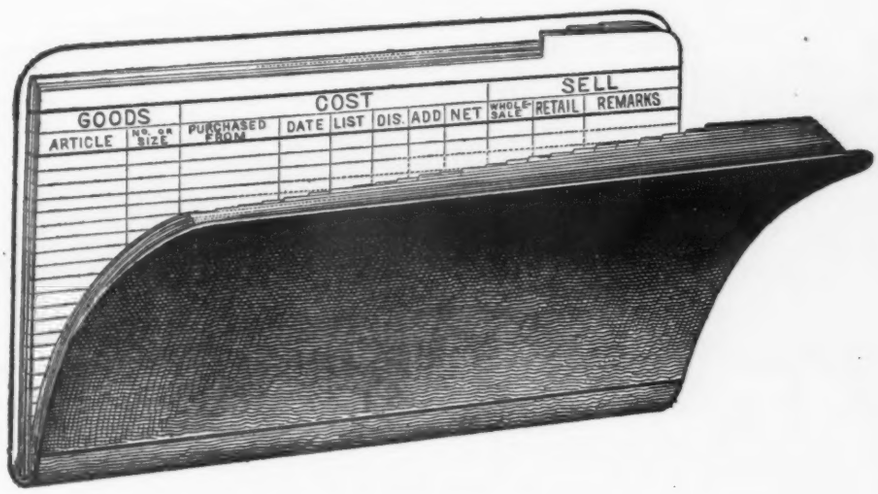
Hardware Price Book B.

In this book each page is complete, and the record of prices does not, as in Book A, run across two pages. Thus it accommodates a larger range of goods with much less detail in the record. It is adapted for office or store use, and by the use of familiar abbreviations sufficiently large for the convenient and concise record of prices.

Size, 4 x 7 in.; grain seal leather.

FOUR EDITIONS:

B, 200 pages,	$1.00
B F, 200 pages with flap,	1.25
B 2, 400 pages,	1.50
B F 2, 400 pages with flap,	1.75



BOOK C.

The headings in book C run across the top, in a line parallel with the hinge. In this way a very complete record can be kept on a single page. The details of weight and freight contained in book A are omitted, and a single column headed "Add" given for the insertion of freight or other expenses which it is desirable to include in the cost. Under the selling prices space is left for the wholesale price, the retail price and also for any remarks in regard to cost of the goods, desirability of pushing them or other matters.

Size, 4½ x 7¾ in.; grain seal leather.

FOUR EDITIONS.

C, 200 pages,	$1.00
C F, 200 pages with flap,	1.25
C 2, 400 pages,	1.50
C F 2, 400 pages with flap,	1.75

Hardware Price Book C.

Sent, post-paid, on receipt of price by DAVID WILLIAMS, Publisher, 66 and 68 Duane St., New York, from whom any book published in this country or abroad may be obtained without extra charge. Catalogues of scientific, technical and useful books sent on application.

EMPIRE PORTABLE FORGE CO.,
LANSINGBURGH, N. Y., U. S. A.

GOODELL LATHE.

Many kinds of Scroll Saws have been put on the market by ourselves and other manufacturers during the past twelve years. Of these only a few have proved good enough to remain in demand. The call now is for a well-made, practical machine, and all second-class ones are of slow sale.

Those who want a good Lathe with Scroll-Sawing Attachment and all Tools and Improvements to the very latest moment will buy the Goodell Lathe.

Those who want only a Scroll Saw with Drilling Attachment, Rubber Blower and Lever Clamp will prefer the Rogers Saw.

These two machines are taking the place of all others, and are now the most in demand throughout the world.

No dealer can make a mistake by laying in a stock of them. About Christmas time they are wanted in every town, and will make business lively at this otherwise dull season.

We also keep a full stock of Designs, Wood, and all other Scroll Sawing goods.

Price of Goodell Lathe, complete, $12.00.

Price of Rogers Saw, complete, $3.50.

It will draw ten gallons of water per minute.
Never has to be packed, primed or thawed out.
A ten-year old boy can draw water with ease from a 40-ft. well.
No iron tubing to rust or burst. No suckers or valves to wear out.
It has no wooden tubing to wear out, decay or pollute the water.
It will not rust or corrode, as the chain is made of galvanized iron.
It is the simplest and most durable structure made for raising water.
It can be set up in 15 minutes, as there is nothing to fasten below the platform.
It will not freeze, having stood the test of a Dakota winter, 38 degrees below zero, as the buckets discharge themselves.
Has no leather, rubber or wood in contact with the water to contaminate it.
You do not have to pump out a pailful of water to get a fresh, cool drink for every bucket goes down full of air to the bottom and fills with cold water as the air escapes.

BUCKET PUMP CO.,

(Sole owners of patents for the U. S. and Canada)

441 and 443 Plum St., CINCINNATI, O.

EXCLUSIVE AGENCIES GIVEN.

Beware of infringers. No perfect working Pump can be made on this principle without infringing on our patents.

ENTERPRISE SPECIALTIES

New Champion Force Pump.

With vacuum and air chambers, brass cylinders and brass valve seats—continuous discharge—working parts readily accessible.

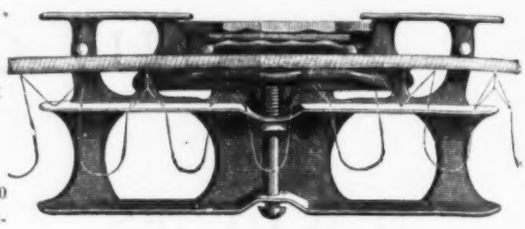
SETTING BLOCK.

E. C. ATKINS & CO.,

INDIANAPOLIS, IND.,

ATKIN'S PAT. EXCELSIOR SAW TOOLS

For Use in Fitting up Cross-Cut Saws.



Comprising a Combined Side File, Jointer and Tooth Gauge, by the aid of which Cross-Cut Saws may be kept in much better order than is possible without them. The value of the Setting Block will be readily estimated, as it is well known that saws having a proper temper cannot be safely set with a wrench, or "Spring Sets" made for the purpose; while with our Setting Block saws of very high temper and of the finest steel can be easily set.

TOOTH-GAUGE.

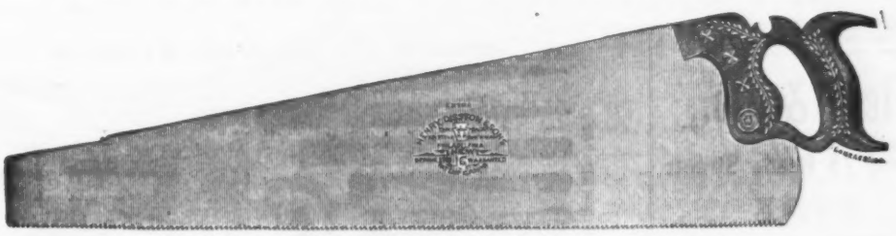
"If you want a Saw it is best to get one with a name on it which has a reputation.
A man who has made a reputation for his goods knows its value as well as its cost and will maintain it."—HENRY DISSTON.

THE SAWS THAT LEAD THEM ALL

"THE SAW;" HOW TO CHOOSE IT, AND HOW TO KEEP IN ORDER, Sent Free on Receipt of Name and Post Office Address.



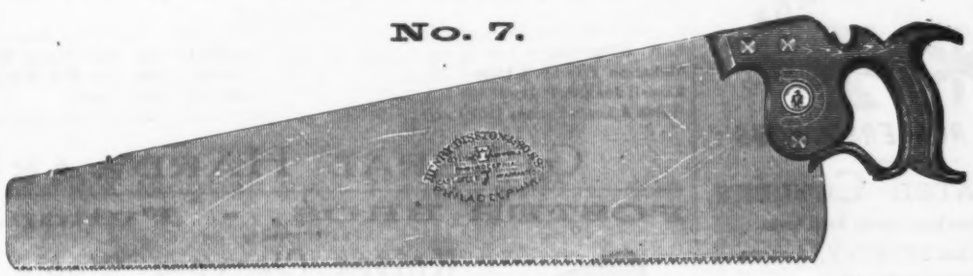
DISSTON & SONS' PATENT D-8 HAND SAW.

This Saw combines all the valuable improvements in Hand-saws that have been made by us of late. The first and most important is the hollow or skew-back, the success of which can best be attested by the number sold. The peculiar shape of the butt or heel, coupled with the new method of fastening to the handle, give a full stroke of the blade without fear of catching or hooking in the work; and as the handle is put further on the blade you have a full stop on the proper point and a greater command over your Saw, by reason of being two inches nearer the point, which must give more power.

The Saw being let into the handle on a circle, has a perfect bearing, which, with the new screws, makes it stronger and almost impossible to work loose, and avoids the unsightly gap that is seen on the back of the old style handle. All the above features are patented.

Our New No. 16 Premium Saw.

AN EXTRA FINE SAW IN EVERY RESPECT.



Having the Latest Close up Handle, Spring Steel Blade, Extra Thin Back, Finely Grained, with an Apple Handle and Four Brass Centennial Screws.

No. 12.

DISSTON & SONS' Extra Refined London Spring Steel, Selected and highly Polished Blade, Handle Carved and Polished, 4 Improved Brass Screws, the finest Hand Saw manufactured.

No. 7.

If you **want the best Scythe-stones** buy the following celebrated brands:—The **"Indian Pond Red Ends,"** which have been made for about 70 years, and the sale of them extends to-day all over the world, and the demand for this stone exceeds all others. They are quick cutting, strong and do not glaze. The **"Lamoille Scythe-stone"** is also well-known, and has the reputation of being the best stone in the world to give a keen, smooth edge. The **"Black Diamond Scythe-stone"** is of the same grit, but superior finish, and is the handsomest scythe-stone in the market. The **"Ragg," "Willoughby Lake." "Green Mountain," "Diamond Grit," "White Mountain," "Farmer's Choice,"** and **"Extra Quinnebaug"** are all choice stone, coming from the best quarries which have been discovered in long years of effort and experience. These stones are carefully selected and handsomely packed and are sure to sell with satisfaction and profit.

The Leonard Patent Portable Storm Houses.

A long-felt Want Supplied. Comfort and Economy Assured.

The sides and roof are constructed of Corrugated Iron set in a frame of Michigan Pine. The front is a good five panel sash door set in a frame of 2 x 4 pine. The upper panel is set with glass. The whole is neatly painted—two coats and two colors. Has a good latch with porcelain knob, and door spring. It is **Ornamental, Light, Strong, Cheap and Durable.** Anybody can set it up or take it down. Not necessary to have a carpenter. Storm Doors can be taken away in case of removal. The sides of the house are hinged to the front and fold inwards. The gables are hinged to the roof and fold inwards. The whole structure is only six inches thick when folded. To set it up, hook the edges to the door frame and adjust the roof to the top of the door frame. A notch may be sawed in the bottom rail for a projecting step or thresnold if necessary. They save their cost in fuel every year, besides the comfort they give. Exclusive agencies given.

RICE FIRE PAIL.

No other contains its chemicals forever dry in compartments. None other mingles its chemicals in solution at the will of the operator. Ready for instant use Cannot freeze. Cannot diminish in volume by evaporation. Cannot deteriorate with age. All insurance men approve No acid in the compartment pail. It will not affect the skin, does not injure textile goods nor alter colors. Instantly extinguishes the fiercest fire.

New Haven, Conn.

ARCTIC ICE DOGS.

These Ice Dogs or Creepers, designed to secure safe-footing on slippery pavements, are the simplest and best ever invented. They consist of a very light, malleable casting of the best quality of iron, fitted for the sole of the shoe and fastened to the foot by means of a toe-strap and an endless elastic band drawn high over the heel, thus holding the dog to its place, and being easy of adjustment, is very quickly put on or taken off.

There are two sizes, for ladies and gentlemen respectively, and the peculiar adjustment attaches them equally well to boots, shoes or rubbers, without difficulty or delay.

Retail at 50c. per pair. Liberal discount to dealers.

"RIVAL"
PATENT
Lawn Sprinkler.
Cheapest and Best in Use

Agents Wanted. Liberal discount to buyers.

The Spray from it covers upwards of 1000 sq. feet of lawn. It is the only patent adjustable Sprinkler which is adaptable to any water pressure. Being made of brass, and having no revolving parts to wear out, or small opening to clog up, it can be operated with sandy or muddy water as well as clear, and will last for years. To operate, screw Sprinkler on end of hose, stick the rod in to the ground in a vertical position, adjust the acorn to suit pressure and spray wanted and it is ready for use. It may be so regulated as to throw a spray *as coarse as rain or as fine as mist*, and will make one of the most beautiful fountains imaginable. It is unequaled in merit, requires no attention and is sold at a less price than any sprinkler in the market. Remember, the RIVAL is the only Sprinkler made by which the coarseness of the spray and the area to be wet can be regulated. They are packed 1 doz. in a box, and finished either plain or nickel plated.

HUMPHREY TOOL CO.,
Warren, Mass.

A MAN OF SAMPLES.
Something About the Men he Met "On The Road."
BY WM. H. MAHER.

Should be read by every business man in the country.

It is a book full of keen points about business men and business methods, from the pen of a successful merchant who has not only been "on the road" but has been book-keeper, buyer and head of a house doing a large trade.

The merchant who stays at home can see how men work on the road.

The book-keeper can learn how his letters and drafts are looked upon by the men he writes to.

The stock clerk can get points about shipping goods and filling orders.

Those who advertise can learn from one of the best advertisers in the United States.

Actual names of men and houses are given, but not a line in the book has been paid for in any way.

If men were complimented, it was because the author felt that they deserved it, and others are condemned fearlessly.

Sent, postpaid, on receipt of the price, 75 cents, by

For Sale by David Williams 66 & 68 Duane St. New York

SELLING A STOVE

Is an art. Unlike shelf goods, it cannot be quickly handed out for inspection. Is your storeroom dark in any portion where you keep stoves? A "Daisy" never break stove truck will supply the light needed to show the stove off properly and perhaps affect a sale.

These trucks are far superior to the old fashioned platform, as with them every part of the stove may be examined by the customer. "All you've got to do is push the stove out and talk." Remember they fit any stove. Dealers sell stoves in half the usual time when using them. Try a dozen and see how handy they are.

Wrought Steel Hollow Ware.

"Empire" Cold Handle Steel Spiders.

PATENTED.

The "Empire" Cold Handle Spiders are made from cold rolled wrought steel of the highest grade and finish, and are stamped from a SINGLE PIECE, and polished perfectly smooth and bright. The thickness of the steel of which the Empire Spiders are made (No. 14 Standard gauge) is a guarantee that they cannot break, bend or warp. An important feature also is that they are made without rivets, and cannot leak or the handles become loose.

The handle is reinforced in an attractive manner with a cover made of heavy tin, making a hollow ventilated handle which keeps always cool and comfortable to the hand.

The Empire SPIDERS will be found on inspection the most perfect ever made and cannot fail to give satisfaction. Our 1890 Catalogue of Patented Specialties, Acme Fry Pans, and Edgars' Patent Stove Shovels, mailed on application.

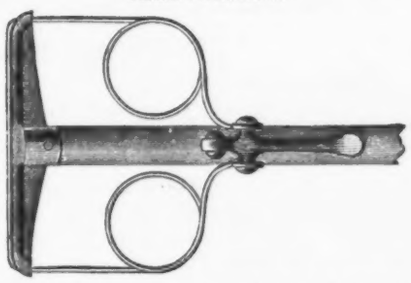
"FLOUR AS IT IS"



Produced at the mill, while perfectly fine by the time it reaches the consumer, is in a condition of "lumpiness" that is not conducive to the best results in baking. The latter can only be attained by the use of an auxiliary like the famous "Hunter's Sifter." The dealer that will demonstrate or even explain this to his customers, not only benefits his patrons, but himself as well. Write us for information "how."

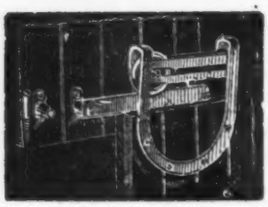
THE SWIFT MILL.

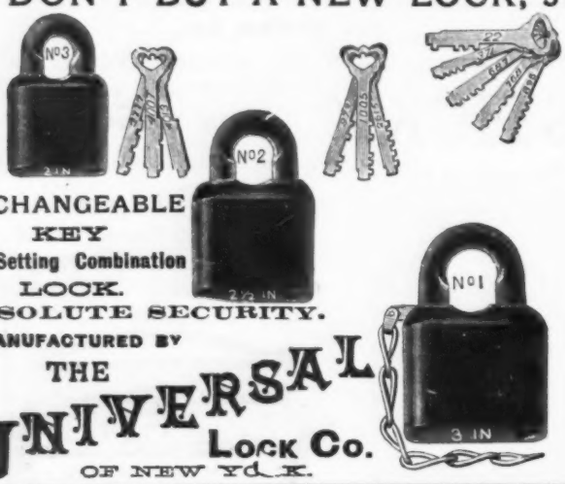


ESTABLISHED 1845.

The annexed cut shows one of the many styles of Coffee Mills of our manufacture, especially adapted to Grocers' use and all retailers of coffee. They are highly ornamental and workmanship of the very best. We make more than 30 styles.

Lane's Measuring Faucet.

LANE'S PATENT STEEL DOOR HANGER.



The most perfect Anti-Friction Hanger in the Market, because

It is made of steel throughout, except the wheel, which has a steel axle. It will not break. It is practically free from wear. It is almost noiseless in action. It requires no oil. It has a broad bearing on the door, and keeps it life, it is by far the most durable. It may be used with any track. It is always in order. LANE'S PATENT TRACK is made of steel and is easily put in position. Catches and holds no snow or ice. Door hung thereon cannot jump the track. Is not subject to decay. Requires no fitting, but is ready at once. May be used with hangers of other manufacture. Send for circulars.

Manufactured by **LANE BROS.,** Poughkeepsie, N. Y.

JOHN H. GRAHAM & CO., General Agents, 113 Chambers Street NEW YORK.

DON'T BUY A NEW LOCK, JUST BUY A DIFFERENT KEY.

A CHANGEABLE KEY
Self-Setting Combination LOCK.
ABSOLUTE SECURITY.

MANUFACTURED BY
THE UNIVERSAL Lock Co.
OF NEW YORK.

This lock differs from all others in the fact that it will set itself to any one of 4013 different keys with which the user may choose to lock it. Only the key used in locking will unlock it.

The advantage will naturally become apparent when for any reason whatever the user wishes to change the means of securing his premises, he need only buy a new key. Obviously as many different locks for securing the premises will be available as there are keys in the possession of the holder.

IVES' PATENT

SASH LOCKS

Offers greater security and durability combined, and has a larger sale than any other Sash Lock or Sash Fastener on the market.

Important features are in securely locking when open or closed, and simultaneously carrying the MEETING RAILS in position, and drawing them closely together.

The Ives Patent Sash Locks are manufactured under nine patents in all styles of finish.

Address us for price-list, mailed free, showing fifty styles Sash Locks and Door Bolts.

SABIN MACHINE CO. Montpelier, Vt.

THE "SPRING" CURRY COMB.

PATENTED IN U. S. JULY 16, 1889

Foreign Patents in

Germany, France, Belgium, Great Britain and Canada, Austria, Italy, India, Australia.

A Comb that combines the strength of metal with the elasticity of a brush.

The flexibility of the loops makes this comb a wonderful device.

A FEW POINTS

"It is as soft as a brush," because the loops *give* and enable the combing surface to get down into the hollows and slip over the elevations, to the great comfort of the animal and the great convenience of the hostler.

"It is a perfect self-cleaner," and **"The best shedder known,"** because it is a spring, and the vibration of the coils readily frees them from all dirt and hair.

"It cleans a horse quicker and better than other combs," because it has three hundred and twenty teeth which do not *track*, and because it "does not grate harshly over the surface," but accommodates itself to any and all parts of a horse, from his ears to his heels.

"It is a very strong and well made comb," since the coil is made of very tough spring steel, and the shank is cast malleable and *all parts are riveted together.*

"Its teeth do not bend out of shape" from rough usage, because of its circular form, and because it is elastic.

"The back is an excellent sweat scraper." The reasons are apparent.

The above Claims are endorsed by experts and the trade and guaranteed by the manufacturers.

PATENT COMBINATION WRENCH.

Case-Hardened Throughout. Parts Interchangeable.

This wrench not only combines the superior qualities of a Gas Pipe Wrench but also all the requisite combinations of a regular Nut Wrench, thus making a combination which has no equal.

No. 3 PATENT PIPE WRENCH.

The serrated jaws of the Wrench are interchangeable; that is, the same serrated plate may be used for either the stationary or sliding jaw, so that if one plate is broken another can be furnished adapted to either jaw without express designation. The slides, nuts and various parts are also interchangeable, thus easily repairing the Wrench at very small expense, and with as perfect practicability for further use as when the Wrench was new.

For Circulars and Price List, address

This Wrench can be Furnished with Long Nut or Sleeve.

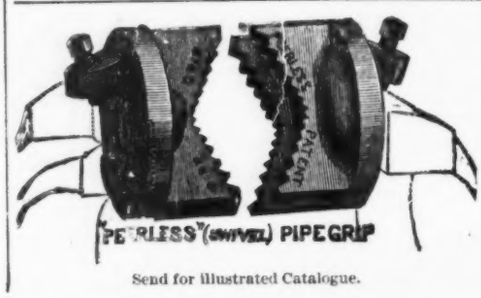
BOLTS AND NUTS, COACH OR LAG SCREWS

Bridge Bolts, Car Bolts, Track Bolts, Washers, Chain Links, BUILDING BOLTS AND IRONS OF ALL KINDS, Forgings, Bolt and Nut Machinery, &c.

JAMES MINTER *President.* LOWELL, MASS. MILES F. BRENNAN, *Treasurer.*



J. FRED. WILSON

Metal Punching, Die Making, &c.

COLD PUNCHED NUTS AND WASHERS
FOR ALL PURPOSES.

23 Hermon St., Worcester Mass.

Send for illustrated Catalogue.

Made of Steel, Fits any Vise

PRICE, $2.50 and $2.75.

Instantly converts *any Vise* into a first-class *Pipe Vise* Holding Pipes, Thimbles, Couplings, Bolts, Nuts, &c., in *any position.*

PRENTISS VISE CO.,

M'f'rs of all k'nds of Vises,

44 BARCLAY ST., NEW YORK.

CLASSIFIED LIST OF ADVERTISERS.

Agricultural Implements.
Brown Mfg. Co. Zanesville, Ohio.

Air Compressors.
Norwalk Iron Works, S. Norwalk.

Air Moving Machinery.
Howard & Morse, 45 Fulton, N. Y.

Aluminum, Brass and Bronze.
Aluminum Brass and Bronze Co., Bridgeport, Conn.
Cowles Electric Smelting and Aluminum Co., Cleveland, O.

Tubes, Seamless Drawn Copper.
Ansonia Brass & Copper Co., 19 and 21 Cliff, N. Y.
Bridgeport Brass Co., 19 Murray, N. Y.
Randolph & Clowes, Waterbury, Conn.

Tubes, Steel.
Leng, John S., 4 Fletcher, N. Y.
Spiral Weld Tube Co., 5 & 7 Beekman St., New York.

Tumbling Barrels.
Henderson Bros., Waterbury, Conn.

Turnbuckles.
Anthony & McElroy, Philadelphia, Pa.
Carnegie, Phipps & Co., Ld., Pittsburgh, Pa.
Cleveland City Forge and Iron Co., Cleveland, O.
Merrill Bros., Brooklyn, E. D.

Typewriters.
Smith-Premier Typewriter Co., Syracuse, N. Y.

Twist Drills, *Makers of.*
Cleveland Twist Drill Co., Cleveland.
Morse Twist Drill & Machine Co., New Bedford, Mass.
Standard Tool Co., Cleveland.

Valves, Gas, Water and Steam.
Chapman Valve Mfg. Co., Boston.
Jenkins Bros., 71 John, N. Y.
Leng, John S., 4 Fletcher, N. Y.
Ludlow Valve Mfg. Co., Troy, N. Y.
Lunkenheimer Brass Mfg. Co., Cincinnati, Ohio.
McNab & Harlin Mfg. Co., 56 John N. Y.
Mason Regulator Co., Boston, Mass.

Ventilator Appliances.
Colby Hdw. & Electric Co., Chicago, Ill
Howard & Morse, 45 Fulton, N. Y.

Vises.
Howard Iron Works, Buffalo, N. Y.
Prentiss Vise Co., 23 Dey, N. Y.
Tower & Lyon, 95 Chambers, N. Y.

Wagon Jacks.
Boston & Lockport Block Co., Boston Mass., and Lockport, N. Y.
Covert, E. Mfg. Co., Farmer Village, N.Y.
Higganum Mfg. Corp., Higganum, Conn

Washers.
Mason Iron Co., Philadelphia, Pa.
Milton Mfg. Co., Milton, Pa.

Washing Machines.
Wayne, Anthony Mfg. Co., Ft. Wayne, Ind.

Water Motors.
Belknap Motor Co., Portland, Me.

Welding Machines.
Thomson Electric Welding Co., Boston

Well Machinery.
American Well Works, Peoria, Ill.

Wheelbarrows.
Lansing Wheelbarrow Co., Lansing, Mich.
McNeil, G. C., Akron, Ohio.

Wheels.
Quincy Metal Wheel Co., Quincy, Ill.

White Lead.
Atlantic White Lead and Linseed Oil Co., 287 Pearl, N. Y.
Lewis, John T. & Bros. Co., Phila.
Southern White Lead Co., St. Louis, Mo.

Window Cord, *Makers of.*
Samson Cordage Works, Boston, Mass.

Wire, *Manufacturers of.*
Ansonia Brass & Copper Co., 19 and 21 Cliff, N. Y.
Cary & Moen, 234 W. 29th, N. Y.
Emmons, F. R. & Bro., 21 Warren, N. Y.
Fuller Bros. & Co., 139 Greenwich, N. Y.
Gautier Steel Department of Cambria Iron Co., Johnstown, Pa.
Salem Wire Nail Co., Salem, O.
Trenton Iron Co., Trenton, N. J.
Washburn & Moen Mfg. Co., Worcester
Wetherell Bros., 93 Liberty St., N. Y.
Wolff, R. H. & Co., Ltd., 118th St. and Harlem River, N. Y.
Worcester Wire Co., Worcester, Mass.

Wire Cloth.
Barnum, E. T., Detroit, Mich.
Clinton Wire Cloth Co., Clinton, Mass.
Darby, Edward & Sons, Philadelphia.
Estey, W. S., 71 Fulton, N. Y.
Gilbert & Bennett Mfg. Co., 42 Cliff N. Y.
Howard & Morse, 45 Fulton, N. Y.
Wickwire Bros., Cortland, N. Y.
W. S. Tyler Wire Works Co., Clev'd.
Wright & Colton Wire Cloth Co., Worcester, Mass.

Wire Cutters.
Higganum Mfg. Corp., Higganum, Conn
King, J. M. & Co., Watertown, N. Y.

Wire Door Mats.
Hartman Mfg. Co., Beaver Falls, Pa.
The Wire Goods Co., Worcester, Mass.

Wire Fences.
Gilbert & Bennett Mfg. Co., 42 Cliff
Wright & Colton Wire Cloth Co., Worcester, Mass.

Wire Goods, *Manufacturers of.*
Darby, Edward & Sons, Phila.
Gilbert & Bennett Mfg. Co., N. Y.
Hollow Cable Mfg. Co., Hornellsville.
E. Jenckes Mfg. Co., Pawtucket, R. I.
Ludlow-Saylor Wire Co., St. Louis.
Whitman & Barnes Mfg. Co., Syracuse, N. Y.
Wire Goods Co., Worcester.
Wickwire Bros, Cortland, N. Y.

Wire Machinery.
Adt, John & Son, New Haven, Conn.
Collins-Goodin Mfg. Co., St. Louis, Mo.
Manville, E. J. Mch. Co., Waterbury, Ct

Wire Nail and Tack Machines.
Eckstein, Chas. G. & Co., 32 Liberty,
Sweetser, W. A. Brockton, Mass.

Wire Nails.
American Tack Co., Fairhaven.
Braddock Wire Co., Pittsburgh, Pa.
Dunbar, Hobart & Co., 39 Warren, N. Y.
Field, A. & Sons, Taunton, Mass.
Phillips, E. & Sons, South Hanover.
Phillips, Townsend & Co., Phil., Pa.
Plymouth Mills, Plymouth, Mass.
Salem Wire Nail Co., Salem, O.
St. Louis Wire Mill Co., St. Louis, Mo.
Thompson, Richard Co., Ltd., 105 Chambers, N. Y.
Trufant, W. E., Whitman, Mass.
Whitney, A. R. & Co., New York City.
Wire Goods Co., Worcester.

Wire Rods, Steel.
Illinois Steel Co., Chicago, Ill.
New Castle Steel Co., New Castle, Pa.
Whitney, A. R. & Co., 17 B'way, N. Y.

Wire Rope, Iron and Steel *Makers.*
Broderick & Bascom, St. Louis, Mo.
California Wire Works, San Francisco
Hazard Mfg. Co., Wilkesbarre, Pa.
A. Leschen & Sons Rope Co., St. Louis
Washburn & Moen Mfg. Co., Worcester, Mass.
Williamsport Wire Rope Co., Williamsport, Pa.

Wire, Spool.
Frazer, Russell, 79 Centre, N. Y.
Tate & Co., Malden, Mass.

Woodenware.
Tucker & Dorsey Mfg. Co., Indianapolis, Ind.

Wood-Working Machinery.
Egan Co., Cincinnati, O.
Seneca Falls Mfg. Co., Seneca Falls N. Y.

Wrenches, *Manufacturers of.*
Bemis & Call Hardware & Tool Co. Springfield Mass.
Billings, Spencer & Co., Hartford, Conn.
Capitol Mfg. Co., Chicago, Ills.
Coes Wrench Co., Worcester, Mass.
Graham, Bailey & Co., Buffalo, N. Y.
Trimont Mfg. Co., Roxbury, Mass.
Williams, J. H., Brooklyn, N. Y.

Wringers.
Foos, G. S. Company, Springfield, O.
Stone Mfg. Co., Columbus, Ohio.

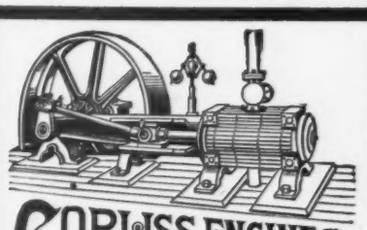
STANLEY'S PATENT Roofing Bracket.

STANLEY

Rule & Level Co.

New Britain, Conn.



SOLD BY ALL HARDWARE DEALERS.

The parts are of Spring Steel, firmly riveted together. Push the beveled ends up under two layers of shingles, already nailed down; the Bracket has two separate bearings on the roof, and is so formed that any increase of pressure from above, increases its stability.

One dozen per minute can be placed in position, or removed; and great economy in lumber and nails will be found. There are no loose parts to get lost; and no nail-holes are made in the roof. In constant use these Brackets will last a life-time.

No. 1. Roofing Brackets, 8 inch, ½ dozen in box. Per Doz., $3.00

—MANUFACTURERS OF—

IRON AND STEEL WIRE

of every description, plain, galvanized, tinned and lead-coated; spiral ribbon fence wire; steel wire ties for baling hay, straw, rags, excelsior, &c., &c., &c.

IRON AND STEEL WIRE ROPE

for all purposes, including cables of the best quality and of any desired length for street cable roads. The attention of all users of wire rope is specially called to the Trenton Iron Co.'s

Patent Locked Wire Ropes

which are far superior to any other in tensile strength and durability; from the fact that the wires in these ropes are interlocked, "unstranding" or projection of broken wires is impossible, and consequently a smooth surface only is constantly presented to the sheave or drum, causing these latter to last indefinitely. One of these locked wire ropes working under ordinary conditions will outwear two or three ropes of the ordinary style. The Trenton Iron Co. also call attention to their

Patent Wire Rope Tramways (Bleichert system)

also their hoisting and conveying plants for quarries, open cut mines, docks and contractor's work. Haulage and transmission of power by wire ropes a specialty. Surveys made and plans furnished at moderate rates by competent engineers.

The Metallurgy of Steel.

BY

HENRY M. HOWE.

Price, - - - - *$10.00*

This work is the most notable contribution to the literature of iron and steel metallurgy ever published. This series of papers on the subject have, during the past two years, attracted world-wide attention and have received the heartiest commendation from all quarters. The volume now published presents this material in much more convenient shape, with considerable additional matter, giving the results of the most recent research, experiment and practice. Also presenting a complete review of all important conclusions reached by earlier investigators. Every statement and citation has been carefully weighed and verified, and the references to the literature of the subject are given minutely, the book thus furnishing in itself a key to the whole range of steel metallurgy. It also furnishes the results of much new and original investigation, specially undertaken for the present work. Every metallurgist, every manufacturer of steel in any form, and all who are interested in the iron or steel industries, and all engineers who use iron or steel should have this standard work and cannot afford to be without it.

TABLE OF CONTENTS:

Chapter I.—Classification and Constitution of Steel.
Chapter II.—Carbon and Iron, Hardening, Tempering and Annealing.
Chapter III.—Iron and Silicon.
Chapter IV.—Iron and Manganese.
Chapter V.—Iron and Sulphur.
Chapter VI.—Iron and Phosphorus.
Chapter VII.—Chromium, Tungsten, Copper.
Chapter VIII.—The metals occurring but sparingly in iron.
Chapter IX.—Iron and Oxygen.
Chapter X.—Nitrogen, Hydrogen, Carbonic Oxide.
Chapter XI.—The Absorption and Escape of Gas from Iron.
Chapter XII.—The Prevention of Blowholes and Pipes.
Chapter XIII.—Structure and related subjects.
Chapter XIV.—Cold Working, Hot Working, Welding.
Chapter XV.—Direct Processes.
Chapter XVI.—Charcoal-Hearth Processes.
Chapter XVII.—The Crucible Steel Process.
Chapter XVIII.—Apparatus for the Bessemer Process.
Appendix I.—Special Steels.
Appendix II.—Anti-Rust Coatings.
Appendix III.—Lead Quenching.

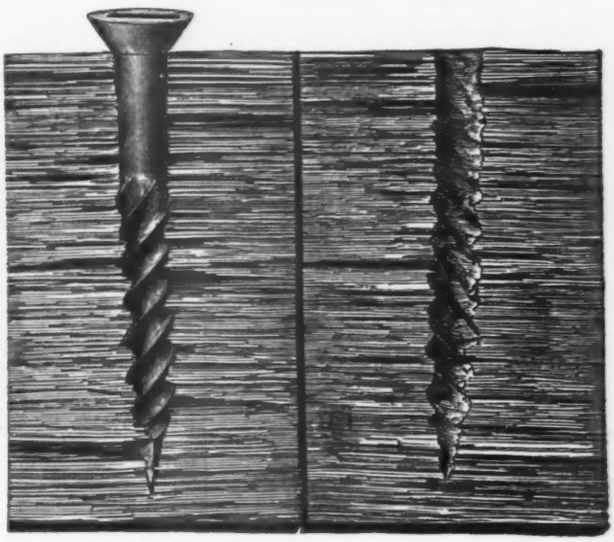
AMERICAN SCREW COMPANY



PROVIDENCE, R. I.

Chicago Store, No. 19 Lake St. EUROPEAN AGENTS, THOMAS & STIRLING, Liverpool.

"ROGERS' DRIVE SCREWS."

Patented May 10, 1887; July 19, 1887; July 10, 1888. Other patents pending.

A common cut thread screw as ordinarily inserted—*i.e.*, driven two-thirds of its length with a hammer and the balance with a screw driver. Fibres of the wood are necessarily broken, and holding power of screw much impaired.

The "ROGERS' DRIVE SCREW" driven with a hammer its entire length. It revolves as it goes in and does not break the fibres of the wood, but makes its own nut of the cavity it forms.

The foregoing illustrations speak for themselves, but we call attention to a few advantages of the "ROGERS' DRIVE SCREWS."

1. Stiffness, adapted for driving with a hammer.
2. Rapidity of insertion.
3. Increased holding surface.
4. Ability to be driven with hammer and withdrawn with Screw Driver numerous times from same hole.
5. Superior Head, which will withstand blows of a hammer and not impair the slot.
6. Improved Slot, admitting the use of a heavier Screw Driver.
7. A "ROGERS' DRIVE SCREW" of small diameter will hold as much as a common screw of larger diameter.

List prices, same as common iron wood screws. Discount for Flat Heads, 66⅔%.

DESCRIPTIVE CATALOGUE ON APPLICATION TO

THE WELLS RUSTLESS IRON CO.,

Little Ferry, N. J. 52 John St., New York.

SOFT STEEL PLATES.

We are making a specialty of soft steel plates for Blanking and Stamping, with clean, smooth surface, rolled carefully as to gauges, ranging from No. 9 to 16 inclusive, in widths up to 15½ inches, and to any multiples of length desired.

We can also furnish plates freed from scale and so treated as not to rust readily before using.

By the use of these, instead of raw plates in Stamping, the great saving of wear on costly dies and increased production of better work will more than cover the increase of cost over that of raw plates. Trial orders solicited in small or large quantities.

J. G. SPEIDEL,

READING, PA.,

Patentee and Manufacturer of the celebrated

Economic Safety Hoist.

One man can lift two to three times as fast as with any other self-holding chain hoist. Spur gearing in connection with the automatic brake holds the load at any place, reducing friction to a minimum. The hoist has two speeds, is built strong and durable and guaranteed to give satisfaction. Cheaper than any other reliable hoist.

Overhead Tramways and Portable Derricks. Hand Power Elevators.

Send for illustrated catalogue. Agents wanted.

IMPROVED

Patent Portable Hatchway and Outrigger

Rope Hoists

Quick Lifting, Quick Lowering, Elevator and Dumb Waiter Gearings, etc.

A large number are in use and endorsed by leading railroads, machinists, Contractors, etc.

ONE OF MANY.

GENTLEMEN — The six portable Rope Hoists purchased from you last Fall I have in constant use, and find them very useful. They paid for themselves in one building operation. I have no hesitancy in saying that your Hoist is a very useful device for builders and others having long or short lifting. Yours respectfully,

THOMAS BENNETT,
Philadelphia, Mar. 5, '90. Contractor and Builder.

Fluor-Spar.

MULLINS'

Fluor-Spar and Lead Mining Co.,

220 First National Bank Building

CHICAGO, ILL.

This Company owns, at Mineral City, on the Ohio River, the largest Mines of Fluor-Spar ever discovered.

We are working a large force of miners; our new mills and tram railway are running, and we are now prepared to furnish the purest Fluor-Spar in any quantities to Iron and Steel Manufacturers, to Smelters of Gold, Silver and Copper, and to Paint, Paper and Glass Makers.

Fluor-Spar is pronounced the most powerful of fluxes; it facilitates the reduction of the most refractory materials. For Alkalies, Clays, and all Metallic Oxides it has a remarkable solvent power; it reduces the melting point, and saves fuel; it diminishes the loss of metal, saves labor, and keeps the cupola clean; reacts strongly upon scaffolds and cloggings.

One part of Fluor-Spar is more effective than ten parts of Limestone. Limestone is an enemy to iron; Fluor-Spar is a friend.

Directions for the proper use of Fluor-Spar given our patrons.

We ship Lump, Gravel, Crushed and Ground, in bulk or barrel.

SPECIAL NOTICE TO CONSUMERS OF CHARCOAL IRON.

Wyebrooke Charcoal Pig Iron, strictly cold blast.
Has splendid chilling qualities and great strength.
Furnace now in blast and orders can be filled promptly.

This book is mainly a reprint of a series of articles which appeared in THE ELECTRICIAN, under the title of "Letters for Learners and Unprofessional Readers." 8vo, cloth.....$2.50

Aspects of the Earth. The general reader unacquainted with natural science will find here an interesting and graphic account of those phenomena of the earth's surface—earthquakes, cyclones, volcanoes, rivers, forests, caverns &c. By Prof. N. S. SHALER. With 100 illustrations 8vo.....$4.00

Electric Transmission of Energy, and its transformation, subdivision, and distribution. A practical handbook. By G. KAPP. Second edition. 348 pages, with 124 illustrations. 8vo, cloth.....$3.00

Derivation of Practical Electrical Units. With 12 illustrations. Being a reprint of articles published in the *Western Electrician*. By LT. F. B. BADT and Prof. H. S. CARHART. 56 pages with 12 portraits. 12mo, cloth.....$0.75

The Disposal of Household Wastes. The best methods of treatment of the sewage of farmhouses, isolated country houses, suburban dwellings, houses in villages and smaller towns, and of larger institutions, such as hospitals, asylums, hotels, prisons, colleges, &c., and of the modes of removal and disposal of garbage, ashes and other solid house refuse. By W. PAUL GERHARD. Boards.....$0.50

Gibb's Route and Reference Book of the United States and Canada. With maps. For the use of Commercial Travelers, Merchants and others; containing the names and population of the principal towns, with the most direct routes for reaching same, where connections can be made, distances between town and town, railroad fares, hotels, &c.; also alphabetical tables, containing the leading businesses and the number of firms engaged in same in each town. Bound in flexible leather. Price.....$3.00

Earthwork Slips and Subsidencies upon Public Works: their causes, prevention and reparation. Especially written to assist those engaged in the construction or maintenance of railways, docks, canals, roads, waterworks, river-banks, reclamation embankments, drainage works, etc. By JOHN NEWMAN. 234 pages, 12mo, cloth.....$3.00

Sent, postpaid, on receipt of price, by

Address
BOX 43, Pittsburg, Kansas.

FOR SALE.

In West Chelmsford, Mass., all the Real Estate and Machinery formerly owned by the Hiscox File Co.; the real estate consisting of about 7 acres of land, together with the buildings and water power, and the machinery, being such as was used by them in the manufacture of files, machine knives, sword blades and edge tools. There is also on the premises a good 75 horse-power Harris-Corliss engine and good boiler, also a large amount of shafting, belting and supplies. This property is situated about five miles from Lowell, and is very easy of access by railway, with excellent facilities. The entire property will be sold very cheap, either as a whole or in part, and will afford some party an excellent chance to enter into this business. For terms, &c., inquire of

J. W. BENNETT, Lowell, Mass., or
F. G. SARGENT, Graniteville, Mass.

WANTED.

A good second-hand Boring Mill, to swing about 50 inches; also lathe of same swing with very short bed. Address, with particulars,

"BOX 717,"

office of *The Iron Age*, 66 and 68 Duane St., N. Y.

STATE OF WASHINGTON.

For sale, a half interest in a General Mill and Engineers' Supply Store in the future metropolis of the Pacific Coast. Present owners have other business to attend to and want a managing Partner. Only those who thoroughly understand business methods in general, and this in particular, need apply in person, with references, to
THE EATON, COLE & BURNHAM CO.,
82 & 84 Fulton St., New York.

Iron Bridge M'f'r's.

The demand in the South for Iron Bridges and buildings is now very large and growing. A Bridge and Structural Iron Works in the South would have an abundance of orders and pay large dividends from the start, if it was located accessible to coal, on competing lines of R. R., and where material of good quality could be readily secured. Buchanan, Va., presents all of these advantages. It is on two trunk lines of R. R., with two more located; it is in the midst of the great iron and coal fields of the Virginias, and the Central Land Co., of Buchanan not only offers free sites but financial aid from its large cash development fund ($400,000). This is a rare opportunity to a pushing, energetic Bridge Builder. Buchanan also seeks associate industries on similar terms. Address CENTRAL LAND CO. of Buchanan, Buchanan, Va.

FOR SALE.

The well-established business, known as THE GAYLORD, CROSS & SPEIRS CO., located in Waterbury, Conn., is offered for sale. This plant is on the corner of Benedict and Meadow Sts.; consisting of land, brick and frame buildings, &c.; the foundry and all machinery goes with sale; there is between $10,000 and $12,000 worth of machinery that goes with the business. The lot fronts on two streets, 164 feet on Meadow and 219½ feet on Benedict Sts.; there is ample room for another large machine shop or any kind of manufacturing business without being cramped for room; this plant is only two minutes' walk from depot. The reason why this valuable property is put in the market at the price asked is because the owner is West and cannot give the attention that it requires. Take the business in consideration, both in foundry and machine work, it is a rare opportunity that does not occur every day, where one can buy an established business for the low figure, $45,000. The land and buildings alone are worth the price I ask, without the machinery. Address
L. J. BOWEN, Receiver,
Waterbury, Conn.

COAL at **50 cents per ton for twenty years; $1,000,000 cash,** and desirable location, with railway facilities, at **$100 PER ACRE,** worth $500, as special inducements to encourage new manufacturing industries

MEANS that **PITTSBURG, Kansas,** with its unequaled railway connections, is the best point on this continent for the establishing of smelting works, foundries and machine shops and any kind of manufacturing industry consuming coal and looking to the U. S. and Mexico for a market; guaranteeing

PROSPERITY to every dollar invested and every man employed. Gas, 75 cents per thousand. Taxes 3 per cent. on a 30 per cent. valuation; four trunk railways; $7,000,000 invested in industrial enterprises, best of free schools, property cheap. **Now is the time to invest. Come and investigate.** Write for information and Maps. **TO PITTSBURG**

PITTSBURG TOWN CO.,
Pittsburg, Kan. A. W. GIFFORD, General Agent.

FOR $25,000

I will sell a very profitable Manufacturing Plant, all running in good shape; goods sold as fast as produced; poor health the only motive for selling; experience not essentially necessary, as all work is produced by the piece; margin of profit very large. Running 15 years without a stop. This is an extraordinary chance for an energetic young man. Address
"MANUFACTURING PLANT,"
office of *The Iron Age*, 66 and 68 Duane st., N. Y

WANTED.

Hardware Specialties to manufacture in Iron Brass, Bronze, Sheet Steel or Malleable Iron.
THE PERKINS LOCK MFG. CO.,
Cleveland, Ohio.

A. J. FREDERICK,
Carey, Ohio.

A MANUFACTURING COMPANY,

who will have from $75,000 to $100,000 paid up capital, wish to enlarge their works and will seek new location where good railroad facilities and cheap fuel can be obtained; offers of grounds and buildings, with expense of moving will be considered.

Address
HENRY SMITH, Manager,
office of *The Iron Age*, cor. 4th and Main Sts, Cincinnati, O.

OLD METAL WANTED.

Heavy Brass, Copper and Brass Turnings; state quantity and price for spot cash.

E. A. WILLIAMS & SON,
107 Plymouth St., - - Jersey City, N. J.

A RARE CHANCE.

A first-class Hardware Store and Stock for sale, in Northwestern part of New York State, in a good thriving town of 5000 inhabitants; stock consists of Hardware, Stoves, Tin and Kitchen-furnishing Goods; stock would be sold and store rented if desired; can do $35,000 to $40,000 per year with a good profit; stock is all clean and will invoice about $10,000; good reason given for selling. Address "No. 10," office of *The Iron Age*, 66 and 68 Duane St., N. Y.

FOR SALE.

Rare Opportunity.

Best Hardware business in a thriving Ohio city of 20,000 inhabitants; stock, $25,000 to $30,000; annual sales, $80,000 to $90,000, with good profits; no hand stock; open until Jan. 1, 1891.

Address "BEST,"
office of *The Iron Age*, 66 and 68 Duane St., N.Y.

FOR SALE AT ST. PAUL.

The well-known Hardware Business of B. F. Knauft & Co., doing a General and Builders' Hardware, Furnace, Stove, Tin and House-furnishing Hardware business; established in present location in 1872; has the confidence of the people and enjoys a large trade. We own the building we occupy and can give favorable lease; good reason for selling. Splendid opportunity for parties with push and ability. Address
B. F. KNAUFT,
338 and 342 E. 7th St., St. Paul, Minn.

For Sale.

A good, clean stock of Hardware, Stoves and Tinware, with Tin Shop connected, located in the prosperous City of Charlotte, Mich.; stock and fixtures will invoice about $7000; business has been established about 20 years; reasons for selling, one of the partners wishes to engage in other business. For further particulars, address
LOCK BOX 368, Charlotte, Mich.

FOR SALE.

A new specialty manufacturing business; last year's business $6,000; this year's business $25,000, and a prospect of nearly double next year; good reasons for selling; price $13,500; goods can be manufactured anywhere. Address
"SPECIALTY" Box 818,
office of *The Iron Age*, 66 and 68 Duane St., N. Y.

FACTORY FOR SALE.

A commodious and well-built brick Shop, 40 ft. x 120 ft., two stories high, with first floor clear of posts; engine and boiler house attached, fitted with shafting, heating apparatus, &c.; with additional lot 55 ft. x 140 ft. connected, all for sale at a low price; reason for selling, new shop twice the capacity being built. Terms and prices can be obtained by referring to
THE NATIONAL PIPE BENDING CO.,
New Haven, Conn.

TO MANUFACTURERS.

Long experience makes it quite possible for me to find "out-of-the-way" markets for any line that manufacturers prefer to sell at reduced prices rather than create friction with their regular customers, viz.: seconds, off sizes, overstocks, old styles, etc. Send memorandum with quantities and lowest cash figures.
W. M. CALDWELL, agent for the sale of special lots, 75 Chambers St., New York.

FOR SALE.

An old-established Wholesale General Hardware Business, located at Burlington, Iowa. Has the advantages of both rail and water communications, and one of the best distributing points on the Upper Mississippi River; good trade already established and am to-day doing a good business; stock on hand about $70,000; have five salesmen on the road; do business in Western Illinois, Northern Missouri, Eastern Nebraska, Southern Dakota and Minnesota and a large portion of Iowa.

The largest portion of my trade comes from Iowa. The territory can be extended and trade increased if desired. This is a rare opportunity for any one wishing to step into a good business already thoroughly established. Reason for wishing to sell out—poor health. For any information desired pertaining to the business and location, I would refer you to Ross & Fuller, 33 Chambers St., N. Y.; Clement M. Biddle & Co., Philadelphia; the National State Bank of Burlington, Iowa, or the undersigned

LYMAN H. DRAKE.

SOUTHERN CALIFORNIA.

CLIMATIC PARADISE OF THE U. S.
No Snow. No Cyclone.

A Store For Sale.

Good will and stock of about $4,000 in Hardware' Crockery and House Furnishing goods. Price of the two-story brick building (21 x 48 feet), garden and yard (together 12,131 square feet) $7,000. The city of Anaheim (population 1,500), the oldest settlement of Southern California, is surrounded by an extensive farming country, has the finest drinking water and has for healthfulness no rival on the coast. It is situated about 26 miles southeast of Los Angeles and 14 miles from the Pacific Ocean. The store lies between the Southern Pacific and Santa Fé Railroad depots. Address: Charles Pamperl, Anaheim, Orange County, California.

WE HAVE FOR RENT one of the most extensive manufacturing properities on the Hudson, within 13 miles of Grand Central Depot, unsurpassed for its railroad and dock facilities; with engine, boiler and other machinery; manufacturers looking for such a property will do well to give this consideration; send for diagram and description.
WILLIAM H. HOYT & CO.,
5 Vanderbilt Ave., opposite Grand Central Depot, New York.
